STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1890 by Thomas Trebeil, this two-story, two-bay Queen Anne-style single dwelling has Italianate influences and was constructed from permit #0570. The dwelling is constructed of seven-course American-bond brick and is set on a solid, raised concrete foundation. The façade (west elevation) is faced with pressed stretcher-bond brick. A four-course brick watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A metal ogee-molded cornice complements a molded brick course and a corbeled brick table. Multiple stringcourses, composed of two courses of brick, span the façade. The southernmost bay of the first story holds a single-leaf, replacement paneled wood door with lights, a one-light wood transom, and a three-light wood side-light. A soldier brick segmental arch with brick pearl cap tops the transom. Concrete steps with metal railings provide access to the concrete stoop and door. The stoop is supported by a brick pier and has a turned metal balustrade. The second story window opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay with molded brick chamfered corners rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block. All window openings on the bay, except the foundation, hold paired 1/1, double-hung, vinyl-sash windows. All openings on the façade are highlighted by concrete-lug sills and soldier brick segmental arches with brick pearl caps. The foundation is pierced by two 1/1, double-hung, wood-sash windows with rowlock brick segmental arches. A single-leaf paneled metal door with lights pierces the foundation in the southern end bay and provides access to a basement unit. The side (north) elevation is fenestrated with 1/1, 2/2, and 6/6 double-hung, wood-sash windows. Window openings are highlighted by concrete-lug sills and two-course rowlock brick segmental arches.

A two-story ell extends from the southernmost bay of the rear elevation and is original. The ell is constructed of brick and is set on a solid foundation. Visible fenestration at basement level consists of a single-leaf door and window openings set in two-course rowlock brick segmental arches. A two-story wood porch is set within the ell. It is supported by a square brick pier and wood posts, both with scrolled wood brackets, and has wood and metal balusters. The second story has a sloped roof. The first story openings hold a single-leaf paneled wood door with multiple lights and 2/2, double-hung, wood-sash windows. All are highlighted by two-course rowlock brick segmental arches. The second story is fenestrated by a single-leaf paneled wood door with lights with a lug lintel. A single-leaf wood multi-light door in a segmental opening on the second story and a 2/2, double-hung, wood-sash window in a segmental opening on the first story are located on the rear (east) elevation of the main block. The rear elevation of the ell is fenestrated by a single-leaf door opening on the foundation, a 2/2, double-hung, wood-sash window on the first story, and 6/6, double-hung, wood-sash windows on the second story. The openings are highlighted by two-course rowlock brick segmental arches, and the windows have rowlock brick sills. A brick chimney with parged cap is located in the southeast corner of the ell.

Site Notes:

March 2010: This single dwelling is located on the east side of 7th Street, N.E. at the intersection of 7th and G Streets, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk. A concrete walkway leads from the sidewalk and travels towards the primary entrance and basement entrance. The dwelling is set on a grassy lot bounded by a metal hairpin and picket fence to the north and west. A brick patio is located at the rear (east) of the dwelling, and an asphalt-paved parking lot is located to the south.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse was designed and constructed in 1899 by William Boone Douglass. It is one of five rowhouses constructed from the same permit (#0065). The brick dwelling is set on a solid concrete and brick foundation. The façade (east elevation) is faced with stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with brick corbelling below. A concrete watertable is located above the foundation and brick sill courses travel across the façade beneath the first window openings. An additional molded metal belt course spans the façade below the second story window openings. Decorative brick lintel courses are located above the first- and second-story window openings. The northernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light stained glass transom. The opening is highlighted by a square edge wood surround and a concrete-lug lintel. Brick steps with brick wing walls provide access to the entrance. An opening on the second story holds a 6/9, double-hung, wood-sash window with a concrete-lug lintel. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a steep front-gable roof. The gable is highlighted by a molded metal cornice and sawtooth brick molding. All openings on the bay hold fixed multi-light wood windows or 6/9, double-hung, wood-sash windows with concrete-lug lintels. Openings on the first story have concrete-lug sills as well. The foundation is pierced by a fixed five-light wood window with concrete-lug sill. The rear (west) elevation was not visible from the public right-of-way, although Sanborn Maps indicate that an original two-story ell with sloping roof extends from the southern bay of the rear elevation.

Site Notes:

March 2010: This rowhouse is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 612 and 616 8th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is planted with shrubs and is bordered by a metal hairpin fence. A small yard and garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse was designed and constructed in 1899 by William Boone Douglass. It is one of five rowhouses constructed from the same permit (#0065). The brick dwelling is set on a solid concrete and brick foundation. The façade (east elevation) is faced with stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with brick corbelling below. A concrete watertable is located above the foundation and brick sill courses travel across the façade beneath the first window openings. An additional molded metal belt course spans the façade below the second story window openings. Decorative brick lintel courses are located above the first- and second-story window openings. The northernmost bay of the first story holds a single-leaf paneled door with lights and a one-light stained glass transom. The opening is highlighted by a single-light sidelight and a concrete-lug lintel. Brick steps with brick wing walls provide access to the entrance. An opening on the second story holds a 6/9, double-hung, wood-sash window with a concrete-lug lintel. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a steep front-gable roof. The gable is highlighted by a molded metal cornice and sawtooth brick molding. All openings on the bay hold fixed multi-light wood windows or 6/9, double-hung, wood-sash windows with concrete-lug lintels. Openings on the first story have concrete-lug sills as well. The foundation is pierced by a fixed five-light wood window with concrete-lug sill. The rear (west) elevation was not fully visible from the public right-of-way, although Sanborn Maps indicate that an original two-story ell with sloping roof extends from the southern bay of the rear elevation. A two-story appendage, most likely an original two-story sleeping porch, projects from the west elevation of the ell. The first story has been enclosed with wood-frame mesh screening and wood lattice. The second story, supported by square brick posts, has been faced with horizontal vinyl German siding. A two-light vinyl window is located on the second story.

Site Notes:

March 2010: This rowhouse is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 616 and 620 8th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is planted with immature shrubs and trees and is bordered by brick retaining wall. A small yard and garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse was designed and constructed in 1899 by William Boone Douglass. It is one of five rowhouses constructed from the same permit (#0065). The brick dwelling is set on a solid concrete and brick foundation. The façade (east elevation) is faced with stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with brick corbelling below. A concrete waterable is located above the foundation and brick sill courses travel across the façade beneath the first window openings. An additional molded metal belt course spans the façade below the second story window openings. Decorative brick lintel courses are located above the first- and second-story window openings. The northernmost bay of the first story holds a single-leaf metal door with a leaded glass inset and a one-light transom. The opening is highlighted by a concrete-lug lintel. Brick steps with brick wing walls provide access to the entrance. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a steep front-gable roof. The gable is highlighted by a molded metal cornice and sawtooth brick molding. All openings on the façade hold fixed single or paired 1/1, double-hung, vinyl-sash windows with concrete-lug lintels. Openings on the first story have concrete-lug sills as well. The foundation is pierced by paired single-light fixed windows with concrete-lug sills.

An original two-story ell extends from the rear (west) elevation. A two-story, two-bay addition extends from the ell and sits on a solid concrete-block foundation. The wood-frame addition is faced with vinyl German siding and is capped by a sloping roof with overhanging eave. A one-leaf paneled metal door with semicircle light is located in the southern end bay and is accessible via wooden steps with metal hand rails. The addition is fenestrated with 1/1, double-hung, vinyl-sash windows. The second-story opening is highlighted by a semi-circular single-light vinyl transom.

Site Notes:

March 2010: This rowhouse is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 616 and 620 8th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is planted with a mature tree and small foundation plantings and is bordered by concrete retaining wall. A small yard enclosed by a metal chain-link fence is located (west) of the dwelling. A brick alley is also located to the west of the property.

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse was designed and constructed in 1899 by William Boone Douglass. It is one of five rowhouses constructed from the same permit (#0065). The brick dwelling is set on a solid concrete and brick foundation. The façade (east elevation) is faced with stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with brick corbelling below. A concrete watertable is located above the foundation and brick sill courses travel across the façade beneath the first window openings. An additional molded metal belt course spans the façade below the second story window openings. Decorative brick lintel courses are located above the first- and second-story window openings. The northernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light transom. The opening is highlighted by a single-light sidelight and a concrete-lug lintel. Concrete steps with brick wing walls provide access to the entrance. An opening on the second story holds a 9/9, double-hung window (materials not discernible) with a concrete-lug lintel. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a steep front-gable roof. The gable is highlighted by a molded metal cornice and sawtooth brick molding. All openings on the bay hold fixed multi-light wood windows or 9/9, double-hung windows (materials not discernible) with concrete-lug lintels. The foundation is pierced by a two-light sliding vinyl window with concrete-lug sill.

An original two-story ell extends from the rear (west) elevation. A two-story, two-bay addition extends from the ell and sits on a solid concrete-block foundation. The wood-frame addition is faced with horizontal aluminum siding and is capped by a sloping roof. A single-leaf paneled metal door with semicircle light is located in the northern end bay. A wood deck with square wood balusters spans the elevation and has wooden steps with wood hand rails that provide access to the entry. The addition is fenestrated with 1/1, double-hung, vinyl-sash windows.

Site Notes:

March 2010: This rowhouse is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 620 and 624 8th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is planted with immature shrubs and trees and is bordered by stone retaining wall and metal picket fence. A small yard bordered by a wood fence is located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Designed and constructed by George S. Cooper in 1891, this two-story, two-bay Queen Anne-style dwelling is one of two twin dwellings constructed from permit #0652. The dwelling is constructed of brick and is set on a solid, raised brick foundation that has been faced with rusticated concrete. A rusticated concrete belt course spans the façade (west elevation) on the first and second stories. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A false mansard roof runs along the façade and is clad with asphalt shingles. The mansard is complemented by an ogee-molded metal cornice with pressed brick and brick dentils below. A molded string course runs below a plain brick frieze. The southernmost bay of the first story holds a single-leaf metal French door. The door opening is highlighted by a semicircular one-light transom set in a semicircular soldier brick arch with rusticated concrete keystone. Concrete steps with metal railings provide access to the door. The second story window opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and is capped by a pyramidal roof with asphalt shingles. All window openings on the bay, except the foundation, hold fixed vinyl windows. All openings on the façade are highlighted by rusticated concrete-lug sills and brick segmental arches. The foundation of the bay is pierced by a single-leaf paneled metal door and a 1/1, double-hung, wood-sash window with a rowlock brick sill.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell, which has been parged, is constructed of brick and is set on a solid foundation. The rear of the ell is fenestrated with 1/1, double-hung, vinyl-sash windows set in segmental openings with rowlock brick sills. The first story of the ell is fenestrated by a single-leaf door in the southernmost bay.

Site Notes:

March 2010: This attached single dwelling is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and is adjacent to 633 and 637 7th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary entrance. A brick patio at the front of the dwelling is enclosed by a metal milled point fence, and a brick wall divides the patio from the steps leading down to the basement entrance. A concrete-paved parking area is located at the rear (east) of the dwelling and is enclosed by a staggered wood fence. The parking area is accessible from the brick alley at the rear by a single-leaf metal roll-up garage door.

