Queen Anne

Exterior & Architectural Notes:

October 2010: This building was constructed in 1890 by owner/builder Robert Waldron as a store and single-family residence. It has been rehabilitated and now is used as a condominium building. Based on historic maps, the northeast corner of the building was removed (reportedly damaged by fire) between 1904 and 1928. The corner was rebuilt with the same footprint ca. 1950. The original portion of the building is two stories high and three bays wide, facing G Street. The building sits on a solid brick foundation and is constructed of seven-course, American-bond brick. The sloping roof is obscured by a parapet with a molded metal cornice and brick corbeling. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills. Window openings have two-course segmental brick arches or jack brick arches. A full-height, three-sided canted bay is located on the façade (north elevation) and has dog-leg brick at the corners. The main entry, a single-leaf door, is capped by a large transom and is edged by sidelights. The two-story addition on the east (side) elevation is constructed of concrete blocks faced with stretcher-bond brick. A two-story rectangular projecting bay is located on the northeast corner. It has a flat roof with metal coping and is fenestrated with 1/1, double-hung, vinyl-sash windows with brick rowlock sills and soldier-brick lintels. The projecting bay is flanked by single-leaf entries on the main block that have a large one-light transom and sidelights.

Site Notes:

October 2010: This dwelling sits on the southwest corner of C Street, N.E. and 13th Street, N.E. on a grassy level lot enclosed with a metal chain-link fence. The building has a setback of approximately 10 feet from the public brick sidewalk. A concrete paved driveway is located to the west of the house.

Architectural Style(s)

Queen Anne

Romanesque (Richardsonian)

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1893 by owner/builder Baker, Norris & Lampton. It is one of eight similar rowhouses constructed from the same permit (# 2147) and exhibits elements of the Richardsonian Romanesque and Queen Anne styles. Set on a solid brick and concrete foundation that is parged on the north side, the brick building is faced with stretcher-bond brick. It is capped by a sloping roof ornamented with a molded metal cornice and checkerboard brick frieze. An interior brick chimney with a plain cap pierces the roof. A two-story bay slightly projects from the plane of the façade (west elevation) and has the same material treatment as the main block with paired window openings. A four-course brick stringcourse is located at the water table. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with rock-faced concrete lintels and sills. The single-leaf entry has a semicircular transom with a semicircular gauged brick arch. The basement level contains paired one-light vinyl sliding windows. Openings on the side elevation have two-course, segmental brick lintels. The rear is fenestrated with 1/1, double-hung, vinyl-sash windows, paired one-light vinyl sliding windows, and a single-leaf door.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a sloping lot. The building has no setback and is adjacent to the public brick sidewalk. The back yard is enclosed with wood privacy fencing.

Architectural Style(s)

Queen Anne

Romanesque (Richardsonian)

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1893 by owner/builder Baker, Norris & Lampton. It is one of eight similar rowhouses constructed from the same permit (# 2147) and exhibits elements of the Richardsonian Romanesque and Queen Anne styles. The dwelling is ornamented with multiple molded brick stringcourses and a molded metal stringcourse set above the second-story window openings. Set on a solid brick and concrete foundation, the brick building is faced with stretcher-bond brick. It is capped by a sloping roof ornamented with a molded metal cornice and paneled brick frieze. An interior-side brick chimney with a plain cap pierces the roof. Two-story projecting bays are located on the façade (north elevation) and side (west) elevation and have the same material treatment as the main block. The polygonal bay is located on the northwest corner of the façade and the two-bay-wide rectangular bay is located on the side elevation. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows and paired 6/6, double-hung, wood-sash windows with rock-faced concrete lintels and sills. The single-leaf entry has a one-light transom with a rock-faced concrete lintel. Second-story openings on the polygonal bay have semicircular transoms and semicircular gauged brick arches. The basement level contains narrow one-light vinyl awning windows. The two-story ell on the rear elevation has the same material treatment as the main block. A two-story enclosed porch is located on the rear (south) elevation of the ell. The wood-frame porch sits on a solid concrete foundation and is clad with weatherboard siding. It has a shed roof edged by a parapet and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf door.

