## STYLE/EXTERIOR DATA

Architectural Style(s)

**Modern**

Exterior & Architectural Notes:

**October 2010:** This four-story condominium building was constructed in 2007 and is six structural bays wide. The rectangular-shaped building sits on a solid raised foundation faced with brick. The building is veneered with stretcher-bond brick and has a flat roof with overhanging eaves and a molded cornice with a plain frieze ornamented with multiple beltcourses. A segmental pediment with returns is centrally located on the façade (west elevation). Ornamentation is limited to concrete and brick beltcourses, both plain and corbeled, that wrap around the building. Five two-story oriels project from the façade. The oriels are bowed and have flat roofs that serve as balconies for the fourth-story units. The roofs are edged by metal balustrades. Fenestration of the oriels consists of single and paired 1/1, double-hung, metal-sash windows edged by pilasters. One identical oriel is located on the south (side) elevation. The main entry, centrally located on the façade, consists of a double-leaf, metal-frame glass door edged by sidelights and capped by a multiple-light transom. A segmentally arched metal hood shelters the entry, which is framed by a stone surround with pilasters. Fenestration consists of single and paired 1/1, double-hung, metal-sash windows and single- and double-leaf metal-frame glass doors. Concrete balconies with metal balustrades are located on the second, third, and fourth stories of the building, both on the façade and rear elevation.

Site Notes:

**October 2010:** This condominium building sits on the northeast corner of 13th Street, N.E. and D Street, N.E. The building sits on a level grassy lot that is landscaped with shrubs, immature trees, and foundation plantings. The building is set back approximately fifteen feet from the public concrete sidewalk. The back yard is lined by a metal bow and picket fence. Access to an underground parking garage is located to the rear of the building and is provided by a concrete-paved driveway that enters the property from D Street, N.E. Parged concrete retaining walls line the edges of the driveway.

Outbuilding Notes:

**October 2010: This one-story, one-bay garage was constructed ca. 1926. The wood-frame building is clad with vinyl German siding and has a shed roof (materials not visible). Fenestration consists of a paneled vinyl roll-up door.**

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**  
**Craftsman**

Exterior & Architectural Notes:

**October 2010: This two-and-a-half-story, two-bay building was constructed in 1926 by owner/builder T.A. Jameson and was one of 22 buildings designed from the same permit (#5895). Designed by George T. Santmyers, the building was constructed as a rowhouse and now houses a commercial business in the basement level. The building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard. The mansard has flared overhanging eaves with a bracketed cornice. A shed-roof dormer pierces the mansard. It has overhanging eaves with exposed rafter ends and holds paired 12-light wood awning windows. The dwelling is fenestrated with a replacement single-leaf paneled wood door with two lights and a one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay porch. Set on a solid brick foundation, the porch has a flat roof supported by brick posts. The molded concrete balustrade is obscured by a one-story, one-bay addition in the basement level of the house. Noted on the 1960 Sanborn Insurance Map, this small commercial storefront, known as the Doggie Café, is faced with brick. It is fenestrated with a single-leaf wood door and a one-light fixed wood window with a concrete lug sill. An exterior brick chimney that has been parged is located on the rear (east) elevation. The two-story wood-frame porch has been enclosed with vinyl German siding. It has a shed roof and is fenestrated by bands of 1/1, double-hung, vinyl-sash windows and a single-leaf paneled wood door with lights. No other details were visible.**

Site Notes:

**October 2010: This rowhouse sits on the east side of the street on a raised lot that has been paved with concrete. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 425 13th Street, N.E. on the north side. A garage is located to the rear (east) of the dwelling and the back yard is enclosed by a metal picket fence.**

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with overhanging eaves and exposed rafter ends. Two shed-roof dormers pierce the mansard. They have overhanging eaves with exposed rafter ends and each holds a 12-light wood awning window. The dwelling is fenestrated with a replacement single-leaf paneled wood door with a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation pierced by a six-light wood awning window, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (east) elevation. The two-story wood-frame porch has been enclosed with vinyl German siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf door. A one-story, full-width porch spans the rear elevation. The shed roof is supported by metal posts. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a raised grassy lot edged by a stone retaining wall and a metal picket fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 423 and 427 13th Street, N.E. A garage is located to the rear (east) of the dwelling and the back yard is enclosed by a metal picket fence.