Exterior & Architectural Notes:

March 2010: Designed and constructed by George S. Cooper in 1891, this two-story, two-bay Queen Anne-style dwelling is one of two twin dwellings constructed from permit #0652. The dwelling is constructed of brick and is set on a solid, raised brick foundation that has been faced with rusticated concrete. A rusticated concrete belt course spans the façade (west elevation) on the first and second stories. A sloping roof caps the dwelling and an interior brick chimney with parged cap pierces the roof. A false mansard roof runs along the façade and is clad with slate shingles. The mansard is complemented by an ogee-molded metal cornice with pressed brick and brick dentils below. A molded string course runs below a plain brick frieze. The southernmost bay of the first story holds a single-leaf flush wood door with one light. The door opening is highlighted by a semicircular soldier brick arch with rusticated concrete keystone and a self-supporting metal awning. Concrete steps with metal railings provide access to the door. The second story window opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and is capped by a pyramidal roof with slate shingles and a metal finial. All window openings on the bay, except the foundation, hold 1/1, double-hung, vinyl-sash windows. All openings on the façade are highlighted by rusticated concrete-lug sills and brick segmental arches. The foundation of the bay is pierced by two vinyl sliding windows. The north (side) elevation has been parged.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell, which has been parged, is constructed of brick and is set on a solid foundation. The main block is fenestrated with an opening at basement level (not visible) and 1/1, double-hung, vinyl-sash windows with concrete-lug sills in segmental openings on the first and second stories. The rear of the ell is also fenestrated in the same manner. A one-story, one-bay porch extends from the ell and is supported by square brick piers. A metal awning shelters the porch and is supported by circular metal posts. The first story of the ell is fenestrated by a single-leaf paneled door with lights. An interior brick chimney with parged cap is located on the north side of the ell.

Site Notes:

March 2010: This semi-detached single dwelling is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and the south (side) elevation is adjacent to 635 7th Street. A concrete walkway leads from the sidewalk and travels towards the primary entrance. A concrete-paved patio to the west of the dwelling is enclosed by a brick and metal milled point fence. A small grassy yard and concrete-paved driveway are located at the rear (east) of the dwelling and are enclosed by a metal chain link fence. A brick alley is also located to the rear of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Romanesque influences was constructed in 1891. Built by Wright and Stockett, this rowhouse is one of six constructed from the same permit (#0852). The brick dwelling is set on a raised, solid brick foundation and is faced with pressed brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice and a corbeled brick cornice below. Additional string courses, composed of molded brick, and panels of dogtooth brick span the façade beneath a brick frieze. A molded brick watertable is located above the foundation, and brick sill courses travel across the façade beneath the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf paneled wood door. Steps from the front yard provide access to the opening. The westernmost bay of the first story holds a single-leaf paneled wood door with a semicircular one-light transom. The opening is highlighted by a staggered soldier brick semicircular arch and topped by brick nailhead molding. Cast iron stairs with gas pipe hand rails provide access to the primary entrance. The second story opening holds a 1/1, double-hung, wood-sash window with a staggered soldier brick segmental arch with brick nailhead molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a corbeled chamfered corner on the foundation and rounded corners above. It is capped by a segmental pediment that features prismatic nailhead molding. The bay is fenestrated with paired one-light fixed wood windows and 1/1, double-hung, wood-sash windows. The first story opening is highlighted by rusticated brick quoining and a stone lintel. A semicircular panel with prismatic nailhead molding sits atop the lintel. The foundation is pierced by 6/6, double-hung, wood-sash windows with rowlock brick arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. A one-story wood deck projects from the first story of the ell and is supported by square wood posts and has square wood balusters. It is accessible from the yard via wood steps with railings. The foundation level was not fully visible due to obstruction by the rear fence. The first story is fenestrated by a single-leaf door with a one-light transom and a wood-sash window with a rowlock brick segmental arch. The second story openings hold 2/2, double-hung, wood-sash windows with concrete-lug sills and two-course, rowlock brick segmental arches.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. The dwelling is set back approximately five feet from the brick sidewalk and is adjacent to 700 F Street and 704 F Street, N.E. A brick and concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small brick-paved front yard is bordered by a metal milled point fence. A small rear yard is bordered by a staggered wood fence.

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Romanesque influences was constructed in 1891. Built by Wright and Stockett, this rowhouse is one of six constructed from the same permit (#0852). The brick dwelling is set on a raised, solid brick foundation and is faced with pressed brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice and a corbeled brick table below. Additional brick string courses and panels of dogtooth brick span the façade beneath a brick frieze. A molded brick watertable is located above the foundation, and brick sill courses travel across the façade beneath the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf paneled metal door. Steps from the front yard provide access to the opening. The westernmost bay of the first story holds a single-leaf metal storm door with a semicircular one-light transom. The opening is topped by a staggered soldier brick segmental arch capped by brick nailhead molding. An interior vestibule provides access to a single-leaf paneled wood door. Metal stairs with hand rails provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window with a staggered soldier brick segmental arch capped by brick nailhead molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners. It is capped by a brick parapet wall with indented brick molding and molded metal cornice returns. The bay is fenestrated with paired and single 1/1, double-hung, vinyl-sash windows. The first story opening is highlighted by a rusticated brick quoining and a stone lintel. The second story opening has a staggered soldier brick segmental arch capped by nailhead brick molding. A prismatic nailhead panel sits between the first and second story openings on the bay. The foundation is pierced by 1/1, double-hung, vinyl-sash windows with rowlock brick segmental arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. A one-story metal deck projects from the first story of the ell and has metal balusters. It is accessible from the yard via metal steps with railings. The foundation level was not visible due to obstruction by rear fences. The first story is fenestrated by a single-leaf door with a one-light transom highlighted by a rowlock brick segmental arch. All other openings hold 1/1, double-hung, vinyl-sash windows with rowlock brick segmental arches.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. The dwelling is set back approximately five feet from the brick sidewalk and is adjacent to 702 F Street and 706 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small brick-paved front yard is bordered by a metal milled point fence. A small rear yard is bordered by a staggered wood fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Romanesque influences was constructed in 1891. Built by Wright and Stockett, this rowhouse is one of six constructed from the same permit (#0852). The brick dwelling is set on a raised, solid brick foundation and is faced with pressed brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice and a corbeled brick cornice below. Additional brick string courses and panels of dogtooth brick span the façade beneath a brick frieze. A molded brick watertable is located above the foundation, and brick sill courses travel across the façade beneath the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf flush wood door. Steps from the front yard provide access to the opening. The westernmost bay of the first story holds a single-leaf paneled wood door with a blind semicircular one-light transom. The opening is highlighted by a staggered soldier brick segmental arch and topped by brick nailhead molding. Cast iron steps with gas pipe railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window with a staggered soldier brick segmental arch capped by brick nailhead molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a corbeled chamfered corner on the foundation and rounded corners above. It is capped by a gabled pediment that features prismatic nailhead molding. The bay is fenestrated with 1/1, double-hung, round-headed vinyl-sash windows on the first story. These openings are highlighted by concrete-lug sills and staggered soldier brick semicircular arches capped by molded brick. The two openings on the south elevation of the bay share a pointed arch with a prismatic nailhead panel and molded brick cap. Openings on the second story hold 1/1, double-hung, vinyl-sash windows with concrete-lug sill and staggered soldier brick segmental arches capped by brick nailhead molding. The foundation is pierced by 1/1, double-hung, vinyl-sash windows with rowlock brick segmental arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. The foundation level was not visible due to obstruction by the rear fence. The first story is fenestrated by a single-leaf door with a one-light transom highlighted by a rowlock brick segmental arch. Metal steps with railings provide access to the entryway. All other openings hold 1/1, double-hung, vinyl-sash windows with rowlock brick segmental arches.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. The dwelling is set back approximately five feet from the brick sidewalk and is adjacent to 704 F Street and 708 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small front yard is bordered by a metal milled point fence. A small rear yard is bordered by a staggered wood fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Romanesque influences was constructed in 1891. Built by Wright and Stockett, this rowhouse is one of six constructed from the same permit (#0852). The brick dwelling is set on a raised, solid brick foundation and is faced with pressed brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice and a corbeled brick cornice below. Additional brick string courses and panels of dogtooth brick span the façade beneath a brick frieze. A molded brick watertable is located above the foundation, and brick sill courses travel across the façade beneath the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf paneled wood door with lights. Steps from the front yard provide access to the opening. The westernmost bay of the first story holds a single-leaf paneled wood door with lights with a semicircular one-light transom. The opening is highlighted by a staggered soldier brick semicircular arch and topped by brick nailhead molding. Cast iron steps with gas pipe railings provide access to the primary entrance. The second story opening holds a 9/9, double-hung, wood-sash window with a staggered soldier brick segmental arch with brick nailhead molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a corbeled chamfered corner on the foundation and rounded corners above. It is capped by a segmental pediment that features prismatic nailhead molding. The bay is fenestrated with single and paired 9/9, double-hung, wood-sash windows. The first story opening is highlighted by rusticated brick quoining and a stone lintel. A semicircular panel with prismatic nailhead molding sits atop the lintel. Openings on the sides of the bay are highlighted by stone lintels. Second story openings are highlighted by staggered soldier brick segmental arches capped by brick nailhead molding. The foundation is pierced by 4/4, double-hung, wood-sash windows with rowlock brick arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. A one-story wood deck projects from the first story of the ell and is supported by square wood posts and has square wood balusters. It is accessible from the yard via wood steps with railings. The foundation level was not visible due to obstruction by the rear fence. The first story is fenestrated by a recessed single-leaf door with a blind one-light transom and a 4/4 wood-sash window with a rowlock brick segmental arch. The second story openings hold 6/9, double-hung, wood-sash windows with concrete-lug sills and two-course, rowlock brick segmental arches.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. The dwelling is set back approximately five feet from the brick sidewalk and is adjacent to 706 F Street and 710 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small front yard is planted with shrubs and bordered by a metal bow and milled point fence. A small rear yard is bordered by a staggered wood fence.

Architectural Style(s)

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Romanesque influences was constructed in 1891. Built by Wright and Stockett, this rowhouse is one of six constructed from the same permit (#0852). The brick dwelling is set on a raised, solid brick foundation and is faced with pressed brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice and a corbeled brick table below. Additional brick string courses and panels of dogtooth brick span the façade beneath a brick frieze. A molded brick watertable is located above the foundation, and brick sill courses travel across the façade beneath the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf multi-light wood door. Steps from the front yard provide access to the opening. The westernmost bay of the first story holds a paneled wood door with a semicircular one-light transom. The opening is topped by a staggered soldier brick segmental arch capped by brick nailhead molding. Metal stairs with gas pipe railings provide access to the primary entrance. The second story opening holds a fixed two-light window with a staggered soldier brick segmental arch capped by brick nailhead molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners. It is capped by a gabled pediment with indented brick molding and molded metal cornice returns. The bay is fenestrated with paired and single two-light fixed wood windows. The first story opening is highlighted by a rusticated brick quoining and a stone lintel. The second story opening has a staggered soldier brick segmental arch capped by nailhead brick molding. A prismatic nailhead panel sits between the first and second story openings on the bay. The foundation is pierced by 2/2, double-hung, wood-sash windows with rowlock brick segmental arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. A two-story addition with a shed roof (ca. 1950s) is located on the rear ell. This addition has been parged and is fenestrated by single and paired 1/1, double-hung, metal-sash windows. A single-leaf door opening is located on the east elevation of the addition. A metal balcony or fire escape is located within the ell. The rear was only partially visible due to rear fencing.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. The dwelling is set back approximately five feet from the brick sidewalk and is adjacent to 708 F Street and 712 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small brick-paved front yard is bordered by a metal milled point fence. A small rear yard is bordered by a staggered wood fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Romanesque influences was constructed in 1891. Built by Wright and Stockett, this rowhouse is one of six constructed from the same permit (#0852). The brick dwelling is set on a raised, solid brick foundation and is faced with pressed brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice and a corbeled brick cornice below. Additional brick string courses and panels of dogtooth brick span the façade beneath a brick frieze. A molded brick watertable is located above the foundation, and brick sill courses travel across the façade beneath the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf paneled metal door with leaded glass lights. Steps from the front yard provide access to the opening. The westernmost bay of the first story holds a single-leaf paneled metal door with a semicircular one-light transom. The opening is highlighted by a staggered soldier brick segmental arch and topped by brick nailhead molding. Cast iron steps with gas pipe railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, wood-sash window with a staggered soldier brick segmental arch capped by brick nailhead molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features a corbeled chamfered corner on the foundation and rounded corners above. It is capped by a gabled pediment that features prismatic nailhead molding. The bay is fenestrated with 1/1, double-hung, round-headed wood-sash windows on the first story. These openings are highlighted by concrete-lug sills and staggered soldier brick semicircular arches capped by molded brick. The two openings on the south elevation of the bay share a pointed arch with a prismatic nailhead panel and molded brick cap. Openings on the second story hold 1/1, double-hung, wood-sash windows with concrete-lug sills and staggered soldier brick segmental arches capped by brick nailhead molding. The foundation is pierced by 1/1, double-hung, vinyl-sash windows with rowlock brick segmental arches.