Site Notes:

October 2010: This rowhouse is located on the southwest corner of G Street, N.E. and 14th Place, N.E. It sits on a level lot that is enclosed with a metal fence. The building is set back approximately five feet from the public brick sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1893 by owner/builder Baker, Norris & Lampton. It is one of eight similar rowhouses constructed from the same permit (# 2147) and exhibits elements of the Richardsonian Romanesque and Queen Anne styles. Set on a solid brick and concrete foundation, the brick building is faced with stretcher-bond brick. A two-course brick stringcourse is located at the water table level. The dwelling is capped by a sloping roof ornamented with a paneled brick frieze with brick dentils. A two-story rectangular projecting bay is located on the façade (north elevation) and is ornamented with a front gable edged with a molded metal cornice. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash with rock-faced concrete lintels and sills. The second-story openings on the bay are capped by semicircular transoms and have semicircular gauged brick arches with drip molding. The single-leaf entry is sheltered by a metal awning supported by metal posts. The two-story ell on the rear elevation was not visible from the right-of-way.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a level lot that is enclosed with a metal fence. The building is set back approximately five feet from the public brick sidewalk. The back yard is enclosed with wood privacy fencing.

Architectural Style(s)

Queen Anne

Romanesque (Richardsonian)

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1893 by owner/builder Baker, Norris & Lampton. It is one of eight similar rowhouses constructed from the same permit (# 2147) and exhibits elements of the Richardsonian Romanesque and Queen Anne styles. Set on a solid brick and concrete foundation, the brick building is faced with stretcher-bond brick. A two-course brick stringcourse is located at the water table level. The dwelling is capped by a sloping roof ornamented with a checkerboard brick frieze. A two-story rectangular projecting bay is located on the façade (north elevation) and is ornamented with a front gable edged with a molded metal cornice and brick dentils. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash with rock-faced concrete lintels and sills. The second-story openings on the bay are capped by semicircular transoms and have semicircular gauged brick arches with drip molding. The single-leaf entry has a blind semicircular transom with a semicircular gauged brick arch. Basement-level window openings on the façade have gauged brick arches and have been infilled with bricks. The two-story ell on the rear elevation is obscured from view by a two-story enclosed porch. The wood-frame porch is clad with vinyl siding and has a shed roof. It is fenestrated with 6/1 and 6/6, double-hung, wood-sash windows. First-story fenestration was not visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a level lot that is enclosed with a metal fence. The building is set back approximately five feet from the public brick sidewalk. The back yard is enclosed with wood privacy fencing.

Outbuilding Notes:

October 2010: This one-story, one-bay carport was constructed ca. 1990. The wood-frame structure is covered by a flat roof covered with plywood. It is fenestrated with a paneled metal roll-up door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1908 by J.D. Burn for owner Lottie L. Burn. Designed by C.T. Rose, the building is one of two similar residences constructed from the same permit (#2127). The Classical Revival-style brick building sits on a solid concrete foundation and is faced with stretcher-bond brick. The sloping roof is ornamented with a molded metal cornice and brick corbeling. The dwelling is fenestrated with single and paired 6/6, double-hung, vinyl-sash windows with concrete lug sills and rock-faced concrete lintels. The single-leaf entry has a one-light transom and rock-faced concrete lintel. It is sheltered by a one-story, one-bay porch set on a solid brick foundation. The porch has a flat roof supported by narrow brick posts on brick piers. The roof is finished with a boxed wood cornice and the porch is edged with a metal balustrade. A single-leaf entry is located in the basement level of the façade (north elevation). The two-story, two-bay ell on the rear elevation is constructed of five-course, American-bond brick and has a sloping roof. The ell and the rear elevation of the main block are fenestrated with 1/1, double-hung, vinyl-sash windows and 2/2, double-hung, wood-sash windows. A single-leaf opening with a one-light transom is located on the rear of the ell. All openings have concrete lug sills and two-course segmental brick arches.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a sloping lot edged by a low brick retaining wall with a metal fence. The building is set back approximately five feet from the public brick sidewalk. The back yard is enclosed with metal chain-link fencing. A carport is located south of the house and covers the concrete driveway.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1908 by J.D. Burn for owner Lottie L. Burn. Designed by C.T. Rose, the building is one of two similar residences constructed from the same permit (#2127). The Classical Revival-style brick building sits on a solid concrete foundation and is faced with stretcher-bond brick. The east (side) elevation is parged. The sloping roof is ornamented with a molded metal cornice and brick corbeling. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and rock-faced concrete lintels. The single-leaf entry has a one-light transom and rock-faced concrete lintel. It is sheltered by a one-story, two-bay porch set on a solid brick foundation. The porch is covered by a metal awning supported by metal filigree posts. The porch is edged with a metal balustrade. A single-leaf entry is located in the basement level of the façade (north elevation). The two-story, two-bay ell on the rear elevation is constructed of five-course, American-bond brick and has a sloping roof. The ell is fenestrated with 1/1, double-hung, vinyl-sash windows with brick rowlock sills. A single-leaf opening with a one-light transom is located on the rear of the ell. All openings have two-course segmental brick arches.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a sloping lot edged by a low brick retaining wall with a metal fence. The building is set back approximately five feet from the public brick sidewalk. The back yard is enclosed with metal chain-link fencing.