**October 2010: This one-story, one-bay garage was constructed ca. 1926. The wood-frame building is clad with aluminum siding and has a shed roof (materials not visible). Fenestration consists of a metal roll-up door.**

## STYLE/EXTERIOR DATA

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with overhanging eaves and exposed rafter ends. Two shed-roof dormers pierce the mansard and have overhanging eaves with exposed rafter ends. Each holds a 12-light wood awning window. The dwelling is fenestrated with a single-leaf paneled wood door with nine lights and a narrow one-light transom and 6/1, double-hung, wood-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation pierced by a six-light wood awning window, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (east) elevation. The two-story wood-frame porch has been enclosed and is clad with vinyl siding. It has a shed roof and is fenestrated with 6/1, double-hung, wood-sash windows and a single-leaf door. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 425 and 429 13th Street, N.E. A garage is located to the rear (east) of the dwelling and the back yard is enclosed by a metal picket fence.

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with flared overhanging eaves with a bracketed cornice. A shed-roof dormer pierces the mansard and has overhanging eaves with exposed rafter ends. It holds paired 12-light wood awning windows. The dwelling is fenestrated with a single-leaf paneled wood door with lights and a narrow one-light transom and 6/6, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation pierced by a six-light wood awning window, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. The north (side) elevation is fenestrated with single and paired six-light wood awning windows and single and paired 6/6, double-hung, vinyl-sash windows. All window openings have concrete lug sills and continuous soldier-brick lintel. An exterior brick chimney with a plain parged cap is located on the rear (east) elevation. The two-story wood-frame porch on the rear elevation has been enclosed and is clad with hardiplank siding. It has a shed roof and is fenestrated with 6/6, double-hung, vinyl-sash windows and a double-leaf French door. A double-leaf flush metal door is located on the basement level of the north (side) elevation). A one-story wood deck is located off the rear elevation. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 429 13th Street, N.E on the south side. A garage is located to the rear (east) of the dwelling and the back yard is enclosed by a wooden privacy fence.

## STYLE/EXTERIOR DATA

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by an asphalt-shingled false mansard with flared overhanging eaves and a bracketed cornice. Two shed-roof dormers with overhanging eaves and exposed rafter ends pierce the mansard. Each dormer holds a 12-light wood awning window. The dwelling is fenestrated with a single-leaf paneled wood door with a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation pierced by a six-light wood awning window, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. A two-story, one-bay projecting bay with a false mansard roof is located on the west (side) elevation and has the same material treatment as the main block with paired window openings. The two-story wood-frame porch on the rear (south) elevation sits on a solid brick-faced foundation. According to the 1928 Sanborn Insurance Map, a one-car garage was located in the basement level and was accessible from 13th Street, N.E. The vehicular opening has been infilled with T-111 siding and a single-leaf paneled wood door. The rear porch has been enclosed and is clad with aluminum siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled metal door. A one-story wood deck is located off the rear elevation. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall and enclosed by a metal picket fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 1303 E Street, N.E. on the east side. A garage is located to the rear (south) of the dwelling.

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired 12-light wood awning windows. The dwelling is fenestrated with a single-leaf paneled wood door with a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. The original awning window in the basement of the porch has been removed and is partially infilled with concrete blocks. A larger opening was cut to provide access to a single-leaf paneled wood door. The porch has a flat roof supported by brick posts. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch has been enclosed and is clad with vinyl siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and single-leaf paneled wood doors, located on the first story and in the basement. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall and a metal picket fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1301 and 1305 E Street, N.E. The back yard is covered with gravel and is used as a parking area.

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired 12-light wood awning windows. The dwelling is fenestrated with a single-leaf paneled wood door with lights and a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a solid brick foundation. The porch has a flat roof supported by brick posts and is finished with overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch has been enclosed and is clad with vinyl German siding. It has a shed roof and is fenestrated with bands of 1/1, double-hung, vinyl-sash windows and a single-leaf door (not visible). No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall and a metal picket fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1303 and 1307 E Street, N.E. and the back yard is enclosed by a wood privacy fence. A garage is located to the rear (south) of the dwelling.

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with flared overhanging eaves and a bracketed cornice. Two shed-roof dormers with overhanging eaves and exposed rafter ends pierce the mansard. Each dormer holds a 12-light wood awning window. The dwelling is fenestrated with a replacement single-leaf paneled wood door with lights and a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story, wood-frame porch on the rear elevation has been enclosed and is clad with hardiplank siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled metal door with nine lights. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1309 and 1313 E Street, N.E.