The side (east) elevation is fenestrated by 1/1 and 2/2, double-hung, wood-sash windows with concrete-lug sills and soldier brick segmental arches. Most openings on the first and second stories are flanked by paneled wood shutters. The foundation has been parged on this elevation.

A one-story wood porch off the rear (north) elevation has been enclosed and is capped by a shed roof. The appendage is supported by square wood posts and is faced with T-111 siding. The westernmost bay holds a single-leaf paneled door with lights and the addition is further fenestrated by 1/1, double-hung, vinyl-sash windows. The foundation level was not visible due to obstruction by the rear fence. The main block is fenestrated by 2/2, double-hung, wood-sash windows with header brick sills and rowlock brick segmental arches. These openings are flanked by paneled wood shutters.

Site Notes:

March 2010: This end-unit rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The west (side) elevation is adjacent to 710 F Street and the east elevation is adjacent to a brick alley. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small front yard is bordered by a metal bow and milled point fence. A small rear yard is bordered by wood fencing and is accessible from the brick alley via a single-leaf paneled metal roll-up automobile door.

Outbuilding Notes:

March 2010: This one-story, one-bay garage was constructed in 1913 by George W. Flather (permit #722). The building is constructed of brick and set on a solid concrete foundation. The west elevation is pierced by a paneled metal roll-up garage door. The west elevation has also been faced with plywood and wood trellis above the door opening.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne
Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1892 by George W. Flather (permit #0963). The dwelling is constructed of brick and is set on a solid raised brick foundation. The façade (east elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with brick dentils. Molded brick string courses run below the cornice. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. An additional belt course spans the façade between the first and second story window openings and is decorated with roundel molding. The northernmost bay of the foundation holds a single-leaf paneled wood door. The northernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light transom. The door opening is highlighted by a multi-light sidelight and a rock-faced concrete lintel. Brick steps with metal railings provide access to the entrance. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. All openings on the façade hold single or paired 1/1, double-hung, vinyl-sash windows with rusticated concrete-lug sills and lintels. Greek key molding panels sit between the first and second story openings. The foundation is pierced by paired two-light vinyl sliding windows with brick segmental arches. The rear (west) elevation was not visible from the public right-of-way.

Site Notes:

March 2010: This rowhouse is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 610 and 614 8th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is planted with immature shrubs and trees and is bordered by a metal hairpin fence. A small yard and garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: This two-story, three-bay dwelling and commercial space was constructed by Louis H. Emmert from the design of John C. Kondrup (permit #1093). Built in 1911, this Colonial Revival-style building is constructed of brick and is set on a solid concrete foundation. A sloping roof caps the dwelling and is complemented on the façade (east elevation) by a boxed wood cornice with overhanging eaves. The façade has been parged. Two single-leaf, paneled wood doors with leaded glass lights are located in the northern- and southernmost bays on the first story. These openings are topped with one-light transoms and fixed one-light windows. A three-sided, one-story, one-bay projecting bay is located in the center of the façade on the first story. The bay has a sloping roof clad with standing seam metal. The bay has fixed metal storefront windows atop a solid stucco-faced brick balustrade. Three fixed wood lights are located above the projecting central bay. An intermediate cornice runs above the first story openings. This ogee-molded cornice has a plain frieze. The openings on the second story hold 1/1, double-hung, vinyl-sash windows with false 6/6 muntins. These are highlighted by concrete-lug sills and splayed concrete arches with keystones.

The rear (west) elevation is faced with stretcher-bond brick. Openings on the first and second story in the eastern end bay hold single-leaf doors (materials not visible). The dwelling is further fenestrated by single and paired 1/1, double-hung, wood-sash windows. All openings are set in wide concrete surrounds with keystones. A wood deck extends from the second story and is supported by square wood posts. The deck has square wood balusters and wood steps with hand rails leading to the ground level.

Site Notes:

March 2010: This dwelling is located on the west side of 8th Street, N.E. and is adjacent to 728 F Street and 610 8th Street, N.E. It is set back approximately ten feet from the brick sidewalk. Concrete walkways lead from the sidewalk and travel to the two entrances. A small, grassy front yard is enclosed by a metal picket fence. A yard, enclosed by a staggered wood fence, and an asphalt-paved parking area are located at the rear (west) of the property. A brick alleyway is also located to the west of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. Additional belt courses bisect the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf flush wood door with leaded lights. The westernmost bay of the first story holds a single-leaf paneled wood door with a one-light transom. The transom is topped by a soldier brick segmental arch capped by brick pearl molding. Metal stairs with hand rails, shared with 716 F Street, provide access to the primary entrance. The second story opening holds a 6/6, double-hung, wood-sash window. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. A panel of rosette medallions is sited between the watertable and the first story. The bay is fenestrated with single and paired 6/6, double-hung, wood-sash windows. All windows on the façade have concrete sills and soldier brick segmental arches capped by brick pearl molding. The basement openings hold 4/4, double-hung, wood-sash windows have segmental arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. The north elevation of the ell is fenestrated with a central 6/6, double-hung, wood-sash window on the second story. This opening features a rowlock brick sill and a soldier brick segmental arch. A tripartite vinyl window is located on the first story. The first story and foundation level of the rear elevation were not visible due to neighboring fencing.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. It is adjacent to 716 and 720 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small grassy front yard is dotted with shrubs and is bordered by a metal milled point fence. A small yard enclosed by a wood fence is located at the rear (north) of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: This three-story, three-bay Queen Anne-style single dwelling was constructed in 1892 by F.M. Davis (permit #1351). Influences of the Italianate style are evident in the design. By 1904, the first floor had been converted into a store while the upper stories most likely remained residential. The brick dwelling has been faced with pressed brick and sits on a solid brick foundation. A sloping roof caps the dwelling and is complemented by an ogee-molded metal and corbeled brick cornice on the façade and west (side) elevation. An interior brick chimney pierces the roof and brick belt courses span the dwelling at various levels. A one-story, three-bay commercial storefront projects from the first story. This storefront has a flat roof with a boxed cornice and an ogee-molded metal cornice. The projection has large fixed windows on a solid stretcher-brick balustrade with a rowlock brick sill. The center of the storefront has a three-sided recessed canted entry with three single-leaf wood-frame glass doors. Openings on the second and third stories hold 1/1, double-hung, vinyl-sash windows with concrete-lug sills and brick segmental arches.

The west (side) elevation received the same material treatment as the façade. Two three-sided, rectangular bays with rounded edges rise the full height of the elevation. The elevation is fenestrated by 1/1, double-hung, vinyl-sash windows with concrete-lug sills and brick segmental arches. A single-leaf paneled wood door with a one-light transom is located on the first story. The opening is highlighted by a self-supporting metal awning. Cast iron steps with gas pipe railings provide access to the door. A metal fire escape is located on the second and third stories. Plastic skylights emerge from the ground and are supported by brick retaining walls. These are attached to the foundation of the side elevation.

The rear (north) elevation has a molded metal cornice and an interior brick chimney with corbeled cap is visible. A single-leaf door with a one-light transom is located on the first story of the easternmost bay. The opening is highlighted by a concrete-lug sill and a two-course rowlock-brick segmental arch. There are no steps to access the door from the rear yard. Three openings on the elevation hold 1/1, double-hung, vinyl-sash windows with rowlock brick sills and rowlock brick segmental arches. Another opening holds a narrow, elongated 1/1, double-hung, vinyl-sash window with a concrete-lug sill and rowlock brick segmental arch.

Site Notes:

March 2010: This semi-detached dwelling is located on the north side of F Street, N.E. at the intersection of F and 7th Streets, N.E. The façade (south elevation) fronts directly onto the concrete and brick sidewalk. The east (side) elevation is adjacent to 702 F Street, N.E. A small grassy side and rear yard is enclosed by a metal bow and picket fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. Additional belt courses bisect the first and second story window openings. The easternmost bay of the foundation is pierced by a single-leaf paneled metal door with leaded lights. The easternmost bay of the first story holds a single-leaf paneled wood door with a one-light transom. The transom is topped by a soldier brick segmental arch capped by brick pearl molding. Metal stairs with hand rails, shared with 718 F Street, provide access to the primary entrance. The second story opening holds a 6/6, double-hung, wood-sash window. A three-sided, rectangular bay extends from the westernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. A panel of rosette medallions is sited between the watertable and the first story. The bay is fenestrated with single and paired 4/4 and 6/6, double-hung, wood-sash windows. All windows on the façade have concrete sills and soldier brick segmental arches capped by brick pearl molding. The basement openings have rowlock brick segmental arches. The side (west) elevation is fenestrated with 4/4 and 6/6, double-hung, wood-sash windows. These openings are highlighted by concrete-lug or rowlock brick sills. Four openings have rowlock brick segmental arches. An interior brick chimney rises from the west elevation and has a plain cap.

The rear (north) elevation is fenestrated with 6/6, double-hung, wood-sash windows, which feature concrete and rowlock brick sills and soldier brick segmental arches. A single-leaf door with one-light transom and soldier brick segmental arch pierces the east bay on the first story. This entryway is accessible via a wood deck. This wood deck has staggered wood balusters and wood steps with railings. The deck is supported by square wood posts.

Site Notes:

March 2010: This end-unit rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The east (side) elevation is adjacent to 718 F Street and the west elevation is adjacent to a brick alley. A concrete and brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small front yard is planted with shrubs and a mature tree and is bordered by a metal milled point fence. A small rear yard is bordered by staggered board wood fencing.

Queen Anne
Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. Additional belt courses bisect the first and second story window openings. The easternmost bay of the foundation is pierced by a single-leaf flush wood door. The easternmost bay of the first story holds a single-leaf paneled wood door with a one-light transom. The transom is topped by a soldier brick segmental arch capped by brick pearl molding. Metal stairs with hand rails, shared with 722 F Street, provide access to the primary entrance. A three-sided, rectangular bay extends from the westernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. A panel of rosette medallions is sited between the watertable and the first story. All openings on the façade hold single and paired 1/1, double-hung, wood-sash windows. The windows have concrete sills and soldier brick segmental arches capped by brick pearl molding. The basement openings have two-course rowlock brick segmental arches.

A two-story ell projects from the easternmost bay of the rear (north) elevation and is original to the dwelling. An interior brick chimney with corbeled cap rises from the west elevation of the ell. The north elevation of the ell is fenestrated with a sliding vinyl window on the second story. This opening features a concrete sill. A single-leaf door opening is located on the first story. A wood deck with square wood balusters projects from the first story of the ell. The deck is supported by square wood posts and has steps with hand rails leading to the rear yard.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. It is adjacent to 718 and 722 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is bordered by a metal hairpin fence. A small yard is located at the rear (north) of the dwelling.

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. Additional belt courses bisect the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf paneled wood door with leaded lights. The westernmost bay of the first story holds a single-leaf paneled wood door with a one-light transom. The transom is topped by a soldier brick segmental arch capped by brick pearl molding. Metal stairs with hand rails, shared with 720 F Street, provide access to the primary entrance. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. A panel of rosette medallions is sited between the watertable and the first story. All openings on the façade hold single and paired 1/1, double-hung, wood-sash windows. The windows have concrete sills and soldier brick segmental arches capped by brick pearl molding. The basement openings have two-course rowlock brick segmental arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. The north elevation of the ell is fenestrated with a 1/1, double-hung, wood-sash window on the second story. This opening features a rowlock brick sill and a soldier brick segmental arch. A single-leaf door opening is located on the first story. A wood deck with square wood posts projects from the first story. It has a wooden staircase that provides access to the ground level. The first story and foundation level of the rear elevation were not visible due to neighboring fencing.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. It is adjacent to 720 and 724 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small grassy front yard is dotted with shrubs and is bordered by a metal milled point fence. A small yard enclosed by a wood fence is located at the rear (north) of the dwelling.

