Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick string courses are located above the foundation and first story openings. A side-gabled roof caps the dwelling and is covered with asphalt shingles. A soldier brick string course spans the façade (west elevation) and is located beneath the eaves. A single-leaf metal door pierces the southernmost bay of the foundation. The southernmost bay of the façade is recessed forming an integrated porch and is pierced by a single-leaf paneled wood door with lights and a one-light transom. A stuccoed surround complements the opening. The second story opening holds sliding one-light vinyl windows. A three-sided, rectangular bay projects from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a front-gabled roof. The roof is covered with asphalt shingles and feature raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows and two-light fixed metal windows. A round-headed fixed light is positioned over the central opening of the second story. A soldier brick round-headed arch complements the light and continues as a string course. A stuccoed panel is located between the first and second story central openings. The north (side) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and sliding one-light vinyl windows. The rear (east) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows and a single-leaf paneled metal door with lights. A one-story, one-bay porch shelters the entrance and is set on a square wood post and concrete foundation. The shed roof is covered with asphalt shingles and is supported by square wood posts. A solid wood balustrade complements the porch.

Site Notes:

January 2010: This single-family dwelling is located on the east side of 8th Street, N.E and is set back approximately five feet from the concrete sidewalk. The south (side) elevation is adjacent to 717 8th Street, N.E. and an alley runs parallel to the north (side) elevation of the dwelling. The grassy front yard features mature shrubs and is bounded by a milled point metal fence. A concrete walkway leads from the primary entrance and ends at the sidewalk. A concrete parking bay is located east of the dwelling and is accessed from an alley. The grassy rear yard is bounded by wood fencing.

Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick string courses are located above the foundation, first, and second story openings. A fourth string course of header brick is located beneath the first and second story windows. A side-gabled roof caps the dwelling and is covered with asphalt shingles. A soldier brick string course spans the façade (west elevation) and is located beneath the eaves. A single-leaf door pierces the northernmost bay of the foundation. The northernmost bay of the façade is recessed forming an integrated porch with a quarter-circle opening and is pierced by a single-leaf paneled wood door and a one-light transom. A stuccoed surround complements the opening. The second story opening holds a two-light window. A three-sided, rectangular bay projects from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a shed roof. The roof is covered with asphalt shingles and feature raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows and paired one-light vinyl sliding windows. A quarter-circle fixed light is positioned over the central opening of the second story. A soldier brick quarter-circle arch complements the light and continues as a string course. A stuccoed panel is located between the first and second story central openings. The rear (east) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows and a single-leaf wood-frame glass door. A one-story, one-bay porch shelters the entrance and is set on a square wood post and concrete foundation. The shed roof is covered with asphalt shingles and is supported by square wood posts. A solid wood balustrade complements the porch.

Site Notes:

January 2010: This single-family dwelling is located on the east side of 8th Street, N.E. and is set back approximately five feet from the concrete sidewalk. The dwelling is adjacent to 715 and 719 8th Street, N.E. A milled point metal fence bound the front yard. A concrete walkway leads from the primary entrance and ends at the sidewalk. A concrete parking bay is located east of the dwelling and is accessed via the alley. The grassy rear yard is bounded by wood fencing.

Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick string courses are located above the foundation and first story openings. Additional header brick string courses are sited beneath the first and second story windows. A side-gabled roof caps the dwelling and is covered with asphalt shingles. A soldier brick string course spans the façade (west elevation) and is located beneath the eaves. A single-leaf metal door pierces the southernmost bay of the foundation. The southernmost bay of the façade is recessed forming an integrated porch and is pierced by a single-leaf paneled wood door with lights and a one-light transom. A stuccoed surround complements the opening. The second story opening holds paired one-light fixed windows. A three-sided, rectangular bay projects from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a front-gabled roof. The roof is covered with asphalt shingles and feature overhanging eaves and raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows and a circular fixed window in the upper gable end. The circular window is surrounded by rowlock bricks. The rear (east) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows and a single-leaf wood-frame glass door. A header brick string course travels across the rear elevation and is sited beneath the second story window openings. A one-story, one-bay porch shelters the entrance and is set on a square wood post and concrete foundation. The shed roof is covered with asphalt shingles and is supported by square wood posts. A solid wood balustrade complements the porch.

Site Notes:

January 2010: This single-family dwelling is located on the east side of 8th Street, N.E. and is set back approximately five feet from the concrete sidewalk. The dwelling is adjacent to 709 and 713 8th Street, N.E. The front yard is landscaped with mature shrubs and is bounded by a milled point metal fence. A concrete walkway leads from the primary entrance and ends at the sidewalk. The rear yard is landscaped with mature trees and is bounded by a wood fence. An alley is located east of the dwelling.

Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick string courses are located above the foundation, first, and second story openings. Additional string courses of header brick are located beneath the first and second story windows. A side-gabled roof caps the dwelling and is covered with asphalt shingles. A soldier brick string course spans the façade (west elevation) and is located beneath the eaves. A single-leaf metal door pierces the southernmost bay of the foundation. The southernmost bay of the façade is recessed forming an integrated porch with a quarter-circle opening and is pierced by a single-leaf paneled metal door with lights and a one-light transom. A stuccoed surround complements the opening. Poured concrete steps with metal hand rails provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay projects from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a shed roof. The roof is covered with asphalt shingles and feature raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows and fixed two-light vinyl windows. A quarter-circle fixed light is positioned over the central opening of the second story. A soldier brick quarter-circle arch complements the light and continues as a string course. A stuccoed panel is located between the first and second story central openings. The rear (east) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows, a two-light sliding vinyl window, and a single-leaf wood-frame glass door. A one-story, one-bay porch shelters the entrance and is set on a square wood post and concrete foundation that is covered with wood lattice. The shed roof is covered with asphalt shingles and is supported by square wood posts. Square wood balusters complement the porch.

Site Notes:

January 2010: This single-family dwelling is located on the east side of 8th Street, N.E. and is set back approximately five feet from the concrete sidewalk. The dwelling is adjacent to 701 and 705 8th Street, N.E. The front yard is landscaped with mature shrubs and is encircled by a milled point metal fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the concrete sidewalk. A concrete parking bay is located east of the dwelling and is accessed via an alley. The grassy rear yard is bounded by wood fencing.

Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick veneer string courses are located above the foundation, first, and second story openings. Additional header brick string courses are sited beneath the first and second story openings. A side-gabled roof caps the dwelling and is covered with asphalt shingles. The northernmost bay of the façade is recessed forming an integrated porch and is pierced by a single-leaf paneled door with lights and a one-light transom. A stuccoed surround complements the opening. The second story opening holds a two-light vinyl window (possibly fixed). A three-sided, rectangular bay projects from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a front-gabled roof. The roof is covered with asphalt shingles and feature raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. A round-headed fixed light is positioned over the central opening of the second story. A soldier brick round-headed arch complements the light and continues as a string course. A stuccoed panel is located between the first and second story central openings. The rear (west) elevation is stuccoed and is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows.

Site Notes:

January 2010: This single dwelling is located on the west side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 910 G Street, N.E. and 702 10th Street, N.E. The grassy front yard is landscaped with foundation plantings and is encircled by milled point metal fencing. A concrete walkway leads from the primary entrance and ends at the sidewalk. A concrete alley is located west of the dwelling.

Soldier brick string courses are located above the foundation, first, and second story openings. Additional header brick string courses are sited beneath the first and second story windows. A side-gabled roof caps the dwelling and is covered with asphalt shingles. The northernmost round-headed bay of the façade (east elevation) is recessed forming an integrated porch and is pierced by a single-leaf paneled door with a round-headed light and a one-light transom. A soldier-brick round-headed surround complements the recessed opening. A stuccoed surround complements the door. The second story opening holds a fixed circular window with a rowlock brick circular surround. A three-sided, rectangular bay projects from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a front-gabled roof. The roof is covered with asphalt shingles and feature overhanging eaves and raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. A circular fixed window is sited in the upper gable end and has a circular rowlock brick surround. The rear (west) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows and a single-leaf door. A one-story, one-bay porch shelters the entrance and is capped by a shed roof.

Site Notes:

January 2010: This single dwelling is located on the west side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 706 and 710 10th Street, N.E. The grassy front yard is landscaped with small shrubs and trees and is encircled with a milled point metal fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. A concrete alley is located west of the dwelling.

Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick veneer string courses are located above the foundation, first, and second story openings. Additional header brick string courses are sited beneath the first and second story windows. A side-gabled roof caps the dwelling and is covered with asphalt shingles. The southernmost bay of the façade is recessed forming an integrated porch and is pierced by a single-leaf paneled door with lights and a one-light transom. A stuccoed surround complements the opening. The second story opening holds paired one-light fixed windows. A three-sided, rectangular bay projects from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a front-gabled roof. The roof is covered with asphalt shingles and feature overhanging eaves and raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows and a circular fixed window in the upper gable end. The circular window is surrounded by rowlock bricks. The rear (west) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows and a single-leaf door. A one-story, one-bay shed shelters the door and has a shed roof.

Site Notes:

January 2010: This single dwelling is located on the west side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 708 and 712 10th Street, N.E. The landscaped front yard is planted with mature shrubs and is encircled with a milled point metal fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. A concrete alley is located west of the dwelling.

Exterior & Architectural Notes:

January 2010: Constructed c. 1990, this two-story, two-bay single-family dwelling is constructed of concrete blocks and is set on a solid, raised concrete block foundation; both are faced with stretcher-bond brick. Soldier brick veneer string courses are located above the foundation and first story openings. A side-gabled roof caps the dwelling and is covered with asphalt shingles. The southernmost bay of the façade is recessed forming an integrated porch and is pierced by a single-leaf wood door and a one-light transom. A stuccoed surround complements the opening. The second story opening holds sliding one-light vinyl windows. A three-sided, rectangular bay projects from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a front-gabled roof. The roof is covered with asphalt shingles and feature raking metal boards. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. A round-headed fixed light is positioned over the central opening of the second story. A soldier brick round-headed arch complements the light and continues as a string course. A stuccoed panel is located between the first and second story central openings. The north (side) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and sliding one-light vinyl windows. The rear (west) elevation is stuccoed and is pierced by single and paired 1/1, double-hung, vinyl-sash windows and a single-leaf door. A one-story, one-bay porch shelters the entrance and is capped by a shed roof.