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with flared overhanging eaves and a bracketed cornice. Two shed-roof dormers with overhanging eaves and exposed rafter ends pierce the mansard. Each dormer holds a one-light vinyl awning window. The dwelling is fenestrated with a replacement single-leaf paneled wood door with lights and a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is boarded with plywood. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An opening has been cut in the basement level of the porch to accommodate a single-leaf entry in the basement (not visible). An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story, wood-frame porch on the rear elevation has been enclosed and is clad with vinyl siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled metal door that is partially boarded. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 1311 and 1315 E Street, N.E. The back yard is enclosed by a metal picket fence and is paved with concrete.

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired 10-light wood awning windows. The dwelling is fenestrated with a single-leaf paneled wood door and a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a solid brick foundation pierced by a six-light wood awning window. The porch has a flat roof supported by brick posts and is finished with overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch has been enclosed and is clad with vinyl German siding. It has a shed roof and is fenestrated with bands of 6/1, double-hung, wood-sash windows and a single-leaf flush wood door. A single-leaf paneled metal door with four lights is located in the basement level. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 1313 and 1317 E Street, N.E. The back yard is enclosed by a metal chain-link fence.

## STYLE/EXTERIOR DATA

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with flared overhanging eaves and a bracketed cornice. Two shed-roof dormers with overhanging eaves and exposed rafter ends pierce the mansard. Each dormer holds a ten-light wood awning window. The dwelling is fenestrated with a replacement single-leaf flush wood door with a narrow one-light transom and 6/1, double-hung, wood-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior parged brick chimney with a plain cap is located on the rear (south) elevation. The two-story, wood-frame porch on the rear elevation has been enclosed and is clad with T-111 siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf door (not visible) sheltered by a metal hood. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall and a metal picket fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps and a metal railing leads from the porch to the sidewalk. The building is adjacent to 1319 and 1323 E Street, N.E. The back yard is paved with concrete.

Exterior & Architectural Notes:

**October 2010:** This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging boxed eaves. The dormer holds paired ten-light wood awning windows. The dwelling is fenestrated with a single-leaf paneled wood door with lights and a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a solid brick foundation pierced by a glass-block window. The porch has a flat roof supported by brick posts and is finished with overhanging eaves and a molded cornice. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch on the rear elevation sits on a brick pier foundation. The porch has been enclosed and is clad with vinyl German siding. It has a shed roof and is fenestrated with bands of 1/1, double-hung, vinyl-sash windows and a single-leaf flush wood door with a light that is sheltered by a metal hood. No other details were visible.

Site Notes:

**October 2010:** This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall and a metal chain-link fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1325 and 1329 E Street, N.E. The back yard is enclosed by a metal chain-link fence and contains a concrete-paved parking area.

## STYLE/EXTERIOR DATA

Architectural Style(s)

Craftsman

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired ten-light wood awning windows. The dwelling is fenestrated with a single-leaf paneled wood-frame glass door with a narrow one-light transom and 6/6, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a solid brick foundation pierced by a glass-block window. The porch has a flat roof supported by brick posts and is finished with overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior parged brick chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch on the rear elevation sits on a solid foundation. The porch has been enclosed and is clad with vinyl German siding. It has a shed roof and is fenestrated with 6/6, double-hung, vinyl-sash windows and single-leaf paneled metal doors with lights, located in the basement and the first story. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1327 and 1331 E Street, N.E. The back yard is paved with concrete and concrete pavers.

Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by an asphalt-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired ten-light wood awning windows. The dwelling is fenestrated with a replacement single-leaf paneled wood door with lights and a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a solid brick foundation pierced by an opening covered with plywood. The porch has a flat roof supported by brick posts and is finished with overhanging eaves and a molded cornice with modillions. A molded concrete balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch on the rear elevation sits on a brick pier foundation. The porch has been enclosed and is clad with vinyl siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf flush wood door on the first story and in the basement level. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall and partially lined by a metal fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1329 and 1333 E Street, N.E. A prefabricated shed is located in the back yard, which is partially enclosed by a metal fence.