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. Additional belt courses bisect the first and second story window openings. The easternmost bay of the foundation is pierced by a single-leaf flush wood door. The easternmost bay of the first story holds a single-leaf paneled wood door with a one-light transom. The transom is topped by a soldier brick segmental arch capped by brick pearl molding. Cast iron stairs with gas pipe railings, shared with 726 F Street, provide access to the primary entrance. The opening on the second story holds a 1/1, double-hung, sash window (materials not discernible) with a concrete sill and soldier brick segmental arch capped with brick pearl molding. A three-sided, rectangular bay extends from the westernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. A panel of rosette medallions is sited between the watertable and the first story. The bay is fenestrated with multi-light fixed wood windows and 1/1, double-hung, sash windows (materials not discernible). These windows have concrete sills and soldier brick segmental arches capped by brick pearl molding. The basement openings hold 1/1, double-hung, vinyl-sash windows with two-course rowlock brick segmental arches.

A two-story ell projects from the easternmost bay of the rear (north) elevation and is original to the dwelling. The north elevation of the ell is fenestrated with a 1/1, double-hung, sash window on the second story. This opening features a segmental arch. A single-leaf door opening with one-light transom is located on the first story. A wood deck with square wood posts projects from the first story. It has a wooden staircase that provides access to the ground level. The first story and foundation level of the rear elevation were not visible due to neighboring fencing.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. It is adjacent to 722 and 726 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is bordered by a metal hairpin and picket fence. A small yard is located at the rear (north) of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. Additional belt courses bisect the first and second story window openings. The westernmost bay of the foundation is pierced by a single-leaf wood-frame glass door set in a segmental opening. The westernmost bay of the first story holds a single-leaf wood-frame glass door with a one-light transom. The transom is topped by a soldier brick segmental arch capped by brick pearl molding. Cast iron stairs with gas pipe railings, shared with 724 F Street, provide access to the primary entrance. The opening on the second story holds a 6/6, double-hung, wood-sash window with a concrete sill and soldier brick segmental arch capped with brick pearl molding. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. A panel of rosette medallions is sited between the watertable and the first story. The bay is fenestrated with multi-light fixed wood windows and 4/4, double-hung, wood-sash windows. These openings have concrete sills and soldier brick segmental arches capped by brick pearl molding. The basement openings hold 6/6, double-hung, wood-sash windows with two-course rowlock brick segmental arches.

A two-story ell projects from the westernmost bay of the rear (north) elevation and is original to the dwelling. The north elevation of the ell is fenestrated with a double-hung sash window (lights and materials not visible) on the second story. This opening features a rowlock brick sill and a segmental arch. Sliding glass doors are located on the first story. The first story and foundation level of the rear elevation were not visible due to neighboring fencing.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. It is adjacent to 724 and 728 F Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is bordered by a milled point metal fence. A small yard is located at the rear (north) of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne (Commercial)

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style rowhouse with Italianate influences was constructed in 1888. Built by S.A. Sixbury and Co., this rowhouse is one of seven constructed from the same permit (#1433). The dwelling is constructed of brick and is set on a solid brick raised foundation. Originally a single-family dwelling, the first story was converted into a storefront by 1928. The façade (south elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade and side (east) elevation by a molded metal cornice with a corbeled brick cornice below. A molded brick watertable is located above the foundation and a brick sill course travels across the façade beneath the second story window openings. Additional belt courses bisect the first and second story window openings. A molded metal intermediate cornice bisects the façade and continues onto the east elevation. The first story of the southeast corner of the building has been remodeled and now holds a canted storefront. The storefront window wraps around from the façade to the east elevation and holds large multi-light metal windows. A recessed entry is located in the canted corner and holds a two-leaf metal door with glass insets. This storefront extends from the main block and is supported by tension rods attached to the intermediate cornice. Clerestory windows with metal grills sit above the storefront. The second story on the façade holds single and paired 1/1, double-hung, wood-sash windows with concrete-lug sills and soldier brick segmental arches capped by beaded molding.

The side (east) elevation received the same material treatment as the façade. A three-sided, rectangular bay with chamfered corners projects from the central bay of the elevation. Openings on the projecting bay and northern end bay hold single and paired 1/1 and 2/2, double-hung, wood-sash windows. The windows on the first story of the projecting bay have a wood surround; all other openings have concrete-lug sills and two-course rowlock brick segmental arches. An opening on the first story holds a single-leaf, paneled wood door with lights highlighted by a rectangular one-light transom and a two-course rowlock brick segmental arch. This entryway is accessed by a metal stairway with metal handrails. A basement opening in the northernmost bay holds a 1/1, double-hung window (materials not discernible). A metal staircase sheltered by an awning leads from the side yard to the rear fire escape. The rear (north) elevation was not fully visible due to rear fencing. Single leaf wood French doors are located on the second and third stories in the eastern end bay. An exterior metal chimney extends from the easternmost bay as well.

A one-story addition extends from the north elevation and was constructed ca. 1950s. This one-story, three-bay addition is faced with seven-course American-bond brick. The east elevation is pierced by a single-leaf paneled wood door with lights in the central bay. Twenty-light metal windows with header brick sills are located in the northern and southern bays. A metal chain link fence and wood privacy fence are located on the roof of the addition. The roof is complemented by metal coping.

Site Notes:

March 2010: This building is located on the north side of F Street, N.E. at the intersection of F Street and 8th Street, N.E. It is set back approximately ten feet from the brick sidewalk. The west (side) elevation is adjacent to 726 F Street, N.E. The front and side yard covered with rubber and is bordered by a brick pier and metal fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This end-unit two-and-one-half-story, two-bay Queen Anne-style duplex was constructed in 1902 by J.A. Wynkoop from the design of N.T. Haller Co. It is one of six duplexes constructed from the same permit (#1734). The brick and stone dwelling is faced with brick and set on a solid concrete foundation also faced with brick. A sloping roof caps the dwelling and is complemented by an ogee-molded metal cornice with dentils. The northernmost bay of the first story holds a two-leaf paneled wood door and is highlighted by a rectangular transom and rusticated concrete surround. Brick steps with brick wing walls provide access to the main door. A three-sided, rounded-edge rectangular bay rises the full height of the dwelling and projects from the southernmost bay of the façade. The bay has the material treatment of the main block and is capped by a front gable roof. A fragmented rusticated concrete belt course spans the bay below the first story window openings, and a molded brick belt course spans the bay below the third story openings. All openings on the façade, except the basement, hold 1/1, double-hung, vinyl-sash windows. The windows are highlighted by rusticated concrete-lug sills and lintels. The foundation is pierced on the bay by a blind window with a rusticated concrete-lug lintel.

A two-story ell extends from the northernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and has been parged. It is set on a solid foundation. The south elevation of the ell and the rear elevation of the main block are fenestrated with 1/1, double-hung, vinyl-sash windows with rowlock brick sills. The ell has a two-sided, two-story canted bay on the south elevation and is fenestrated in the same manner as the ell. An exterior parged chimney with a parged cap is located in the eastern end bay of the south elevation.

Site Notes:

March 2010: This duplex is located on the east side of 7th Street, N.E. The dwelling is set back approximately fifteen feet from the concrete sidewalk. The north (side) elevation is adjacent to 611 7th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary entrance. The small front yard contains shrubs, foundation plantings, and an immature tree and is enclosed by a metal haipin fence. A small yard, enclosed by a staggered wood fence, and a concrete-paved parking area are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-and-one-half-story, two-bay Queen Anne-style duplex was constructed in 1902 by J.A. Wynkoop from the design of N.T. Haller Co. It is one of six duplexes constructed from the same permit (#1734). The brick and stone dwelling is faced with brick and set on a solid concrete foundation also faced with brick. A sloping roof caps the dwelling and is complemented by an ogee-molded metal cornice with dentils. The southernmost bay of the first story holds a two-leaf metal-frame glass door and is highlighted by a rectangular transom. The door opening is sheltered by a metal awning supported by square brick posts. An inner vestibule leads to two single-leaf paneled wood doors with lights. Concrete steps with brick wing walls provide access to the main door. A three-sided, rounded-edge rectangular bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and is capped by a front gable roof. A fragmented rusticated concrete belt course spans the bay below the first story window openings, and a molded brick belt course spans the bay below the third story openings. The first and second stories of the bay are fenestrated with one-light fixed vinyl windows with rusticated concrete-lug sills and lintels. All other openings on the façade hold 1/1, double-hung, vinyl-sash windows with a rusticated concrete-lug sills and the first and second story openings have rusticated concrete-lug lintels. All openings are sheltered by self-supporting metal awnings. The foundation of the bay is pierced by a multi-light window opening with a rusticated concrete-lug lintel.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. The ell has a two-sided, two-story canted bay on the north elevation and is fenestrated in the same manner as the ell. A half-width two-story wood porch with sloped roof is located on the north bay of the rear elevation of the ell. The porch is supported by square wood posts and has a square wood balustrade. Wooden steps lead from the first story to the ground level. The first story is fenestrated with a single-leaf paneled wood door with lights and a one-light transom with a two-course rowlock brick segmental arch. The second story is fenestrated in the same manner. The southern bay of the porch has been enclosed by T-111 siding. A single-leaf paneled door is located on the first story and leads to a wood staircase with wood railing leading to the ground level. An exterior brick chimney is located on the north elevation of the ell.

Site Notes:

March 2010: This duplex is located on the east side of 7th Street, N.E. The dwelling is set back approximately fifteen feet from the concrete sidewalk and is adjacent to 609 and 613 7th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is dotted with foundation plantings and a mature tree and is bounded by a low brick retaining wall. A grassy yard enclosed by a metal chain link fence is located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-and-one-half-story, two-bay Queen Anne-style duplex was constructed in 1902 by J.A. Wynkoop from the design of N.T. Haller Co. It is one of six duplexes constructed from the same permit (#1734). The brick and stone dwelling is faced with brick and set on a solid concrete foundation also faced with brick. A sloping roof caps the dwelling and is complemented by an ogee-molded metal cornice with dentils. The northernmost bay of the first story holds a two-leaf wood-frame glass door and is highlighted by a rectangular transom and rusticated concrete surround. An inset doorway, accessible through an inner vestibule, holds a wide single-leaf paneled wood door. Stone steps with brick wing walls provide access to the main door. A three-sided, rounded-edge rectangular bay rises the full height of the dwelling and projects from the southernmost bay of the façade. The bay has the material treatment of the main block and is capped by a pyramidal roof with slate fish scale shingles and a metal finial. A fragmented rusticated concrete belt course spans the bay below the first story window openings, and a molded brick belt course spans the bay below the third story openings. All openings on the façade, except the basement, hold 1/1, double-hung, vinyl-sash windows. The windows are highlighted by rusticated concrete-lug sills and lintels. The foundation is pierced on the bay by a multi-light window with a rusticated concrete-lug lintel.

A two-story ell extends from the northernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. The ell has a two-sided, two-story canted bay on the south elevation and is fenestrated in the same manner as the ell. A two-story wood porch with shed roof extends from the ell and the second story has been enclosed. The second story is faced with T-111 siding and is pierced by paired vinyl windows. The first story is fenestrated with a single-leaf door with one-light transom and two-course rowlock brick segmental arch, as well as a 1/1, double-hung, vinyl-sash window with false 6/6 muntins with a two-course rowlock brick segmental arch. An exterior brick chimney is located on the south elevation of the ell and has a plain cap. The rear elevation of the main block and the south elevation of the ell are fenestrated by 1/1, double-hung, vinyl-sash windows with concrete-lug sills and two-course rowlock brick segmental arches.