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was constructed in 1891 by owner/builder Fred Berger. The building is one of twelve similar rowhouses constructed from the same permit (#0521) and shows the influence of the Queen Anne and Italianate styles. Set on a solid brick foundation, the brick building has been refaced with stretcher-bond brick. The building has a sloping roof, pierced by an interior brick chimney that is parged, and is ornamented with a boxed metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, metal-sash windows with brick rowlock sills and soldier-brick lintels. Openings on the first story are elongated. The single-leaf entry has a one-light transom and soldier-brick lintel. The north (side) and rear (east) elevations are parged and are fenestrated with 1/1, double-hung, vinyl-sash windows, paired one-light vinyl sliders, and sliding glass doors. Window openings have segmental arches.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a level lot set adjacent to the public brick sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two -bay rowhouse was constructed in 1891 by owner/builder Fred Berger. The building is one of twelve similar rowhouses constructed from the same permit (#0521) and shows the influence of the Queen Anne and Italianate styles. The dwelling consists of a rectangular main block with a two-story ell on the rear (north) elevation and a two-story, one-bay projecting rectangular bay on the façade (south elevation). Set on a solid brick foundation, the building is constructed of seven-course, American-bond brick and is faced with stretcher-bond brick on the façade. The building has a sloping roof that is pierced by a metal flue and two interior brick chimneys; one with a corbeled cap and one with a plain cap. The roof is ornamented with a molded metal cornice and brick corbeling and the secondary elevations have a molded metal cornice with dentils. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with pearls and drip molding. Basement-level windows have been infilled. The two-story ell has the same material treatment as the main block. An interior brick chimney with a plain cap pierces the sloping roof. Window openings on the west side and rear elevation of the main block and ell have concrete lug sills and two-course segmental brick arches. A one-story, one-bay addition is located on the rear of the ell. Noted on the 1904 Sanborn Insurance map, this addition is constructed of five-course, American-bond brick and has a shed roof. The structure is partially parged and is fenestrated with a single-leaf door with a one-light transom and 1/1, double-hung, vinyl-sash windows with segmental brick arches.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a level lot covered with gravel. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Set on a solid brick foundation, the building is constructed of seven-course, American-bond brick and is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, wood-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with pearls and drip molding. Basement-level openings contain one-light wood awning windows with concrete lug sills. The two-story ell on the rear elevation has the same material treatment as the main block. An interior brick chimney with a plain cap pierces the sloping roof of the ell. Openings on the ell have concrete lug sills and two-course segmental brick arches. A two-story wood deck is located on the rear of the ell. The deck is edged with a square-post wood balustrade.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a grassy sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two -bay rowhouse was constructed in 1891 by owner/builder Fred Berger. The building is one of twelve similar rowhouses constructed from the same permit (#0521) and shows the influence of the Queen Anne and Italianate styles. The dwelling consists of a rectangular main block with a two-story ell on the rear (north) elevation and a two-story, one-bay projecting rectangular bay on the façade (south elevation). Set on a solid brick foundation, the building is constructed of seven-course, American-bond brick and is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with pearls and drip molding. Basement-level openings were not visible. The two-story ell on the rear elevation was largely obscured from view. Only a portion of the canted corner with dog-leg brick was visible. A portion of the ell is parged. Openings on the ell have segmental arches.

Circa 2000, a one-story pop-up addition was constructed on the roof of the main block. The wood-frame structure is clad with vinyl siding and has a shed roof. No other details were visible from the right-of-way.

Site Notes:

October 2010: This rowhouse sits on the north side of the street on a grassy sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-story building was constructed in 1891 by owner/builder Fred Berger. The building is one of twelve similar rowhouses constructed from the same permit (#0521) and shows the influence of the Queen Anne and Italianate styles. Originally constructed as a store and residence, this corner building is now used as a single dwelling. Set on a solid brick foundation, the brick building is faced with ten-course, American-bond brick with dog-leg brick corners. The building has a full slate-shingled false mansard roof that creates a full third story on the building. The roof is ornamented with a molded metal cornice and brick dentils and is pierced by front-gabled wall dormers. The wood dormers each hold a 1/1, double-hung, vinyl-sash window. The main block is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Double-leaf entries are located on both sides of the corner building. The entry on the south elevation has a multiple-light fanlight edged with drip molding. The double-leaf entry on the southeast elevation originally provided access to the store and held a double-leaf door. It now contains a single-leaf entry and has been partially infilled with plywood. The entry is flanked by one-light/one-panel sidelights (boarded) and is capped by a large semicircular transom with a three-course segmental brick arches. A commercial storefront window spans the corner of the building on the first story. Slightly projecting from the main block, the large fixed windows are sheltered by a half-hipped corrugated metal roof. Oriels are located on the upper story of the building. The oriels have molded metal cornices and paneled spandrels above and below the 1/1, double-hung, vinyl-sash windows. The rear elevation was largely obscured from view. Visible were 1/1, double-hung, vinyl-sash windows with segmental brick arches.