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1926 by owner/builder T.A. Jameson and was one of 22 buildings constructed from the same permit (#5895). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the wood-frame house is faced with five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard with flared overhanging eaves and a bracketed cornice. Two shed-roof dormers with overhanging eaves and exposed rafter ends pierce the mansard. Each dormer holds a 10-light wood awning window. The dwelling is fenestrated by a single-leaf paneled wood door with lights a narrow one-light transom and 6/6, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a solid brick foundation pierced by a paired one-light vinyl sliding window, the porch has a flat roof supported by brick posts. The roof has wide overhanging eaves and a molded cornice with modillions. The east (side) elevation is parged and is fenestrated with single and paired 6/6, double-hung, vinyl-sash windows and paired one-light vinyl sliding windows. An exterior brick parged chimney with a plain cap is located on the rear (south) elevation. The two-story wood-frame porch on the rear (south) elevation sits on a brick pier foundation infilled with concrete. The rear porch has been enclosed and is clad with vinyl siding. It has a shed roof and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf paneled wood door. The basement level contains a single-leaf flush metal door and paired one-light vinyl sliding windows. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 1331 E Street, N.E on the west side. A metal chain-link fence partially encloses the back yard.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

**October 2010:** The Kingsman School was originally constructed in 1922 as a three-story, Classical Revival-style building with a rectangular form. Designed as an expansible building that could later be added on to, the school was enlarged in 1939 with the addition of an auditorium, new entry, and a west wing, forming a T-shaped plan. The 1939 additions closely resemble the original portion of the building in style, form, and ornamentation. In 1959, a one-story wing was constructed to the west of the school and was connected by a hyphen. Post 1960, a three-story addition was constructed on the rear (south) of the 1939 wing. In 2003, the vacant school was sold by the District of Columbia as surplus property to the Charter Schools Development Corporation (CSDC). The CSDC then undertook an \$8.5 million renovation of the school, creating two separate charter schools within one campus. The 1922 and 1939 portions of the school sit on solid concrete foundations. They have flat concrete roofs with molded stone cornices and are constructed of brick faced with stretcher-bond brick. Ornamentation is limited to the entries, double-leaf flush metal doors with lights, which have decorative brick surrounds with molded concrete and stone hoods with brackets, and to numerous brick and stone beltcourses that wrap the building. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills, soldier-brick lintels, and stacked brick surrounds with concrete or stone cornerblocks. The main entry, added in 1939, is centrally located on the façade (north elevation). Projecting slightly from the plane of the façade, the three-story entry is framed by pilasters and is ornamented by a molded stone cornice with modillions. The plain stone frieze reads "Kingsman School." Access to the school is provided by a double-leaf, flush metal door with lights, capped by a semicircular transom with a scrolled volute. The entry is flanked by 1/1, double-hung, vinyl-sash windows and the first story is faced with scored stones. The second- and third-story windows are separated by a decorative brick spandrel. Third-story windows have flat brick arches. The one-and-a-half-story auditorium on the rear (south) elevation, is also faced with stretcher-bond brick and has a flat roof. Brick buttresses line the sides of the auditorium. Visible fenestration includes fixed vinyl or awning windows and circular fixed vinyl windows. The one-story wing constructed in 1959 sits on a solid concrete foundation and has a steel frame covered with five-course, American-bond brick. The building has a flat roof and is ornamented with brick quoins at the corners. It is fenestrated with double-leaf flush metal doors with lights and a one-light transom, as well as what appears to be multiple-light fixed and awning windows. The wing is attached to the building by a one-story, one-bay hyphen with a flat roof. The hyphen is fenestrated with multiple-light fixed vinyl windows. Post-1960, a three-story, four-bay addition was constructed on the rear (south) elevation of the 1939 wing. Faced with stretcher-bond brick, the addition has a flat roof with very wide overhanging eaves. Brick buttresses with concrete caps line the exterior walls. Fenestration consists of bands of 1/1 fixed vinyl-sash windows with one-light fixed vinyl windows over one-light vinyl awning windows. No other details were visible from the right-of-way.

Site Notes:

**October 2010:** This school is located on the southwest corner of E Street, N.E. and 14th Street, N.E. The building sits on a grassy sloping lot that is landscaped with mature trees and shrubs. Set back approximately 50 feet from the public concrete sidewalk, the school is surrounded by asphalt paved parking lots to the west (side) and south (rear). Concrete walkways with broad concrete steps cross the property.