Site Notes:

March 2010: This duplex is located on the east side of 7th Street, N.E. The dwelling is set back approximately fifteen feet from the concrete sidewalk and is adjacent to 611 and 615 7th Street, N.E. A stone walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is planted with small shrubs and is enclosed by a metal bow and picket fence. A small yard, enclosed by a staggered wood fence, and a concrete-paved parking area are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

Outbuilding Notes:

March 2010: This one-story, one-bay garage was constructed ca.1940. The building is faced with T-111 siding. A paneled metal roll-up garage door set in a metal surround on the east elevation provides vehicle access from the rear brick alleyway.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-and-one-half-story, two-bay Queen Anne-style duplex was constructed in 1902 by J.A. Wynkoop from the design of N.T. Haller Co. It is one of six duplexes constructed from the same permit (#1734). The brick and stone dwelling is faced with brick and set on a solid concrete foundation also faced with brick. A sloping roof caps the dwelling and is complemented by an ogee-molded metal cornice with dentils. The southernmost bay of the first story holds a two-leaf wood-frame glass door and is highlighted by a rectangular transom and rusticated concrete surround. An inset doorway, accessible through an inner vestibule, also holds a two-leaf wood door with oval glass insets. Concrete steps with brick wing walls provide access to the main door. Openings on the second and third stories hold 1/1, double-hung, vinyl-sash windows with rusticated concrete-lug sills. The second-story opening is highlighted by a rusticated concrete-lug lintel. A three-sided, rounded-edge rectangular bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and is capped by a pyramidal roof with slate fish scale shingles and a metal finial. A fragmented rusticated concrete belt course spans the bay below the first story window openings, and a molded brick belt course spans the bay below the third story openings. The first and second stories of the bay are fenestrated with one-light fixed vinyl windows with rusticated concrete-lug sills and lintels. The third story opening holds a 1/1, double-hung, vinyl-sash window with a rusticated concrete-lug sill. The foundation is pierced on the bay by a window opening with a rusticated concrete-lug lintel.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. The ell has a two-sided, two-story canted bay on the north elevation and is fenestrated in the same manner as the ell. A full-width wood porch is visible on the second story of the ell. The porch is supported by square wood posts and has a square wood balustrade. Wooden steps lead from the deck to the ground level. The first story was not visible due to the rear fence and garage. The second story is fenestrated with a 1/1, double-hung, vinyl-sash window with a concrete-lug sill and two-course rowlock brick segmental arch. The northern bay holds a single-leaf door with a blind transom. An exterior brick chimney is located on the north elevation of the ell.

Site Notes:

March 2010: This duplex is located on the east side of 7th Street, N.E. The dwelling is set back approximately fifteen feet from the concrete sidewalk and is adjacent to 613 and 617 7th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is dotted with foundation plantings and a mature tree and is bounded by a low brick retaining wall. A small yard and garage are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

Garage

Outbuilding Notes:

March 2010: This one-story, one-bay garage was constructed ca. 1915. The building is faced with rusticated concrete and is set on a solid foundation. A paneled metal roll-up garage door set in a wood surround on the east elevation provides vehicle

access from the rear brick alleyway. The garage is capped by a sloped roof.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-and-one-half-story, two-bay Queen Anne-style duplex was constructed in 1902 by J.A. Wynkoop from the design of N.T. Haller Co. It is one of six duplexes constructed from the same permit (#1734). The brick and stone dwelling is faced with brick and set on a solid concrete foundation also faced with brick. A sloping roof caps the dwelling and is complemented by an ogee-molded metal cornice with dentils. The northernmost bay of the first story holds a two-leaf wood-frame glass door and is highlighted by a rectangular transom and rusticated concrete surround. An inset doorway, accessible through an inner vestibule, also holds a two-leaf wood door with oval glass insets. Brick steps with brick wing walls provide access to the main door. A three-sided, rounded-edge rectangular bay rises the full height of the dwelling and projects from the southernmost bay of the façade. The bay has the material treatment of the main block and is capped by a front gable roof with slate shingles and a metal finial. A fragmented rusticated concrete belt course spans the bay below the first story window openings, and a molded brick belt course spans the bay below the third story openings. All openings on the façade, except the basement, hold 1/1, double-hung, vinyl-sash windows. The windows are highlighted by rusticated concrete-lug sills and lintels. The foundation is pierced on the bay by a blind window opening with a rusticated concrete-lug lintel.

A two-story ell extends from the northernmost bay of the rear (east) elevation and is original. The ell is constructed of six-course American-bond brick and is set on a solid foundation. The ell has a two-sided, two-story canted bay on the south elevation and is fenestrated in the same manner as the ell. A two-story wood porch extends from the ell and has been screened in. The rear elevation was not visible due to the rear fence and garage and the screen material. The first story screen porch is pierced by a single-leaf wood-frame door. An exterior brick chimney is located on the south elevation of the ell.

Site Notes:

March 2010: This duplex is located on the east side of 7th Street, N.E. The dwelling is set back approximately fifteen feet from the concrete sidewalk and is adjacent to 615 and 619 7th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is dotted with plantings and is enclosed by a metal bow and picket fence. A small yard and garage are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-and-one-half-story, two-bay Queen Anne-style duplex was constructed in 1902 by J.A. Wynkoop from the design of N.T. Haller Co. It is one of six duplexes constructed from the same permit (#1734). The brick and stone dwelling is faced with brick and set on a solid concrete foundation also faced with brick. A sloping roof caps the dwelling and is complemented by an ogee-molded metal cornice with dentils. The southernmost bay of the first story holds a replacement single-leaf paneled wood door. The opening is highlighted by a rectangular transom and one-light sidelights. A self-supporting fabric awning shelters the opening. Brick steps with brick wing walls provide access to the main door. A three-sided, rounded-edge rectangular bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and is capped by a front gable roof with slate shingles and a metal finial. A fragmented rusticated concrete belt course spans the bay below the first story window openings, and a molded brick belt course spans the bay below the third story openings. All openings on the façade, except the basement, hold 1/1, double-hung, vinyl-sash windows. The windows are highlighted by rusticated concrete-lug sills and lintels. The foundation is pierced on the bay by a one-light window opening with a rusticated concrete-lug lintel.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell is constructed of six-course American-bond brick and is set on a solid foundation. The ell has a two-sided, two-story canted bay on the north elevation and is fenestrated in the same manner as the ell. A small wood porch is visible on the second story of the ell and is accessible from the ground level via wooden steps. The first story was not visible due to the rear fence. The second story is fenestrated with a 1/1, double-hung, vinyl-sash window with a concrete-lug sill and two-course rowlock brick segmental arch. The northern bay holds a single-leaf French door sheltered by a self-supporting fabric awning. An exterior brick chimney is located on the north elevation of the ell and has a corbeled cap.

Site Notes:

March 2010: This duplex is located on the east side of 7th Street, N.E. The dwelling is set back approximately fifteen feet from the concrete sidewalk and is adjacent to 617 and 621 7th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary entrance. The small front yard is dotted with immature trees and plantings and is enclosed by a metal bow and picket fence. A small yard bordered by a wood picket fence is located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, four-bay building was constructed in 1890 by Thomas Trebeil from permit #0570. This building was originally constructed as a stable for 647 4th Street, N.E. Although it does not have its own permit, the permit for the primary resource notes that there is a "2 story brick stable on alley." The building became a beer bottling factory and store by 1904, an auto repair shop by 1928, and, by 1999, became a multiple dwelling—its function today. Originally built on the same lot as 647 4th Street, N.E. (0025), the land was later resubdivided and the building now has its own lot (0814). This building, constructed of irregularly-coursed American-bond brick, sits on a solid brick foundation. The flat roof, pierced by interior metal chimneys, is complemented by metal coping and a corbeled brick cornice on the façade (north elevation). The first story on the façade is fenestrated by single-light fixed wood windows with rowlock brick sills and rowlock brick segmental arches. Two three-sided, rectangular bays project from the façade and rise the full height of the building. Between the two projecting bays, a recessed bay is fenestrated with a single-leaf flush wood door. The second story holds an infilled window with concrete sill and two-course rowlock brick segmental arch. All other openings on the façade hold replacement 1/1, double-hung, sash windows (materials not discernible) with concrete sills and two-course rowlock brick segmental arches.

The west elevation shares the material treatment as the façade. A single-leaf paneled wood door is located in the central bay of the first story and is highlighted by a two-course rowlock brick segmental arch. This elevation is also fenestrated with replacement 1/1, double-hung, sash windows (materials not discernible) with concrete sills and two-course rowlock brick segmental arches.

It appears that the east elevation originally held a vehicular door. This opening has been infilled and parged. The lintel has also been removed and has left an imprint above the first-story openings. A recessed single-leaf flush wood door with one-light transom is located in the southern end bay of the first story. The northern end bay holds paired 1/1, double-hung, vinyl-sash windows with false 6/6 muntins. The second story is fenestrated by a 1/1, double-hung, vinyl-sash window with concrete sill and rowlock brick segmental arch. Another opening has been infilled and parged.

Site Notes:

March 2010: This detached building is located on the south side of G Street, N.E., and is set back approximately ten feet from the brick sidewalk. The dwelling is sited on a flat, grassy lot planted with mature shrubs and trees. It is enclosed by a milled point metal fence. A brick and stone walkway leads from the sidewalk and travels toward the main entry. An asphalt-paved parking lot is located to the south of the building and a brick alleyway is located east of the building. A brick patio is located west of the building and may be shared with 647 7th Street, N.E.

Outbuilding Notes:

March 2010: This two-story, two-bay stable was constructed in 1896 by Mr. Simms (permit #1136). It is now used as a garage. This stretcher-bond brick building sits on a concrete and brick foundation and is capped by a sloping roof. A one-story, one-bay cupola sits atop the roof and is faced by horizontal siding.

It is also pierced by a single-leaf paneled metal door with lights. A ventilation shaft pierces the roof of the cupola. The west elevation of the garage is fenestrated on the first story by a single-leaf paneled metal door in the northern end bay. The southern end bay holds a vehicular opening that has been infilled with four single-leaf paneled metal doors. These are set in a wood surround and are highlighted by a soldier brick lintel. The second story openings hold 1/1, double-hung, replacement wood windows with concrete-lug sills and two-course rowlock brick segmental arches. The south elevation of the garage is fenestrated by single-light wood windows with concrete-lug sills and two-course rowlock brick segmental arches.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, two-bay Queen Anne-style single dwelling with Italianate influences was constructed in 1891 by Walters and Thompson (permit #1756). The dwelling is constructed of brick and is set on a solid raised brick foundation. The façade (east elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded metal cornice with a corbeled brick cornice below. Molded brick string courses run below a plain brick frieze. Interior metal chimney caps pierce the roof on the southern elevation. A molded brick watertable is located above the foundation and brick sill courses travel across the façade beneath the first and second story window openings. An additional belt course spans the façade between the first and second story window openings and is decorated with roundel molding. The northernmost bay of the foundation holds a single-leaf paneled wood door. The northernmost bay of the first story holds a double-leaf wood-frame glass door with a one-light segmental transom. The door opening is highlighted by a soldier brick surround capped by beaded molding. Cast iron stairs with gas pipe railings provide access to the entrance. An inner vestibule leads to a double-leaf paneled wood door. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the façade and features chamfered corners with brick corbelling. All openings on the first story hold 1/1, double-hung, vinyl-sash windows with concrete-lug sills and brick segmental arches. Decorative rusticated panels are situated below sill level. All openings on the second story hold 1/1, double-hung, segmental-arched sash windows (materials not discernible). These openings are highlighted by concrete-lug sills and soldier brick segmental arches capped by beaded molding. The foundation is pierced by blind two-light wood windows with concrete-lug sills and soldier brick splayed arches.