Site Notes:

October 2010: This building is located northwest of the intersection of F Street, N.E. and Tennessee Avenue, N.E. The building sits on a grassy level lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by Fred Berger for owner William Pabst. The building is one of ten similar rowhouses designed by Theodore G. Friebus and constructed from the same permit (#1224). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (northwest) elevation and a two-story, one-bay projecting rectangular bay on the façade (southeast elevation). Set on a solid brick foundation, the building is constructed of seven-course, American-bond brick and is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 6/6, double-hung, wood-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with pearls and drip molding. Basement-level openings hold one-light vinyl awning windows with concrete lug sills. The two-story ell on the rear elevation is parged and is fenestrated with 1/1, double-hung, wood-sash windows with header-brick sills and segmental arches. First-story fenestration was not visible from the right-of-way.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a grassy sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing and contains a gravel parking area.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by Fred Berger for owner William Pabst. The building is one of ten similar rowhouses designed by Theodore G. Friebus and constructed from the same permit (#1224). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (northwest) elevation and a two-story, one-bay projecting rectangular bay on the façade (southeast elevation). Originally designed as a single-family dwelling, the building is now used as a multiple dwelling with a basement-level apartment. Set on a solid brick foundation, the building is constructed of seven-course, American-bond brick and is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, wood-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with pearls and drip molding. The basement-level opening holds a double-leaf French door. The two-story ell on the rear elevation has been refaced with stretcher-bond brick. It is fenestrated with 1/1, double-hung, vinyl-sash windows and single-leaf doors, all with soldier-brick lintels. A one-story, one-bay addition is located on the rear of the ell and was added post-1960. The concrete-block addition is faced with stretcher-bond brick and has a flat roof with a roof-top wood deck.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a grassy sloping lot. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, three-bay dwelling was constructed in 1891 by Fred Berger for owner William Pabst. The building is one of ten similar buildings designed by Theodore G. Friebus and constructed from the same permit (#1224). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a polygonal main block with a two-story projecting rectangular bay on the façade (southeast elevation). According to Sanborn Insurance maps, in 1904, the building was used as a mission. In 1928 and 1960, the building's use is documented as a store. The building is now used as a multiple dwelling. Set on a solid brick foundation, the brick building is parged on the façade. The building has a slate-shingled false mansard roof that obscures the sloping roof of the main block. The false mansard is pierced by pedimented metal wall dormers and is ornamented with a molded metal cornice with brick dentils. The dormers hold single and tripled 1/1, double-hung, vinyl-sash windows. Two interior brick chimneys with plain caps pierce the sloping roof of the building. Window openings on the main block and bay consist of 1/1, double-hung, vinyl sash. Openings on the main block have concrete lug sills and segmental brick arches with pearls and drip molding. A two-course brick stringcourse serves as a continuous sill on the second story. Two entries are located on the main block. The southernmost entry originally held a double-leaf door, but now holds a single-leaf door edged by a two-light sidelight. Both entries have semicircular blind transoms with semicircular gauged brick arches with drip molding. The first story of the projecting bay is parged and the second story has a paneled spandrel above and below the window openings.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a grassy sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by Fred Berger for owner William Pabst. The building is one of ten similar rowhouses designed by Theodore G. Friebus and constructed from the same permit (#1224). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 6/6, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with pearls and drip molding. Basement-level openings hold paired one-light vinyl sliding windows with concrete lug sills. The two-story ell on the rear elevation is parged and is fenestrated with a single-leaf door. An interior brick chimney that appears to be parged pierces the roof of the ell. A two-story porch is located on the rear of the ell. The first story is open and the second story is enclosed with concrete blocks and is parged. The porch is fenestrated with 1/1, double-hung, vinyl-sash windows and is supported by parged concrete-block posts.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a grassy sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by Fred Berger for owner William Pabst. The building is one of ten similar rowhouses designed by Theodore G. Friebus and constructed from the same permit (#1224). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a blind transom and a segmental brick arch with pearls and drip molding. Basement-level openings hold one-light wood windows with concrete lug sills. The two-story ell on the rear elevation is gabled on the upper story. It is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental arches. Fenestration of the first story was not visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing and is accessed by a paneled vinyl roll-up door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by Fred Berger for owner William Pabst. The building is one of ten similar rowhouses designed by Theodore G. Friebus and constructed from the same permit (#1224). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 4/4 and 6/6 (vertical-sash), double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with pearls and drip molding. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a blind transom and a segmental brick arch with pearls and drip molding. The two-story ell on the rear elevation is parged and is fenestrated with 6/6, double-hung, vinyl-sash windows with brick rowlock sills and segmental arches. First-story fenestration was not visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1890 by owner/builder Robert Waldron. The building is one of five similar rowhouses constructed from the same permit (#0463). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with drip molding. A two-course brick stringcourse serves as a continuous sill on the second story, and the water table is ornamented with a three-course string. The single-leaf entry has a blind transom and a segmental brick arch with drip molding. The two-story ell on the rear elevation is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows with brick rowlock sills and segmental arches. First-story fenestration was not visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by owner/builder Robert Waldron. The building is one of ten similar rowhouses constructed from the same permit (#1811). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1 and 6/6, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with drip molding. A two-course brick stringcourse serves as a continuous sill on the second story, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with drip molding. The two-story ell on the rear elevation was obscured from view by the privacy fence.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by owner/builder Robert Waldron. The building is one of ten similar rowhouses constructed from the same permit (#1811). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with drip molding. A paneled brick spandrel is located below the first-story windows on the bay. A two-course brick stringcourse serves as a continuous sill on the second story, and the water table is ornamented with a four-course string. The single-leaf entry has a one-light transom and a segmental brick arch with drip molding. The two-story ell on the rear elevation has a sloping roof that is pierced by an interior brick chimney with a parged cap. The ell is obscured from view by a two-story enclosed porch. The brick porch is faced with stretcher-bond brick on the first story and is clad with aluminum siding on the second story. The side elevations of the porch are parged. First-story fenestration was not visible. The window openings on the second story contain tripled 1/1, double-hung, vinyl sash.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing and contains a garage.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by owner/builder Robert Waldron. The building is one of ten similar rowhouses constructed from the same permit (#1811). When originally constructed, the dwelling showed the influence of the Queen Anne and Italianate styles and consisted of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Sanborn Insurance maps indicate that by 1960, the building was being used as a church and the projecting bay had been removed. The façade was then refaced and the fenestration was altered. The building, now used as a single dwelling, sits on a solid brick foundation. The building has a sloping roof ornamented with a molded metal cornice. An interior parged brick chimney with a plain cap pierces the roof. A one-story, partially enclosed porch spans the façade. The southernmost bay is enclosed and is faced with a stone veneer. It holds a 1/1, double-hung, vinyl-sash window. The asphalt-shingled, half-hipped roof of the porch shelters the single-leaf entry that is flanked by sidelights. The northeast corner of the roof is supported by a turned wood post. The second story is fenestrated with three 1/1, double-hung, vinyl-sash windows with segmental brick arches and concrete lug sills. A two-course brick stringcourse serves as a continuous sill. The rear elevation of the main block and the ell have been clad with vinyl German siding. Fenestration consists of 6/6, double-hung, vinyl-sash windows and a single-leaf door on the first story of the ell.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a brick retaining wall and square-post vinyl balustrade with brick posts. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with a tall metal fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by owner/builder Robert Waldron. The building is one of ten similar rowhouses constructed from the same permit (#1811). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches with drip molding. A checkerboard brick spandrel is located below the first-story openings on the bay. A two-course brick stringcourse serves as a continuous sill on the second story, and the water table is ornamented with a four-course string. The single-leaf entry has a one-light transom and a segmental brick arch with drip molding. The rear elevation ell is parged. The rear of the main block and the ell are fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental arches. The first story was not visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by owner/builder Robert Waldron. The building is one of ten similar rowhouses constructed from the same permit (#1811). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (west) elevation and a two-story projecting rectangular bay on the façade (east elevation). Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice and brick corbeling. Fenestration consists of 1/1, double-hung, wood-sash windows and one-light vinyl casements with concrete lug sills and segmental brick arches with drip molding. A two-course brick stringcourse serves as a continuous sill on the second story, and the water table is ornamented with a four-course string. The single-leaf entry has a one-light transom and a segmental brick arch with drip molding. The basement-level opening contains paired one-light metal sliding windows. The two-story ell on the rear elevation is constructed of seven-course, American-bond brick. It is capped by a sloping roof pierced by an interior parged brick chimney with a plain cap. Window openings on the ell have been infilled with brick. They now hold paired one-light vinyl sliding windows with a brick rowlock sill. The first story was not visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed with a metal fence. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood privacy fencing.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1891 by owner/builder Robert Waldron. The building is one of ten similar rowhouses constructed from the same permit (#1811). The façade (east elevation) of the dwelling was altered post-1960 by removing the two-story projecting rectangular bay, refacing the façade, altering the fenestration pattern, and adding a one-story, two-bay porch. Because of these alterations, the building reads as a restrained interpretation of the Classical Revival style. Originally built as a single-family dwelling, the 1904 and 1960 Sanborn Insurance maps indicate the building was once used as a store. The building is currently used as a single dwelling. The building consists of a rectangular main block with a two-story ell on the rear (west) elevation. Set on a solid brick foundation, the brick building is faced with six-course, American-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice. A molded concrete rosette is centrally located on the frieze. The one-story porch on the first story is partially enclosed. The southernmost bay is faced with brick and holds a multiple-light fixed vinyl window. The single-leaf entry to the north is edged by one-light/one-panel sidelights and is sheltered by the flared half-hipped roof of asphalt shingles. Second-story openings hold 6/6, and 8/8, double-hung, vinyl-sash windows with a continuous concrete sill and soldier-brick lintel. The two-story ell on the rear elevation is constructed of seven-course, American-bond brick. It is fenestrated with 6/6, double-hung, vinyl-sash windows with a two-course segmental brick arch. The first story was not visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the west side of the street on a sloping lot enclosed by a metal fence with brick posts. The building is set back approximately ten feet from the public concrete sidewalk. The back yard is enclosed with wood fencing.