Architectural Style(s)

### Classical Revival

Exterior & Architectural Notes:

**October 2010:** This two-story, three-bay apartment building was constructed in 1913. It has a U-shape and is an illustration of the Classical Revival style. Set on a solid concrete foundation, this building is faced with Flemish-bond brick with glazed headers. The sloping roof is ornamented by a molded metal cornice with end brackets. The dwelling is fenestrated with double-hung, vinyl-sash windows with concrete lug sills and lintels, and a single-leaf flush wood door with a blind transom and sidelights. Window openings on the outermost bays of the façade (southeast elevation) hold 1/1 windows, while those in the center bay of the upper story contain narrow 6/6 windows. The entry is sheltered by a one-story, one-bay porch. Set on a solid parged foundation, the porch has a flat roof supported by parged posts. It has a concrete balustrade. Two two-story, two-bay ells are located on the rear (northwest) elevation. Constructed of five-course, American-bond brick, the ells have sloping roofs that are pierced by interior brick chimneys with plain caps. Openings on the rear of the main block (which is canted) and on the ells are set in two-course rowlock segmental brick arches. Window openings hold 1/1, double-hung, vinyl sash and the four entries each contain a single-leaf paneled metal door with a blind transom. Metal decks with metal steps provide access to the upper stories.

Site Notes:

**October 2010:** This apartment building sits on the west side of the street on a raised grassy lot edged by a concrete retaining wall with a metal picket fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 410 and 414 Tennessee Avenue, N.E. The back yard is enclosed by a metal chain-link fence.

door and a paneled metal roll-up door.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

**October 2010:** This two-story, two-bay single dwelling was constructed in 1912 by builder L.W. Gibson for owner Sterling H. Watson (permit #1324). Designed by W.S. Plager, the dwelling is an illustration of the Classical Revival style. Set on a solid concrete foundation, the brick building is faced with Flemish-bond brick and is capped by a sloping roof obscured by a paneled metal parapet. The dwelling has a molded metal cornice with a pressed metal frieze with dentil molding. Fenestration includes a single-leaf wood door with a one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills. All openings on the façade (southeast elevation) have concrete lug sills. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof supported by brick posts on brick piers. A metal balustrade edges the porch, which is accessed by concrete steps. A two-story, two-bay ell is located on the rear elevation. Constructed of five-course, American-bond brick, the ell has a sloping roof with metal coping. An exterior brick chimney with a plain cap is located on the northwest corner. Fenestration of the rear elevation of the main block and the ell consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course, rowlock brick segmental arches. The first story was not visible.

Site Notes:

**October 2010:** This single dwelling sits on the west side of the street on a raised grassy lot edged by a concrete retaining wall with a metal picket fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 408 and 412 Tennessee Avenue, N.E. A garage is located northwest of the house.

### Classical Revival

Exterior & Architectural Notes:

**October 2010:** This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style building is one of four buildings constructed from the same permit (#1442). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (southeast elevation). The building is capped by a sloping roof obscured by a paneled metal parapet and open pediment with a molded metal cornice with modillions and dentil molding. Fenestration consists of a single-leaf paneled wood door with lights with a one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills. All openings on the façade have concrete lug lintels and the first-story window opening is paired. A circular louvered vent with a metal surround is centrally located on the upper story of the façade. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof with a molded cornice that is supported by brick posts on brick piers. A metal balustrade edges the porch. The two-story, two-bay ell on the rear elevation has the same material treatment as the main block. Fenestration of the rear of the main block and of the ell consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course, rowlock-brick segmental arches and a single-leaf paneled wood door with nine lights. An exterior brick chimney with a plain cap is located on the rear of the ell. The entry is sheltered by a one-story, one-bay porch constructed ca. 2000. Set on a wood pier foundation, the porch has a shed roof of asphalt shingles supported by square wood posts.

Site Notes:

**October 2010:** This rowhouse sits on the west side of the street on a raised grassy lot edged by a stone retaining wall with a metal fence. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The building is adjacent to 406 and 410 Tennessee Avenue, N.E. The back yard is paved with bricks and gravel and is enclosed by a metal picket fence. A plastic prefabricated shed, dating from ca. 2005, is located just northwest of the dwelling.

Architectural Style(s)

**Vernacular**

Exterior & Architectural Notes:

**October 2010:** This two-story church was constructed in 1924 by E.D. Maxwell for the Rosedale M.E. Church. Designed by James E. Cooper, the building consists of a rectangular-shaped stone sanctuary with a front-gabled roof lined by a parapet. The building is set north-south at an angle to the street. Off the southeast corner is a two-story, one-bay, front-gabled narthex. Both the sanctuary and narthex have been covered with permastone and have asphalt shingled roofs. An interior-end chimney, covered with permastone, pierces the roof of the church. Fenestration consists of fixed stained glass windows and jalousie windows with permastone sills. The front-gabled roof of the narthex also has a parapet. The narthex is fenestrated with fixed stained glass windows with permastone lintels. A permastone beltcourse serves as a continuous sill for first-story windows. Shed-roof wall dormers are located along the north side of the narthex.