A two-story ell projects from the northernmost bay of the rear (north) elevation and is original to the dwelling. A one-story appendage is located within the ell and continues around to the west elevation of the ell. A wood pergola is located atop the one-story appendage and creates a deck on the second story. The second story of the ell is fenestrated by paired 1/1, double-hung, wood sash windows with a rowlock brick sill and two-course rowlock brick elliptical arch. The first story was not visible due to rear fencing, but openings with one- and two-light wood transoms were visible on the south and west elevations.

Site Notes:

March 2010: This dwelling is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 608 and 612 8th Street, N.E. A stone walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is planted with mature trees and immature shrubs and is bordered by a metal bow and picket fence. A small yard is located at the rear (west) of the dwelling and is bordered by a wood fence. A carriage house and a brick alley are also located to the west of the property.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: This two-story, three-bay Queen Anne-style brick building was constructed in 1892 by Henry F. Getz from permit #2492. The building originally served as a single dwelling above and a storefront below. The structure is faced with pressed brick and is set on a solid brick foundation. A wide rusticated concrete belt course spans the façade (west elevation) between the first and second stories. A sloping roof caps the dwelling and interior aluminum chimneys pierce the roof. A false mansard roof runs along the façade and is clad with slate shingles. The mansard is complemented by an ogee-molded metal cornice with brick dentils and fret molding below. The northern- and southernmost bays of the first story hold single-leaf paneled wood doors with. The door openings are highlighted by rectangular one-light transoms. The second story window openings hold 1/1, double-hung, vinyl-sash windows with rusticated concrete sills and lintels. A three-sided, rectangular bay rises the full height of the dwelling and projects from the central bay of the façade. The bay has molded brick chamfered corners and has the material treatment of the main block. It is capped by a pyramidal roof with slate shingles and a metal finial. A window opening on the first story holds paired 1/1, double-hung, vinyl-sash windows set in a wood surround with a rectangular one-light transom and concrete-lug sill. The second story opening holds paired 1/1, double-hung, vinyl-sash windows set in a wood surround. All second story openings on the façade are highlighted by rusticated concrete-lug sills and lintels, as well as decorative lattice panels below the sills.

A two story ell with a one-story appendage extends from the northern end bay of the rear (east) elevation and is original. The ell is constructed of brick and set on a solid foundation. The main block and the ell are fenestrated with 1/1, double-hung, vinyl-sash windows with concrete-lug sills and two-course rowlock brick segmental arches. A one-story metal porch is located within the ell and has a metal balustrade and steps leading from the second story to the ground. The one-story appendage has a shed roof clad with shingles and pierced by a skylight. This appendage may have originally been a sleeping porch. It is constructed of concrete block and is fenestrated with a single-leaf paneled wood door with lights and paired 1/1, double-hung, vinyl-sash windows.

Site Notes:

March 2010: This attached duplex is located on the east side of 7th Street, N.E. The building is set back approximately ten feet from the concrete sidewalk and is adjacent to 619 and 623 7th Street, N.E. A brick walkway leads from the sidewalk and travels towards the two primary entrances. The small front yard is enclosed by a metal bow and picket fence. A small yard the rear (east) of the dwelling is bordered by a staggered wood fence. A brick alley is also located east of the property.

Outbuilding Notes:

March 2010: This one-story, one-bay garage was constructed in 1914 by M.L. Gottwals (permit #3599). The building is constructed of six course American-bond brick and is set on a solid concrete foundation. A paneled metal roll-up garage door

with a concrete-lug lintel on the east elevation provides vehicle access from the rear brick alleyway. The opening around the door has been partially infilled with beaded edge vinyl siding. The garage is capped by a sloped roof.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Designed and constructed by M.L. Gottwals in 1910, this two-story, two-bay Queen Anne-style dwelling is one of two dwellings constructed from permit #4777. It is similar in design to four dwellings to the north constructed at the same time from permit #4778. The dwelling is constructed of brick and is set on a solid, raised concrete foundation faced with brick. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A false mansard roof runs along the façade (west elevation) and is clad with slate fish scale shingles. The mansard is complemented by an ogee-molded metal cornice. A molded string course runs below a plain brick frieze. The southernmost bay of the first story holds a replacement single-leaf wood-frame glass door with lights. The opening is highlighted by a rectangular transom topped by a splayed concrete arch with keystone. An inner vestibule provides access to a second opening that holds a single-leaf paneled wood door with lights. Concrete steps with brick wing walls provide access to a brick stoop with brick balustrade and the main entry. A three-sided, canted bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and has corbeled brick cornices on the sides. The bay is capped by a pyramidal roof with slate fish scale shingles and a metal finial. The facade is fenestrated with 1/1, double-hung, sash windows (materials not discernible) highlighted by concrete-lug sills and lintels. A basement entry in the southernmost bay holds a single-leaf wood French door.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. A two-story wood porch with a sloped roof is located on the rear of the ell. The first story of the porch was obscured by the garage and fencing at the rear of the dwelling. The first story has wood steps leading up to the enclosed porch and a door opening. The ell is fenestrated with single-leaf doors with rectangular transoms and rowlock brick segmental arches on the first and second stories of the southern end bay. 1/1, double-hung, vinyl-sash windows are located in the northern end bay. The porch is supported by square wood posts and has a square wood balustrade. An exterior brick chimney with parged cap is located in the northeast corner of the ell.

Site Notes:

March 2010: This attached single dwelling is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and is adjacent to 621 and 625 7th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is dotted with immature shrubs and plantings and is enclosed by a metal bow and picket fence. A garage and small yard are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

March 2010: This one-story, one-bay garage (ca. 1925) has a sloped roof and is capped by metal coping. The structure has been parged and the west elevation is pierced by a paneled metal roll-up garage door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of five rowhouses constructed from permit #4067. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (east elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented on the façade by a false mansard clad with asphalt shingles. The dwelling also has an ogee-molded metal cornice and boxed metal molding below. The mansard is pierced by two front gable pedimented dormers with louvered vents. The sloping roof is pierced by an interior brick chimney with parged cap. The northernmost bay on the first story holds a single-leaf wood French door with a one-light transom and a concrete-lug lintel. The foundation is pierced by a blind window opening with a concrete-lug lintel in the southernmost bay. All other openings on the façade hold 6/1, double-hung, wood-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the north of the facade and is set on a solid brick foundation. An opening in the foundation of the porch leads to a single-leaf basement entry that was obscured by a metal security door. The flat roof of the porch has an ogee-molded metal cornice with overhanging eaves and is supported by metal Doric columns atop square brick posts. Metal balusters encircle the porch, which is accessed via the poured concrete steps with metal hand rails in the northern end bay.

An opening in the northernmost bay of the first story on the rear (west) elevation holds a single-leaf wood French door. This exterior door leads to an interior paneled wood door with lights. The entry is highlighted by a rectangular transom and a 1/1, double-hung, vinyl-sash sidelight. The doorway is set in a segmental opening and is capped by a two-course rowlock brick segmental arch. A three-sided, canted bay extends from the southernmost bay of the elevation and rises the full height of the dwelling. The bay received the same material treatment as the main block. The elevation is fenestrated with 2/2, double-hung, wood-sash windows with concrete sills and two-course rowlock brick segmental arches. A wooden deck extends from the northern portion of the elevation and has square wood balusters. Wooden steps provide access to the door.

Site Notes:

March 2010: This building is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 626-630 and 636 8th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small grassy yard is planted with immature shrubs and trees and is bordered by a stone retaining wall. A small yard bordered by a wood picket fence and a garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of five rowhouses constructed from permit #4067. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (east elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented on the façade by a false mansard clad with fish scale slate shingles. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by a front gable pedimented dormer with paired single-light fixed wood windows. The sloping roof is pierced by an interior brick chimney with parged cap. The northernmost bay on the first story holds a single-leaf flush wood door with lights. The opening is highlighted by a one-light transom. The foundation is pierced by a one-light wood window with a concrete-lug lintel in the southernmost bay. All other openings on the façade hold 1/1, double-hung, vinyl-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the north of the facade and is set on a solid brick foundation. An opening in the foundation of the porch leads to a single-leaf wood-frame glass door basement entry. The flat roof of the porch has a boxed metal cornice with overhanging eaves and is supported by metal Doric columns atop square brick posts. Metal balusters encircle the porch, which is accessed via the poured concrete steps with metal hand rails in the northern end bay.

An opening in the northernmost bay of the first story on the rear (west) elevation holds a single-leaf wood-frame glass door. The entry is highlighted by a rectangular transom and a 1/1, double-hung, vinyl-sash sidelight. The doorway is set in a segmental opening and is capped by a two-course rowlock brick segmental arch. A three-sided, canted bay extends from the southernmost bay of the elevation and rises the full height of the dwelling. The bay received the same material treatment as the main block. The elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course rowlock brick segmental arches. A wooden deck extends from the northernmost bay of the elevation and has square wood balusters. Wooden steps provide access to the door.

Site Notes:

March 2010: This building is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 632 and 638 8th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small grassy yard is planted with immature shrubs and trees and is bordered by a stone retaining wall. A small yard and a concrete-paved parking area bordered by a wood picket fence are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Outbuilding Notes:

March 2010: This one-story, two-bay garage (ca. 1925) has a sloped roof that is highlighted by metal coping with overhanging eaves. The structure is faced with brick and the west elevation is pierced by two paneled metal roll-up garage

doors. Aluminum siding faces the west elevation.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of five rowhouses constructed from permit #4067. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (east elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented on the façade by a false mansard clad with fish scale slate shingles. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by two front gable pedimented dormers with single-light fixed wood windows. The sloping roof is pierced by an interior brick chimney with parged cap. The northernmost bay on the first story holds a single-leaf paneled wood door with lights and a one-light transom. The foundation is pierced by a blind window opening with a concrete-lug lintel in the southernmost bay. All other openings on the façade hold 6/1, double-hung, wood-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the north of the facade and is set on a solid brick foundation. An opening in the foundation of the porch leads to a single-leaf paneled wood basement entry. The flat roof of the porch has a molded metal cornice with overhanging eaves and is supported by metal Doric columns. Metal balusters encircle the porch, which is accessed via the poured concrete steps with metal hand rails in the northern end bay.

An opening in the northernmost bay of the first story on the rear (west) elevation holds a single-leaf door. The entry is highlighted by a rectangular transom and a 2/2, double-hung, wood-sash window to the north. This opening is sheltered by a shed roof clad with asphalt shingles. The roof is supported by square wood posts. A three-sided, canted bay extends from the southernmost bay of the elevation and rises the full height of the dwelling. The bay received the same material treatment as the main block. The elevation is fenestrated with 2/2, double-hung, wood-sash windows with concrete sills and two-course rowlock brick segmental arches. A wooden deck extends from the northernmost bay of the elevation and has square wood balusters.

Site Notes:

March 2010: This building is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 636 and 640 8th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small front yard is bordered by a stone retaining wall, and a small yard and garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of five rowhouses constructed from permit #4067. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (east elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented on the façade by a false mansard clad with fish scale slate shingles. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by a front gable pedimented dormer with paired single-light blind windows. The sloping roof is pierced by an interior brick chimney with parged cap. The northernmost bay on the first story holds a single-leaf paneled wood door and a one-light transom. The opening is highlighted by a concrete-lug lintel. The foundation is pierced by a 6-light vinyl window with a concrete-lug lintel in the southernmost bay. An opening on the first story holds a multi-light wood window flanked by 4/4, double-hung, wood-sash windows highlighted by a concrete-lug sill. All other openings on the façade hold 6/6, double-hung, wood-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the north of the facade and is set on a solid brick foundation. An opening in the foundation of the porch leads to a single-leaf metal door with glass inset basement entry. Metal balusters encircle the porch, which is accessed via the brick steps with metal hand rails in the northern end bay.

