Non-Contributing

Outbuilding Notes:

October 2010: This one-story, one-bay garage, based on its form and materials, was constructed c. 1990. Set on a concrete slab, this wood-frame structure is clad in vertical board siding. A flat roof caps the garage, which includes a paneled, roll-up garage door fronting the rear alley.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1910 by Charles A. Peters, this Queen Anne-style rowhouse was one of three built under the same permit (#4287). Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brick along the façade (west elevation). A sloped roof caps the dwelling and includes an interior-side brick chimney along the south (side) elevation. A molded metal cornice with dentils across the façade completes the roofline. Fenestration of the façade consists of 1/1, double-hung, vinyl-sash windows with concrete sills and lug lintels. A single-leaf, paneled wood door with single-light transom is located in the northern bay. A full-height, canted bay defines the façade. The south and east elevations have 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story brick ell is located on the rear of the dwelling. The ell has a sloped roof and 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This semi-detached rowhouse is located on the east side of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. An alley runs south of the building. Mature shrubs and plantings line the small front yard, with metal stairs extending up to the elevated front entry. The backyard is enclosed with a wooden privacy fence and includes a garage fronting the rear alley.

Exterior & Architectural Notes:

October 2010: Constructed in 1910 by Charles A. Peters, this two-story, two-bay rowhouse is one of three built under the same permit (#4287). Set on a solid concrete foundation, this brick structure is faced in stretcher-bond brickwork. A sloped roof caps the dwelling with a molded metal cornice with dentils extending across the façade (west elevation). No chimney was visible. Fenestration of the façade consists of 1/1, double-hung, vinyl-sash windows with concrete sills and lug lintels. A full-height, canted bay projects from the front of the building. Window openings on the rear of the building hold 6/2, double-hung, wood-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell extends off the east (rear) elevation. Fenestration consists of 6/2, double-hung, wood-sash windows with two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This rowhouse is located east of Elliott Street and has a setback from the concrete sidewalk of approximately five feet. The small front yard has a metal stair extending to the elevated main entry. The property extends east to an alley. A paneled, roll-up metal door lines the backyard.

Exterior & Architectural Notes:

October 2010: Constructed in 1908 by Charles A. Peters, this two-story, two-bay, Queen Anne-style rowhouse was one of three built under the same permit (#2716). Set on a solid concrete foundation, this brick structure has stretcher brickwork. A sloped roof caps the dwelling and features a molded metal cornice with dentils across the façade (west elevation). An exterior chimney rises from the east (rear) elevation. Fenestration of the façade consists of 1/1, double-hung, vinyl-sash windows with rock-faced concrete sills and lug lintels. A full-height canted bay with rounded corners defines the façade. The east (rear) elevation of the main block was not visible from the public right-of-way.

A two-story, two-bay brick ell extends off the rear of the dwelling. Capped by a sloped roof, the ell is pierced with 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This rowhouse is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Immature foundation plantings line the front of the building. A metal stair provides access to the elevated main entry. Extending east to an alley, the rear of the property is enclosed by a fence and backed by a garage.

Outbuilding Notes:

October 2010: This one-story, one-bay garage was constructed ca. 1925. It is of masonry construction faced with stretcher-bond brick. Set on a solid concrete foundation, the garage has a shed roof with overhanging eaves and a paneled metal roll-

up door is located on the façade (east elevation).

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1908 by Charles A. Peters, this two-story, two-bay, Queen Anne-style rowhouse was one of three built under the same permit (#2716). Set on a solid concrete foundation, this brick structure has stretcher brickwork. A sloped roof caps the dwelling and features a molded metal cornice with dentils across the façade (west elevation). An exterior chimney rises from the east (rear) elevation. Fenestration of the façade consists of 1/1, double-hung, vinyl-sash windows with rock-faced concrete sills and lug lintels. A full-height canted bay with rounded corners defines the façade. The east (rear) elevation of the main block was not visible from the public right-of-way.

A two-story, two-bay brick ell extends off the rear of the dwelling. Capped by a sloped roof, the ell is pierced with 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This rowhouse is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Immature foundation plantings line the front of the building. A metal stair provides access to the elevated main entry. Extending east to an alley, the rear of the property is enclosed by a fence and backed by a garage.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1910 by Charles A. Peters, this two-story, two-bay rowhouse was one of three built under the same permit (#5000). This Queen Anne-style building has stylistic influences of the Classical Revival. Set on a solid concrete foundation, this brick structure has stretcher brickwork. A sloped roof caps the dwelling and features a molded metal cornice with dentils across the façade (west elevation). An exterior chimney rises from the east (rear) elevation. Fenestration of the façade consists of 1/1, double-hung, vinyl-sash windows and a two-light, vinyl-sash sliding window. All feature concrete sills and lug lintels. The main entry holds a single-leaf, paneled wood door with a single-light transom. A molded metal hood with scrolled brackets accentuates the door opening. A full-height canted bay with rounded corners defines the façade. The east (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay ell extends off the rear of the rowhouse. The brick structure has been parged on the east (rear) elevation. A sloped roof caps the ell and features a molded cornice. Fenestration consists of 1/1, double-hung, vinyl-sash windows and two-light, vinyl-sash sliding windows.

Site Notes:

October 2010: This rowhouse is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Immature foundation plantings line the front of the building. Brick steps lead up to a brick stoop with access to the elevated main entry. Extending east to an alley, the rear of the property is enclosed by a fence and backed by a garage.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1893 by owner/architect/builder Joseph Carr, this two-story, two-bay dwelling was one of two built under the same permit (#1747). The Queen Anne-style building with stylistic influences of the Italianate style is set on a solid concrete foundation. The brick structure is faced with stretcher bond brickwork across the façade (west elevation). A sloped roof caps the dwelling and features a molded metal cornice set on an elaborate corbeled brick table. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills. Lintels are either rock-faced concrete or brick segmental arches with pearl-molded accents. A full-height bay defines the façade. The east (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell extends from the rear of the building. Capped by a sloped roof, the ell features an interior-corner brick chimney. Window openings hold 1/1, double-hung, vinyl-sash windows with wood sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This rowhouse is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Immature foundation plantings line the front of the building. Metal steps provide access to a metal stoop and the elevated main entry. Extending east to an alley, the rear of the property is enclosed by a wood privacy fence.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1893 by owner/architect/builder Joseph Carr, this two-story, two-bay dwelling was one of two built under the same permit (#1747). The Queen Anne-style building with stylistic influences of the Italianate style is set on a solid concrete foundation. The brick structure is faced with stretcher bond brickwork across the façade (west elevation). A sloped roof caps the dwelling and features a molded metal cornice set on an elaborate corbeled brick table. Window openings on the façade hold 1/1, double-hung, wood-sash or single-light fixed sash. Concrete sills are supplemented by two-course brick sill strings. Lintels vary between rock-faced concrete or brick segmental arches with pearl-molded accents. A full-height bay with rounded corners defines the façade. The east (rear) elevation has 2/2, double-hung, wood-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell extends from the rear of the building. Capped by a sloped roof, the ell features an interior-corner brick chimney. Window openings hold 2/2, double-hung, wood-sash windows with wood sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This rowhouse is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Immature foundation plantings line the front of the building. Metal steps provide access to a metal stoop and the elevated main entry. Extending east to an alley, the rear of the property is enclosed by a wood privacy fence overgrown with vines.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1895 by S.M. Carr, this two-story, two-bay Queen Anne-style dwelling has exhibits stylistic influences of the Italianate style. Set on a solid concrete foundation, this brick structure has stretcher brickwork on the façade (west elevation). A sloped roof covers the dwelling and includes a molded metal cornice set atop an elaborate corbeled brick table. Window openings on the façade have 1/1, double-hung, vinyl sash with concrete sills and rock-faced concrete lug lintels. A single-light, vinyl-sash awning window with segmental arch pierces the basement. A full-height canted bay defines the front of the dwelling. Fenestration of the east (rear) elevation consists of 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay ell extends off the back of the building. Constructed of brick, the ell has seven-course, American-bond brickwork and is capped by a shed roof. An interior-corner brick chimney pierces the roof. Window openings hold 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This dwelling is located on the east side of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. The south elevation is attached to a building of the same size and scale while the north elevation is adjacent to a much larger building. Mature plantings and shrubs landscape the small front yard, which includes brick steps with metal railing up to the elevated main entry. Extending east to an alley, the backyard is enclosed by a wooden privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1895 by Salomon Carr, this three-story, two-bay single-family dwelling is composed of a two-story main block with a full-height, projecting bay on the façade and a three-story ell extending from the rear (east) elevation. An exercise in the Queen Anne style, this large dwelling exhibits stylistic influences of the Italianate style. Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brickwork across the façade (west elevation). A sloped roof caps the dwelling and features a molded metal cornice set above an elaborate corbeled brick table. An exterior-side brick chimney rises along the south (side) elevation. A full-height, three-sided canted bay defines the façade. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows. Each has a concrete sill and a molded soldier brick segmental arch with nail-head drip molding. Two-course brick sill strings compliment the openings. Fenestration of the east (rear) elevation consists of 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A three-story, two-bay brick ell extends off the rear of the dwelling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with rowlock brick sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This dwelling is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Landscaping of the small front yard consists of mature shrubs and ground cover. A brick retaining wall extends aside the sidewalk, meeting with brick steps providing access to the elevated main entry. The property extends east to an alley and is enclosed by a wooden privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1903 by Salomon Carr, this three-story, two-bay multiple dwelling is composed of a two-story main block with a full-height, projecting bay on the façade and a three-story ell extending from the rear (east) elevation. An exercise in the Queen Anne style, this large dwelling exhibits stylistic influences of the Italianate style. Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brickwork across the façade (west elevation). A sloped roof caps the dwelling and features a molded metal cornice set above an elaborate corbeled brick table. A chimney was not visible from the public right-of-way. A full-height, three-sided canted bay defines the façade. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows. Each has a concrete sill and either a rock-faced concrete lintel or two-course, rowlock brick segmental arch with nail-head drip molding. The recessed door opening (north bay) holds a single-leaf, paneled wood door with a three-course, rowlock brick arch. Two-course brick sill strings compliment the openings. Fenestration of the east (rear) elevation consists of 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A three-story, two-bay brick ell extends off the rear of the dwelling. A shed roof caps the ell. Fenestration consists of 1/1, double-hung, vinyl-sash windows with rowlock brick sills and two-course, rowlock brick segmental arches. A single-leaf, wood-frame glass door has been installed on the second-story of the rear of the ell. The door opening has no egress.

Site Notes:

October 2010: This dwelling is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. The front yard has not been landscaped. Brick steps with metal railing provide access to the elevated main entry. The property extends east to an alley and is enclosed by a wooden privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by Salomon Carr, this three-story, two-bay single-family dwelling is composed of a two-story main block with a full-height, projecting bay on the façade. An exercise in the Queen Anne style, this large dwelling exhibits stylistic influences of the Italianate and Romanesque styles. Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brickwork across the façade (west elevation). A shed roof caps the dwelling and features a molded metal cornice set above an elaborate corbeled brick table. An interior-side chimney rises along the north side of the building. A full-height, three-sided rounded bay defines the façade. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills and rock-faced concrete lug lintels. Two-course brick sill strings compliment the openings. The north and east elevations are pierced by 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This semi-detached dwelling is located east of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Mature shrubs dot the small front yard. Brick steps provide access to the elevated main entry. A narrow alley extends north of the building. The property extends east to an alley and is enclosed by a wooden privacy fence.

Architectural Style(s)

Classical Revival

Italianate

Exterior & Architectural Notes:

October 2010: Constructed in 1892 by Salomon Carr, this two-story, two-bay dwelling was one of two built under the same permit (#2576). The Classical Revival-style single-family dwelling has influences of the Italianate style. Set on a solid brick foundation, this brick structure is faced with stretcher-bond brick across the façade (west elevation). Secondary elevations have a six-course, American-bond brick veneer. Capped by a sloped roof, the dwelling includes two interior-side brick chimneys. A molded metal cornice set on a corbeled brick table defines the roofline along the façade. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills and rowlock brick segmental arches with pearl accents. Window openings on the south (side) and east (rear) elevation contain 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. Single-light fixed windows pierce the foundation along the side of the dwelling.

A one-story porch spans across the rear of the dwelling. The north half has been enclosed with vertical board siding and is pierced by 1/1, double-hung, vinyl-sash windows.

Site Notes:

October 2010: This semi-detached dwelling is located on the east side of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. A brick alley extends to the south of the building. Mature trees line the front of the building, which includes metal stairs extending up to the elevated main entry. The backyard extends east to an alley and is enclosed with a wooden privacy fence set on a brick retaining wall.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: Constructed in 1892 by Salomon Carr, this two-story, two-bay dwelling was one of two built under the same permit (#2576). The Classical Revival stylings of the building have been altered with the application of Permastone. Set on a solid brick foundation, the brick structure has been faced with Permastone on the façade (west elevation). A sloped roof caps the dwelling and has a molded metal cornice. Permastone covers a corbeled brick table. Window openings on the façade hold single-light fixed and 1/1, double-hung, vinyl sash with Permastone-molded sills and keystone arches. The east (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell projects from the rear of the dwelling. Capped by a shed roof, the ell has 1/1, double-hung, vinyl-sash windows with rowlock brick sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: Located on the east side of Elliott Street, this dwelling is setback approximately five feet from the concrete sidewalk. The small front yard is enclosed by a milled point fence and includes immature plantings. A metal stair extends to the elevated main entry. Enclosed by a wooden privacy fence, the backyard extends east to an alley.

