STYLE/EXTERIOR DATA

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of ten rowhouses constructed from the same permit (#1). The dwelling is constructed of brick and is set on a solid, raised foundation. The façade (west elevation) is faced with stretcher-bond brick. A molded watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and is highlighted by a prominent molded metal cornice with modillions, dentil molding, end brackets and a frieze. An interior-side brick chimney rises from the north (side) elevation and has been partially parged. A single-leaf paneled door pierces the foundation. The northernmost bay of the first story holds a replacement, single-leaf paneled wood door with lights and a one-light transom. A simple molded hood with scrolled consoles surmounts the door opening, which is flanked by wood pilasters. Cast iron steps and railings provide access to the primary entrance. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows and have concrete sills and soldier brick segmental arches. The rear (east) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and glass blocks. All visible openings have concrete sills and soldier brick segmental arches.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 601 and 605 10th Street, N.E. The grassy front yard is encircled by metal milled point fencing. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is encircled by wood fencing.

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of ten rowhouses constructed from the same permit (#1). The dwelling is constructed of brick and is set on a solid, raised foundation. The façade (west elevation) is faced with stretcher-bond brick. A sloping roof caps the dwelling and is highlighted by a prominent molded cornice with modillions, dentil molding, end brackets and a frieze. An interior brick chimney rises from the north (side) elevation of the dwelling. A single-leaf paneled door with lights pierces the foundation. The northernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light transom. A simple molded hood with scrolled consoles surmounts the door opening, which is flanked by fluted wood pilasters. Poured concrete steps with metal hand rails provide access to the primary entrance. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows and have wood sills and soldier brick segmental arches. The rear (east) elevation is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows and double-leaf doors. The second story windows are set in segmental openings. A one-story, full-width deck extends from the rear elevation of the dwelling and is set on a wood post foundation.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 603 and 607 10th Street, N.E. The front yard is landscaped with mature shrubs and small trees. A metal hairpin and picket fence encircles the front yard. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is landscaped with mature shrubs and is encircled by wood fencing.

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of ten rowhouses constructed from the same permit (#1). The dwelling is constructed of brick and is set on a solid, raised foundation. The façade (west elevation) is faced with stretcher-bond brick. A brick watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and is highlighted by a prominent molded cornice with modillions, dentil molding, end brackets and a frieze. A single-leaf paneled wood door pierces the foundation. The northernmost bay of the first story holds a single-leaf paneled wood door and a one-light transom. A simple molded hood with scrolled consoles surmounts the door opening, which is flanked by wood pilasters. Steps with metal hand rails provide access to the primary entrance. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows and have concrete sills and soldier brick segmental arches. The rear (east) elevation is fenestrated with glass blocks, 1/1, double-hung, vinyl-sash windows and 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins. Double-leaf multi-light wood doors pierce the southernmost bay of the first story. The double-hung windows are topped by soldier brick segmental arches.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 609 and 613 10th Street, N.E. The landscaped front yard features mature shrubs and is encircled by a metal bow and picket fence. A brick walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is bounded by wood fencing. An alley is located east of the dwelling.

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of ten rowhouses constructed from the same permit (#1). The dwelling is constructed of brick and is set on a solid, raised foundation. The façade (west elevation) is faced with stretcher-bond brick. A brick watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and is highlighted by a prominent molded wood cornice with modillions, dentil molding, end brackets and a frieze. A single-leaf wood door with a diamond light pierces the foundation. The northernmost bay of the first story holds a single-leaf paneled wood door. A Colonial Revival-style surround complements the door and is composed of pilasters and a molded pediment. Poured concrete steps with metal hand rails provide access to the primary entrance. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins and have rowlock brick sills and soldier brick segmental arches. The rear (east) elevation is fenestrated with 1/1, double-hung, wood-sash windows and double-leaf wood-frame glass doors. The windows feature rowlock brick sills and soldier brick segmental arches. A one-story, full-width wood-frame deck extends from the rear elevation of the dwelling and is complemented by square wood balusters.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 611 and 615 10th Street, N.E. The grassy front yard is encircled by a metal bow and picket fence. A concrete walkway leads from the primary entrance and ends at the brick sidewalk. The rear yard is bounded by a wood fence. A concrete parking space and public alley are located east of the dwelling.

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of ten rowhouses constructed from the same permit (#1). The dwelling is constructed of brick and is set on a solid, raised foundation. The façade (west elevation) is faced with stretcher-bond brick. A brick watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and is highlighted by a prominent molded wood cornice with modillions, dentil molding, end brackets and a frieze. An interior-side brick chimney rises from the north (side) elevation. A single-leaf paneled wood door pierces the foundation. The northernmost bay of the first story holds a single-leaf paneled wood door. The entry is flanked by wood pilasters and topped by a paneled blind transom. All window openings on the façade hold 6/6, double-hung, wood-sash windows, which have header brick sills and soldier brick segmental arches. A one-story, full-width porch spans the façade and is set on a brick pier foundation. The flat roof of the porch is supported by metal filigree posts. Metal balusters encircle the porch which is accessed via steps in the northern end bay. The rear (east) elevation is fenestrated with 6/6, double-hung, wood-sash windows and single-leaf multi-light wood doors with blind transoms. All openings are topped by soldier brick segmental arches and the windows have concrete sills. An exterior-rear chimney rises from the center of the rear elevation. A one-story wood-frame deck extends from the northernmost bay and is set on a square wood post foundation.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the sidewalk. The dwelling is adjacent to 613 and 617 10th Street, N.E. The grassy front yard is landscaped with mature shrubs and small trees and is encircled by a metal bow and picket metal fence. The rear yard is bounded by a wood fence. A concrete parking space and public alley are located east of the dwelling.

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of ten rowhouses constructed from the same permit (#1). The dwelling is constructed of brick and is set on a solid, raised foundation. The façade (west elevation) is faced with stretcher-bond brick. A three-course brick watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and is highlighted by a prominent molded wood cornice with modillions, dentil molding, end brackets and a frieze. A single-leaf wood door with nine-lights pierces the foundation. The northernmost bay of the first story holds a single-leaf paneled wood door and a one-light transom. A simple molded hood with scrolled consoles surmounts the door opening, which is flanked by wood pilasters. Metal steps with metal hand rails provide access to the primary entrance. All window openings on the first and second stories of the façade hold 1/1, double-hung, vinyl-sash windows and have soldier brick segmental arches and header brick sills. The foundation is pierced by 6/6, double-hung, wood-sash windows. The rear (east) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf multi-light wood door. All openings are surmounted by soldier brick segmental arches and the windows also have header brick sills.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 619 and 623 10th Street, N.E. The grassy front yard is encircled by a wood picket fence with brick posts. A brick walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The grassy rear yard is bisected by a concrete walkway. Wood fencing edges the south and north boundaries of the rear yard. An alley is located east of the dwelling.

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1876, this two-story, three-bay Italianate-style single-family rowhouse is one of three rowhouses constructed from the same permit (#4). The dwelling is constructed of seven-course, American-bond brick and is set on a solid, raised and parged foundation. A three-course brick watertable spans the façade and is located above the foundation. A sloping roof caps the dwelling and is highlighted by a prominent molded wood cornice with modillions, dentil molding, end brackets and a frieze. An interior-side brick chimney rises from the north (side) elevation of the dwelling. A single-leaf paneled wood door with lights pierces the foundation. The northernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light transom. A simple molded hood with foliated consoles surmounts the door opening, which is flanked by wood pilasters. Brick steps with metal hand rails provide access to the primary entrance. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins and have soldier brick segmental arches and rowlock brick sills. The rear (east) elevation is fenestrated with a 1/1, double-hung, vinyl-sash window, a 1/1, double-hung, vinyl-sash window with false 6/6 vinyl muntins, and a single-leaf paneled metal door with lights. All openings are surmounted by soldier brick segmental arches and the windows also have rowlock brick sills.