Architectural Style(s)

Classical Revival
Craftsman

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1911 by owner/builder David N. Rust, Jr. Designed by MacNeil & MacNeil, this building was one of five similar rowhouses constructed from the same permit. One of these rowhouses has been demolished, leaving four of the original five. This brick dwelling blends the Craftsman and Classical Revival styles. It sits on a solid foundation and is faced with Flemish-bond brick. The south (side) elevation is clad with aluminum siding. The sloping roof is obscured by an asphalt-shingled pent with wide overhanging eaves and exposed rafter ends. An interior brick chimney with a plain cap pierces the roof. Fenestration consists of single and tripled 1/1, double-hung, vinyl-sash windows with concrete lug sills and lintels. A two-course rowlock brick stringcourse extends above the lintel on the second story. The single-leaf entry, which also has a concrete lintel, is sheltered by a one-story, one-bay porch. The porch sits on a solid brick foundation and has an asphalt-shingled roof supported by metal filigree posts. The porch is finished with a stone-veneered deck, stone steps, and a metal balustrade. The two-story ell on the rear elevation has the same material treatment as the main block. A two-story, one-bay enclosed porch is located on the rear of the ell. The wood-frame porch is clad with aluminum siding on the south elevation and vinyl siding on secondary elevations. Visible fenestration includes 1/1, double-hung, vinyl-sash windows. A one-story, one-bay addition was constructed on the rear of the porch ca. 1990. The wood-frame addition is clad with vinyl siding and has an asphalt-shingled shed roof with overhanging eaves and a boxed cornice. No other details were visible from the alley.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a level lot. The building has no front yard and is adjacent to the public brick sidewalk. The back yard is enclosed with wood fencing.

STYLE/EXTERIOR DATA

Architectural Style(s)

Modern

Exterior & Architectural Notes:

October 2010: This two-story, three-bay apartment building was constructed in 1940 by owner/builder H&J Construction Company. Designed by George T. Santmyers, the building is one of five similar apartment buildings constructed from the same permit (#234960). Evoking the Modern Movement, this four-unit building sits on a solid concrete-block foundation and is constructed of concrete blocks faced with six-course, American-bond brick. It has a flat roof edged with metal coping and a large exterior brick chimney with a plain cap is located on the rear (east) elevation. Ornamentation is limited to pressed brick panels on the frieze and multiple single-course stringcourses on the outer edges of the façade. Fenestration consists of paired 1/1, double-hung, vinyl-sash windows, a one-light vinyl casement window, and a single-leaf door. Window openings have rowlock brick sills and the entry is framed by brick pilasters and capped by a stacked brick panel. The rear elevation is fenestrated with paired 1/1, double-hung, vinyl-sash windows with brick rowlock sills and single-leaf doors edged by one-light vinyl casements with brick rowlock sills. A two-story concrete deck is located on the rear and is supported by brick posts. It is edged by a metal railing and has concrete steps.