In 1981, the building was enlarged by the construction of a two-story T-shaped addition on the east side of the sanctuary. The masonry addition is faced with stretcher-bond brick. It has a flat roof with a front-gabled parapet on the east side that is ornamented by a corbeled brick cornice. The addition is fenestrated with full-height fixed metal-sash windows with brick rowlock sills. The main entry to the church, now located in the new addition, consists of a double-leaf, metal-frame glass door flanked by full-height sidelights and capped by a large two-light transom.

Site Notes:

**October 2010:** This church sits on the west side of the street on a grassy raised lot edged by a concrete and brick retaining wall and metal fence. The building is set back approximately thirty feet from the public concrete sidewalk. A concrete walkway with steps leads from the main entry to the sidewalk. The back yard is lined with a metal chain-link fence.

Architectural Style(s)

### Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of four buildings constructed from the same permit (#1442). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (southeast elevation). It is capped by a sloping roof obscured by a paneled metal parapet. The dwelling has a molded metal cornice with a pressed metal frieze with dentil molding. Fenestration includes a single-leaf paneled wood door with a blind transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills. All openings on the façade (southeast elevation) have concrete lug sills and the first story window opening is paired. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation partially infilled with lattice, the porch has a flat roof supported by brick posts on brick piers. A metal balustrade edges the porch, which is accessed by metal steps. The rear elevation is parged and features an exterior parged brick chimney with a plain cap. Fenestration consists of 1/1, double-hung, vinyl-sash windows with brick rowlock sills and segmental arches. The one-light transom over the single-leaf entry has been infilled with bricks. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a raised grassy lot edged by a brick retaining wall. The building is set back approximately twenty feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The back yard is enclosed by a wood privacy fence.

**Classical Revival**

Exterior & Architectural Notes:

**October 2010:** This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of four buildings constructed from the same permit (#1442). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (southeast elevation). The building is capped by a sloping roof obscured by a paneled metal parapet and open pediment with a molded metal cornice with modillions and dentil molding. Fenestration consists of a single-leaf door with a one-light transom and 4/4, double-hung, vinyl-sash windows with concrete lug sills. All openings on the façade have concrete lug lintels and the first-story window opening is paired. A circular louvered vent with a metal surround is centrally located on the upper story of the façade. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation with pierced concrete-block infill, the porch has a flat roof with a molded cornice that is supported by brick posts on brick piers. A square-post balustrade edges the porch. The two-story, two-bay ell on the rear elevation is clad with vinyl siding and has an exterior brick chimney with a plain cap that is partially clad with siding. Fenestration consists of 1/1, double-hung, vinyl-sash windows and a single-leaf metal door with lights.

Site Notes:

**October 2010:** This rowhouse sits on the west side of the street on a raised grassy lot edged by a stone retaining wall with a metal fence. The building is set back approximately twenty feet from the public concrete sidewalk. A brick walkway with steps leads from the porch to the sidewalk. The back yard is enclosed by a wood privacy fence. A garage is located to the rear of the dwelling.

## STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Craftsman

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1923 by owner/builder Clarke & Johnson and was one of 4 buildings constructed from the same permit (#3876). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the house is constructed of five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired 8-light wood awning windows. The dwelling is fenestrated with a single-leaf door with a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a brick pier foundation with pierced concrete-block infill. The porch has a flat roof with overhanging eaves and a molded cornice that is supported by brick posts. A metal balustrade edges the porch. The west (side) elevation is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows, paired one-light vinyl sliding windows, and a bowed window composed of one-light vinyl casements. Window openings on the side have brick rowlock sills and two-course segmental brick arches. An exterior brick chimney with a plain cap is located on the rear (north) elevation. The two-story wood-frame porch on the rear elevation has been enclosed and is clad with aluminum siding. It is set on a brick pier foundation infilled with bricks and has a shed roof. Fenestration consists of a single-leaf door, one-light vinyl casements, and a paired one-light vinyl sliding window. No other details were visible.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a raised grassy lot edged by a stone retaining wall and a metal picket fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The back yard is enclosed by a tall metal chain-link fence.