A second story enclosed addition projects from the southernmost bay of the rear elevation and is noted on the 1928 Sanborn map. The wood-frame addition is clad with vinyl siding and is supported by square wood posts. A shed roof caps the addition, which is fenestrated with sliding one-light vinyl windows.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 621 and 625 10th Street, N.E. The front yard features mature trees and shrubs and is bounded by a metal milled point fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is edged with wood fencing. An alley is located east of the dwelling.

Garage

Outbuilding Notes:

March 2010: A one-story, one-bay garage is located east of the dwelling and was constructed c. 1925. The garage is constructed of five-course, American-bond brick and is set on a solid brick foundation. A sloping roof caps the garage. The façade (east elevation) is pierced by a single opening that is covered by a roll-up corrugated metal door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1890 by Charles A. Summerlott, this two-story, two-bay Queen Anne-style single-family dwelling was influenced by the Italianate style. The dwelling is constructed of brick and is set on a solid brick foundation; the façade (west elevation) is faced with pressed stretcher-bond brick. A three course brick watertable is located above the foundation. Brick sill courses span the façade below the first and second story window openings, which are also bisected by two other brick string courses. A sloping roof caps the dwelling and is highlighted by a molded cornice and corbeled brick cornice. An interior-side chimney rises from the south (side) elevation of the dwelling and is parged. A single-leaf wood door pierces the foundation of the dwelling. The northernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light wood transom. A soldier brick segmental arch with header cap surmounts the transom. Cast iron steps and railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay projects from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is fenestrated with 1/1, double-hung, vinyl-sash windows. All first and second story windows have concrete sills and soldier brick segmental arches with header brick caps. The foundation window is topped by a two-course, rowlock brick segmental arch. Decorative recessed brick panels divide the first and second stories. The south (side) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows, which have concrete sills and two-course, rowlock brick segmental arches. The rear (east) elevation is pierced by sliding glass doros and a 1/1, double-hung, vinyl-sash window.

A two-story, full-width porch extends from the rear (east) elevation of the dwelling and is first noted on the 1904 Sanborn map. This porch, judging by the materials, was constructed c. 1960. The wood-frame porch is set on a solid foundation and has a flat roof, which supports a second story deck. The first story has been partially enclosed with T-111 siding. Square wood balusters encircle the second story.

Site Notes:

March 2010: This single-family dwelling is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The north (side) elevation of the dwelling is adjacent to 631 10th Street, N.E. and a brick alley runs parallel to the south (side) elevation of the dwelling. The small grassy front yard directly abuts the brick sidewalk. A concrete walkway leads from the primary entrance and ends at the sidewalk. The rear yard is edged by wood fencing. An alley is located east of the dwelling.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by F.G. Hought, this two-story, two-bay Queen Anne-style single-family dwelling was constructed from the same permit (#0016) as 633 10th Street, N.E. The dwelling is constructed of brick and is set on a solid, raised brick foundation; the façade (west elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior chimney rises from the dwelling and is parged. A brick watertable spans the façade and is located above the foundation. Sill courses are located at the first and second stories. A string course, composed of nebule molding, spans the façade and is sited below the corbeled brick cornice. A single-leaf paneled metal door with a blind transom pierces the foundation. The northernmost bay of the first story holds a replacement, single-leaf paneled metal door with lights and a one-light wood transom. A soldier brick segmental arch with pearl molding surmounts the door opening, which is accessed via metal stairs. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay extends from the southernmost bay of the façade and rises the full height of the dwelling. The bay has the same material treatment as the main block and is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows. All windows on the façade have concrete sills and the first and second story openings are topped by soldier brick segmental arches with pearl molding. The foundation openings are topped by rowlock brick segmental arches. The rear (east) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows.

A two-story ell extends from the northernmost bay of the rear elevation and is original. The ell is constructed of brick and is set on a solid foundation. A sloping roof caps the ell. Visible fenestration consists of a 1/1, double-hung, vinyl-sash window and a single-leaf door with lights and a one-light transom. The openings are topped by two-course, rowlock brick segmental arches and the window has a concrete sill. The second story openings have been infilled with brick. A one-story, full-width deck projects from the rear elevation and features square wood balusters.

Site Notes:

March 2010: This two-story dwelling is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 629 and 633 10th Street, N.E. The grassy front yard is encircled by a metal milled point fence. The rear yard is paved with concrete and accessed via swing-out metal chain-link gates. An alley is located east of the dwelling.

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by F.G. Hought, this two-story, two-bay Queen Anne-style single-family dwelling was constructed from the same permit (#0016) as 631 10th Street, N.E. The dwelling is constructed of brick and is set on a solid, raised brick foundation; the façade (west elevation) is faced with pressed stretcher-bond brick. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior-side brick chimney rises from the north (side) elevation of the dwelling. A brick watertable spans the façade and is located above the foundation. Sill courses are located at the first and second stories. A string course, composed of nebule molding, spans the façade and is sited below the corbeled brick cornice. A single-leaf paneled wood door with lights and a one-light transom pierce the foundation. The southernmost bay of the first story holds a replacement, single-leaf paneled metal door with lights and a one-light wood transom. A self-supporting metal awning shelters the entry, which is also surmounted by a soldier brick segmental arch with pearl molding. Metal steps provide access to the entry. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the same material treatment as the main block and is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows. All windows on the façade have concrete sills and the first and second story openings are topped by soldier brick segmental arches with pearl molding. The foundation openings are topped by rowlock brick segmental arches. The rear (east) elevation is fenestrated with 2/2, double-hung, wood-sash windows.

A two-story ell extends from the southernmost bay of the rear elevation and is original. The parged ell is constructed of brick and is set on a solid foundation. A sloping roof caps the ell and is pierced by an interior brick chimney. Visible fenestration consists of a 1/1, double-hung, wood-sash window and a single-leaf paneled wood door with lights. The original transom opening is boarded. Wood steps provide access to the entry. The second story openings have been infilled with brick and are parged.

Site Notes:

March 2010: This two-story dwelling is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 631 and 635 10th Street, N.E. The front yard is landscaped with mature shrubs. The rear yard is enclosed with wood fencing. An alley is located east of the dwelling.

Garage

Outbuilding Notes:

March 2010: A one-story, one-bay garage is located east of the dwelling and was constructed c. 1925. Noted on the 1928 Sanborn map, the north (side) elevation of the garage is constructed of rock-faced concrete blocks and has been partially re-constructed with concrete blocks. The south (side) elevation is constructed of American-bond brick. A sloping roof caps the garage. The façade (east elevation) is pierced by a roll-up paneled metal door. The opening has also been partially infilled with wood weatherboard siding.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by Wright & Hopkins, this two-story, three-bay Classical Revival-style single-family rowhouse is one of three rowhouses constructed from the same permit (#6682). The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (west elevation) is faced with Flemish-bond brick. A brick sill course spans the first and second stories. A sloping roof caps the dwelling and is highlighted by a molded cornice with modillions. A single-leaf paneled metal door pierces the foundation. The southernmost bay of the first story holds a single-leaf paneled wood door and a one-light transom. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows and have concrete sills and lintels. Metal awnings shelter the second story openings. A one-story, two-bay porch spans the façade and is set on a stone foundation. The flat roof of the porch has overhanging eaves and is supported by battered stone posts that are set on stone supports. A metal awning projects from the façade of the porch. A 1/1, double-hung, vinyl-sash window pierces the rear (east) elevation. A three-sided, canted bay projects from the northernmost bay of the rear elevation and is original. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows. All window openings on the rear elevation have two-course, rowlock brick segmental arches and wood sills.