Outbuilding Notes:

October 2010: This one-story, one-bay prefabricated shed, based on its form and materials, appears to have been constructed c. 1995. The wood-frame structure is clad in T-111 siding and capped by a shed roof with overhanging eave along the façade (north elevation) A single-leaf door is located on the

façade.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1895 by B.L. Nevins, Jr., this two-story, two-bay, Queen Anne-style dwelling exhibits elements of the Italianate style. The dwelling is composed of a main block with a projecting rectangular bay on the façade and a rear ell. Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brick on the façade (west elevation). A sloped roof caps the dwelling and features a molded metal cornice set on an intricate corbeled brick table. Window openings along the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills and molded soldier brick segmental arches with drip molding. The full-height projecting bay has rounded edges. There are no openings on the north (side) elevation. Fenestration of the east (rear) elevation is composed of 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

The two-story, two-bay rear ell is constructed of brick and capped by a shed roof. Window openings hold 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A one-story, full-width wood porch extends across the rear of the ell. Its shed roof is covered with asphalt sheets and supported by wood posts.

Site Notes:

October 2010: This semi-detached dwelling is located on the east side of Elliott Street and is set back from the concrete sidewalk approximately five feet. A metal hairpin fence encloses the small front yard. Metal stairs provide access to the elevated main entry. The backyard extends east to an alley and is enclosed by a wooden privacy fence. A prefabricated shed is located in the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1901 by J.W. Burns, this semi-detached rowhouse is one of six built under the same permit (#1723). While the other five rowhouses face F Street, this one faces east towards 14th Street and is the largest example constructed. An exercise in the Queen Anne style, this single-family dwelling has a rectangular form augmented with projecting rectangular bays. Two stories in height and five bays wide, the dwelling is two bays deep. Set on a solid concrete foundation, this brick structure has a stretcher-bond brick veneer accented with Indiana limestone. A sloped roof is fronted by a false mansard of asphalt shingles. The roofline is finished with a molded metal gutter system set above brick dentils. The façade (east elevation) has 1/1, double-hung, vinyl-sash windows and fixed windows with sill strings and molded-metal lintels. The main entry, located in the second bay of the elevation, holds a single-leaf door set in a surround composed of multi-light sidelights and transom. The façade features a two-story projecting rectangular bay capped by a front-gabled roof with checkerboard brick accents. The southeast corner has a projecting rectangular bay capped by a pyramidal roof of asphalt shingles.

A two-story, one-bay addition is located on the north (side) elevation. It is possible that this was originally a porch. Set on a solid concrete foundation, the brick-veneered addition is capped by a shed roof. Fenestration consists of 1/1, double-hung, vinyl-sash windows with rowlock brick segmental and soldier brick jack arches. The lower level of the addition features what appears to be an original concrete-block garage.

Site Notes:

October 2010: Overlooking the intersection of 14th Street and F Street, this dwelling has a setback of approximately twenty feet from the sidewalk along both avenues. The level lot has an elevated yard contained by stone retaining walls. There is little vegetation and no grass. A small alley runs north of the dwelling.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1901 by J.W. Burns, this end-unit rowhouse is one of six built under the same permit (#1723). The two-story, two-bay, Queen Anne-style dwelling is set on a solid concrete foundation. The brick structure has a stretcher-bond brick veneer across the façade (east elevation). A false mansard roof of slate shingles with molded metal cornice highlights the front of the building while a sloped roof caps the structure. The façade is pierced by 6/6, double-hung, wood-sash windows. First-story openings have concrete sills and rock-faced Indiana limestone lug lintels. Second-story openings feature a molded metal sill string and a rock-faced metal lintel course. A rectangular projecting bay defines the front of the building. It is capped by a pyramidal roof of slate shingles. There are no openings on the south (side) elevation. The west (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story brick ell extends off the back of the dwelling. Capped by a shed roof, an exterior brick extends from the south elevation of the ell. Fenestration is composed of 1/1, double-hung, vinyl-sash windows. Additional details were not visible from the public right-of-way.

Site Notes:

October 2010: Located on the west side of 14th Street, this semi-detached rowhouse has a setback of approximately twenty feet from the sidewalk. The manicured front lawn is enclosed by a metal hairpin fence. A brick walkway extends from the sidewalk up steps to the main entry. A small alley extends down the south side of the building. The property extends west and includes a large tree.

Garage

Contributing Status

Contributing

Outbuilding Notes:

October 2010: This wide, one-story garage, based on its form and materials, appears to have been constructed c. 1925. In poor condition, the garage has a five-course, American-bond structure and is capped by a shed roof. Large, double-leaf

wood doors are located on the west elevation, facing the alley.
These doors have multi-light over cross-braced construction.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1901 by J.W. Burns, this end-unit rowhouse is one of six built under the same permit (#1723). The two-story, two-bay, Queen Anne-style dwelling has a brick structure (parged) while the concrete foundation has been covered with Permastone. A false mansard of asphalt shingles fronts the building and includes a molded cornice. A sloped roof covers the structure, pierced by an interior parged chimney. Fenestration of the façade consists of fixed, vinyl-sash windows with multi-light false muntins. Wide wood surrounds complete the openings while a molded metal sill string accents the second-story openings. The façade features a full-height projecting bay capped by a pyramidal roof of asphalt shingles. The west (rear) elevation of the main block was not visible from the public right-of-way.

The two-story, two-bay rear ell has been parged. Fenestration consists of 1/1, double-hung, vinyl-sash windows with vinyl-clad surrounds.

Site Notes:

October 2010: This rowhouse is located west of 14th Street and has a setback of approximately twenty feet from the sidewalk. The bricked front yard is enclosed by a bow and picket metal fence. Brick steps provide access to the elevated main entry. The property extends west to an alley and includes a garage.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1906 by Jones and Peters, this building was one of seven constructed under the same permit (#2821). Built in the Queen Anne style, this building has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, this brick structure has been covered with Permastone. A false mansard of asphalt shingles fronts the building and is accompanied by a molded metal cornice. A sloped roof caps the structure. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with rock-faced concrete block lug lintels. A full-height canted bay projects from the façade and is capped by a pyramidal roof of asphalt shingles. The west (rear) elevation, also covered in Permastone, has 1/1, double-hung, vinyl-sash windows with Permastone arches.

The two-story, two-bay rear ell (also clad in Permastone) has a shed roof and an exterior-rear brick chimney (parged). Fenestration of the ell consists of 1/1, double-hung, vinyl-sash windows with Permastone arches.

A two-story enclosed porch is located on the rear of the ell. Enclosed with Permastone, the porch has a shed roof and two-light, vinyl-sash sliding windows. Permastone keystone arches complete the openings.

Site Notes:

October 2010: This rowhouse is located on the west side of 14th Street and has a setback of approximately twenty feet from the sidewalk. The front yard is enclosed by a milled point metal fence and includes mature shrubs with foundation plantings. The rear of the property extends west to an alley and is enclosed with a plastic security fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1906 by Jones and Peters, this building was one of seven constructed under the same permit (#2821). Built in the Queen Anne style, this building has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, the façade (east elevation) of this brick structure has stretcher-bond brick veneer. A false mansard of asphalt shingles fronts the building and is accompanied by a molded metal cornice. A sloped roof caps the structure. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with protruding rock-faced concrete block lug string lintels. A full-height canted bay projects from the façade and is capped by a pyramidal roof of asphalt shingles. The west (rear) elevation is clad in German vinyl siding and has 1/1, double-hung, vinyl-sash windows.

A two-story, two-bay ell extends from the rear of the building. The brick ell is clad in German vinyl siding and capped by a shed roof with an interior-side chimney. Window openings hold 1/1, double-hung, vinyl-sash windows. A two-story wood porch is located on the rear of the ell.

Site Notes:

October 2010: This rowhouse is located on the west side of 14th Street and has a setback of approximately twenty feet from the sidewalk. The manicured front lawn is enclosed by a bow and picket metal fence. Metal stairs provide access to the elevated main entry. The property extends west to an alley and is enclosed by a wooden privacy fence.

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1906 by Jones and Peters, this building was one of seven constructed under the same permit (#2821). Built in the Queen Anne style, this building has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, the façade (east elevation) of this brick structure has stretcher-bond brick veneer. A false mansard of asphalt shingles fronts the building and is accompanied by a molded metal cornice. A sloped roof caps the structure. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows. Rock-faced concrete sill and lintel strings complete the openings. A full-height canted bay projects from the façade and is capped by a pyramidal roof of asphalt shingles. The west (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story, two-bay ell extends from the rear of the building. The brick ell is capped by a shed roof with an interior-corner brick chimney. Window openings hold 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A second-story door opening (wood-frame glass) suggests that a second-story rear porch has been removed.

Site Notes:

October 2010: This rowhouse is located on the west side of 14th Street and has a setback of approximately twenty feet from the sidewalk. The landscaped front yard is enclosed by a bow and picket metal fence. A metal stair provides access to the elevated main entry. The property extends west to an alley and is enclosed by a wooden privacy fence.

Outbuilding Notes:

October 2010: This two-story carriage house was constructed c. 1906. This brick structure has five-course, American-bond brick coursing and is capped by a shed roof. The west elevation (fronting the alley) has an opening with a paneled

metal roll-up door. This opening is topped by a metal lintel. The second story holds window openings that have been infilled with two-course, rowlock brick segmental arches.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1906 by Jones and Peters, this building was one of seven constructed under the same permit (#2821). Built in the Queen Anne style, this building has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, the façade (east elevation) of this brick structure has stretcher-bond brick veneer. A false mansard of asphalt shingles fronts the building and is accompanied by a molded metal cornice. A sloped roof caps the structure. Window openings on the façade hold 1/1, double-hung, wood sash. Rock-faced concrete sill and lintel strings complete the openings. The main entry, located in the southern bay, has a Colonial Revival-style surround composed of fluted pilasters and a broken bed with closed bed. This non-original surround is set over an original concrete keyed arch. A full-height canted bay projects from the façade and is capped by a pyramidal roof of asphalt shingles. Twin-light casements pierce the foundation of the bay. The west (rear) elevation has 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay ell extends two-bays deep off the rear of the building. The brick ell is capped by a shed roof with an interior-corner brick chimney with a parged cap. A two-story porch, supported by wood posts, spans the rear of the ell. Double-leaf French doors access the first story while a single-leaf, wood-frame door with lights is located on the second story.

Site Notes:

October 2010: This rowhouse is located on the west side of 14th Street and has a setback of approximately twenty feet from the sidewalk. The manicured front lawn is enclosed by a bow and picket metal fence. A metal stair provides access to the elevated main entry. Outbuilding Notes:

October 2010: This two-story carriage house was constructed c. 1906. This brick structure has five-course, American-bond brick coursing and is capped by a shed roof. The west elevation (fronting the alley) has a large opening that has been

enclosed with concrete block. This opening is flanked by a single-leaf, flush metal door with two lights set under a two-course, rowlock brick segmental arch. The second story holds a 1/1, double-hung, vinyl-sash windows with narrow concrete sill and two-course, rowlock brick segmental arch. The east elevation (fronting the backyard) is pierced by 1/1, double-hung, vinyl-sash windows with narrow sills and two-course, rowlock brick segmental arches.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1906 by Jones and Peters, this building was one of seven constructed under the same permit (#2821). Built in the Queen Anne style, this building has a rectangular form with a projecting front bay. Set on a solid concrete foundation, the façade (east elevation) of this brick structure has stretcher-bond brick veneer. A false mansard of asphalt shingles fronts the building and is accompanied by a molded metal cornice. A sloped roof caps the structure and is pierced by two interior-side brick chimneys with corbeled caps. Window openings on the façade hold 1/1, double-hung, wood sash. Rock-faced concrete sill and lintel strings complete the openings. A full-height rectangular bay projects from the façade and is capped by a pyramidal roof of asphalt shingles. The north (side) and west (rear) elevations have 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A two-story, full-width wood porch spans the rear of the dwelling. Capped by a shed roof, the porch is supported by wood posts with a wood balustrade.

Site Notes:

October 2010: This semi-detached rowhouse is located on the west side of 14th Street and has a setback of approximately twenty feet from the sidewalk. The slightly raised manicured front lawn is enclosed by a bow and picket metal fence set in front of a concrete retaining wall. A metal stair provides access to the elevated main entry. A narrow alley is located along the north side of the building. The property extends west to an alley, fronted by a two-story carriage house. The area between the dwelling and garage is enclosed by a brick wall.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

October 2010: Constructed in 1891 by J.C. Yost, this one-story, three-bay building was built as a blacksmith shop. Set on a solid brick foundation, the brick structure features stretcher-bond brickwork along the façade (east elevation). The secondary elevations have been parged. A sloped roof caps the structure and includes a denticulated brick cornice across the façade. A centrally located rectangular bay defines the front of the building. It includes a large, fixed window on the east side and a single-leaf door on the south side. The southern bay of the façade holds a large, roll-up metal garage door. There are no openings on the south or north (side) elevations. The west (rear) elevation has what appear to be two separate additions.