## STYLE/EXTERIOR DATA

Architectural Style(s)

### Classical Revival

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, two-bay rowhouse was erected in 1923 by owner/builder Clarke & Johnson and was one of 4 buildings constructed from the same permit (#3876). Designed by George T. Santmyers, the building reflects the influence of both the Classical Revival and Craftsman styles. Set on a solid concrete foundation, the house is constructed of five-course, American-bond brick. It is capped by a sloping roof that is obscured by a slate-shingled false mansard pierced by a shed-roof dormer. Both the mansard and dormer have overhanging eaves and exposed rafter ends. The dormer holds paired 8-light wood awning windows. The dwelling is fenestrated with a single-leaf door with a narrow one-light transom and 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The window opening on the first story is paired. The entry is sheltered by a one-story, one-bay, full-width porch set on a brick pier foundation infilled with bricks. The porch has a flat roof with overhanging eaves and a molded cornice that is supported by brick posts. A metal balustrade edges the porch. An exterior brick chimney with a plain cap is located on the rear (north) elevation. The two-story wood-frame porch on the rear elevation has been enclosed and is clad with aluminum siding. It is set on a brick pier foundation and has a shed roof. Fenestration consists of a single-leaf door sheltered by a shed-roof hood and 1/1, double-hung, vinyl-sash windows.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a raised grassy lot edged by a stone retaining wall and a metal picket fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The back yard is enclosed by a metal chain-link fence and is largely paved with concrete.

### Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of six buildings constructed from the same permit (#4663). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (south elevation). It is capped by a sloping roof obscured by a paneled metal parapet. The dwelling has a molded metal cornice with a pressed metal frieze with dentil molding. Fenestration includes a single-leaf door with a one-light transom, a single fixed vinyl light on the first story, and 12/1, double-hung, vinyl-sash windows on the second story. Window openings have concrete lug sills and all openings have concrete lug lintels. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof supported by Tuscan columns on brick piers. A metal balustrade edges the porch, which is accessed by wood steps. A two-story, two-bay ell on the rear elevation has the same material treatment as the main block. An exterior brick chimney with a plain cap is located off the rear of the ell. Fenestration consists of a single-leaf door and 2/2, double-hung, wood-sash windows with wood sills and two-course segmental brick arches. The openings are sheltered by metal awnings.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a raised grassy lot edged by a stone retaining wall. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The back yard is enclosed by a metal chain-link fence.

### Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of four buildings constructed from the same permit (#1442). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (south elevation). The building is capped by a sloping roof obscured by a paneled metal parapet and open pediment with a molded metal cornice with modillions and dentil molding. Fenestration consists of a single-leaf door with a one-light transom, a one-light fixed vinyl window, and 1/1, double-hung, vinyl-sash windows. All windows have concrete lug sills and all openings on the façade have concrete lug lintels. A circular louvered vent with a metal surround is centrally located on the upper story of the façade. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof with a molded cornice that is supported by square wood posts. A square-post balustrade edges the porch. The two-story, two-bay ell on the rear elevation has the same material treatment as the main block with concrete lug sills and two-course segmental brick arches. Basement-level windows were not visible.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a raised grassy lot edged by a stone retaining wall and a metal fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The back yard is paved with concrete.

### Classical Revival

Exterior & Architectural Notes:

**October 2010:** This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of six buildings constructed from the same permit (#4663). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (south elevation). It is capped by a sloping roof obscured by a paneled metal parapet. The dwelling has a molded metal cornice with a pressed metal frieze with dentil molding. Fenestration includes a single-leaf door with a one-light transom, paired 12-light vinyl casements on the first story, and 8/8, double-hung, vinyl-sash windows on the second story. Window openings have concrete lug sills and all openings have concrete lug lintels. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof supported by square wood posts on brick piers. A metal balustrade edges the porch, which is accessed by concrete steps. A two-story, two-bay ell on the rear elevation has the same material treatment as the main block. An exterior brick chimney with a plain cap is located off the rear elevation. The ell is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course segmental brick arches. The second-story porch on the rear elevation has been enclosed. The wood-frame structure is clad with asbestos siding and is fenestrated with 1/1, double-hung, vinyl-sash windows. A one-story, two-bay garage was constructed ca. 1928. Attached to the rear elevation of the ell, the garage is constructed of five-course, American-bond brick. It has a sloping roof edged by a wood privacy fence. Fenestration includes a single-leaf flush metal door and a paneled metal roll-up door.

Site Notes:

**October 2010:** This rowhouse sits on the north side of the street on a raised grassy lot edged by a stone retaining wall and a metal fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. A garage is attached to the rear of the dwelling.