A one-story addition extends from the southern bay of the rear elevation and was constructed c. 1960. However, this addition was constructed on the footprint of an earlier addition that is noted on the 1928 Sanborn map. The wood-frame addition is constructed with T-111 siding and is capped by a shed roof. The roof is covered with asphalt shingles.

Site Notes:

March 2010: This rowhouse is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 633 and 637 10th Street, N.E. The front yard is bounded by metal milled point fencing. An alley is located east of the dwelling.

Classical Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by Wright & Hopkins, this two-story, three-bay Classical Revival-style single-family rowhouse is one of three rowhouses constructed from the same permit (#6682). The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (west elevation) is faced with Flemish-bond brick. A brick sill course spans the first and second stories. A sloping roof caps the dwelling and is highlighted by a molded cornice with modillions. A single-leaf metal door and paired sliding one-light windows pierce the foundation. The southernmost bay of the first story holds a single-leaf wood-frame glass door and a one-light transom. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows with false 6/1 vinyl muntins and have concrete sills and lintels. A one-story, full-width porch spans the façade and is set on a brick pier foundation. The half-hipped roof of the porch has overhanging eaves and is supported by fluted Tuscan columns that are set on brick supports. Square wood balusters encircle the porch, which is accessed via poured concrete steps with brick wing walls in the southern end bay.

A two-story, full-width addition is located on the rear (east) elevation and was constructed c. 2008. The wood-frame addition is clad with Hardiplank siding and is set on a solid foundation. A sloping roof caps the addition. Visible fenestration consists of a single-leaf wood-frame glass door with a one-light transom and tripartite windows composed of 1/1, double-hung, vinyl-sash windows with false 6/1 vinyl muntins.

Site Notes:

March 2010: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 635 and 639 10th Street, N.E. The grassy front yard is bounded by a concrete curb. The rear yard is bounded by wood fencing. An alley is located east of the dwelling.

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by Wright & Hopkins, this two-story, three-bay Classical Revival-style single-family rowhouse is one of three rowhouses constructed from the same permit (#6682). The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (west elevation) is faced with Flemish-bond brick. A brick sill course spans the first and second stories. A sloping roof caps the dwelling and is highlighted by a molded cornice with modillions. A single-leaf wood-frame glass door and a one-light fixed wood window pierce the foundation. Both are topped by two-course, rowlock brick segmental arches. The southernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light transom. All window openings on the façade hold 1/1, double-hung, wood-sash windows and have concrete sills and lintels. A one-story, two-bay porch spans the façade and is set on a rock-faced concrete block pier foundation. The half-hipped roof of the porch has overhanging eaves and is supported by Tuscan wood columns that are set on brick supports. Square wood balusters encircle the porch, which is accessed via poured concrete steps with rock-faced concrete block wing walls in the southern end bay. A single-leaf wood-frame glass door with a one-light transom and 1/1, double-hung, wood-sash windows pierce the rear (east) elevation. A three-sided, canted bay projects from the northernmost bay of the rear elevation and is original. Visible fenestration consists of 1/1, double-hung, wood-sash windows. All window openings on the rear elevation have two-course, rowlock brick segmental arches and wood sills.

Site Notes:

March 2009: This two-story rowhouse is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 637 and 641 10th Street, N.E. The grassy front yard is landscaped with small shrubs. The rear yard is edged by wood fencing. An alley is located east of the dwelling.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed c. 1905, this two-story, two-bay Queen Anne-style single-family dwelling is constructed of five-course, American-bond brick and is set on a solid foundation. The façade (west elevation) is faced with stretcher-bond brick. A sloping roof caps the dwelling and is highlighted by a corbeled brick cornice. The southernmost bay of the façade holds a single-leaf paneled wood door and a one-light transom. A stone lintel tops the transom. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, canted bay extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is fenestrated with 1/1, double-hung, vinyl-sash windows. All windows on the façade have concrete sills and stone lintels. The foundation openings have been infilled with brick.

A two-story ell extends from the southernmost bay of the rear (east) elevation and was constructed c. 1910. The ell is parged and is set on a solid foundation. An interior brick chimney pierces the sloping roof and is partially parged. Visible fenestration consists of 6/6, double-hung, wood-sash windows and a 1/1, double-hung, vinyl-sash window. All windows are set in square-edged wood surrounds. A single-leaf door pierces the rear elevation. A one-story, two-bay porch extends the length of the rear elevation and is set on a solid foundation. The shed roof is covered with asphalt shingles and is supported by square wood posts. Wood lattice serves as a balustrade.

Site Notes:

March 2010: This two-story dwelling is located on the east side of 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The south (side) elevation of the dwelling is adjacent to 639 10th Street, N.E. A concrete schoolyard is parallel to the north (side) elevation of the dwelling. The front yard is landscaped with mature shrubs and foundation plantings and is encircled by a metal hairpin and picket fence. A brick walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The grassy rear yard is edged by wood fencing and is bisected by a stone pathway. An alley is located east of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by Joseph B. Williamson, this two-story, two-bay Queen Anne-style single-family dwelling was influenced by the Italianate style and is one of three rowhouses constructed from the same permit (#0369). The dwelling is constructed of brick and is set on a solid brick foundation; the façade (south elevation) is faced with pressed stretcher-bond brick. A brick sill course spans the façade beneath the second story windows. Molded brick string courses are located above the first and second story openings. A string course, composed of fret molding and flanked by stretcher bricks, is sited below the first story openings. Decorative panels are sited above the second story openings and are lined by nailmolded bricks. A sloping roof caps the dwelling and is highlighted by a molded cornice with bead molding and brick dentils. A single-leaf paneled metal door with leaded lights pierces the foundation and is topped by a two-course, rowlock brick segmental arch. The recessed westernmost bay of the first story holds a single-leaf paneled wood door with lights and a painted transom. A one-story, one-bay porch shelters the entrance and is set on the cast iron stoop. The shed roof of the porch is supported by square wood posts. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and features chamfered corners. Fenestration consists of 1/1, double-hung, vinyl-sash windows. The foundation and second story openings of the façade have gauged brick jack arches. The first story openings have gauged brick segmental arches. All windows have concrete sills. The rear (north) elevation is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled door with lights and a six-light transom. All windows are set in segmental openings and have concrete sill. A one-story, full-width deck extends from the rear elevation and is wood-frame construction. Square wood balusters encircle the deck.

Site Notes:

March 2010: This rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The east (side) elevation of the dwelling is adjacent to 1006 F Street, N.E. The grassy front yard is landscaped with mature shrubs and is encircled by a metal picket fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is enclosed with wood fencing.

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by Joseph B. Williamson, this two-story, two-bay Queen Anne-style single-family dwelling was influenced by the Italianate style and is one of three rowhouses constructed from the same permit (#0369). The dwelling is constructed of brick and is set on a solid brick foundation; the façade (south elevation) is faced with Permastone. A sloping roof caps the dwelling and is highlighted by a molded cornice with bead molding. A single-leaf paneled wood door pierces the foundation. The recessed westernmost bay of the first story holds a single-leaf paneled wood door and a one-light transom. A segmental arch of Permastone tops the transom. Cast iron steps and railings provide access to the door opening. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and features chamfered corners. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a one-light fixed vinyl window. The foundation and second story openings of the façade have Permastone jack arches. The first story openings have Permastone segmental arches. The rear (north) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled door. All windows are topped by two-course, rowlock brick segmental arches. Two openings on the first story have been infilled with brick.

Site Notes:

March 2010: This two-story rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 1004-1004B and 1008 F Street, N.E. The front yard is encircled by a wood picket fence. The rear yard is bounded by wood fencing.