Site Notes:

October 2010: This apartment building sits on the east side of the street on a level lot edged by a metal fence. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is enclosed by a metal chain-link fence and has a gravel parking area.

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1898 by architect/builder John W. Points for owner Patrick Reddington (permit #0714). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story projecting rectangular bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a molded metal cornice, brick dentils, and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental brick arches adorned with brick dentils. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with brick dentils. The basement-level openings hold one-light vinyl awning windows with segmental arches. The two-story ell on the rear elevation is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf door with a one-light transom. All openings have segmental arches.

Site Notes:

October 2010: This single dwelling sits on the east side of the street on a level lot. The building has a setback of approximately five feet from the public brick sidewalk. A gravel parking area is located in the back yard.

Queen Anne
Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1897 by builder/architect C.H. Gladden (permit #1436). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story projecting rectangular bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. Set on a solid brick foundation, the brick building is faced with stretcher-bond brick on the façade. The building has a sloping roof ornamented with a boxed metal cornice, brick dentils, and brick corbeling. Fenestration consists of 1/1, double-hung, vinyl-sash windows with rock-faced concrete lug sills and segmental brick arches adorned with brick dentils. Two-course brick stringcourses serve as continuous sills on the first and second stories, and the water table is ornamented with a three-course string. The single-leaf entry has a one-light transom and a segmental brick arch with brick dentils. The basement-level openings hold one-light vinyl awning windows with segmental arches. The two-story ell on the rear elevation is constructed of five-course, American-bond brick. The rear elevation is clad with vinyl siding and is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows and single- and double-leaf doors. A two-story wood deck is located on the rear and is edged with a square-post balustrade.

Site Notes:

October 2010: This single dwelling sits on the east side of the street on a level lot. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is enclosed with a wooden privacy fence.

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1894 by Robert Waldron for George T. Thompson and is one of six similar buildings constructed from the same permit (#1827). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (east) elevation. Set on a solid brick and concrete foundation, the brick building is faced with seven-course American-bond brick on the façade (west elevation). The building has a sloping roof ornamented with a molded metal cornice, brick dentils, and brick corbeling. Fenestration consists of a large one-light fixed vinyl window on the first story and 1/1, double-hung, vinyl-sash windows with header-brick sills and segmental brick arches with drip molding. The single-leaf entry has a one-light transom with a segmental brick arch with drip molding. A concrete stoop with a wood deck spans the width of the façade. Openings on the rear elevation have segmental brick arches and concrete lug sills. The two-story ell on the rear elevation has a sloping roof pierced by an interior brick chimney with a plain cap. The ell is fenestrated with 1/1, double-hung, vinyl-sash windows with segmental arches.

Site Notes:

October 2010: This single dwelling sits on the east side of the street on a level lot. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is enclosed with a wooden privacy fence.

The building has a sloping roof ornamented with a molded metal cornice, brick dentils, and brick corbeling. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course segmental brick arches with drip molding. The single-leaf entry has a one-light transom with a segmental brick arch and drip molding. A one-story, two-bay porch spans the width of the façade. It sits on a solid concrete foundation and has a shed roof of asphalt shingles supported by chamfered wood posts. It is edged by a square-post wood balustrade. Openings on the rear elevation have segmental brick arches and concrete lug sills. The two-story ell on the rear elevation is parged and has a sloping roof pierced by an interior brick chimney with a plain cap. The ell is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental arches. A single-leaf door is located on the north side of the ell and is sheltered by an asphalt-shingled shed-roof hood.

Site Notes:

October 2010: This single dwelling sits on the east side of the street on a level lot. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is enclosed with a metal chain-link fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1894 by Robert Waldron for George T. Thompson and is one of six similar buildings constructed from the same permit (#1827). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (east) elevation. Set on a solid brick and concrete foundation, the brick building is faced with seven-course American-bond brick on the façade (west elevation). The building has a sloping roof ornamented with a molded metal cornice, brick dentils, and brick corbeling. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows with stone sills and two-course segmental brick arches with drip molding. The single-leaf entry has a one-light transom with a segmental brick arch and drip molding. A one-story, two-bay porch spans the width of the façade. It sits on a solid concrete foundation and has a shed roof of standing-seam metal supported by square wood posts. It is edged by a square-post wood balustrade. The rear elevation of the main block and the ell are fenestrated with 1/1, double-hung, vinyl-sash windows with brick sills and two-course segmental brick arches. A single-leaf entry is located on the south side of the ell and was not visible from the alley. An interior brick chimney with a plain cap pierces the sloping roof of the ell.