The rear (west) elevation was not fully visible due to the garage and neighboring fencing. A two-story addition with a flat roof extends (ca. 2000) from the northernmost bay on the rear elevation. This concrete-block structure is faced with stretcher-bond brick. The second story on the west elevation is fenestrated by a two-leaf wood-frame glass door with a concrete-lug lintel that leads onto a one-story porch. This porch has metal balusters. The south elevation of the addition is fenestrated with double-hung sash windows (materials not visible) with rowlock brick sills and concrete-lug lintels. A three-sided, canted bay extends from the southernmost bay of the elevation and rises the full height of the dwelling. The bay received the same material treatment as the main block. The elevation is fenestrated with 2/2, double-hung, wood-sash windows with concrete sills and two-course rowlock brick segmental arches.

Site Notes:

March 2010: This building is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 638 and 642 8th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small front yard is bordered by a stone retaining wall, and a small yard and garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of five rowhouses constructed from permit #4067. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (east elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented on the façade by a false mansard clad with fish scale slate shingles. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by two front gable pedimented dormers with single-light blind windows. The sloping roof is pierced by an interior brick chimney with parged cap. The northernmost bay on the first story holds a single-leaf flush wood door with one light and a one-light transom. The opening is highlighted by a concrete-lug lintel. All openings on the façade 1/1, double-hung, vinyl-sash windows and feature concrete-lug sills and lintels. A one-story, two-bay porch is located on the facade and is set on a solid brick foundation. Square metal and turned concrete balusters encircle the porch, which is accessed via the concrete steps with turned concrete hand rails in the northern end bay. The northern bay of the porch is covered by a flat roof with an ogee-molded metal cornice. The roof is supported by metal fluted Corinthian columns. An opening in the southernmost bay of the foundation of the porch holds a single-leaf paneled metal door. The porch foundation is further pierced by single and paired 1/1, double-hung, wood-sash windows with concrete-lug sills.

The rear (west) elevation was not fully visible due to the garage and neighboring fencing. A two-story addition with (ca. 1960s) spans the majority of the rear elevation. This appendage is faced with seven-course American-bond brick. A single-leaf paneled door is located in the southern bay of the first story and provides access to a wood deck with square wood balusters. The northern bay holds a 1/1, double-hung, wood-sash window with a rowlock brick sill. The second story holds two sets of three-light fixed wood windows with matching transoms.

Site Notes:

March 2010: This end-unit rowhouse is located on the west side of 8th Street, N.E. and has a concrete-paved yard that merges with the brick sidewalk. It is adjacent to 640 8th Street, N.E. to the south. A concrete walkway leads from the sidewalk and travels towards the primary entrance. A small yard and garage are located at the rear (west) of the dwelling. A brick alley is also located to the west of the property.

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of six rowhouses constructed from permit #4068. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (north elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented by a false mansard clad with fish scale slate shingles on the façade. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by two front gable pedimented dormers with blind single-light wood windows. The sloping roof is pierced by an interior brick chimney with parged cap. The westernmost bay on the first story holds a single-leaf paneled wood door with lights and a one-light transom. The opening is highlighted by a concrete-lug lintel. The foundation is pierced by a window opening that is highlighted by a concrete-lug lintel. All other openings on the façade hold 2/2, double-hung, wood-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the facade and is set on a solid brick foundation. Metal balusters encircle the porch, which is accessed via the concrete steps with brick wing walls in the western end bay. A flat roof with an ogee-molded metal cornice covers the porch and is supported by square brick posts. The porch foundation is pierced by an opening that leads to a basement entry. This opening holds a single-leaf paneled metal door with semicircle light.

The rear (south) elevation has a corbeled brick cornice. This elevation is fenestrated by a single-leaf wood French door with a single-light transom in the western end bay. A 2/2, double-hung, wood-sash window highlights the doorway to the west, and the entire entry is set in a two-course rowlock brick segmental arch. The entry is sheltered by a one-story, one-bay porch with a shed roof. The roof is supported by metal posts. A three-sided, canted bay extends from the eastern end bay of the elevation and rises the full height of the dwelling. All openings hold 2/2, double-hung, wood-sash windows with concrete-lug sills and two-course rowlock brick segmental arches.

Site Notes:

March 2010: This end-unit rowhouse is located on the south side of G Street, N.E., and is set back approximately ten feet from the brick sidewalk. The dwelling is sited on a flat, grassy lot planted with immature shrubs and trees. It is enclosed by a brick retaining wall and a wood picket fence and is adjacent to 717 G Street, N.E. to the east. A concrete and brick alleyway is located to the west of the dwelling. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small yard enclosed by a wood fence is located at the rear (south) of the dwelling.

Colonial Revival

Exterior & Architectural Notes:

March 2010: This rowhouse is located on the south side of G Street, N.E., and is set back approximately ten feet from the brick sidewalk. The dwelling is sited on a flat lot planted with immature shrubs and foundation plantings and is enclosed by a brick retaining wall. It is adjacent to 719 and 715 G Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. A small yard enclosed by a wood fence is located at the rear (south) of the dwelling.

Site Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of six rowhouses constructed from permit #4068. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (north elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented by a false mansard clad with fish scale slate shingles on the façade. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced a front gable pedimented dormer with paired single-light blind wood windows. The sloping roof is pierced by an interior brick chimney with parged cap. The westernmost bay on the first story holds a single-leaf flush wood door with lights and a one-light transom. The opening is highlighted by a concrete-lug lintel. The foundation is pierced by a one-light wood window highlighted by a concrete-lug lintel. Openings on the first story hold 1/1, double-hung, vinyl-sash windows and openings on the second story hold 6/1, double-hung, wood-sash windows. All openings on the façade feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the facade and is set on a solid brick foundation. Metal balusters encircle the porch, which is accessed via the concrete steps with metal hand rails in the western end bay. A flat roof with a boxed metal cornice and overhanging eaves covers the porch and is supported by metal posts. The porch foundation is pierced by an opening that leads to a basement entry that holds a single-leaf door.

The rear (south) elevation was not fully visible due to obstruction by rear fencing. The rear elevation has a corbeled brick cornice. A three-sided, canted bay extends from the eastern end bay of the elevation and rises the full height of the dwelling.

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of six rowhouses constructed from permit #4068. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (north elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented by a false mansard clad with fish scale slate shingles on the façade. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by two front gable pedimented dormers with paired single-light wood windows. The sloping roof is pierced by an interior brick chimney with parged cap. The westernmost bay on the first story holds a single-leaf wood-frame glass door with a one-light transom. The opening is highlighted by a concrete-lug lintel. The foundation is pierced by a window opening that is highlighted by a concrete-lug lintel. All other openings on the façade hold 1/1, double-hung, vinyl-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the facade and is set on a solid brick foundation. Metal balusters encircle the porch, which is accessed via the stone steps with metal hand rails in the western end bay. A flat roof with an ogee-molded metal cornice and overhanging eaves covers the porch and is supported by square brick posts. The porch foundation is pierced by an opening that leads to a basement entry that holds a single-leaf paneled wood door with lights.

The rear (south) elevation was not fully visible due to obstruction by rear fencing. The rear elevation has a corbeled brick cornice. A three-sided, canted bay extends from the eastern end bay of the elevation and rises the full height of the dwelling. The bay is fenestrated by 1/1, double-hung, vinyl-sash windows with concrete-lug sills and two-course rowlock brick segmental arches on the second story. A one-story, one-bay porch is located on the first story of the western end bay. It has a half-hipped roof clad with asphalt shingles. The roof is supported by metal filigree posts.

Site Notes:

March 2010: This rowhouse is located on the south side of G Street, N.E., and is set back approximately ten feet from the brick sidewalk. The dwelling is sited on a flat lot planted with immature shrubs and enclosed by a stone retaining wall. It is adjacent to 721 and 717 G Street, N.E. A stone walkway leads from the sidewalk and travels towards the primary and basement entrances. A small yard enclosed by a wood fence is located at the rear (south) of the dwelling.

Turned concrete balusters encircle the porch, which is accessed via the concrete steps with brick wing walls in the western end bay. A flat roof with an ogee-molded metal cornice and exposed rafter tails covers the porch and is supported by square brick posts. The porch foundation is pierced by an opening that leads to a basement entry. This opening was not visible due to mature plantings in the front yard.

The rear (south) elevation was not fully visible due to obstruction by rear fencing. The rear elevation has a corbeled brick cornice. A three-sided, canted bay extends from the eastern end bay of the elevation and rises the full height of the dwelling. The bay is fenestrated by 2/2, double-hung, wood-sash windows with concrete-lug sills and two-course rowlock brick segmental arches on the second story.

Site Notes:

March 2010: This rowhouse is located on the south side of G Street, N.E., and is set back approximately ten feet from the brick sidewalk. The dwelling is sited on a flat, grassy lot planted with mature shrubs and enclosed by a stone retaining wall. It is adjacent to 725 and 721 G Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. A small yard enclosed by a wood fence is located at the rear (south) of the dwelling.

Outbuilding Notes:

March 2010: This one-story, one-bay garage (ca. 1950s) has a sloped roof. The east elevation is faced with stretcher-bond brick. Metal coping caps the elevation, and a header course runs below the coping. A paneled metal roll-up garage door

with lights pierces the east elevation and is highlighted by a soldier brick lintel. A concrete driveway provides access to the garage from 8th Street, N.E.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by John M. Henderson from the design of William C. Allard, this two-story, three-bay dwelling is one of six rowhouses constructed from permit #4068. This Colonial Revival-style dwelling is constructed of brick and is set on a solid concrete foundation. The façade (north elevation) is faced with stretcher-bond brick. The building is capped with a sloping roof that is complemented by a false mansard clad with fish scale slate shingles. The dwelling also has an ogee-molded metal cornice and scroll modillions below. The mansard is pierced by a front gable pedimented dormer with paired single-light wood windows. The sloping roof is pierced by an interior brick chimney with parged cap. The westernmost bay on the first story holds a single-leaf wood French door with a one-light transom. The opening is highlighted by a concrete-lug lintel. The foundation is pierced by a sliding vinyl window with concrete lug lintel. All other openings on the façade hold 1/1, double-hung, vinyl-sash windows and feature concrete-lug sills and lintels. A one-story, one-bay porch is located on the facade and is set on a solid brick foundation. Square metal balusters encircle the porch, which is accessed via the stone steps with metal hand rails in the western end bay. A flat roof with an ogee-molded metal cornice covers the porch and is supported by metal Doric columns atop square brick piers. An opening in the easternmost bay of the foundation of the porch leads to a single-leaf paneled wood door with lights.

The side (east) elevation received the same material treatment as the main block. The mansard roof continues on this elevation and is pierced by front gable dormers with paired one-light fixed wood windows. A three-sided rectangular bay projects from the southernmost bay and rises the full height of the dwelling. All foundation-level openings hold sliding vinyl windows with concrete-lug lintels, and all other openings hold 1/1, double-hung, vinyl-sash windows with concrete-lug sills and lintels. The rear (south) elevation is fenestrated by a single-leaf paneled door with lights and single-light transom in the western end bay. A 1/1, double-hung, vinyl-sash window highlights the doorway to the west, and the entry is set in a two-course rowlock brick segmental arch. The elevation is further fenestrated by 1/1, double-hung, vinyl-sash windows with concrete-lug sills and two-course rowlock brick segmental arches.

Site Notes:

March 2010: This end-unit rowhouse is located on the south side of G Street, N.E., southeast of the intersection of G and 8th Streets, N.E. The dwelling is sited on a flat, grassy corner lot enclosed by a milled point metal fence and is set back approximately ten feet from the brick sidewalk. It is adjacent to 723 G Street, N.E. to the west. A stone walkway leads from the sidewalk and travels towards the primary and basement entrances. A small yard enclosed by a staggered wood fence and a garage with opening onto 8th Street, N.E. are located at the rear (south) of the dwelling.