Queen Anne

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by Joseph B. Williamson, this two-story, two-bay Queen Anne-style single-family dwelling was influenced by the Italianate style and is one of three rowhouses constructed from the same permit (#0369). The dwelling is constructed of brick and is set on a solid brick foundation; the façade (south elevation) is faced with pressed stretcher-bond brick. A brick sill course spans the façade beneath the second story windows. Molded brick string courses are located above the first and second story openings. A string course, composed of fret molding and flanked by stretcher bricks, is sited below the first story openings. Decorative panels are sited above the second story openings and are lined by nailmolded bricks. A sloping roof caps the dwelling and is highlighted by a molded cornice with bead molding and brick dentils. A single-leaf paneled metal door with lights pierces the foundation and is topped by a two-course, rowlock brick segmental arch. The westernmost bay of the first story holds a single-leaf paneled metal door and a one-light transom. Cast iron steps and railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A three-sided, rectangular bay extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and features chamfered corners. Fenestration consists of 1/1, double-hung, vinyl-sash windows and one-light fixed vinyl windows. The foundation and second story openings of the façade have gauged brick jack arches. The first story openings have gauged brick segmental arches. All windows have concrete sills. The rear (north) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows. All windows have concrete sills and two-course, rowlock brick segmental arches.

Site Notes:

March 2010: This two-story rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 1010 and 1006 F Street, N.E. The grassy front yard is encircled by a metal hairpin and picket fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. A wood fence edges the rear yard. A concrete-paved parking space and an alley are located north of the dwelling.

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (south elevation) is faced with pressed stretcher-bond brick. Recessed panels, containing a band of reed molding flanked by bands of bead molding, are located between the first and second story openings. A three-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. A string course, composed of reed molding, spans the façade and is located between the first and second story openings and also bisects the first story openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior-rear brick chimney rises from the northwest corner of the building and has a parged corbeled cap. A single-leaf paneled wood door pierces the foundation. The recessed westernmost bay of the first story holds a single-leaf paneled wood door with lights and a one-light transom. A stone lintel tops the transom. Cast iron steps and railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick segmental arch with pearl molding surmounts the window opening. A three-sided, rectangular bay with chamfered corners extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a pyramidal roof of square butt and fishscale slate shingles. A finial tops the roof. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (north) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows, a single-leaf paneled wood door with lights, and a single-leaf paneled metal door with lights. All openings are topped by two-course, rowlock brick segmental arches and the windows have vinyl-clad sills. A one-story wood-frame deck extends from the rear elevation of the dwelling and is set on a square wood post foundation. A solid wood balustrade complements the roof.

Site Notes:

March 2010: This two-story rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 1008 and 1012 F Street, N.E. The small front yard is landscaped with small trees and is encircled by a metal bow and picket fence. Wood fencing encloses the rear yard of the property. An alley is located north of the dwelling.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (south elevation) is faced with pressed stretcher-bond brick. Recessed panels, containing a band of reed molding flanked by bands of bead molding, are located between the first and second story openings. A three-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. A string course, composed of reed molding, spans the façade and is located between the first and second story openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior-rear brick chimney rises from the northwest corner of the building and has a corbeled cap. A single-leaf paneled wood door with lights pierces the foundation. The recessed westernmost opening of the first story holds a single-leaf paneled metal door with lights and a one-light transom. The round-headed primary opening is highlighted by a soldier brick round-headed arch with stone imposts and keystone. Cast iron steps and railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick segmental arch with pearl molding surmounts the window opening, which has a stone sill. A three-sided, rectangular bay with chamfered corners extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a pyramidal roof of square butt and fishscale slate shingles. A finial tops the roof. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (north) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf multi-light wood door with a one-light transom. All openings are topped by two-course, rowlock brick segmental arches and the windows have vinyl-clad sills. A one-story wood-frame deck extends from the rear elevation of the dwelling and is set on a square wood post foundation. Square wood balusters complement the roof.

Site Notes:

March 2010: This two-story rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 1012 and 1016-1016B F Street, N.E. The front yard is landscaped with small trees and is encircled by metal bow and picket fencing. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is encircled by metal chain-link fencing. An alley is located north of the dwelling.

A string course, composed of reed molding, spans the façade and is located between the first and second story openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior-rear brick chimney rises from the northwest corner of the building and has a corbeled cap. A single-leaf paneled wood door with a blind transom pierces the foundation. The recessed westernmost opening of the first story holds a single-leaf paneled metal door and a one-light fanlight. The round-headed primary opening is highlighted by a soldier brick round-headed arch with stone imposts and keystone. Cast iron steps and railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick segmental arch with pearl molding surmounts the window opening. A three-sided, rectangular bay with chamfered corners extends from the easternmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block. A brick crowstep parapet rises from the bay and features decorative pearl molding. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (north) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf door with a one-light transom. All openings are topped by two-course, rowlock brick segmental arches. The windows have sills. A one-story, full-width wood-frame deck extends from the rear elevation of the dwelling and is set on a square wood post foundation.

Site Notes:

March 2010: This two-story rowhouse is located on the north side of F Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 1014 and 1018 F Street, N.E. The front yard is landscaped with mature shrubs and is encircled by a metal bow and picket fence. The rear yard is bounded by fencing. An alley is located north of the dwelling.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, three-bay Queen Anne-style rowhouse is one of fourteen rowhouses constructed from the same permit. The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. A four-course, stretcher-bond brick watertable encircles the dwelling and is located above the foundation. Brick beltcourses are located beneath the first and second story window openings, between these openings, and bisecting the first story openings. Several of the beltcourses feature reed molding. The roofing type was obscured by a brick parapet, which features decorative checkerboard brick panels. A molded cornice and corbeled brick cornice finish the roof. An interior brick chimney rises from the northwest corner of the dwelling and has a corbeled brick cap. The central bay of the façade holds double-leaf paneled wood doors with lights and a one-light transom. Panels with reed molding and panels with bead molding flank the entry. A one-story, one-bay porch shelters the primary entrance. The flat roof of the porch has flared, overhanging eaves, which are supported by metal posts set on the stoop. Metal balusters encircle the roof of the porch, which serves as a second story deck for a single-leaf multi-light wood door. A single-leaf wood door with a diamond light pierces the foundation and is located below the porch. Three-sided, rectangular bays extend from the end bays of the façade and rise the full height of the dwelling. Each bay has chamfered corners with half-round brick molding and has the same material treatment as the main block. Pyramidal roofs with decorative slate shingles cap each bay. Finals top each roof. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows and paired one-light vinyl casement windows. One-light transoms top the central bay of the first story. All first and second story openings on the façade have soldier brick segmental arches with pearl molding. The foundation openings are topped by soldier brick segmental arches. All windows have stone sills. Decorative panels with bead molding are located between the first and second story of the central bay.

A three-sided, rectangular bay projects from the south (side) elevation and has the same material treatment as the bays on the façade. Fenestration is consistent with the façade.

The north (side) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf multi-light wood door with a one-light transom. All openings are surmounted by two-course, rowlock brick segmental arches.

A one-story, full-width addition is located on the north elevation of the dwelling and was constructed c. 1920. The addition extends from the foundation of the dwelling and serves as a garage. The addition is constructed of brick and is set on a solid foundation. A flat roof caps the addition and supports a deck. The east elevation is fenestrated with a 1/1, double-hung, vinyl-sash window and a roll-up paneled metal door. The north elevation is fenestrated with one-light windows (possibly casement), which have concrete sills and two-course, rowlock brick segmental arches.

Site Notes:

March 2010: This two-story rowhouse is located on the northwest corner of 11th Street, N.E. and F Street, N.E. and is set back approximately five feet from the brick sidewalk. The west (rear) elevation of the dwelling is adjacent to 1020-1020B F Street, N.E. The grassy front and side yards are encircled by metal hairpin and picket fencing. A concrete walkway leads from the primary entrance facing 11th Street, N.E. and ends at the brick sidewalk. An alley is located north of the dwelling.

