**Non-Contributing**

Outbuilding Notes:

**February 2010: The tennis court is located off the west side of the Sherwood Recreation Center. The paved court is enclosed with a tall metal chain-link fence.**

February 2010: The basketball court is located southwest of the Recreation Center, just to the west of the asphalt paved parking lot. The paved court is enclosed with a tall metal chain-link fence.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Modern**

Exterior & Architectural Notes:

February 2010: The Sherwood Recreation Center was erected in 2003. The large, rectangular structure is two stories in height. The masonry building sits on a solid foundation and both the foundation and structure are faced with stretcher-bond brick. Brick buttresses are located on all four elevations. The hipped roof has wide overhanging eaves with a boxed cornice and is covered with standing-seam metal. The eaves are supported at regular intervals by plain knee brackets. The main entry is located on the east elevation. The double-leaf, metal-frame glass door is topped by a one-light transom and is flanked by full-height sidelights. Window openings hold large fixed metal-sash windows that appear in various configurations, including single, paired, tripled, and multiple-light. Second-story window openings on the secondary elevations sit over a parged spandrel. The south elevation contains a double-leaf, metal-frame glass door flanked by sidelights. A band of large fixed metal window spans the upper story above the entry. The northern end of the building contains a large gymnasium that is illuminated by clerestory windows. The north elevation of the building is fenestrated with large, full-height fixed metal windows and two single-leaf flush metal doors. The entries are reached by a set of concrete steps. All window openings on the north elevations are opaque. The west elevation holds large fixed windows and a double-leaf, metal-frame glass door topped by a transom and flanked by sidelights.

Site Notes:

February 2010: This recreation facility is located on the southwest corner of 10th Street, N.E. and G Street, N.E. The grassy lot slopes to the north and contains mature trees, shrubs, and foundation plantings. The lot is largely enclosed with metal fencing. Concrete walkways lead from the entries of the building to the street and encircle the building itself. A tennis court is located on the west side of the building. A short asphalt-paved walking track, a basketball court, and an asphalt paved parking lot are located south of the recreation center. Both the tennis and basketball courts are enclosed with tall chain-link fencing.

## STYLE/EXTERIOR DATA

Architectural Style(s)

### Modern (International Style)

Exterior & Architectural Notes:

**March 2010:** The Prospect Learning Center, formally the Anne M. Goding Elementary School, was constructed ca. 1959. The large, Modern, L-shaped structure is constructed of concrete block and is faced with seven-course American-bond brick. It sits on a solid foundation faced with stretcher-bond brick. The flat roof is pierced by aluminum ductwork and flues. The main block (southwest wing) rises four stories. The main entry is located on the south elevation and is recessed. Two sets of double-leaf, flush metal doors are topped by one-light transoms. The façade (south elevation) and rear (north) elevation have curtain walls of banded metal-sash windows. These openings hold fixed over fixed or fixed over awning windows. Some openings hold safety casement windows. The openings are set in aggregate concrete and have concrete sills. The west elevation contains a double-leaf, flush metal door with a three-light transom flanked by sidelights. The entry is sheltered by a self-supporting awning and is accessed via concrete steps with metal hand rails. Paired fixed or awning metal windows with fixed lights below and transoms above are located on the second, third, fourth, and fifth stories. Four sets of two-leaf flush metal doors with one-light transoms are located on the first story of the north elevation. This elevation is fenestrated in the same manner as the façade but has plain concrete sections on the first story with four clerestory windows. Metal safety screens protect some openings. The southeast wing is one story and is faced with stone. Wide, overhanging eaves shelter paired two-leaf flush metal doors with transoms on the east elevation. The overhanging eaves are supported by concrete brackets. An auditorium is located in the northeast corner. It is faced with brick and concrete with recessed panels and has two stories of windows covered by metal screens.

Site Notes:

**March 2010:** This school is located on the north side of F Street, N.E. between 9th and 10th Streets, N.E. The school is set back approximately fifteen feet from the brick sidewalk. The grassy lot slopes to the north and contains immature trees and shrubs. The lot is enclosed with milled point metal fencing and concrete walkways lead from the sidewalk to the building entries. A concrete- and asphalt-paved parking lot is located north of the building. The parking lot is partially enclosed by chain link metal fencing and a concrete retaining wall.