### Classical Revival

Exterior & Architectural Notes:

**October 2010:** This two-story, two-bay rowhouse was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of six buildings constructed from the same permit (#4663). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (south elevation). It is capped by a sloping roof obscured by a paneled metal parapet. The dwelling has a molded metal cornice with a pressed metal frieze with dentil molding. Fenestration includes a single-leaf door with a one-light transom and double-hung, vinyl-sash windows with concrete lug sills. The paired opening on the first story contains 1/1 windows and the upper story holds 8/1 windows. All openings have concrete lug lintels. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof supported by Tuscan columns on brick piers. A square-post balustrade edges the porch, which is accessed by concrete steps. A two-story, two-bay ell on the rear elevation has the same material treatment as the main block. An exterior brick chimney with a plain cap is located off the rear elevation. The only visible fenestration includes 1/1, double-hung, vinyl-sash windows with vinyl-clad sills and two-course segmental brick arches.

Site Notes:

**October 2010:** This rowhouse sits on the north side of the street on a raised gravel-covered lot edged by a stone retaining wall and a metal chain-link fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. A metal roll-up door obscures the view of the back yard.

Outbuilding Notes:

**October 2010: This one-story, one-bay garage was constructed ca. 1928. The building is parged and has a sloping roof with concrete coping. The vehicular opening has been partially infilled with concrete blocks and now holds a single-leaf flush**

metal door.

## STYLE/EXTERIOR DATA

Architectural Style(s)

### Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of two buildings constructed from the same permit (#6323). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (south elevation). It is capped by a sloping roof obscured by a paneled metal parapet. The dwelling has a molded metal cornice with a pressed metal frieze with dentil molding. Fenestration includes a single-leaf door with a one-light transom and double-hung, wood-sash windows with concrete lug sills. The paired opening on the first story contains 1/1 windows and the upper story holds 9/1 windows. All openings have concrete lug lintels. The entry is sheltered by a one-story, one-bay, full-width porch. Set on a brick pier foundation, the porch has a flat roof supported by brick posts on brick piers. A metal balustrade edges the porch, which is accessed by concrete steps. A two-story, two-bay ell on the rear elevation has the same material treatment as the main block. An exterior brick chimney with a plain cap is located off the rear of the ell. Visible fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course segmental brick arches.

Site Notes:

October 2010: This single dwelling sits on the north side of the street on a raised gravel-covered lot edged by a stone retaining wall and a metal chain-link fence. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. A garage is located to the rear of the dwelling.

### Classical Revival

Exterior & Architectural Notes:

**October 2010:** This two-story, five-bay single dwelling was constructed in 1910 by owner/builder G.W. Barkman. Designed by A.H. Beers, the Classical Revival-style dwelling is one of two buildings constructed from the same permit (#6323). Set on a solid concrete foundation, the dwelling is constructed of five-course, American-bond brick faced with Flemish-bond brick on the façade (south elevation). The building is capped by a sloping roof obscured by a paneled metal parapet and open pediment with a molded metal cornice with modillions and dentil molding. Fenestration consists of a centrally located single-leaf door with a one-light transom, 1/1, double-hung, vinyl-sash windows on the first story, and 9/1, double-hung, vinyl-sash windows on the upper story. All windows have concrete lug sills and all openings on the façade have concrete lug lintels. A paired diamond-pane casement window is centrally located on the upper story of the façade and is capped by a circular louvered vent with a metal surround. The entry is sheltered by a one-story, one-bay porch. Set on a brick pier foundation infilled with lattice, the porch has a flat roof with a molded cornice that is supported by Tuscan columns on brick piers. A square-post balustrade edges the porch, which is accessed by concrete steps. The two-story, two-bay ell on the rear elevation has the same material treatment as the main block. Fenestration includes 2/2, double-hung, wood-sash windows with wood sills and two-course segmental brick arches and a single-leaf door. A one-story, one-bay garage was constructed on the rear elevation of the ell ca. 1928. The brick garage has a flat roof edged by a square-post wood balustrade. It is fenestrated with a double-leaf flush metal door.

Site Notes:

**October 2010:** This single dwelling sits on the north side of the street on a grassy raised lot edged by a stone retaining wall. The building is set back approximately fifteen feet from the public concrete sidewalk. A concrete walkway with steps leads from the porch to the sidewalk. The back yard is partially enclosed with a wood privacy fence. A garage is attached to the rear elevation and a concrete driveway provides access from the alley to the garage.