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of seven-course, American-bond brick and is set on a solid and raised brick foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. The foundation of the south (side) elevation is parged. A four-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. Brick string courses also are located between the first and second stories and bisect the first story window openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. A single-leaf opening pierces the foundation and is covered with plywood. The recessed southernmost opening of the first story holds a single-leaf wood-frame glass door and a transom opening. A stone lintel surmounts the transom opening. The second story opening holds a 1/1, double-hung, vinyl-sash window with false 6/6 vinyl muntins. A soldier brick segmental arch with pearl molding tops the window opening, which also has a stone sill. A three-sided, rectangular bay with chamfered corners extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a pyramidal roof. The roof is covered with square butt and fishscale slate shingles. A finial tops the roof. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows with false 4/4 vinyl muntins. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches.

A two-story, full-width addition is located on the rear (west) elevation of the dwelling and was constructed c. 2009. The wood-frame addition is clad with vinyl siding and is set on a solid parged foundation. A sloping roof caps the addition and features an overhanging eave along the west elevation. Fenestration consists of single-leaf wood-frame glass doors, fixed one-light windows, and one-light transoms. Several openings are boarded with plywood.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately five feet from the brick sidewalk. The north (side) elevation of the dwelling is adjacent to 614 11th Street, N.E. and a concrete alley runs parallel to the south (side) elevation of the dwelling. The front yard is encircled by metal chain-link fencing. The sloping rear yard ends at a public alley.

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. A four-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. Brick string courses also are located between the first and second stories. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior brick chimney pierces the roof and has a corbeled brick cap. A single-leaf paneled wood door with lights pierces the foundation and is topped by a one-light transom. The recessed southernmost opening of the first story holds a single-leaf paneled metal door and a one-light transom. A stone lintel surmounts the transom opening. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick segmental arch with pearl molding tops the window opening, which also has a stone sill. A three-sided, rectangular bay with chamfered corners extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a pyramidal roof. The roof is covered with square butt and fishscale slate shingles. A finial tops the roof. The frieze features a recessed panel composed of basketweave brick. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (west) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled door with lights and a one-light transom. All openings have two-course, rowlock brick segmental arches.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 614 and 618 11th Street, N.E. The front yard is bounded by a metal milled point fence. A brick archway provides an entry point from the public brick sidewalk to the front yard. An alley is located west of the dwelling.

Outbuilding Notes:

March 2010: Constructed c. 1950, this one-story, one-bay garage is located west of the dwelling. The garage is constructed of concrete blocks and is set on a solid concrete block foundation. A sloping roof caps the garage. The façade

(west elevation) is pierced by a roll-up paneled metal door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. A four-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. A string course spans the façade and is located between the first and second story openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. A single-leaf paneled wood door with lights pierces the foundation. The recessed southernmost opening of the first story holds a single-leaf paneled metal door with lights and a round-headed fanlight. The round-headed blind fanlight is highlighted by a soldier brick round-headed arch with stone imposts and keystone. Cast iron steps and railings provide access to the primary entrance. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick segmental arch with pearl molding surmounts the window opening. A three-sided, rectangular bay with chamfered corners extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block. A brick crowstep parapet rises from the bay and features decorative pearl molding. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (west) elevation is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows and a sliding glass doors. All window openings are set in segmental openings. A one-story, full-width wood-frame deck extends from the rear elevation of the dwelling and is set on a square wood post foundation.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 616 and 620 11th Street, N.E. The grassy front yard is enclosed with a metal chain-link fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is bounded by wood fencing. An alley is located west of the dwelling.

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. A four-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. A brick string course is also located between the first and second stories. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. A single-leaf paneled wood door with a blind transom pierces the foundation. The southernmost opening of the first story holds a single-leaf paneled wood door and a one-light transom. A stone lintel surmounts the transom opening. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick segmental arch with pearl molding tops the window opening, which also has a stone sill. A three-sided, rectangular bay with chamfered corners extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a pyramidal roof. The roof is covered with square butt and fishscale slate shingles. A finial tops the roof. The frieze is complemented by a recessed panel of basketweave brickwork. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (west) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and sliding glass doors. The windows are topped by two-course, rowlock brick segmental arches and have rowlock brick sills. Several openings have been altered. A one-story, full-width wood-frame deck extends from the rear elevation of the dwelling and is encircled by square wood balusters.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 620 and 624 11th Street, N.E. The front yard is bounded by a low, brick retaining wall, that is topped with English ivy. The rear yard is bounded by wood fencing. An asphalt-paved parking space and a public alley are located west of the dwelling.

Queen Anne

Exterior & Architectural Notes:

March 2010: Constructed in 1892 by J.T. Loveless, this two-story, two-bay Queen Anne-style single-family rowhouse is one of fourteen rowhouses constructed from the same permit (#2608). The dwelling is constructed of brick and is set on a solid and raised brick foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. A four-course brick watertable is located above the foundation. Sill courses are sited below the first and second story openings. Brick string courses also are located between the first and second stories and bisecting the first story window openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior brick chimney pierces the roof. A single-leaf metal door with lights pierces the foundation. The recessed southernmost opening of the first story holds a single-leaf paneled door with lights and a blind fanlight. A soldier brick round-headed arch with stone impostes and keystone surmount the blind fanlight. The second story opening holds a 1/1, double-hung, vinyl-sash window. A soldier brick round-headed arch with pearl molding tops the window opening, which also has a stone sill. A three-sided, rectangular bay with chamfered corners extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block. A brick parapet rises from the bay and features a decorative brick panel with dogtooth brickwork. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows. A one-light transom complements the central bay of the first story. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (west) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows, a single-leaf wood door, and single-leaf door. The windows complemented by two-course, rowlock brick segmental arches and concrete sills. A one-story, full-width deck extends from the rear elevation and is set on a post foundation. Square wood balusters encircle the deck. A metal awning shelters the first story of the rear elevation.

A one-story, full-width addition extends from the foundation of the rear elevation and was constructed c. 1965. The wood-frame addition is clad with horizontal siding and is capped by a shed roof.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately five feet from the brick sidewalk. The dwelling is adjacent to 620 and 624 11th Street, N.E. The front yard is landscaped with mature shrubs and is encircled by a metal milled point fence. A walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is landscaped with mature shrubs and trees and is bounded by wood fencing. A concrete walkway leads from the rear of the dwelling and terminates at the alley.

Brick string course are also located between the first and second stories and bisecting the first story openings. A sloping roof caps the dwelling and is highlighted by a molded cornice and a corbeled brick cornice. An interior-side brick chimney rises from the north (side) elevation and has a corbeled brick cap. A second interior brick chimney pierces the roof and is located near the rear (west) elevation. A single-leaf paneled door with lights and a one-light transom pierce the foundation. The recessed southernmost opening of the first story holds a single-leaf paneled wood door with leaded lights and a one-light transom. A stone lintel surmounts the transom opening. The second story opening holds a 1/1, double-hung, vinyl-sash window with false 6/6 vinyl muntins. A soldier brick segmental arch with pearl molding tops the window opening, which also has a stone sill. A three-sided, rectangular bay with chamfered corners extends from the northernmost bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is capped by a pyramidal roof. The roof is covered with square butt and fishscale slate shingles. A finial tops the roof. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows with false 4/4 vinyl muntins and one-light fixed vinyl windows with false twenty-light vinyl muntins. The first and second story openings are topped by soldier brick segmental arches with pearl molding and the foundation windows are highlighted by soldier brick segmental arches. The rear (west) elevation is parged and scored to imitate stone. The rear is fenestrated with 1/1, double-hung, vinyl-sash windows with false 4/4 and 6/6 vinyl muntins and double-leaf paneled doors with lights. The windows are topped by two-course, rowlock brick segmental arches and have concrete sills.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately five feet from the brick sidewalk. The south (side) elevation of the dwelling is adjacent to 622 11th Street, N.E. The grassy front yard is bounded by a metal hairpin and picket fence. A brick walkway runs parallel to the north (side) elevation of the dwelling. The rear elevation is bounded by wood fencing. An alley is located west of the dwelling.