The southern addition, the larger of the two, is two-stories in height and has a parged exterior. A shed roof slopes to the south. Window openings have 1/1, double-hung, vinyl sash.

The northern addition, one story in height, has a parged exterior and a roof that slopes to the north. A wooden privacy fence lines the perimeter of the roof. A roll-up, metal garage door is located on the west (rear) elevation of the addition.

Site Notes:

October 2010: This detached building is located on the west side of 14th Street and has a setback of approximately twenty feet from the concrete sidewalk. Much of the area in front of the building has been covered with concrete, facilitating a garage located on façade. A narrow alley is located on the south side of the building. The backyard is covered with concrete to facilitate parking and is enclosed with a metal chain-link fence.

Outbuilding Notes:

October 2010: This one-story brick structure, based on its form, materials, and Sanborn Fire Insurance Company maps, was constructed ca. 1915. Currently in a ruinous state, the brick structure has been supplemented with the introduction of concrete block. Steel beams extend across the top of the structure. The building has no roof its east wall.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

October 2010: Constructed in 1916 by Salvatore Cucchiara from the design of Lucien Williams, this one-story, three-bay building was constructed as a coal office and later incorporated into a store to the north. This combination explains the asymmetrical fenestration pattern of the facade. Set on a solid concrete foundation, this detached brick structure has a stretcher-bond brick veneer across the facade (east elevation). Secondary elevations are parged. A shed roof caps the building, with the only adornment a simple corbeled brick cornice along the facade. The main entry, located in the second bay, holds a single-leaf, metal-frame glass door set in a narrow, square-edge wood surround. Flanking the door opening is a 1/1, double-hung, wood-sash window with rowlock brick sill and a two-light, wood-sash sliding window with stretcher sill. A small opening is located near the northern end of the facade. The south (side) elevation holds a 6/1, double-hung, wood-sash window with a wood sill. The north (side) elevation has no openings.

A one-story addition is located in the southwest corner of the building. Based on its form and materials, as well as Sanborn Fire Insurance Company map documentation, it appears that this addition was constructed ca. 1975. Constructed of concrete block, this addition is parged and has a shed roof. The west (rear) elevation has no finish and is pierced by a large, twelve-light, metal-sash window with rowlock brick sill. An interior-corner brick chimney rises from the northwest corner.

Site Notes:

October 2010: This building is located on the west side of 14th Street and has a setback of approximately twenty feet from the sidewalk. The level, grassy lot is enclosed with a combination of metal chain-link fencing as well as security gates. Foundation plantings front the facade of the building. The ruins of a previous structure are located in the southwest corner of the property.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by D.G. Moxley, this building was one of five constructed under the same permit (#0016). Built in the Queen Anne style, this duplex has a rectangular form with a projecting front bay and two-story rear ell. The building now functions as a single-family dwelling. Set on a solid concrete foundation, the façade (east elevation) of this brick structure is faced in stretcher-bond brickwork. The sloped roof is fronted by a molded metal cornice set on a corbeled brick parapet with dentils. Window openings on the façade hold 1/1, double-hung, vinyl sash with concrete lug sills and two-course, rowlock brick segmental arches. The façade has a full-height projecting rectangular bay. Originally constructed as a duplex, the north door opening has been bricked. The south (side) elevation is parged and has no openings. Extending off the rear of the building is a two-story, two-bay brick ell with sloped roof. Fenestration consists of 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. One of the arches has been replaced with a jack arch.

Site Notes:

October 2010: This semi-detached building rests on the west side of 14th Street and has a setback of approximately twenty feet from the concrete sidewalk. The level front yard is enclosed by a bow and picket fence. The property extends west to an alley. Mature trees dominate the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by D.G. Moxley, this building was one of five constructed under the same permit (#0016). Built in the Queen Anne style, this duplex has a rectangular form with a projecting front bay and two-story rear ell. The building now functions as a single-family dwelling. Set on a solid concrete foundation, the façade (east elevation) of this brick structure has been parged. The sloped roof is fronted by a molded metal cornice set on a parged parapet wall. An interior brick chimney pierces the roof. Window openings on the façade contain 1/1, double-hung, vinyl-sash windows. The main entry, located in the southern bay, has a single-leaf, flush wood door with diamond light. The northern door opening has been enclosed and parged over. The west (rear) elevation features a two-story, two-bay ell with sloped roof. A parge coat has been applied to the ell, which is pierced by 1/1, double-hung, vinyl-sash windows with segmental arches. A two-story, full-width wood porch spans the rear of the ell. The porch has a sloped roof and is supported by wood posts with square wood balusters.

Site Notes:

October 2010: This building is located west of 14th Street and has a setback of approximately twenty feet. The level front yard is enclosed by a hoop and picket metal fence. Concrete steps access the main entry. Extending west to an alley, the backyard is enclosed by a wooden privacy fence.

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by D.G. Moxley, this building was one of five constructed under the same permit (#0016). Built in the Queen Anne style, this duplex has a rectangular form with a projecting front bay and two-story rear ell. Set on a solid concrete foundation, the façade (east elevation) of this brick structure is faced in stretcher-bond brickwork. The sloped roof is fronted by a molded metal cornice set on a corbeled brick parapet with dentils. Two interior-side brick chimneys with corbeled caps are located along the north (side) elevation. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A full-height, projecting rectangular bay splits the façade. Single-leaf, paneled wood doors with fanlights and single-light transoms flank the projecting bay.

The west (rear) elevation has a two-story, two-bay brick ell with a sloped roof. Window fenestration consists of 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This semi-detached building is located west of 14th Street and has a setback of approximately twenty feet. The level front yard has mature shrubs and is enclosed by a hoop and picket metal fence. Concrete steps access the main entry. Extending west to an alley, the backyard is enclosed by a wooden privacy fence.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by D.G. Moxley, this building was one of five constructed under the same permit (#0016). Built in the Queen Anne style, this duplex has a rectangular form with a projecting front bay and two-story rear ell. Set on a solid concrete foundation, the façade (north elevation) of this brick structure is faced in stretcher-bond brickwork. The sloped roof is fronted by a molded metal cornice set on a corbeled brick parapet with dentils. An interior-side brick chimney with corbeled cap extends from the east (side) elevation. The façade features a full-height projecting rectangular bay centrally located on the elevation. This feature is pierced by two-light, vinyl-sash sliding windows. The second-story opening is set beneath a segmental arch. The remaining window openings on the façade have been enclosed with brick or altered. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with fanlight. The transom has been bricked in. The segmental arch remains. The east (side) elevation has no openings. The south (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A two-story, two-bay ell projects off the rear of the building. Capped by a sloped roof, the ell has 1/1, double-hung, vinyl-sash windows with flat arches. Many of the original openings have been enclosed, yet still retain their original two-course, rowlock brick segmental arches.

Site Notes:

October 2010: Located south of G Street, this semi-detached building has a setback from the concrete sidewalk of approximately twenty feet. The level, grassy front yard is enclosed with a metal chain-link fence and has a mature tree. The backyard extends south to an alley and includes a concrete parking pad.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The brick structure features Flemish-bond brickwork along the façade (south elevation) and west (side) elevation. A sloped roof caps the building and is fronted along the façade and west elevations by a molded metal cornice with modillions. An interior-side brick chimney with corbeled cap pierces the roof. Window openings contain 1/1, double-hung, wood sash with concrete sills and lug lintels. The façade features a one-story, full-width porch set on a brick pier foundation with decorative concrete block infill. A flat roof, supported by metal filigree posts, completes the porch. The north (rear) elevation has 2/2, double-hung, wood-sash windows with two-course, rowlock brick segmental arches. A two-story porch spans the rear of the building. Set on a brick pier foundation, the second-story of the porch has been enclosed with vinyl siding and 1/1, double-hung, vinyl-sash windows.

Site Notes:

October 2010: This semi-detached rowhouse is located on a corner lot northeast of the intersection of F Street and Elliott Street and has a setback of approximately twenty feet from the sidewalk. Slightly elevated, the lot is enclosed with a metal chain-link fence and includes a manicured lawn, mature shrubs, and foundation plantings. Concrete steps extend from the sidewalk alongside F Street up to the front porch. An alley is located north of the property.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The façade (south elevation) of this brick structure is faced with Flemish-bond brick. A sloped roof caps the building and is fronted by a molded metal cornice with modillions. An exterior-rear brick chimney with plain cap completes the roofline. Window openings on the façade contain single-light, vinyl-sash casements or 1/1, double-hung, vinyl sash. All openings have concrete sills and lug lintels. The façade features a one-story, two-bay porch set on a solid brick foundation. A flat roof with a molded cornice, supported by elaborate metal filigree posts, completes the porch. The north (rear) elevation has a two-story that has been enclosed. The first story is enclosed with a cementitious material and pierced by sliding vinyl windows. German vinyl siding and 1/1, double-hung, vinyl-sash windows complete the second story of the porch.

Site Notes:

October 2010: This rowhouse is located north of F Street and has a setback of approximately twenty feet. Landscaped, the elevated front yard has a stone retaining wall, immature and mature plantings and shrubs, and is enclosed with a milled point metal fence. Brick steps provide access to the front porch. The rear of the property extends north to an alley. A wooden privacy fence with lattice extension encloses the backyard.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The façade (south elevation) of this brick structure is faced with Flemish-bond brick. A sloped roof caps the building and is fronted by a molded metal cornice with modillions. An exterior-rear brick chimney with plain cap completes the roofline. Window openings on the façade contain 1/1, double-hung, vinyl sash with concrete sills and lug lintels. A one-story, two-bay porch highlights the front of the rowhouse. Set on a brick pier foundation with brick infill, the porch has a flat roof with molded metal cornice. Metal filigree posts complete the porch. The north (rear) elevation has 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A two-story porch dominates the rear of the building. Set on a brick pier foundation, the second story of the porch has been enclosed with vinyl siding and 1/1, double-hung, vinyl-sash windows with 4/4 false muntins. A shed roof caps the shed.

Site Notes:

October 2010: This rowhouse is located north of F Street and has a setback of approximately twenty feet. The elevated front yard has a stone retaining wall, a mature shrub, and is enclosed by a metal chain-link fence. Brick and concrete steps provide access to the front porch. The rear of the property extends north to an alley. A metal chain-link fence encloses the grassy backyard, which is dotted by mature shrubs.

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The façade (south elevation) of this brick structure is faced with Flemish-bond brick. A sloped roof caps the building and is fronted by a molded metal cornice with modillions. An exterior-rear brick chimney with plain cap completes the roofline. Window openings on the façade contain 1/1, double-hung, wood sash with concrete sills and lug lintels. A one-story, two-bay porch is located on the front of the house. Set on a brick pier foundation with brick infill, the porch has a flat roof with molded metal cornice. Metal filigree posts complete the porch. Metal awnings have been applied to the front of the building. The north (rear) elevation has five-course, American-bond brick work and is pierced by 1/1, double-hung, wood-sash windows with two-course, rowlock brick segmental arches.

A one-story, full-width addition is located on the rear. Set on a wood pier foundation, this addition is clad in vinyl siding and capped by a shed roof. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, flush wood door with diamond light.

Site Notes:

October 2010: This rowhouse is located north of F Street and has a setback of approximately twenty feet. The elevated front yard has a stone retaining wall, a mature shrub, and is enclosed by a metal chain-link fence. Concrete steps provide access to the front porch. The rear of the property extends north to an alley. A metal chain-link fence encloses the backyard, which has a large mature tree.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The façade (south elevation) of this brick structure is faced with Flemish-bond brick. A sloped roof caps the building and is fronted by a molded metal cornice with modillions. An exterior-rear brick chimney with plain cap completes the roofline. Window openings on the façade contain 1/1, double-hung, vinyl sash with concrete sills and lug lintels. A one-story, two-bay porch highlights the front of the rowhouse. Set on a brick pier foundation with decorative brick infill, the porch has a flat roof with molded metal cornice. Metal filigree posts complete the porch.

The north (rear) elevation has a two-story, three-bay addition constructed ca. 1995. This addition replaced an earlier two-story porch. Set on a solid foundation, the addition has a brick veneer and is capped by a shed roof. Window openings hold 1/1, double-hung, vinyl-sash windows with rowlock brick sills and soldier brick jack arches.

Site Notes:

October 2010: This rowhouse is located north of F Street and has a setback of approximately twenty feet. The elevated front yard has been landscaped with immature plantings, flowers, and is enclosed with a milled point metal fence. Brick steps provide access to the front porch. The small backyard, enclosed by a metal chain-link fence, extends north to an alley.