Site Notes:

January 2010: This single dwelling is located on the west side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The south (side) elevation of the dwelling is adjacent to 716 10th Street, N.E. An alley is located north of the dwelling. The grassy front yard is landscaped with foundation plantings and is encircled by milled point metal fencing. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. A concrete alley is located west of the dwelling.

Gazebo

Outbuilding Notes:

January 2010: A gazebo, constructed c. 1995, is located north of the dwelling. The wood-frame gazebo is capped by an octagonal roof that is covered with asphalt shingles. A cupola tops the roof and is pierced by vents. Square wood balusters encircle the gazebo.

STYLE/EXTERIOR DATA

Architectural Style(s)

Modern

Exterior & Architectural Notes:

January 2010: Constructed in 1980, this eight-story, multiple-bay apartment building, now known as Capitol Hill Towers, is constructed of concrete blocks and is set on a solid concrete block foundation; both are faced with stretcher-bond brick. The apartment building is composed of two blocks; the eastern block extends from the southernmost bay of the east (side) elevation of the western block. A flat roof caps the building and is fronted by a short, brick parapet wall. Multiple balconies project from the façade (south elevation), east (side), and rear (north) elevations and are divided by projecting brick walls that rise the full height of the dwelling. Metal balusters enclose each balcony. The first story of the building does not feature balconies. The face of each balcony unit is stuccoed and is pierced by sliding vinyl-frame glass doors and paired one-light vinyl sliding windows. The first story units of the building are fenestrated with paired one-light vinyl sliding windows. The rear elevation is fenestrated by paired one-light vinyl sliding windows and also features balcony units. An awning extends from the easternmost bay of the façade of the western block and reaches the brick sidewalk. The awning shelters the primary entrance, which contains double-leaf metal doors and a one-light metal transom.

Site Notes:

January 2010: This apartment building is located on the north side of G Street, N.E. and is set back approximately 100-feet from the brick sidewalk. The building is sited on a level, grassy lot that features mature trees and shrubs, as well as foundation plantings. A metal picket fence bounds the southernmost boundary of the property and chain-link fencing edges the westernmost and easternmost boundaries of the property. The rear yard of the property is paved with asphalt and serves as a parking lot. The parking lot is encircled by a chain-link metal fence.

Exterior & Architectural Notes:

May 2009: This one-story, multi-bay shopping center was constructed from 1986 to 1987 and has space for approximately sixteen businesses. This building replaced a row of three-story stores. The L-shaped center is constructed of concrete blocks and is set on a solid concrete block foundation. The façade (north elevation) is mostly faced with stretcher-bond brick. A flat roof caps the building. Mock gables, featuring barrel vaults, rise from the roof and are covered with standing-seam metal. An arcade spans the entirety of the façade and supports the roof with square masonry posts that are faced with brick. Fenestration consists of one-light fixed metal storefront windows and single-leaf metal-frame glass doors with one-light metal transoms.

Site Notes:

May 2009: This free-standing shopping center is located on the south side of H Street, NE and is setback from the street. An asphalt parking lot fronts the stores. The lot is landscaped with mature shrubs.

STYLE/EXTERIOR DATA

Architectural Style(s)

Exterior & Architectural Notes:

May 2009: This one-story bank was constructed in 1988. The masonry building and solid foundation are veneered in stretcher-bond brick. On the east, south, and west elevations is a stringcourse made of tile. All elevations feature a wide band on concrete, which is located towards the top of the building. A flat roof is partially hidden behind a parapet wall veneered in stretcher-bond brick and finished with metal flashing. On the north (front) and south (rear) elevations of the building is a decorative, front-gabled pediment made of metal and featuring a segmental arch. Fenestration on the façade is made up of a band of one-light metal storefront windows with a wide concrete panel above. The western third of the façade is recessed, protected by an overhang that continues the concrete panel motif. The entry, which holds a double-leaf glass door in a metal frame, is located under the overhang. In the northern portion of the east (side) elevation are two examples of one-light fixed windows with a one-light, round-arched window above. On the south (rear) elevation is a two-bay carport that is supported by concrete columns. The only fenestration on the south elevation is a single-leaf window used by the bank teller. The west (side) elevation has a single-leaf metal door and a one-light fixed window with a one-light, round-arched window above.

Site Notes:

May 2009: This property is located on the southwest corner of the intersection between H Street, NE and 10th Street, NE. The building fronts a concrete sidewalk on its north and east elevations. An asphalt parking area is located in the rear, south of the building.