Modern

Exterior & Architectural Notes:

March 2010: Constructed c. 1970, this two-story, three-bay Modern apartment building is constructed of concrete blocks and is faced with five-course, American-bond brick. The building is set on a solid, concrete block foundation and is raised. A flat roof caps the building and is highlighted with metal coping. The northernmost bay of the façade (east elevation) slightly projects from the primary elevation. The façade is fenestrated with paired one-light metal sliding window and tripartite windows composed of a central one-light fixed metal window and flanking one-light sliding metal windows. All openings have concrete sills. Decorative concrete blocks are located above the second story windows of the central and southernmost bays. A single-leaf paneled metal door with lights pierces the south (side) elevation. The side (north and south) and rear (west) elevations have fenestration that is consistent with the façade.

Site Notes:

March 2010: This two-story apartment building is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The free-standing building is sited on a level, grassy lot that features mature trees and shrubs, as well as foundation plantings. A metal hairpin and picket metal fence encircles the property. A brick walkway runs parallel to the south (side) elevation of the dwelling. A brick alley is located north of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1917, this two-story, five-bay Colonial Revival-style apartment building was constructed from the same permit as 642 11th Street, N.E. The building is constructed of brick and is set on a solid concrete block foundation; the façade (east elevation) is faced with five-course, American-bond brick. A brick sill course spans the façade and is located below the second story window openings. Soldier brick string courses travel the façade above the first and second story openings and are flanked by string courses of rowlock brick. A sloping roof caps the building and is highlighted by a molded wood cornice and molded architrave. The central opening of the first story holds a single-leaf paneled wood door and a one-light transom. A square-edged wood surround complements the opening, which is topped by a gauged brick jack arch with concrete keystones. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins and have concrete sills. The rear (west) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins. These openings have concrete sills and two-course, rowlock brick segmental arches.

A two-story block extends from the center bay of the rear elevation and is original. The block is constructed of brick and is faced with irregular-coursed, American-bond brick. The block is set on a solid foundation and is capped by a sloping roof. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins and single-leaf doors with one-light transoms. The first story openings are topped by three-course, rowlock brick segmental arches and the second story openings are topped by two-course, rowlock brick segmental arches. The second story openings of the rear elevation have been altered and once held fenestration similar to the first story. A two-story, full-width porch has been removed.

Site Notes:

March 2010: This two-story apartment building is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The north (side) elevation of the dwelling is adjacent to 642 11th Street, N.E. The grassy front yard is landscaped with mature shrubs and foundation plantings and is encircled by a metal milled point fence. A concrete walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is grassy and edged by metal chain-link fencing. An alley is located west of the dwelling.

Soldier brick string courses travel the façade above the first and second story openings and are flanked by string courses of rowlock brick. A sloping roof caps the building and is highlighted by a molded wood cornice and molded architrave. The central opening of the first story holds a single-leaf wood-frame door with leaded glass and a one-light transom. A canopy shelters the primary entrance. All window openings on the façade hold 1/1, double-hung, wood-sash windows and have concrete sills. The rear (west) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows. These openings have concrete sills and two-course, rowlock brick segmental arches.

A two-story block extends from the center bay of the rear elevation and is original. The block is constructed of brick and is faced with irregular-coursed, American-bond brick. The block is set on a solid foundation and is capped by a sloping roof. An interior-side brick chimney rises from the south (side) elevation of the dwelling and has a parged cap. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows and single-leaf paneled wood doors with one-light transoms. The second story openings are topped by two-course, rowlock brick segmental arches. A two-story, full-width porch projects from the rear elevation and is set on a square wood pier foundation. Each story is encircled by square wood balusters and is accessed by wood steps.

Site Notes:

March 2010: This two-story apartment building is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 640 and 644 11th Street, N.E. The grassy front yard is landscaped with mature shrubs and is encircled by a metal milled point metal fence. The rear yard is paved with concrete and serves as a parking area. An alley is located west of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1898 by S. Carr, this two-story, two-bay Italianate-style single-family dwelling was constructed from the same permit (#1110) as 646 11th Street, N.E. The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. Brick sill courses span the façade beneath the first and second story window openings and a third string course is located above the second story openings. A sloping roof caps the dwelling and is highlighted by a molded metal cornice and a corbeled brick cornice. The northernmost bay of the façade holds a single-leaf paneled wood door and a one-light transom. A concrete lintel surmounts the transom. The façade is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows. All window openings have concrete sills and lintels. The rear (west) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows, which have two-course, rowlock brick segmental arches and concrete sills.

A two-story ell extends from the northernmost bay of the rear elevation and is original to the dwelling. The ell is constructed of five-course, American-bond brick and is set on a solid foundation. A sloping roof caps the ell. An interior-side brick chimney rises from the south (side) elevation of the dwelling and has a parged cap. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf paneled door with lights and a blind transom. All openings are surmounted by two-course, rowlock brick segmental arches. The windows have concrete sills.

Site Notes:

March 2010: This two-story dwelling is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 642 and 646 11th Street, N.E. The front yard is landscaped with mature shrubs and is bounded by a metal bow and picket fence. A brick walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard is grassy and features mature trees. Wood fencing edges the property. An alley is located west of the dwelling.

Garage	

Outbuilding Notes:

March 2010: Constructed c. 1970, this one-story, one-bay garage is located west of the dwelling and replaced an earlier two-story garage. The wood-frame garage is clad with German vinyl siding and is set on a solid foundation. A sloping roof caps the garage and is covered with corrugated metal. The façade (west elevation) is pierced by a roll-up paneled metal door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: Constructed in 1898 by S. Carr, this two-story, two-bay Italianate-style single-family dwelling was constructed from the same permit (#1110) as 644 11th Street, N.E. The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (east elevation) is faced with pressed stretcher-bond brick. Brick sill courses span the façade beneath the first and second story window openings and a third string course is located above the second story openings. A sloping roof caps the dwelling and is highlighted by a molded metal cornice and a corbeled brick cornice. The northernmost bay of the façade holds a single-leaf paneled metal door and a one-light transom. A stone lintel surmounts the transom. The façade is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows. All window openings have concrete sills and stone lintels.

A two-story ell extends from the northernmost bay of the rear elevation and is original to the dwelling. The ell is constructed of five-course, American-bond brick and is set on a solid foundation. A sloping roof caps the ell. An interior-side parged chimney rises from the south (side) elevation of the dwelling. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows. All openings are surmounted by two-course, rowlock brick segmental arches and have concrete sills.

Site Notes:

March 2010: This two-story rowhouse is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 644 and 648 11th Street, N.E. The grassy front yard is landscaped with foundation plantings and is bounded along the sidewalk by a brick curb. A brick walkway leads from the primary entrance of the dwelling and ends at the sidewalk. The rear yard features mature trees and is bounded by wood fencing.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1910 by Ketcham & Carmody, this two-story, three-bay Classical Revival-style multiple dwelling was constructed from permit #6589. The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (east elevation) is faced with stretcher-bond brick. Brick sill courses span the façade and are located beneath the first and second story window openings. A sloping roof caps the dwelling and is fronted along the façade by a molded cornice. A molded architrave is located above the second story openings. The end bays of the façade hold single-leaf paneled wood doors with transoms. The southernmost transom is composed of stained glass. The second story openings hold 1/1, double-hung, vinyl-sash windows. A three-sided, canted bay extends from the central bay of the façade and rises the full height of the dwelling. The bay has the material treatment of the main block and is fenestrated with 1/1, double-hung, vinyl-sash windows and one-light fixed vinyl windows. The foundation is pierced by paired 1/1, double-hung, vinyl-sash windows. All windows on the façade have concrete sills and lintels.