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The façade (south elevation) of this brick structure is faced with Flemish-bond brick. A sloped roof caps the building and is fronted by a molded metal cornice with modillions. An exterior-rear brick chimney with plain cap completes the roofline. Window openings on the façade contain 1/1, double-hung, vinyl sash with concrete sills and lug lintels. A one-story, one-bay porch shelters two openings along the facade. Set on a brick pier foundation with brick infill, the porch has a flat roof with molded metal cornice. Metal filigree posts complete the porch. The north (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story porch highlights the rear of the building. Based on its materials, this porch was likely constructed ca. 2000 and replaced an original porch of the same massing and dimensions. Set on metal piers, the metal-frame structure has filigree posts. The second story is enclosed with vinyl siding and capped by a shed roof. Two-light vinyl sliding windows pierce the second story.

Site Notes:

October 2010: This rowhouse is located north of F Street and has a setback of approximately twenty feet. The elevated front yard has been covered with stone and includes mature topiary. A milled point metal fence encloses the front yard. Brick steps provide access to the front porch. Enclosed by a wooden privacy fence, the rear of the property extends north to an alley.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1909 by owner/builder Charles A. Peters and was one of seven constructed from the same permit (#4751). Designed by A.H. Beers, this Classical Revival-style dwelling is set on a solid concrete foundation. The façade (south elevation) of this brick structure is faced with Flemish-bond brick. A sloped roof caps the building and is fronted by a molded metal cornice with modillions. An exterior-rear brick chimney with plain cap completes the roofline. Window openings on the façade contain 1/1, double-hung, vinyl sash with concrete sills and lug lintels. A two-light, vinyl-sash sliding window pierces the raised basement. A one-story, one-bay porch shelters two openings along the façade. Set on a brick pier foundation with brick infill, the porch has a flat roof supported by metal filigree posts. Parged, the north (rear) elevation is pierced by 1/1, double-hung, vinyl-sash windows with segmental arches. A two-story wood porch is located on the rear of the dwelling. The second story is enclosed with plywood and pierced by ribbons of window openings (also covered with plywood).

A one-story, one-bay addition is located beneath the enclosed second story of the porch. With its brick veneer, the addition appears to have been constructed ca. 1990. 1/1, double-hung, vinyl-sash windows pierce the addition.

Site Notes:

October 2010: This rowhouse is located north of F Street and has a setback of approximately twenty feet. The elevated, grassy front yard has a stone retaining wall, mature shrubs, and is enclosed by a metal chain-link fence. Stone steps provide access to the front porch. The backyard is not accessible via an alley.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1901 by J.W. Burns and was one of six constructed from the same permit (#4751). Designed by Joseph Bohn, Jr., this Queen Anne-style dwelling has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, this brick structure is faced in stretcher brick and capped by a sloped roof. A false mansard of slate shingles with ovolo-molded metal cornice fronts the building. Brick dentils complete the roofline. Window openings on the façade (south elevation) hold 1/1, double-hung, vinyl sash with concrete sills. Rock-faced Indiana limestone lug lintels adorn the first story openings. A molded metal sill string and rock-faced metal panels complete the second story openings. A full-height projecting rectangular bay highlights the front of the building. With channeled edges, the bay is capped by a front-gabled pediment with checkerboard brick tympanum.

The north (rear) elevation of the main block was not visible from the public right-of-way. A two-story ell projects from the rear of the building. Parged, the ell is capped by a sloped roof with an exterior-side parged chimney. Fenestration consists of 1/1, double-hung, vinyl-sash windows with segmental arches. The rear of the ell features a second-story bump out clad in plywood. This original feature has a 1/1, double-hung, vinyl-sash window.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the sidewalk. The elevated, grassy front yard is enclosed by a metal chain-link fence. Concrete steps provide access to the elevated main entry. The backyard is not accessible via an alley.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This semi-detached, single-family dwelling was erected in 1890 by builder/owner Solomon Carr and is one of two buildings constructed from the same permit (#1333). This Queen Anne-style building exhibits influences of the Italianate style. Set on a solid brick foundation, this brick structure is faced in stretcher-bond brick. A sloped roof caps the dwelling and is fronted by a prominent corbeled brick parapet wall with molded cornice. Two interior chimneys with parged stacks pierce the roof. Window openings hold 1/1, double-hung, vinyl sash with concrete sills and soldier brick segmental arches embellished with nail-head drip molding. The western corner of the building features a full-height, four-sided canted bay with woven brick edges. The main entry, located east of the projecting bay, holds a single-leaf, paneled wood door with fanlight and single-light transom. Accessed via metal stairs, this opening is sheltered by a one-bay porch supported by scrolled brackets affixed to the sides of the porch. A below-grade door opening is located beneath the metal stairs and holds a similar door. Secondary elevations have 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A shed-roofed porch shelters a below-grade opening on the rear of the building.

Site Notes:

October 2010: This dwelling is located on a corner lot southeast of the intersection of Maryland Avenue and Elliott Street. Setback from the concrete sidewalk aside Maryland Avenue is approximately thirty feet while that from Elliott Street is about five feet. The triangular-shaped property is enclosed by a bow and point metal fence and includes mature trees, shrubs, and has a grassy lawn.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This semi-detached, single-family dwelling was erected in 1890 by builder/owner Solomon Carr and is one of two buildings constructed from the same permit (#1333). This Queen Anne-style building exhibits influences of the Italianate style. Set on a raised solid brick foundation, this brick structure is faced in stretcher-bond brick. A sloped roof caps the dwelling and is fronted by a prominent corbeled brick parapet wall with molded cornice. An interior-rear brick chimney is located on the southeast elevation. The façade (northwest elevation) has 1/1, double-hung, vinyl-sash windows with soldier brick segmental arches adorned with nail-head drip molding. A full-height, two-bay rectangular bay projects from the façade. Door openings hold single-leaf, paneled wood doors with single-light transoms. A flat-roofed door hood with gingerbread lattice and scrolled brackets shelters the main entry. The rear elevation is pierced by 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A one-story, one-bay porch set on a brick foundation is located on the rear of the building. Enclosed in aluminum siding, the porch is capped by a shed roof and pierced by a 6/6, double-hung, wood-sash window.

Site Notes:

October 2010: This single-family dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The level, grassy front yard has mature shrubs and trees. A bow and picket metal fence enclose the yard, which is accessed via a brick paver walkway. Metal stairs provide access to the elevated main entry. The rear of the property extends southeast and is not accessible via an alley.

Queen Anne

Exterior & Architectural Notes:

October 2010: This single-family dwelling was erected in 1891 by owner Solomon Carr and is one of three buildings constructed from the same permit (#2651). This Queen Anne-style building exhibits influences of the Italianate style. Set on a raised solid brick foundation, this brick structure is faced in pressed stretcher-bond brick. A sloped roof caps the dwelling and is fronted by a prominent corbeled brick parapet wall with molded cornice. A chimney stack was not visible from the public right-of-way. The façade is dominated by a full-height, two-bay projecting rectangular bay. The main entry holds a single-leaf, paneled wood door with nine lights. The elevated door opening is accessed via metal stairs leading to a metal landing set on a brick pier foundation. A simple door hood extending between the projecting bay a brick privacy wall completes the porch. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with soldier brick segmental arches adorned with nail-head drip molding.

The southeast (rear) elevation has been parged and is pierced by 1/1, double-hung, vinyl-sash windows with segmental arches. A two-story ell extends off the rear of the building, and has similar parged exterior walls. Capped by a sloped roof, the ell is pierced by 1/1, double-hung, vinyl-sash windows with segmental arches. A wood deck has been built on the rear of the ell.

Site Notes:

October 2010: This single-family dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet. The front yard has been covered with brick pavers and is dominated by mature trees and shrubs. A metal stair provides access to the elevated main entry. The rear of the property extends to the southeast and is enclosed by a wooden privacy fence.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This single-family dwelling was erected in 1891 by owner Solomon Carr and is one of three buildings constructed from the same permit (#2651). The building is the largest of the three. This Queen Anne-style building exhibits influences of the Italianate style. Set on a raised solid brick foundation, this brick structure is faced in pressed stretcher-bond brick. A sloped roof caps the dwelling and is fronted by a prominent corbeled brick parapet wall with molded cornice. A chimney stack was not visible from the public right-of-way. Window openings on the façade (northwest elevation) contain 1/1, double-hung, vinyl-sash windows with soldier brick segmental arches with nail-head drip molding. Foundation openings have two-course, rowlock brick segmental arches. A full-height, three-sided canted bay dominates the southern end of the building. A one-story, two-bay porch extends from the canted bay to the northern corner of the façade. Set on a partial solid brick foundation, the porch has a shed roof supported by wood posts. Square wood balusters complete the porch. Directly above the porch is a three-sided canted oriel. Clad in molded metal, the oriel extends up to meet the roofline of the main block. The southeast (rear) elevation has a parged finish. Fenestration consists of 1/1, double-hung, vinyl-sash windows and glass block openings with segmental arches. Most of the window openings appear to have been altered from their original size.

Site Notes:

October 2010: This dwelling is located south of the intersection of Maryland Avenue, Elliott Street, and G Street. Oriented to the northwest, the building has a setback of approximately twenty feet. The landscaped property has mature trees, shrubs, planting beds, and a manicured lawn. A concrete walkway extends off the sidewalk to front porch steps. A milled point metal fence encloses the front yard. The backyard is not accessible from an alley.

Outbuilding Notes:

October 2010: These metal flower sculptures are set on metal bases. They stand approximately eight feet and are about five feet wide. Most consist of metal leaves and prominent bulbs or flowers set at the ends of metal stems.

STYLE/EXTERIOR DATA

Architectural Style(s)

Romanesque Revival

Exterior & Architectural Notes:

October 2010: This two-story public school was constructed in 1894 and is set on a raised basement. Designed in the Romanesque Revival style, this large building has a rectangular form with a projecting full-height projecting octagonal tower in the northeast corner. Set on a solid foundation, the masonry structure is faced with stretcher-bond brick. A clipped hipped roof of asphalt shingles caps the building and features a molded metal cornice with overhanging bracketed eaves. A molded metal cornice highlights the sides of a rooftop patio, flanked by a large interior brick chimney with concrete cap. A rooftop room, fenestrated with vinyl-sash casements, is capped by a shed roof of asphalt shingles.

Window openings on the building are consistent depending on story, with all including narrow concrete sills. The basement is pierced by single-light, vinyl-sash awning windows with soldier brick jack arches. The first story contains 1/1, double-hung, vinyl-sash windows with soldier brick segmental arches. The second story holds 1/1, double-hung, vinyl-sash windows with brick jack arches.

The façade (north elevation) has a centrally located projecting, full-height, front-gabled pavilion with a metal raking cornice. The metal cornice of the main block extends across the pavilion, forming a closed brick tympanum highlighted by a semi-circular window with concrete sill and brick arch. The main entry, set on grade, holds double-leaf, metal French doors with wide sidelights and transom. A metal lintel spans the opening, adorned with ornamental plant motif molding. The first and second stories have three window openings with brick jack arches. A flag pole is attached to the façade beneath the first story. Large metal characters, spelling the words, "Pierce School," are located above the first story openings. Flanking the projecting pavilion are brick pilasters, serving to architecturally support a narrow corbeled brick table beneath the cornice.

The northeast corner features a large, two-and-one-half-story, octagonal canted tower capped by a steeply-pitched eight-sided roof of asphalt shingles. A tall metal finial caps the roof, which is adorned with pedimented dormers pierced by bull's-eye windows.

The east (side) elevation features a two-and-one-half-story, two-bay projecting rectangular bay. Capped by a front-gabled roof, the roofline features a molded raking metal cornice anchored by large metal corner pendants. The upper story is fenestrated with 1/1, double-hung, vinyl-sash windows. Elaborate string courses are found on this elevation. The most notable of these strings is a drip molding lintel string, which spans the width of the second story and wraps around the turret. Multiple strings adorn the third-story openings as well. The southern bay of the elevation projects slightly from the main wall.

The south (rear) elevation has an identical front-gabled projecting bay as found on the façade. The fenestration pattern appears to be identical as well, however, the first story was not visible from the public right-of-way.

The west (side) elevation is six-bays wide. Brick pilasters are located outside the third and fourth bays. The first story was not visible from the public right-of-way.

The following information is found in the Historic School buildings Survey of D.C. Public Schools conducted during 1986-1987 by Dr. Antoinette Lee, sponsored by D.C. Public Schools, and administered by the D.C. Historic Preservation Division. As surveyed:

"The Pierce School was completed in 1894 after designs prepared by the Office of the Building Inspector and approved

by Edward Clark, Architect of the Capitol. In design, it resembles the Jackson School in Georgetown and the Slate School near First Street, N.W. Upon its completion, the National Building Register described the building as "the best of all out school buildings" because of the excellence of construction.

The Pierce School is a virtual duplicate of the Slater and Jackson School with an octagonal corer tower, projecting central pavilion, and pressed brick lintels. However, unlike Slate and Jackson, Pierce's main elevation along G Street is designed in similar fashion as the side elevations of the other schools. Pierce's side elevation along 14th Street is identical with the front elevation of the other schools. Pierce's north elevation is composed of a central projecting pavilion with three narrow windows at the first and second stories, with flanking side pavilions. The west pavilion measures four bays while the east pavilion measures three bays terminating in the octagonal tower. The vertical forces of the projecting pavilions, tower, and pilaster strips is balance by the brick strip at the watertable and brick stringcourses at the window sill and lintel lines."