Outbuilding Notes:

March 2010: This one-story, one-bay garage was constructed by William Cowell in 1915 (permit #4273). The brick structure is set on a solid concrete foundation and has a paneled metal roll-up garage door with a metal lintel on the east elevation that

provides vehicle access from the rear brick alleyway. The garage is capped by a sloped roof.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Designed and constructed by M.L. Gottwals in 1910, this two-story, two-bay Queen Anne-style dwelling is one of four dwellings constructed from permit #4778. It is similar in design to two other rowhouses, constructed at the same time, from permit #4777. The dwelling is constructed of brick and is set on a solid, raised concrete foundation faced with brick. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A false mansard roof runs along the façade (west elevation) and is clad with slate fish scale shingles. The mansard is complemented by an ogee-molded metal cornice. A molded string course runs below a plain brick frieze. The southernmost bay of the first story holds a single-leaf paneled wood door with lights. The opening is highlighted by a semicircular stained glass transom topped by a semicircular concrete arch with keystone. Brick-faced steps with brick wing walls provide access to a brick stoop with brick balustrade and the main entry. A three-sided, canted bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and has corbeled brick cornices on the sides. The bay is capped by a pyramidal roof with slate fish scale shingles and a metal finial. Window openings on the basement and second stories hold 1/1, double-hung, vinyl-sash windows and are highlighted by concrete-lug sills and lintels. A basement entry in the southernmost bay holds a single-leaf paneled wood door with lights.

A two-story ell extends from the northernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. A two-story metal porch with a sloped roof is located on the rear of the ell. The rear elevation was not fully visible due to the garage and fencing. The second story is fenestrated by a single-leaf door with lights with a brick segmental arch and a 1/1, double-hung, vinyl-sash window with a brick segmental arch. The porch is supported by metal posts and has a metal balustrade. The rear elevation of the main block is fenestrated with a 1/1, double-hung, vinyl-sash window with brick segmental arch on the second story. An exterior brick chimney with parged cap is located in the southeast corner of the ell.

Site Notes:

March 2010: This rowhouse is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and is adjacent to 627 and 631 7th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is dotted with immature shrubs and foundation plantings and is enclosed by a metal bow and picket fence. A garage and small yard are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Designed and constructed by M.L. Gottwals in 1910, this two-story, two-bay Queen Anne-style dwelling is one of two dwellings constructed from permit #4777. It is similar in design to four dwellings to the south constructed at the same time from permit #4778. The dwelling is constructed of brick and is set on a solid, raised concrete foundation faced with brick. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A false mansard roof runs along the façade (west elevation) and is clad with slate fish scale shingles. The mansard is complemented by an ogee-molded metal cornice. A molded string course runs below a plain brick frieze. The southernmost bay of the first story holds a single-leaf paneled metal door. The door opening is highlighted by a semicircular one-light transom set in a semicircular concrete arch with keystone. Brick steps with brick wing walls provide access to a brick stoop with brick balustrade and the main entry. A three-sided, canted bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and has corbeled brick cornices on the sides. The bay is capped by a pyramidal roof with slate fish scale shingles and a metal finial. All window openings on the façade, except the foundation, hold 1/1, double-hung windows (materials not discernible) and are highlighted by concrete-lug sills and lintels. The foundation of the bay is pierced by 1/1, double-hung, wood-sash windows with concrete-lug sills and lintels. A basement entry in the southernmost bay holds a single-leaf door (materials not visible).

A two-story ell extends from the northernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. A two-story wood porch is located on the rear of the ell. The porch has a flat roof and is supported by square wood posts. The porch also features wood and metal balustrades. Single-leaf paneled wood doors with lights, one-light rectangular transoms, and rowlock brick segmental arches provide access to the porch on the first and second stores. The rear is also fenestrated with 1/1, double-hung windows (materials not visible) set in rowlock brick segmental arches. An exterior brick chimney with corbeled brick cap is located in the southwest corner of the ell.

Site Notes:

March 2010: This attached single dwelling is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and is adjacent to 631 and 635 7th Street, N.E. A brick walkway leads from the sidewalk and travels towards the primary and basement entrances. The small front yard is enclosed by a metal milled point fence. A garage and small yard, enclosed by a wood fence, are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Designed and constructed by M.L. Gottwals in 1910, this two-story, two-bay Queen Anne-style dwelling is one of four dwellings constructed from permit #4778. It is similar in design to two other rowhouses, constructed at the same time, from permit #4777. The dwelling is constructed of brick and is set on a solid, raised concrete foundation. The façade (west elevation) and foundation have been faced with permastone. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A false mansard roof runs along the façade and is clad with slate fish scale shingles. The mansard is complemented by an ogee-molded metal cornice. The southernmost bay of the first story holds a single-leaf wood-frame glass door that provides access to an inner vestibule. The exterior opening is highlighted by a semicircular one-light transom topped by a semicircular splayed permastone arch with keystone. An interior door opening holds a single-leaf paneled wood door with lights. Carpet-clad steps with permastone-faced wing walls provide access to a stoop with permastone-faced balustrade and the main entry. A three-sided, canted bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and is capped by a pyramidal roof with slate fish scale shingles and a metal finial. The façade is fenestrated with 1/1, double-hung, vinyl-sash windows highlighted by concrete-lug sills and splayed permastone lintels with keystone. A basement entry in the southernmost bay holds a single-leaf paneled wood door with lights.

A two-story ell extends from the northernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. A two-story wood porch with a sloped roof is located on the rear of the ell. The rear elevation was not fully visible due to a two-story wood staircase that provides access to the second story. Both the first and second stories are fenestrated by a single-leaf door with a one-light transom and brick segmental arch in the northern end bay and a double-hung window with a concrete-lug sill and a brick segmental arch in the southern end bay. The foundation is also pierced by a 1/1, double-hung, vinyl-sash window with a brick segmental arch and concrete-lug sill. The porch is supported by square wood posts and has a square wood balustrade. The rear elevation of the main block and the south elevation of the ell are fenestrated with 1/1 and 2/2, double-hung sash windows (materials not discernible) with concrete-lug sills and brick segmental arches. An exterior brick chimney with parged corbeled cap is located in the southeast corner of the ell.

Site Notes:

March 2010: This rowhouse is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and is adjacent to 627 and 631 7th Street, N.E. A concrete walkway faced with carpet leads from the sidewalk and travels towards the primary and basement entrances. The small grassy front yard is dotted with immature shrubs and is enclosed by a metal bow and picket fence. A small brick patio and brick parking area are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Designed and constructed by M.L. Gottwals in 1910, this two-story, two-bay Queen Anne-style dwelling is one of four dwellings constructed from permit #4778. It is similar in design to two other rowhouses, constructed at the same time, from permit #4777. The dwelling is constructed of brick and is set on a solid, raised concrete foundation faced with brick. A sloping roof caps the dwelling and an interior brick chimney pierces the roof. A false mansard roof runs along the façade (west elevation) and is clad with slate fish scale shingles. The mansard is complemented by an ogee-molded metal cornice. A molded string course runs below a plain brick frieze. The southernmost bay of the first story holds a single-leaf wood-frame glass door. The opening is highlighted by a rectangular transom topped by a splayed concrete arch with keystone. Concrete steps with brick wing walls and metal railings provide access to a brick stoop with metal balustrade and the main entry. A three-sided, canted bay rises the full height of the dwelling and projects from the northernmost bay of the façade. The bay has the material treatment of the main block and has corbeled brick cornices on the sides. The bay is capped by a pyramidal roof with slate fish scale shingles and a metal finial. All window openings on the facade hold 1/1, double-hung, vinyl-sash windows and are highlighted by concrete-lug sills and lintels. A basement entry in the southernmost bay holds a single-leaf door that was obscured by a metal security gate.

A two-story ell extends from the southernmost bay of the rear (east) elevation and is original. The ell is constructed of brick and is set on a solid foundation. A two-story wood porch with a sloped roof is located on the rear of the ell. The first story of the porch has been screened in. The rear elevation was not fully visible due to the garage and fencing. The first story has wood steps leading up to the enclosed porch and a door opening. The first story of the ell holds a single-leaf door and a 1/1, double-hung, vinyl-sash window. The second story is fenestrated by a single-leaf paneled wood door with lights and a rectangular one-light transom with a brick segmental arch and a 1/1, double-hung, vinyl-sash window with a brick segmental arch. The porch is supported by square wood posts and has a square wood balustrade. An exterior brick chimney with parged cap is located in the northeast corner of the ell.

Site Notes:

March 2010: This rowhouse is located on the east side of 7th Street, N.E. The dwelling is set back approximately ten feet from the concrete sidewalk and is adjacent to 625 and 629 7th Street, N.E. A concrete walkway leads from the sidewalk and travels towards the primary and basement entrances. The small grassy front yard is dotted with immature shrubs and is enclosed by a metal bow and picket fence. A garage and small yard are located at the rear (east) of the dwelling. A brick alley is also located east of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival (Italianate)

Exterior & Architectural Notes:

March 2010: Designed and constructed in 1927 by H.C. Ball, this two-story, five-bay building was constructed from permit #4869. Influenced by the Italianate and Colonial Revival styles, the building, constructed of brick and tile, is set on a solid concrete foundation. At the time of construction, the building served as a five-family apartment building. The T-shaped structure is set on a solid concrete foundation and the façade (east elevation) is faced with seven-course American-bond brick. The building is capped with a flat roof that is complemented on the façade by an ogee-molded metal cornice and a parapet wall with a pedimented stepped gable. The parapet is edged with metal coping. A decorative concrete swag panel is inlaid below the gable of the parapet. The plain brick frieze is decorated with concrete roundels. A molded metal string course spans the façade above the first story openings. The southernmost bay on the first story holds a single-leaf, paneled wood door highlighted by a large single-light transom. The central bay holds a single-leaf paneled wood door with lights highlighted by a rectangular one-light transom and soldier brick lintel. The northernmost bay holds a single-leaf paneled metal door with semicircle light and a blind transom. Two one-story rectangular storefronts project from the first story on the façade. These storefronts have flat roofs with ogee-molded metal cornices. The southern projection has large fixed windows on a solid stretcher-brick balustrade with a rowlock brick sill. A commercial sign is located atop the storefront. The northern storefront is faced with vertical wood board siding and is fenestrated with two 1/1, double-hung, vinyl-sash windows. Three fixed clerestory windows are located above the storefront. Openings on the second story hold single and paired 1/1, double-hung, vinyl-sash windows with rowlock brick sills and soldier brick lintels.

The rear (west) elevation received the same material treatment as the façade. It is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with rowlock brick sills and soldier brick lintels. Entryways hold single-leaf flush wood doors and paneled wood doors with lights.

Site Notes:

March 2010: This building is located on the west side of 8th Street, N.E. and is set back approximately ten feet from the brick sidewalk. It is adjacent to 624 and 634 8th Street, N.E. Brick walkways lead from the sidewalk and travel towards the three primary entrances. There are two small grassy yards. A small yard bordered by a wood picket fence is located at the rear (west) of the dwelling. A concrete-paved parking area and a brick alley are also located to the west of the property.

Modern

Exterior & Architectural Notes:

March 2010: This three-story, two-bay modern building is comprised of multiple units. The building, under construction in 2010, is set on a solid concrete foundation. The building has a raised basement. The structure is capped by a flat roof pierced by three interior chimneys with parged caps. A single-leaf metal-frame glass door with a one-light transom is located on the first story of the façade (east elevation). The building is further fenestrated by paired one-light metal casement windows between one-light transoms. Large fixed windows over smaller fixed windows with transoms are located on the façade, and sliding glass doors with transoms are located on the third story. A two-story, rectangular projecting bay is located on the northernmost bay of the façade. It is mostly glass and is fenestrated in the same manner as the main block. The rear (west) elevation has two single-leaf metal-frame glass doors with transoms on the first story. Large fixed windows with transoms also fenestrate the rear elevation. The door opening and windows are sheltered by an individual metal pent roof. The second story has a single-leaf doors with transom. The third story holds casement windows with fixed windows above and below. A raised basement is also visible from the rear alleyway.

Site Notes:

March 2010: This building is located on the west side of 8th Street, N.E. and fronts onto the brick sidewalk. It is adjacent to 622 and 624B 8th Street, N.E. Construction was underway during the time of the survey, so the yard was not visible from the public right-of-way. A rear yard was under construction at the west of the building.