A two-story ell extends from the northernmost bay of the rear (west) elevation and is original. The ell is constructed of brick and is set on a solid foundation. A sloping roof caps the ell. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows and single-leaf wood-frame glass doors with one-light transoms. A two-story porch projects from the rear elevation of the ell and is wood-frame construction. The roof is supported by square wood posts.

Site Notes:

March 2010: This two-story multiple dwelling is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 646 and 652 11th Street, N.E. The grassy front yard is landscaped with mature shrubs. Twin concrete walkways lead from the end bays of the dwelling and terminate at the sidewalk. The rear yard is enclosed with metal chain-link fencing.

Classical Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1908 by H.R. Howenstein, this two-story, three-bay Classical Revival-style single-family dwelling was constructed from the same permit (#3883) as 658 11th Street, N.E. The dwelling is constructed of five-course, American-bond brick and is set on a solid concrete foundation; the façade (east elevation) is faced with Flemish-bond brick. A sloping roof caps the dwelling and is fronted along the façade by a molded cornice with modillions. A molded architrave spans the façade and is located above the second story window openings. An interior-side brick chimney rises from the north (side) elevation and has a corbeled brick cap. A single-leaf paneled door with lights pierces the foundation. The southernmost opening of the façade holds a single-leaf paneled wood door. The door entry is flanked by sidelights and topped by a semi-elliptical spiderweb fanlight. A two-course, rowlock brick semi-elliptical arch highlights the transom. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows with false 6/6 vinyl muntins and have concrete sills and lintels. A one-story, one-bay porch shelters the primary entrance and central bay of the façade and is set on a brick pier foundation that has been infilled with wood lattice. A flat roof with overhanging eaves and dentil molding caps the porch and is supported by brick posts. Metal balusters encircle the porch, which is accessed via poured concrete steps in the southernmost end bay.

Site Notes:

March 2010: This two-story dwelling is located on the west side of 11th Street, N.E. and is set back approximately ten feet from the brick sidewalk. The south (side) elevation of the dwelling is adjacent to 648 11th Street, N.E. The front yard is landscaped with mature shrubs and is bounded by a metal bow and picket fence.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1908 by H.R. Howenstein, this two-story, five-bay Classical Revival-style single-family dwelling was constructed from the same permit (#3883) as 652 11th Street, N.E. The dwelling is constructed of five-course, American-bond brick and is set on a solid concrete foundation; the façade (east elevation) and north (side) elevations are faced with Flemish-bond brick. A sloping roof caps the dwelling and is fronted along the façade and north elevation by a brick parapet with a molded cornice and modillions. A molded architrave spans the façade and north elevation and is located above the second story window openings. The central bay of the first story holds a single-leaf paneled metal door and a one-light transom. Sidelights flank the door opening, which is sheltered by a one-story, one-bay porch, which is set on a brick pier foundation that has been infilled with glass blocks. The flat roof of the porch has overhanging eaves and dentil molding and is supported by metal posts. Metal balusters encircle the porch, which is accessed via brick steps in the central bay. The roof of the porch features decorative metal balusters. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows and feature concrete sills and lintels. The foundation is pierced by one-light vinyl windows (possibly awning). The north (side) elevation has fenestration that is consistent with the façade. The south (side) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf wood-frame glass door. The window openings on the south elevation are topped by two-course, rowlock brick segmental arches.

A one-story addition extends from the foundation of the south elevation of the dwelling and is possibly original. The addition is constructed of brick and has a flat roof. The east elevation is pierced by a roll-up paneled metal door. The roof is obscured by a wood fence.

Site Notes:

March 2010: This single-family dwelling is located on the southwest corner of 11th Street, N.E. and G Street, N.E. and is set back approximately ten feet from the brick sidewalk. The rear (west) elevation of the dwelling is adjacent to 1029 G Street, N.E. The front yard is landscaped with mature shrubs and is encircled by a metal bow and picket fence on top of a brick retaining wall.

Colonial Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1924 by W.E. Porter, this two-story, three-bay Colonial Revival-style rowhouse is one of three rowhouses and a church constructed from the same permit (#3882). The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (north elevation) is faced with Flemish-bond brick. A sloping roof caps the dwelling and is highlighted by a molded cornice with modillions. An interior-side brick chimney rises from the west (side) elevation of the dwelling and has a parged cap. A molded architrave spans the façade and is located above the second story window openings. A single-leaf paneled door with lights pierces the foundation of the façade. The easternmost bay of the first story holds a single-leaf paneled wood door. Sidelights flank the entry, which is topped by a semi-elliptical fanlight. A two-course, rowlock brick semi-elliptical arch highlights the fanlight. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows, which feature concrete sills and lintels. A one-story, one-bay porch is located on the façade and shelters the primary entrance and central bay. The porch is set on a brick pier foundation that is infilled with wood lattice and is capped by a flat roof supported by metal filigree posts. Overhanging eaves and dentil molding complement the roof. Metal balusters encircle the porch, which is accessed via poured concrete steps in the easternmost end bay. The rear (south) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows. These windows have two-course, rowlock brick segmental arches and sills.

A two-story, three-sided canted bay extends from the westernmost bay of the rear elevation and is original. The canted bay has the material treatment of the main block and is fenestrated with 1/1, double-hung, vinyl-sash windows. All windows have soldier brick flat arches.

Site Notes:

March 2010: This two-story rowhouse is located on the south side of G Street, N.E. and is set back approximately ten feet from the brick sidewalk. The east (side) elevation of the dwelling is adjacent to 1027 G Street, N.E. The raised front yard is bounded by a brick retaining wall. Poured concrete steps lead from the primary entrance of the dwelling and end at the sidewalk. The rear yard is bounded by metal chain-link fencing.

March 2010: Constructed in 1924 by W.E. Porter, this two-story, three-bay Colonial Revival-style rowhouse is one of three rowhouses and a church constructed from the same permit (#3882). The dwelling is constructed of brick and is set on a solid concrete foundation; the façade (north elevation) is faced with Flemish-bond brick. A sloping roof caps the dwelling and is highlighted by a molded cornice with modillions. An interior-side brick chimney rises from the west (side) elevation of the dwelling. A molded architrave spans the façade and is located above the second story window openings. A single-leaf paneled metal door with lights pierces the foundation of the façade and is topped by a concrete lintel. The easternmost bay of the first story holds a single-leaf paneled metal door with lights. Sidelights flank the entry, which is topped by a one-light transom. A two-course, rowlock brick arch highlights the transom. All window openings on the façade hold 1/1, double-hung, vinyl-sash windows, which feature concrete sills and lintels. A one-story, one-bay porch is located on the façade and shelters the primary entrance and central bay. The porch is set on a brick pier foundation that is infilled with decorative concrete block and is capped by a flat roof supported by brick posts. Overhanging eaves and dentil molding complement the roof. Metal balusters encircle the porch, which is accessed via poured concrete steps in the easternmost end bay. The rear (south) elevation is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows. These windows are set in segmental openings.

A two-story, three-sided canted bay extends from the westernmost bay of the rear elevation and is original. The canted bay is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows. All windows have sills and are set in segmental openings.

A one-story addition is located on the easternmost bay of the rear elevation and was constructed c. 1950. A wood-frame addition is noted on the 1928 Sanborn map, but judging by the materials, this addition is more recent. The wood-frame addition is clad with aluminum siding. A shed roof caps the addition.