Site Notes:

October 2010: Pierce School is located southeast of Maryland Avenue on a prominent corner lot west of 14th Street. The level site is bounded by a large concrete sidewalk, which, the building sits approximately ten feet back from. The narrow front and side yards are enclosed by a milled point metal fence and landscaped with immature trees, shrubs, plantings, as well as mature varieties. Landscape art has been placed across the front of the building to resemble foundation plantings. The main entry is served via a concrete patio on the north side of the building. With variations in aggregate, the words "Pierce School" are overlaid with the word "Lofts". The rear of the building is enclosed by a wooden privacy fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay twin dwelling, based on its form and materials, appears to have been constructed ca. 1990. Set on a raised solid concrete foundation, this concrete structure is faced with stretcher brickwork. A sloped roof is obscured by a stepped brick parapet along the façade (east elevation). Window openings on the building contain 1/1, double-hung, vinyl-sash windows with rowlock brick segmental and soldier brick jack arches. Due to the split-level construction of the dwelling, the main entry is located below the first-story window openings. The main entry holds a single-leaf, paneled wood door with two lights. A paneled, roll-up metal garage door highlights the façade.

Site Notes:

October 2010: This twin dwelling is located west of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. The front yard is occupied by a concrete parking pad and brick steps leading up to the main entry. A mature tree is located in the public right-of-way. A narrow alley flanks the building to the south. The backyard extends west to a neighboring property line.

STYLE/EXTERIOR DATA

Architectural Style(s)

Modern

Exterior & Architectural Notes:

October 2010: Constructed in 1924 by General Construction Company, this eight-family apartment building was designed in the Moderne style. The two-story, five-bay building is set on a solid concrete foundation. The brick structure is faced with six-course, American-bond brickwork. The flat roof is finished by a simple corbeled brick cornice along the façade (east elevation). Window openings on the façade hold triple, single-light vinyl casements with rowlock brick sills. Second-story window openings feature rowlock brick arches with stacked brick highlights. The main entry, centrally located on the façade, holds a single-leaf, paneled wood door with six lights and three-light transom. An arch identical to those on the second-story window openings adorns the door opening. The south (side) elevation has no openings. Fenestration of the west (rear) elevation consists of vinyl casements and double-leaf, multi-light doors. A second story wood deck is accessed via wood steps.

Site Notes:

October 2010: This semi-detached apartment building is located on the west side of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. An alley forms the southern boundary of the property. Landscaped foundation plantings flank the front of the building. The rear of the property extends west to an alley and is enclosed by a wooden privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Modern

Exterior & Architectural Notes:

October 2010: Constructed in 1925 by architect/builder Clarence W. Gosnell, this apartment building was designed with influences of the Moderne style. Set on a brick foundation, the façade of this brick structure has a smooth exterior parged finish. A flat roof caps the building and is finished with a narrow corbeled brick cornice. Moderne in design, this building has 2/2, double-hung, wood-sash windows and 1/1, double-hung, vinyl-sash windows with narrow concrete sills. Second-story window openings feature tall arched surrounds. The main entries, located in the slightly recessed central bays, permit access to the individual apartments via a corridor. A metal awning shelters the opening. A tall blank panel is located in the second story above the main entry. The north (side) elevation is not parged and has no openings. The west (rear) elevation was not visible from the public right-of-way.

Site Notes:

October 2010: This semi-detached apartment building is located on the west side of Elliott Street and has a setback of approximately five feet from the concrete sidewalk. Mature foundation plantings line the front of the building. Brick steps provide access to the main entry. The rear of the property stretches west to an alley.

Outbuilding Notes:

October 2010: A one-story, one-bay prefabricated shed is located in the backyard. Based on its form and materials, this shed appears to have been constructed c. 2000. The wood-frame structure is clad in T-111 siding and capped by a gable roof of cedar shakes.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, four-bay, multiple dwelling was constructed in 1908 by builder/owner Arthur Carr. This building now functions as two single-family residences. Set on a solid concrete foundation, the brick structure features a smooth parged finish on the façade (east elevation). Secondary elevations are faced in five-course, American-bond brick. A sloped roof caps the building and is fronted by a large, molded metal cornice with modillions. Window openings on the façade hold 1/1, double-hung, vinyl sash, some with false muntins, or tripled, single-light vinyl casements. All have segmental arched openings. The south (side) elevation has 1/1, double-hung, vinyl-sash windows. The side (north) elevation has 1/1, double-hung, vinyl-sash windows. The west (rear) elevation has two two-story, two-bay enclosed porches. Clad in vinyl siding, the porch is pierced by sliding vinyl-sash windows and capped by a shed roof. Additional details were not visible from the public right-of-way.

Site Notes:

October 2010: Located on the west side of Elliott Street, this semi-detached building has a setback of approximately five feet from the sidewalk. The front yard has mature shrubs and foundation plantings. Brick steps provide access to a shared stoop. Narrow alleys are located north and south of the building. The backyard extends west to an alley and is enclosed by a wooden privacy fence. A shed is located in the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Craftsman

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. The western corner of the building is canted, reflective of its corner position. Set on a solid concrete foundation, this brick structure is faced in five-course, American-bond brick. A sloped roof caps the dwelling, though it is obscured by a false mansard of slate shingles. The mansard extends across the façade (northwest elevation) and southwest (side) elevation. Deep overhanging eaves with scrolled brackets compliment the building. An exterior-rear brick chimney with parged stack is located on the southeast elevation. Twin half-hipped false dormers adorn the façade. Clad in slate shingles, the dormers have overhanging eaves with thin exposed ends and are pierced by 3/1, double-hung, wood-sash windows. The façade features a one-story, full-width porch set on a solid brick foundation. A flat roof with molded metal cornice and modillions is supported by brick posts. Concrete balusters complete the porch. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with soldier brick lintel strings. The main entry, located in the northern bay, holds a single-leaf, paneled wood door with single-light transom. Fenestration of the side elevation consists of 1/1, double-hung, vinyl-sash windows with concrete sills and soldier brick lintel strings.

The rear of the building has undergone multiple changes. This may be due in part to the operation of a church in the basement of the building in the mid twentieth century.

The southeast (rear) elevation has a two-story, full-width rear porch set on a solid brick foundation. Incorporated into the side of the foundation is a below-grade metal garage door. The exterior of the porch has been enclosed and parged. One-over-one, double-hung, vinyl-sash windows pierce the porch.

A one-story, one-bay addition is located on the rear of the enclosed porch. Centrally positioned on the elevation, this addition was constructed ca. 1950. Parged and on a solid foundation, the addition is capped by a shed roof with stepped parapets. Fenestration consists of a six-light, wood-sash basement window and a 1/1, double-hung, vinyl-sash window on the first story.

A one-story, two-bay addition is located north of the ca. 1950 addition on the rear of the building. Based on its form and materials, it appears that this addition dates to ca. 1975. Set on a brick pier foundation, the addition is faced in stretcher-bond brick and capped by a shed roof, also with stepped parapets. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, nine-light wood door accessed via formed concrete steps with metal railing.

Site Notes:

October 2010: This single-family dwelling is located on a corner lot southeast of the intersection of Maryland Avenue and 13th Street. The building has a setback of approximately thirty feet from the sidewalk aside Maryland Avenue. The level, grassy lot has mature trees, shrubs, and is enclosed by a milled point metal fence. A brick walkway provides access from the front porch to the sidewalk along Maryland Avenue. The large rear yard backs up to an alley.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced in five-course, American-bond brick. The second-story of the façade (northwest elevation) has been clad in aluminum siding. A sloped roof is fronted by a false mansard of rubber shingles. The mansard has a pent roof extension and is adorned by twin, shed-roofed false dormers. Also clad in rubber shingles, the dormers have narrow overhanging eaves and are pierced by 1/1, double-hung, vinyl-sash windows with 6/6 false muntins. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows. The main entry, located in the northern bay, holds a single-leaf, paneled wood door with lights set in a Colonial Revival-style surround with fluted pilasters. A one-story porch shelters the first story of the façade. Set on a brick pier foundation, the porch has a flat roof with molded metal cornice accompanied by modillions. Brick posts support the roof of the porch, which is finished with concrete balusters. The southeast (rear) elevation has a two-story, full-width porch. Set on a brick pier foundation, the porch has been enclosed with aluminum siding and 1/1, double-hung, vinyl-sash windows. A shed roof caps the porch.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. The level, grassy front yard is enclosed by a milled point metal fence. A mature shrub lines the front porch. A brick walkway extends from the sidewalk to the front porch steps. The rear of the property extends southeast to an alley.

Craftsman

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced in five-course, American-bond brick. The sloped roof is fronted by a false mansard of slate shingles with a prominent overhanging eave with scrolled brackets. Twin false dormers adorn the mansard roof. Clad in slate shingles, the dormers have half-hipped roofs with overhanging eaves and are pierced by 1/1, double-hung, vinyl-sash windows. An exterior-rear brick chimney is located on the southeast elevation. Fenestration of the façade (northwest elevation) consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, paneled wood door with lights and three-light transom. Soldier brick lintel strings extend across both stories. A one-story porch shelters the first story. Set on a solid brick foundation, the porch features a flat roof with molded metal cornice and modillions. Concrete balusters stretch between the brick support members topped by molded metal capitals. A six-light, wood-sash window pierces the porch foundation. The southeast (rear) elevation has a two-story porch that has been enclosed with German vinyl siding. Ribbons of 1/1, double-hung, vinyl-sash windows pierce the porch.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. The level, manicured front yard is improved with immature plantings and shrubs. Stone pavers provide access from the sidewalk to the front porch. A milled point metal fence encloses the front yard. The rear of the property extends southeast to an alley. A garage fronts the alley.

Craftsman

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced in five-course, American-bond brick. The sloped roof is fronted by a false mansard of slate shingles with a prominent pent. Twin false dormers adorn the mansard roof. Clad in slate shingles, the dormers have half-hipped roofs with overhanging eaves and are pierced by 1/1, double-hung, vinyl-sash windows. An exterior-rear brick chimney is located on the southeast elevation. Fenestration of the façade (northwest elevation) consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, paneled wood door. Soldier brick lintel strings extend across both stories. A one-story porch shelters the first story. Set on a solid brick foundation, the porch features a flat roof with molded metal cornice and modillions. Concrete balusters stretch between the brick support members topped by molded metal capitals. A six-light, wood-sash window pierces the porch foundation. The southeast (rear) elevation has a two-story porch that has been enclosed with German vinyl siding and 1/1, double-hung, vinyl-sash windows.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. Enclosed by a milled point metal fence, the level, manicured front yard is improved with immature trees, shrubs, and foundation plantings. A stone retaining wall extends aside the sidewalk. A concrete walkway provide access from the sidewalk to the front porch. The rear of the property extends southeast to an alley. A garage fronts the alley.

Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced in five-course, American-bond brick. The sloped roof is fronted by a false mansard of slate shingles with a prominent overhanging eave with scrolled brackets. Twin false dormers adorn the mansard roof. Clad in slate shingles, the dormers have half-hipped roofs with overhanging eaves and are pierced by 1/1, double-hung, vinyl-sash windows. An exterior-rear brick chimney is located on the southeast elevation. Fenestration of the façade (northwest elevation) consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, paneled wood door with transom. Soldier brick lintel strings extend across both stories. A one-story porch shelters the first story. Set on a solid brick foundation, the porch features a flat roof with molded metal cornice and modillions. Concrete balusters stretch between the brick support members topped by molded metal capitals. A six-light, wood-sash window pierces the porch foundation. The southeast (rear) elevation has a two-story porch that has been enclosed with German vinyl siding, 1/1, double-hung, vinyl-sash windows, and two-light, vinyl-sash sliding windows.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. Partially enclosed by a milled point metal fence, the level, manicured front yard has a concrete walkway extending between the front porch and sidewalk. The rear of the property extends southeast to an alley. A garage fronts the alley.

Outbuilding Notes:

October 2010: This one-story, one-bay garage, based on its form and materials, appears to have been constructed ca. 1915. Set on a concrete slab, the wood-frame structure is clad in corrugated metal and capped by a shed roof. The façade

(east elevation) has a large opening, but no door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1915 by owner/builder/architect H.R. Howenstein and is one of three similar dwellings constructed under the same permit (#5471). This Classical Revival-style rowhouse is set on a solid concrete foundation. The brick structure is faced with five-course, American-bond brick. A sloped roof caps the dwelling and is fronted by a false mansard of slate shingles finished with a molded metal cornice with dentils. Twin pedimented false dormers complete the roofline. These dormers hold ten-light, wood-sash windows. Window openings on the façade (northwest elevation) hold 1/1, double-hung, vinyl sash with concrete lug lintels. A one-story porch shelters the first story. Set on a brick pier foundation, the porch has a flat roof with molded metal cornice and modillions. Tapered fluted columns rest on brick piers to provide support to roof. Thin wood balusters complete the porch. The southeast (rear) elevation is pierced by 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A two-story brick ell extends off the rear of the building. The ell is capped by a sloped roof and features an exterior-corner brick chimney. Window openings hold 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches.