Site Notes:

March 2010: This two-story rowhouse is located on the south side of G Street, N.E. and is set back approximately ten feet from the brick sidewalk. The dwelling is adjacent to 1025 and 1029 G Street, N.E. The raised front yard is landscaped with mature shrubs and is bounded along the sidewalk by a stone retaining wall. Poured concrete steps provide access to the primary entrance.

Gothic Revival

Exterior & Architectural Notes:

March 2010: This church was constructed in 1924 by W.E. Porter from the design of Vaughn Ferguson and Company (permit #3882). The Full Gospel Tabernacle Church is a five-course American-bond brick building and is set on a solid foundation. The building is capped by a front-gabled roof of asphalt shingles that is complemented by a stepped gabled parapet wall on the façade (east elevation). The roof features a molded metal cornice. The foundation is pierced by 1/1, double-hung, wood-sash screened windows with a soldier brick lintel course. The northern and southern bays on the first story of the façade hold large two-leaf metal-frame plexiglass doors with three-course rowlock brick arches with concrete keystones and soldier brick surrounds. The central bay holds a three-light stained glass window with the same setting as the door openings. A molded metal and concrete architrave spans the façade above the door openings. A rectangular, three-story bell tower rises from the southeast corner of the building and received the same material treatment as the main block. The tower has two additional architraves and is fenestrated by a 1/1, double-hung, screened window with a rowlock brick sill and a soldier brick lintel, one-light windows with soldier brick lintels, and round-headed vented openings with two-course rowlock brick arches with concrete keystones and imposts. The tower is capped by gabled parapet walls with metal coping and ornaments.

The south (side) elevation is fenestrated by five pointed arch openings with three 1/1, double-hung, wood-sash screened windows below fixed screened windows. The openings are highlighted by rowlock brick sills and two-course rowlock brick arches. The foundation is pierced by tripled 1/1, double-hung, vinyl-sash windows with false 4/4 muntins. The north elevation is fenestrated in the same manner. A two-story front-gabled bay with asphalt shingles projects from the western end bay of the elevation. The bay is fenestrated on the east elevation by a single-leaf metal door with one light that is accessed via metal steps with hand rails.

The rear (west) elevation has an exterior chimney with a corbeled cap. The elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with false 4/4 or 6/6 muntins. The openings are highlighted by rowlock brick sills. Vents are also located on this elevation. A two-story, three-sided canted bay with a half-hipped tin roof projects from the center of the rear elevation. The bay has dogleg brick corners. A single-leaf flush metal door is located on the first story, and three one-light wood windows with a rowlock brick sill are located at the top of the bay. Vent panels are located on the sides of the bay.

Site Notes:

March 2010: This building is located on the west side of 11th Street, N.E. and is set back approximately twenty feet from the brick sidewalk. The south (side) elevation is adjacent to a brick alley. A small grassy yard with a semicircular brick wall and sign is bounded by a milled point metal fence and concrete stairs and walkways lead from the sidewalk to the main and secondary entrances. A brick alley, a concrete parking area, and mechanical apparatus enclosed by chain link metal fencing are located at the rear of the building.

STYLE/EXTERIOR DATA

Architectural Style(s)

Romanesque Revival

Exterior & Architectural Notes:

March 2010: Constructed in 1889, this two-story, seven-bay Romanesque Revival-style school has a rectangular form. The building is constructed of brick and is set on a solid, raised brick foundation; both are faced with stretcher-bond brick. A multi-course brick watertable encircles the building and is located above the foundation. Multiple brick sill courses encircle the building and several full-height brick pilasters ornament the façade, side, and rear elevations. The roofing type and materials were not discernible from the public right-of-way. A molded cornice with brick dentils complements the roof. An interior brick chimney pierces the roof and has a concrete cap. A three-sided, rectangular bay extends from the center of the façade (west elevation) and rises the full-height of the building. Sharing the material treatment of the main block the bay has a fourth story, which serves as a bell tower. The open-air bell tower is pierced by semicircular openings, which are complemented by semi-circular brick arches with molded imposts. A pyramidal roof caps the bell tower and is covered with slate shingles. The bay is fenestrated with double-leaf metal doors with lights. The opening was originally larger and has been enclosed with wood weatherboard siding. A metal awning shelters the primary entrance and is spanned by a metal lintel with rosettes. Additional fenestration consists of 6/6, double-hung, wood-sash windows, which have concrete sills and four-course, rowlock brick segmental arches. The building is fenestrated with 6/6, double-hung, wood-sash windows, paired one-light vinyl sliding windows, and paired two-light wood casement windows. All first and second story openings have concrete sills and four-course, rowlock brick segmental arches.

The north and south (side) elevations feature a centrally located projecting gable. The gabled roof features a molded cornice and corbeled brick and is delineated on the elevation by corbeled brick pilasters. A six-light wood semicircular window pierces the tympanum of each gable and has a three-course, rowlock brick semicircular arch. A full-height, rectangular bay projects from the rear (east) elevation and has the material treatment of the main block. A gabled roof caps the bay and has a corbeled cornice. Fenestration consists of a single-leaf door, 6/6, double-hung, wood-sash windows, and a six-light wood semi-circular window (possibly fixed) in the upper gable end. A metal awning shelters the door and is topped by a metal lintel with rosettes.

Site Notes:

March 2010: This two-story school is located on the southeast corner of G Street, N.E. and 10th Street, N.E. and is set back approximately five feet from the brick sidewalk. The free-standing building is sited on a level lot that features minimal landscaping. The rear yard is enclosed with metal chain-link fencing.

STYLE/EXTERIOR DATA

Architectural Style(s)

Italianate

Exterior & Architectural Notes:

March 2010: This two-story, three-bay Italianate-style dwelling and store was constructed in 1876 from permit #5. Set on a solid foundation, this brick building, now a multiple dwelling, is faced with stretcher-bond brick on the second story of the façade (west elevation); the first story has been parged. The building is capped by a sloped roof that is complemented by a molded metal cornice and brick corbelling on the façade. A brick sill course is located below the second-story window openings, and molded brick string courses span the façade on the second story. A single-leaf paneled wood door with lights and a one-light transom is located in the northernmost bay of the first story. The southern bay holds a one-light vinyl picture window with a concrete-lug sill. Openings on the second story hold 1/1, double-hung, vinyl-sash windows with wood sills and splayed brick arches. A two-story rectangular bay projects from the southernmost bay of the façade and received the same material treatment as the façade. The bay has chamfered corners and is capped by a hipped roof of asphalt shingles. The bay is fenestrated by single and paired 1/1, double-hung, vinyl-sash windows with wood sills and splayed brick arches. A wide wood architrave is located above the first story openings. A one-story, one-bay porch spans the façade on the first story and is encircled by metal balusters. There is a flat roof above the porch with molded cornice that continues the architrave of the projecting bay.

The south (side) elevation has a wood parapet wall with overhanging eaves that features a molded cornice, modillions, scrolled brackets, and dentils. A single-leaf paneled wood door with lights and a wooden hood with scrolled brackets. The elevation is further fenestrated by 1/1, double-hung, vinyl-sash windows with wood sills and soldier brick segmental arches. The rear (east) elevation is fenestrated by 1/1, double-hung, vinyl-sash widows with wood sills and soldier brick segmental arches on the second story.

Site Notes:

March 2010: This building is located on the east side of 10th Street, N.E. at the intersection of 10th and F Streets, N.E. The building is set back approximately ten feet from the brick sidewalk. The grassy front yard wraps around to the side (south) elevation and contains mature shrubs, trees, and foundation plantings. The yard is bounded by a metal picket fence and a brick walkway leads from the sidewalk to the main entrance. A small area in the yard south of the dwelling has been enclosed by wood privacy fencing, and a small yard enclosed by wood privacy fencing is located east of the building.