A two-story porch is located on the rear of the dwelling. An original feature, the porch has been enclosed with German vinyl siding and is capped by a shed roof. Window openings hold single-light vinyl-sash casements.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. Enclosed by a metal chain-link fence, the grassy front yard has a concrete walkway extending from the front porch and sidewalk. The rear of the property extends southeast to an alley and includes a garage.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1915 by owner/builder/architect H.R. Howenstein and is one of three similar dwellings constructed under the same permit (#5471). This Classical Revival-style rowhouse is set on a solid concrete foundation. The brick structure is faced with five-course, American-bond brick. Capped by a sloped roof, the façade features a false mansard of slate shingles set between brick firewalls. A metal cornice with narrow dentils dresses the roofline. Twin pedimented false dormers complete the roofline. These dormers hold ten-light, wood-sash windows. An exterior-rear brick chimney is located on the southeast elevation. Window openings on the façade (northwest elevation) hold 1/1, double-hung, vinyl sash with concrete lug lintels. The main entry holds a single-leaf, wood-frame glass door. A one-story porch shelters the first story. Set on a brick pier foundation with decorative concrete block infill, the porch has a flat roof with molded metal cornice and modillions. Tapered fluted columns rest on brick piers to provide support to roof. Wide concrete balusters complete the porch. A below-grade door opening is located beneath the porch (not visible). The southeast (rear) elevation is pierced by 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A two-story brick ell extends off the rear of the building. Capped by a shed roof, the ell has a corner brick chimney. Fenestration was not visible from the public right-of-way.

A two-story porch is located on the rear of the dwelling. An original feature, the porch has been enclosed with aluminum siding and is capped by a shed roof. Window openings hold single-light vinyl-sash casements.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. Enclosed by a metal chain-link fence, the grassy front yard has a concrete walkway extending from the front porch to the sidewalk. The rear of the property extends southeast to an alley and includes a garage.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was erected in 1915 by owner/builder/architect H.R. Howenstein and is one of three similar dwellings constructed under the same permit (#5471). This Classical Revival-style rowhouse is set on a solid concrete foundation. The brick structure is faced with five-course, American-bond brick. Capped by a sloped roof, the façade features a false mansard of slate shingles set between brick firewalls. A metal cornice with narrow dentils dresses the roofline. Twin pedimented false dormers adorn the false mansard. These dormers hold ten-light, wood-sash windows. Window openings on the façade (northwest elevation) hold 1/1, double-hung, vinyl sash with concrete lug lintels. The main entry holds a single-leaf, paneled metal door with light and single-light transom. A one-story porch shelters the first story. Set on a brick pier foundation with lattice infill, the porch has a flat roof with molded metal cornice and modillions. Tapered fluted columns rest on brick piers to provide support to roof. Wide concrete balusters complete the porch. A below-grade door opening is located beneath the porch (not visible). The southeast (rear) elevation is pierced by 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A two-story brick ell extends off the rear of the building. Capped by a shed roof, the ell has a corner brick chimney. Fenestration was not visible from the public right-of-way.

A two-story porch is located on the rear of the ell. Set on a brick pier foundation, the porch has been enclosed with German vinyl siding and 1/1, double-hung, vinyl-sash windows. A single-leaf, flush wood door is located on the rear of the porch.

Site Notes:

October 2010: This single-family rowhouse is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the brick sidewalk. Enclosed by a metal chain-link fence, the grassy front yard has a concrete walkway extending from the front porch to the sidewalk. The rear of the property extends southeast to an alley and is enclosed by a wooden privacy fence.

Outbuilding Notes:

October 2010: The illuminated Purity Baptist Church sign, based on its form and materials, appears to have been constructed ca. 2000. The metal-frame sign is sited parallel to the sidewalk and is approximately five feet tall and seven feet

wide.

October 2010: This cross appears to have been installed c. 2000. The metal structure has a smooth exterior finish and stands approximately fifteen feet.

October 2010: This sign appears to have been installed c. 2003. Composed of a wooden post with a decorative metal arm, the wood sign has an oval shape.

October 2010: This one-story, one-bay prefabricated shed appears to have been constructed c. 2005. Set on a wooden base, this wood-frame structure is clad in T-111 siding and capped by a front-gabled roof of asphalt shingles.

October 2010: This one-story, two-bay prefabricated shed, based on its form and materials, appears to have been constructed c. 1990. The metal-frame structure is clad in pressed metal sheets and capped by a side-gabled roof of corrugated metal. A 1/1, double-hung, vinyl-sash window pierces the façade (west elevation).

STYLE/EXTERIOR DATA

Architectural Style(s)

Modern

Exterior & Architectural Notes:

October 2010: Constructed in 1947, the Purity Baptist Church and Urban Center is a large complex centered on a steeply-pitched sanctuary. Set on a solid concrete foundation, the building is faced with Roman brick. The centrally located sanctuary is capped by a steeply-pitched front-gabled roof of asphalt shingles. Tapered overhanging eaves extend out to compliment a centrally located projecting bay of stained glass. An exterior-rear brick chimney with a large stack breaks the eave on the south (rear) elevation. A one-story, U-shaped block flanks the sanctuary and includes fixed and awning metal-sash windows. Door openings hold double-leaf, metal-frame glass doors with large sidelights and transoms. The western end of the U-shaped block is approximately five feet taller than the middle and eastern portions.

Site Notes:

October 2010: This building is located on the southeast side of Maryland Avenue and has a setback of approximately forty feet from the sidewalk. The front yard has been landscaped with a manicured lawn, mature trees, and foundation plantings. A metal milled point fence encloses the grassy areas. A wide concrete walkway extends off the sidewalk to the main entry, located in the northern end of the façade (northwest elevation). A secondary opening, located below grade, is accessed via a concrete ramp along the southern end of the facade. A cross, church sign, and school sign are located in front of the church. Two prefabricated sheds are located in the backyard.

Outbuilding Notes:

October 2010: This one-story, one-bay prefabricated shed, based on its form and materials, appears to have been constructed c. 2000. The wood-frame structure is clad in German vinyl siding and capped by a front-gabled roof of

asphalt shingles. Additional details were not visible from the public right-of-way.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay semi-detached rowhouse was constructed in 1897 by architect/builder S. Carr. Exhibiting stylistic influences of the Queen Anne and Italianate styles, the building has a rectangular form with projecting front bay and telescoping rear. Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brick. A sloped roof caps the building and is obscured by a prominent corbeled brick parapet. The main entry holds a single-leaf, paneled wood door with oval transom. Window openings on the façade (northwest elevation) hold 1/1, double-hung, vinyl-sash windows with concrete sills and rock-faced concrete lug lintels. A full-height projecting bay defines the façade. Rectangular in shape, the bay features rounded edges in line with window openings and a below-grade, paneled wood door with four-lights. The northeast (side) elevation has no openings. The southeast (rear) elevation has 1/1, double-hung, vinyl-sash windows with two-course, rowlock brick segmental arches. A two-story brick ell is projects off the rear of the building. Capped by a shed roof, the ell features a corner brick chimney with parged cap.

A two-story porch is located on the rear of the ell and has been enclosed. The first story now has a brick veneer while the second story is enclosed with vinyl siding and includes 1/1, double-hung, vinyl-sash windows.

A one-story block is located at the rear of the building. Clad in vinyl siding, this block has 1/1, double-hung, vinyl-sash windows.

Site Notes:

October 2010: This semi-detached, single-family dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The front yard is enclosed by a bow and picket metal fence and includes mature plantings and shrubs. A concrete walkway extends from the sidewalk up to the main entry and metal stoop. The backyard extends southeast and has been covered with brick pavers. A prefabricated shed is located in the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1908 by Johnson Brothers, this single-family, semi-detached dwelling was designed in the Queen Anne style. Set on a solid concrete foundation, this brick structure is faced with stretcher-bond brick. A sloped roof caps the building and is fronted by a false mansard of slate shingle set between a brick firewall and faux chimney stack. The façade (northwest elevation) is defined by a canted, full-height, projecting bay capped by a pyramidal roof of slate shingles. The molded metal cornice with scrolled modillions extends off the main block and wraps the projecting bay. The recessed main entry holds a single-leaf door and features an arched transom. An arched brick surround is enhanced by concrete accents and a key. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills and rock-faced concrete lug lintels. A round-headed opening features a brick arch with drip molding. Two-light, vinyl-sash sliding windows pierce the foundation. The southeast (rear) elevation has a two-story brick ell four bays deep. This brick ell has five-course, American-bond brick and is capped by a shed roof. The side of the ell has 1/1, and three-light vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A one-story, one-bay brick oriel is located on the first story. With canted bays, this feature is integrated into a second-story, three-sided canted oriel clad in German vinyl siding.

A two-story addition on the rear of the building, which based on its form and materials, appears to have been constructed ca. 2000. Clad in German vinyl siding and capped by a shed roof, the addition has 1/1, double-hung, vinyl-sash windows. A second-story metal deck is accessed via an exterior spiral stair.

Site Notes:

October 2010: This semi-detached dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The level, grassy front yard is enclosed by a hairpin and point metal fence. Mature boxwoods line a brick walkway extending from the sidewalk to metal stairs, which provide access to the elevated main entry. The side yard is enclosed by a hairpin and point metal fence. The rear of the property extends southeast to a narrow alley and includes a mature tree.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1895 by L.F. McGee, this two-story, two-bay, Queen Anne-style dwelling is set on a solid brick foundation. The brick structure has been clad in Permastone. A sloped roof caps the structure and is fronted by a false mansard of slate shingles. The façade (northwest elevation) features a full-height projecting bay capped by a combination front gable and pyramidal slate shingle roof. The bay has rounded edges and features prominent circular metal ornamentation. Window openings on the façade hold 1/1, double-hung, wood sash and 1/1, double-hung, vinyl sash. First story openings have a rock-faced concrete lintel string. Second-story openings have rock-faced concrete lug lintels, save for, those on the front of the bay, which feature segmental Permastone arches. The southeast (rear) elevation, also clad in Permastone, has 1/1, double-hung, vinyl-sash windows and a one-story wood porch. Additional details were not visible from the public right-of-way.

Site Notes:

October 2010: This single-family dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The grassy front yard is enclosed by a hairpin and point metal fence. A concrete walkway extends from the sidewalk up to the metal stairs and stoop. The rear of the property extends to the southeast, though was not visible from the public right-of-way.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Engine House 10 was erected in 1894-1895 following the designs of architect Leon Emile Dessez. The Queen Anne-style building is set on a solid foundation and has a brick structure. Two-stories in height and two-bays wide, this tall, narrow building extends to the southeast. Maintaining its rectangular form, the building features one-, two-, and three-story brick construction. A flat roof caps the building. The façade (northwest elevation) is embellished with the use of pressed brick, molded metal cornices, architraves, molded brick strings, and terra cotta accents. A prominent corbeled brick parapet with a central front-gabled pediment extends across the façade. Metal characters proudly display the building's name. The main entry, centrally located between two vehicle bays, has no door. Furthermore, no doors or windows remain on the façade. Large arched window openings on the second story retain their character-defining molded brick arches set on a molded limestone architrave. A pedimented plaque is centrally located between the second-story window openings. It is inscribed, "Erected 1894".

The northeast (side) and southeast (rear) elevations are faced in five-course, American-bond brick. Window openings have concrete sills and two-course, rowlock brick segmental arches. No sash is extant. A large, exterior brick chimney is located on the rear of the building.

As mentioned earlier, the rear of the building features one- and three-story segments. The one-story block is located along the southwest (side) elevation of the building. Based on Sanborn Fire Insurance Company maps, this one-story block was constructed between 1904 and 1928.

Located three-quarters down the northeast (side) elevation, the three-story block is capped by a hipped roof with overhanging eaves and features multiple porthole openings. Based on Sanborn Fire Insurance Company maps, this third story was added between 1904 and 1928. An exterior-side brick chimney extends up the northeast (side) elevation to pierce the overhanging eave. None of the window openings have sash, while some have been bricked in. However, all retain their two-course, rowlock brick segmental arches where original.

This building was designated a DC Historic Landmark January 24, 2008, with listing in the National Register on November 19, 2008. The following information is from the DC Inventory of Historic Sites:

"Engine House 10 was erected in 1894-1895 to serve the Stanton Park neighborhood, the northern portion of Capitol Hill, and the emerging suburban subdivisions of Trinidad and Ivy City. One of a series of eight District firehouses designed by Leon Dessez, it was similar to his since-demolished Engine House 11 of 1895 and is probably the best and most characteristic example of a Victorian-era firehouse still owned by the District. The front pedestrian entrance between two vehicle bays was typical of these stations, and the brick façade with limestone and terra cotta trim was common to those built in the mid-1880s through mid-1890s."

The building is currently under private ownership and being rehabilitated into a multi-family condominium.

Site Notes:

October 2010: This building is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The level lot, due to construction on site, has been cleared of vegetation and is covered with dirt and gravel. Metal security fencing with barbed wire encloses the property. The rear of the lot abuts an alley to the southeast.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1898 by S. Carr, this three-story, multi-family dwelling is set on a solid concrete foundation. Designed in the Queen Anne style with stylistic influences of the Italianate, this rectangular building has a projecting front bay and a large rear ell. The façade (northwest elevation) of this brick structure is faced with stretcher-bond brick. A sloped roof caps the building, obscured by a prominent corbeled brick parapet wall with ogee-molded metal cornice. Window openings on the façade hold 1/1, double-hung, vinyl sash with false muntins. Openings are replete with concrete sills and rock-faced concrete lug lintels. Brick sill courses extend across the façade, which is defined by a full-height projecting bay. The main entry, located opposite the projecting bay, is set in a recessed arched opening and contains a single-leaf, flush wood door with two lights.

The southwest (side) elevation of the main block has five-course, American-bond brickwork and no openings. The southeast (rear) elevation of the main block was not visible from the public right-of-way.

A three-story, two-bay ell stretches off the rear of the building. Approximately the size of the main block, this large ell has five-course, American-bond brickwork and is capped by a sloped roof. Fenestration of the southwest (side) elevation consists of 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. The southeast (rear) elevation of the ell has 2/2, double-hung, wood-sash windows with concrete sills and two-course, rowlock brick segmental arches.

Site Notes:

October 2010: This semi-detached dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The narrow front yard is enclosed by a milled-point metal fence and includes mature trees. A concrete walkway extends from the metal stoop to the sidewalk. The backyard, enclosed with a wooden privacy fence, extends southeast to an alley.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1890 by owner/builder S. Carr, this two-story, two-bay single-family dwelling was designed in the Queen Anne Style with Italianate influences. The building has a rectangular form with a projecting front bay and rear addition. Set on a raised brick foundation, the brick structure features pressed stretcher-bond brickwork on its façade (northwest elevation). A sloped roof caps the building. Across the façade a molded metal cornice is set atop a prominent corbeled brick parapet. An interior-rear brick chimney rises from the southeast elevation. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches with nail-head drip molding. Sill courses compliment the façade. A full-height projecting bay dominates the façade. The bay features chamfered corners at window opening height and continues the brick parapet found on the main block. The main entry, elevated and accessed via a metal stoop, holds a single-leaf, paneled wood door with single-light transom set under a two-course, rowlock brick segmental arch. A secondary, below-grade door opening is located beneath the stoop. It contains a single-leaf, paneled wood door with single-light transom. The southeast (rear) elevation has five-course, American-bond brickwork and is pierced by 1/1, double-hung, vinyl-sash windows with concrete sills and lug lintels.

A one-story, one-bay appendage, according to Sanborn Fire Insurance Company maps, was constructed on the rear of the building between 1904 and 1928. At the time of the 1960 Sanborn map, the addition was still only one story. Set on a parged pier foundation, this addition is currently two-stories and clad in German vinyl siding. Window openings hold 1/1, double-hung, vinyl sash. Based on its form and materials, this addition was enlarged and enclosed ca. 1990.

Site Notes:

October 2010: This dwelling is located on the southeast side of Maryland Avenue and has a setback of approximately thirty feet from the sidewalk. The front yard is landscaped with mature shrubs and enclosed with a milled point metal fence. A concrete walkway links the metal front stoop to the sidewalk. Concrete steps provide access to a below-grade door opening. The backyard, enclosed by a hairpin and picket metal fence, extends southeast towards Elliott Street.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1890 by owner/builder S. Carr, this semi-detached dwelling was one of two built under the same permit (#1724). The two-story, two-bay dwelling exhibits influences of both the Queen Anne and Italianate styles and has an irregular form. Set on a raised brick foundation, the brick structure is faced with nine-course, American-bond brick. A sloped roof caps the building, being fronted by a molded metal cornice set on a prominent corbeled brick parapet extending across the façade (northwest elevation). A subdued corbeled brick cornice is located on the east elevation. An interior brick chimney with plain cap pierces the roof. The façade features a full-height, five-sided canted projecting bay with perforated edges and dogtooth brick panels. The main entry, located in the southern bay of the façade, holds a single-leaf, paneled wood door with semi-circular light and single-light transom. A one-story, two-bay metal porch shelters the elevated main entry. Set on a metal pier foundation, the porch has a flat roof with metal filigree posts and is served via metal stairs. The east elevation features a full-height, two-bay projecting rectangular bay. Window openings on the façade and east elevation hold either wood or vinyl sash with concrete sills and two-course, rowlock brick segmental arches. Façade openings include nebule-molded drip molding.

Site Notes:

October 2010: This semi-detached dwelling is located on a corner lot southwest of the intersection of Maryland Avenue and Elliott Street. The building has a setback of approximately thirty feet from the concrete sidewalk aside Maryland Avenue. There is approximately five feet between the concrete sidewalk aside Elliott Street and the side of the building. The level, grassy property is enclosed by a metal chain-link fence. A concrete walkway links the sidewalk with the front porch steps.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard. The mansard has overhanging eaves with a bracketed cornice. Twin shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. The dwelling is fenestrated with a single-leaf, wood-frame glass door and 6/1, double-hung, wood-sash windows. The window opening on the first story is paired. Soldier lintel strings complete the fenestration. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a six-light wood-sash awning window), the porch has a flat roof with molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. Fenestration of the west (side) elevation consists of 1/1, double-hung, vinyl-sash windows and vinyl-sash sliding windows. The north (rear) elevation has a two-story porch that has been enclosed with vinyl siding. Capped by a shed roof, the porch now has 1/1, double-hung, vinyl-sash windows and tripartite sliding vinyl windows. A wooden deck has been constructed on the first story.

Site Notes:

October 2010: This semi-detached rowhouse is located on a corner lot northeast of the intersection of F Street and 13th Street. The building has a setback of approximately twenty feet from the concrete sidewalk aside F Street. Landscaped with immature and mature trees, shrubs, and ground cover, the level lot is enclosed with a metal chain-link fence. A concrete walkway links the sidewalk with the front porch steps. The rear of the property extends north to an alley.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves with exposed tails. Paired shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, flush wood door and 6/1, double-hung, wood-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a six-light wood-sash awning window), the porch has a flat roof with a molded metal cornice. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. The porch has been enclosed with aluminum siding and vinyl-sash casements and sliding windows. A single-leaf, paneled wood door provides access to the first story.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a combination of milled point and chain-link fencing. Landscaping consists of a manicured lawn, foundation plantings, and flower beds. A concrete walkway extends from the front porch down to the sidewalk. The rear of the property extends north to an alley. It is covered with concrete and enclosed by a wooden privacy fence.

It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves with exposed tails. Paired shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, paneled wood door with blind transom and 6/1, double-hung, wood-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation with window opening (covered with plywood), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation with concrete block infill, the porch has been enclosed with T-111 siding. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, paneled metal door with light. Wood steps provide access to the rear door opening.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a chain-link fence. Landscaping consists of a manicured lawn and foundation plantings. Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has overhanging eaves with a bracketed cornice. Twin shed-roof false dormers pierce the mansard. They have overhanging eaves and hold single-light, vinyl-sash awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, paneled wood door and 1/1, double-hung, vinyl-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a two-light, vinyl-sash sliding window), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. The porch has been enclosed with vinyl siding and is pierced with 1/1, double-hung, vinyl-sash windows. A single-leaf, paneled metal door with nine lights provides access to a wood deck on the rear of the dwelling.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is landscaped with ground cover, shrubs, plantings, and immature shrubs. A concrete walkway extends from the front porch down to the sidewalk. The rear of the property extends north to an alley and includes a garage.

It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has overhanging eaves with a bracketed cornice. Twin shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed tails and hold 12-light, wood-sash awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, paneled wood door with lights and 1/1, double-hung, vinyl-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation with a window opening (covered with plywood), the porch has a flat roof with a molded metal cornice. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. Metal awnings have been affixed to the front of the porch as well as the second-story opening. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation infilled with wood paneling and a six-light, wood-sash awning window, the porch has been enclosed with vinyl siding. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, paneled wood door with transom.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is landscaped with ground cover, shrubs, plantings, and immature shrubs. A concrete walkway extends from the front porch down to the sidewalk. The rear of the property extends north to an alley and includes a mature tree and concrete parking pad.

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves with exposed tails. The metal gutter system has detached from the roof. Paired shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The main entry, located in the western bay, holds a single-leaf, flush wood door with single-light transom. A paired opening flanks the door opening to the east and holds 6/1, double-hung, wood sash. Three second-story openings hold 1/1, double-hung, vinyl-sash windows with 6/1 false muntins. All window openings have concrete sills. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a six-light, wood-sash awning window), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation with brick infill, the porch has been enclosed with vinyl siding. Fenestration consists of 1/1, double-hung, vinyl-sash windows with 6/1 false muntins and a single-leaf wood door with three-light transom. Metal stairs provide access to the door opening.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a chain-link fence. A concrete walkway extends from the front porch down to the sidewalk. Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves with exposed tails. Paired shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, paneled wood door with a single-light transom and 1/1, double-hung, vinyl-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation pierced by a window opening (covered with plywood), the porch has a flat roof with a molded metal cornice. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation partially enclosed with brick and concrete block, the porch has been enclosed with German vinyl siding. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, flush wood door with single-light transom. The door opening is sheltered by a simple wood doorhood and accessed via wood steps.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a chain-link fence. A concrete walkway extends from the front porch down to the sidewalk. The level, grassy backyard extends north to an alley. A concrete walkway provides access to the rear of the building from the alley.

Outbuilding Notes:

October 2010: This one-story, two-bay garage, based on its form and materials, appears to have been constructed ca. 2000. The concrete-block structure is capped by a sloped roof finished with metal coping. The façade (north elevation) fronts

the alley and includes a single-leaf, paneled wood door and a panelled, roll-up metal garage door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has overhanging eaves with a bracketed cornice. Twin shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, paneled wood door with transom and 6/1, double-hung, wood-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation with a window opening (enclosed with plywood and small, single-light light), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. The porch has been enclosed with vinyl siding, forming a one-story, one-bay integral porch in the western end of the first story. The porch has a wood post support and provides access to a single-leaf door opening. Fenestration of the enclosed porch includes 1/1, double-hung, vinyl-sash windows. A wood deck has been constructed on the rear of the porch.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a chain-link fence. A concrete walkway extends from the front porch down to the sidewalk. The backyard extends north to an alley and includes a garage.

The dwelling is fenestrated with a single-leaf, paneled wood door with transom and 1/1, double-hung, vinyl-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a six-light, wood-sash awning window), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation with brick infill, the porch has been enclosed with vinyl siding and is pierced by 1/1, double-hung, vinyl-sash windows. A single-leaf, paneled wood door with four lights located on the first story is accessed via metal stairs. A single-leaf door opening is located in the basement of the porch.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a milled point metal fence. Foundation plantings front the porch. A concrete walkway extends from the front porch down to the sidewalk. The backyard extends north to an alley. It has mature ground cover and shrubs and has a brick patio. A brick wall with metal gate fronts the alley.

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 16 buildings constructed from the same permit (#10315). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves with exposed tails. Paired shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The dwelling is fenestrated with a single-leaf, flush wood door and 1/1, double-hung, vinyl-sash windows with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a six-light wood-sash awning window), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation with pressed metal infill, the porch has been enclosed with pressed metal. A four-light, wood-sash window and single-leaf, flush wood door fenestrate the foundation. The first and second stories have 1/1, double-hung, vinyl-sash windows. A single-leaf, paneled wood door with six lights is accessed via poured concrete steps. The porch has been enclosed with aluminum siding and vinyl-sash casements and sliding windows. A single-leaf, paneled wood door provides access to the first story.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall and is enclosed by a combination of milled point and chain-link fencing. Landscaping consists of a manicured lawn and foundation plantings. A concrete walkway extends from the front porch down to the sidewalk. The grassy backyard extends north to an alley.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 4 buildings constructed from the same permit (#3389). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by an asphalt-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves. A shed-roof false dormer pierces the mansard. It has overhanging eaves with exposed rafter ends and holds paired 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The main entry, located in the western bay, holds a single-leaf, paneled metal door with single-light transom. Window openings contain 1/1, double-hung, vinyl-sash windows with 9/9 false muntins and concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a two-light vinyl-sash sliding window), the porch has a flat roof with a molded metal cornice. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Enclosed with vinyl siding, the porch has window openings with 1/1, double-hung, vinyl-sash windows and 6/6 false muntins. An oriel window has been installed on the first story.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall. A concrete walkway extends from the front porch down to the sidewalk. The backyard extends north to an alley and includes a garage.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 4 buildings constructed from the same permit (#3389). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. At the time of the one-site survey the building was vacant and in poor condition. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by an asphalt-shingled false mansard set between stepped brick firewalls. The mansard has flared overhanging eaves. A shed-roof false dormer pierces the mansard. It has overhanging eaves with exposed rafter ends and holds paired 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The main entry, located in the western bay, holds a single-leaf, paneled wood door with twelve lights and transom. Single and paired window openings have been covered with plywood. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation (pierced by a metal-clad window opening), the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation, the porch is enclosed with aluminum siding. Window openings are covered with plywood.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The slightly elevated front yard has a stone retaining wall. A concrete walkway extends from the front porch down to the sidewalk. The backyard extends north to an alley and includes a garage.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was erected in 1924 by owner/builder T.A. Jameson and was one of 4 buildings constructed from the same permit (#3389). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, this brick structure is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by an asphalt-shingled false mansard set between stepped brick firewalls. The mansard has overhanging eaves and a bracketed cornice. Twin shed-roof false dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and hold 12-light wood awning windows. An exterior-rear brick chimney with plain cap is located on the north elevation. The main entry, located in the western bay, holds a single-leaf, paneled wood door with lights and transom. Window openings contain 1/1, double-hung, vinyl sash with concrete sills. The window opening on the first story is paired. Soldier lintel strings complete the openings. A one-story, full-width porch shelters the first story. Set on a solid brick foundation pierced by a large opening with decorative concrete block infill sides, the porch has a flat roof with a molded metal cornice, overhanging eaves, and modillions. Brick posts with molded metal capitals support the roof. Concrete balusters complete the porch. The east (side) elevation has no openings. The north (rear) elevation has a two-story original porch capped by a shed roof. Set on a brick pier foundation, the porch has been enclosed with aluminum siding. Window openings hold 1/1, double-hung, vinyl-sash windows. A single-leaf, paneled wood door is accessed via poured concrete steps. A single-leaf, paneled metal door with semi-circular light is located on the rear of the main block, beneath the porch.

Site Notes:

October 2010: This semi-detached, single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. A vacant lot is located east of the building. The slightly elevated front yard has a stone retaining wall and is enclosed with a hairpin metal fence. The front yard has been covered with concrete. The backyard extends north to an alley and includes a brick/grass ribbon driveway. A substantial concrete wall extends along the eastern bounds of the backyard. A metal chain-link fence forms the western bounds of the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1907 by Jones and Peters Construction Co., this two-story, two-bay dwelling was designed in the Queen Anne style following the plans of architect Frank Wade. Set on a raised solid concrete foundation, this brick structure is faced with five-course, American-bond brick. A sloped roof caps the dwelling and includes a prominent molded metal cornice. The façade (south elevation) features a full-height, three-sided canted bay capped by a slate-shingled pyramidal roof with finial. Window openings on the façade hold 1/1, double-hung, vinyl sash with concrete sills and rock-faced concrete lug lintels. Narrow, single-light clerestory windows with concrete sills span the façade. The main entry, located in the western bay, holds a single-leaf, paneled wood door with a leaded-glass transom. A below-grade door opening was not visible from the public right-of-way. The west (side) elevation has no openings. The south (rear) elevation is pierced by 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell extends off the rear of the building. Capped by a shed roof, the ell is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay porch is located on the rear of the ell. This original appendage has been enclosed with German vinyl siding and is capped by a shed roof. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf, paneled metal door with semi-circular light and transom.

Site Notes:

October 2010: This semi-detached dwelling is located on the north side of F Street and has a setback of approximately twenty feet from the sidewalk. Comprised of two lots, the level, grassy front yard is enclosed by a milled point metal fence. Landscaping includes a manicured lawn, immature shrubs, plantings, and ground cover. A stone walkway links the sidewalk with the front steps of the metal stoop. A wooden privacy fence extends west off the building, delineating front yard space. The level, grassy backyard extends north to an alley and is enclosed by a wooden privacy fence and chain-link fence. A large concrete parking pad is located in the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by E.K. Fox following the designs of architect Andrew C. Plant, this two-story, two-bay dwelling is one of two built under the same permit (#1270). The Queen Anne-style dwelling has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A sloped roof caps the dwelling and is obscured by a false mansard of asphalt shingles with a molded metal cornice. A brick chimney is located on the rear of the dwelling. The façade (south elevation) has a full-height projecting rectangular bay capped by a asphalt-shingled pyramidal roof. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills. The first-story window opening on the façade of the projecting bay features a gauged brick jack arch with brick key. The main entry, located in the western bay of the façade, holds a single-leaf, paneled wood door set in a recessed opening with an semi-circular transom and brick arch with key. The north (rear) elevation has 2/2, double-hung, wood-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay ell with five-course, American-bond brick coursing is located on the rear of the dwelling. Capped by a shed roof, the ell is fenestrated with 2/2, double-hung, wood-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A one-story, one-bay porch is located on the rear of the ell. Based on its form and materials, as well as Sanborn Fire Insurance Company maps, this is an original appendage. The porch has been enclosed with T-111 siding and capped by a shed roof. Fenestration consists of 6/6, double-hung, wood-sash windows in narrow, square-edge wood surrounds.

Site Notes:

October 2010: This single-family dwelling is located on the north side of F Street and has a setback of approximately twenty feet. The front yard is enclosed with a milled point metal fence and includes mature shrubs. A concrete walkway extends off the metal front stoop down to the sidewalk. The backyard extends north to an alley.

Outbuilding Notes:

October 2010: This one-story, one-bay garage, based on its form, materials, and Sanborn Fire Insurance Company maps, appears to have been constructed ca. 1925. The masonry structure has been clad in Hardieplank along its façade (north

elevation). Secondary elevations are parged. The façade has a non-original opening with a paneled, roll-up metal garage door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1902 by E.K. Fox following the designs of architect Andrew C. Plant, this two-story, two-bay dwelling is one of two built under the same permit (#1270). The Queen Anne-style dwelling has a rectangular form with a projecting front bay and rear ell. Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A sloped roof caps the dwelling and is obscured by a false mansard of asphalt shingles with a molded metal cornice. A brick chimney is located on the rear of the dwelling. The façade (south elevation) has a full-height projecting rectangular bay capped by a asphalt-shingled pyramidal roof. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows with concrete sills. The first-story window opening on the façade of the projecting bay features a gauged brick jack arch with brick key. The main entry, located in the western bay of the façade, holds a single-leaf, paneled wood door with a semi-circular transom and brick arch with key. The north (rear) elevation has 2/2, double-hung, wood-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay ell with five-course, American-bond brick coursing is located on the rear of the dwelling. Capped by a shed roof, the ell is fenestrated with 2/2, double-hung, wood-sash windows with concrete sills and two-course, rowlock brick segmental arches. A one-story porch spans the width of the ell. Constructed ca. 1925, this wood-frame porch has a shed roof supported by wood posts. The porch, although screened, retains its square wood balusters.

Site Notes:

October 2010: This single-family dwelling is located on the north side of F Street and has a setback of approximately twenty feet. The front yard is enclosed with a milled point metal fence. Landscaping consists of topiary, mature shrubs, and foundation plantings. A concrete walkway extends off the metal front stoop down to the sidewalk. The backyard extends north to an alley and includes a garage.

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1905 following the designs of architect Walter B. Hindmarsh, this two-story, two-bay rowhouse was one of three constructed under the same permit (#2833). The Queen Anne-style dwelling has stylistic influences of the Italianate style. The building has a rectangular form with a projecting front bay and rear ell. Set on a solid raised concrete foundation, the façade (south elevation) of this brick structure is faced with stretcher-bond brick. A sloped roof caps the dwelling, obscured by a molded metal cornice set on a prominent corbeled brick parapet. A chimney is located at the rear of the dwelling. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows and have concrete sills and two-course, rowlock brick segmental arches with drip molding. The main entry, located in the western bay, holds a single-leaf, paneled wood door with oval light set in a wide wood surround with single-light transom. This opening also has a segmental brick arch and is accessed via a raised porch stoop. Beneath the stoop is a below-grade door opening (not visible). The façade is defined by a projecting, full-height canted bay with rounded corners. The north (rear) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell is located on the rear of the building. It is capped by a shed roof and fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A single-leaf, paneled wood door with blind transom and two-course, rowlock brick segmental arch is located off a first-story wooden deck.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The landscaped front yard is enclosed by a milled point metal fence and includes immature shrubs and plantings beds. Concrete occupies a large percentage of the front yard. Enclosed by a wooden privacy fence, the backyard extends north to an alley.

October 2010: This one-story, one-bay garage spans the width of the lot. Based on its form and materials, this garage was constructed ca. 1975. The garage is clad in vinyl siding and capped by a shed roof. A large paneled metal garage door is located on the façade (north elevation).

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1905 following the designs of architect Walter B. Hindmarsh, this two-story, two-bay rowhouse was one of three constructed under the same permit (#2833). The Queen Anne-style dwelling has stylistic influences of the Italianate style. The building has a rectangular form with a projecting front bay and rear ell. Set on a solid raised concrete foundation, the façade (south elevation) of this brick structure is faced with stretcher-bond brick. A sloped roof caps the dwelling, obscured by a molded metal cornice set on a prominent corbeled brick parapet. A chimney is located at the rear of the dwelling. Window openings on the façade hold 1/1, double-hung, vinyl-sash windows and have concrete sills and two-course, rowlock brick segmental arches with drip molding. The main entry, located in the western bay, holds a single-leaf, paneled wood door with sidelight and transom. This opening also has a segmental brick arch and is accessed via a raised concrete stoop. Beneath the stoop is a below-grade door opening (not visible). The façade is defined by a projecting, full-height canted bay with rounded corners. The north (rear) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches.

A two-story, two-bay brick ell is located on the rear of the building. It is capped by a shed roof and fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A single-leaf door with two-light transom and two-course, rowlock brick segmental arch is located on the first story.

A ca. 2000 second-story addition has been added on the rear of the ell. Supported by wood posts (which forms a first-story porch), the second-story addition is clad in vinyl siding and capped by a shed roof. Fenestration consists of 1/1, double-hung, vinyl-sash windows with 6/6 false muntins.

Site Notes:

October 2010: This single-family rowhouse is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The landscaped front yard is enclosed by a milled point metal fence and includes mature shrubs, ornamental trees, and plantings beds. Brick pavers have been laid over much of the front yard. The backyard extends north to an alley and includes a garage.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: Constructed in 1904 by Alexander M. Gorman, this two-story, two-bay Queen Anne-style dwelling was one of three buildings built under the same permit (#0094). Originally constructed as a duplex, it now serves as a single-family dwelling. The building has a rectangular form with a projecting front bay. A sloped roof caps the dwelling and includes a molded metal cornice set atop a brick parapet with brick dentils. Window openings on the façade (north elevation) hold 1/1, double-hung, vinyl-sash windows with concrete sills and lug lintels. The permit card indicates that the sills and lintels may be Sandstone. The main entry, located in the western bay, holds a single-leaf, paneled wood door with single-light transom. A lug lintel completes the opening. A full-height projecting bay is slightly offset on the façade. This wide projection is capped by a front-gabled pediment with molded metal cornice and brick dentils. A semi-circular louvered vent is located in the closed tympanum. The north (rear) elevation has 1/1, double-hung, vinyl-sash windows with rowlock brick segmental and two-course, rowlock brick segmental arches. Additional details were not visible from the public right-of-way.

Site Notes:

October 2010: This dwelling is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The level, grassy front yard is enclosed by a milled point metal fence and includes a mature shrub. A concrete walkway extends from the main entry to the sidewalk. The backyard extends north to a narrow brick walkway.

Originally constructed as a duplex, it now serves as a single-family dwelling. The building has a rectangular form with a projecting front bay. A sloped roof caps the dwelling and includes a molded metal cornice set atop a brick parapet with brick dentils. Window openings on the façade (north elevation) hold 1/1, double-hung, vinyl-sash windows with concrete sills and lug lintels. The permit card indicates that the sills and lintels may be Sandstone. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights and a single-light transom. A lug lintel completes the opening. A full-height projecting bay is slightly offset on the façade. This wide projection is capped by a front-gabled pediment with molded metal cornice and brick dentils. A semi-circular louvered vent is located in the closed tympanum. The north (rear) elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete sills and two-course, rowlock brick segmental arches. A two-story, one-bay porch is located in the eastern end of the elevation. Constructed of wood, the porch has a shed roof supported by wood posts with double-bellied balusters. The first story has been enclosed with large fixed windows.

Site Notes:

October 2010: This dwelling is located on the north side of F Street and has a setback of approximately twenty feet from the concrete sidewalk. The level, grassy front yard is enclosed by a milled point metal fence and includes mature trees and shrubs. A brick walkway extends from the main entry to the sidewalk. The backyard extends north to a narrow brick walkway.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay dwelling, based on its form and materials, was constructed ca. 1990. Set on a solid foundation, this structure has a stretcher-bond brick veneer. A sloped roof caps the dwelling and includes a tall, stepped brick parapet across the façade (south elevation). Fenestration of the façade includes 1/1, double-hung, vinyl-sash windows with rowlock brick sills and a single-leaf, paneled wood door. A paneled, roll-up metal garage door is located on grade. All openings have soldier brick jack arches. Fenestration of the east (side) elevation consists of 1/1, double-hung, wood-sash windows with rowlock brick sills and soldier brick jack arches. The north (rear) elevation has 1/1, double-hung, wood-sash windows with rowlock brick sills and multiple single-leaf, wood-frame glass doors. A wood deck set on a brick pier foundation has been constructed on the rear of the dwelling.

Site Notes:

October 2010: This semi-detached, single-family dwelling is located on a corner lot northwest of the intersection of F Street and Elliott Street. The building has a setback of approximately twenty feet from the concrete sidewalk. A concrete driveway occupies much of the front yard. The level, grassy lot has mature trees, with a wooden privacy fence enclosing the backyard. A narrow brick walkway is located north of the property.