A one-story enclosed porch is located on the rear of the ell. The wood-frame structure is clad with vinyl German siding and has a shed roof covered with asphalt. It is fenestrated with paired one-light vinyl sliding windows.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a level lot. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is enclosed with a metal chain-link fence.

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1894 by Robert Waldron for George T. Thompson and is one of six similar buildings constructed from the same permit (#1827). The dwelling shows the influence of the Queen Anne and Italianate styles and consists of a rectangular main block with a two-story ell on the rear (east) elevation. Set on a solid brick and concrete foundation, the brick building is faced with seven-course American-bond brick on the façade (west elevation). The building has a sloping roof ornamented with a molded metal cornice, brick dentils, and brick corbeling. An interior brick chimney with a plain cap pierces the roof. Fenestration consists of single and paired 1/1, double-hung, wood- and vinyl-sash windows with concrete sills and two-course segmental brick arches with drip molding. The single-leaf entry has a one-light transom with a segmental brick arch and drip molding. The two-story ell is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course segmental brick arches. A single-leaf entry on the rear of the ell has a one-light transom and segmental brick arch. An interior brick chimney with a plain cap pierces the sloping roof of the ell.

A one-story pop-up addition was constructed on the roof of the main block ca. 1985. The wood-frame structure is clad with T-111 siding and has a shed roof with wide overhanging boxed eaves. Fenestration was not visible.

Site Notes:

October 2010: This rowhouse sits on the east side of the street on a level lot. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Modern

Exterior & Architectural Notes:

October 2010: This two-story, three-bay apartment building was constructed in 1940 by owner/builder H&J Construction Company. Designed by George T. Santmyers, the building is one of five similar apartment buildings constructed from the same permit (#234960). Evoking the Modern Movement, this four-unit building sits on a solid concrete-block foundation and is constructed of concrete blocks faced with six-course, American-bond brick. It has a flat roof edged with a molded denticulated metal cornice and a large exterior brick chimney with a plain cap is located on the rear (west) elevation. Ornamentation is limited to pressed brick panels on the frieze and multiple single-course stringcourses on the outer edges of the façade. Fenestration consists of paired 1/1, double-hung, vinyl-sash windows with brick rowlock sills and a three-course continuous brick lintel. The single-leaf entry is framed by brick pilasters and capped by a stacked brick panel. The center bay above the entry contains a window opening infilled with a concrete panel. The rear elevation is fenestrated with paired 1/1, double-hung, vinyl-sash windows with brick rowlock sills and single-leaf doors. A two-story concrete deck is located on the rear and is supported by brick posts. It is edged by a metal railing and has a spiral metal stair.

Site Notes:

October 2010: This apartment building sits on the west side of the street on a level lot edged by a low brick wall. The building has a setback of approximately five feet from the public brick sidewalk. The back yard is paved with concrete and serves as a parking area.

Garage **Contributing**

Outbuilding Notes:

October 2010: This one-story, two-bay garage was constructed ca. 1924. The building is constructed of five-course, American-bond brick and is capped by a shed roof. It is fenestrated with paneled wood roll-up doors with lights and a single-leaf door

(not visible) which is located on the north (side) elevation.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1924 by R.C. Hess for owners Howard J. and Mary J. Reier (permit #8062). Designed by Joseph Herbert, the building reflects a restrained interpretation of the Classical Revival style. The building sits on a solid concrete foundation and is constructed of five-course, American-bond brick. The sloping roof is edged by a stepped parapet with metal coping. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous soldier-brick lintels. The single-leaf entry has a one-light transom and is sheltered by a one-story, two-bay porch. Set on a solid brick foundation, the porch has a flat roof supported by brick posts on brick piers. It is edged by a brick balustrade. A two-story porch is located on the rear (south) elevation. The porch sits on a brick pier foundation and is open on the first story. The upper story is enclosed and is fenestrated with paired one-light vinyl sliding windows with an enclosed balustrade of plywood. The porch is supported by square wood posts.

Site Notes:

October 2010: This single dwelling is located on the southeast corner of G Street, N.E. and 14th Street, N.E. The building sits on a grassy sloping lot and is edged by a low concrete wall and a metal fence. It is set back approximately 15 feet from the public brick sidewalk. A concrete paved driveway enters the property from 14th Street, N.E. and extends to a garage.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay duplex was constructed in 1935 by Martin Brothers for owner/architect Mary J. Reier (permit #185939). The Colonial Revival-style building sits on a solid raised concrete-block foundation. The concrete-block structure is faced with stretcher-bond brick. A slate-shingled pent roof with a molded metal cornice obscures the sloping roof of the main block. The dwelling is fenestrated with single and tripled 6/1, double-hung, wood-sash windows with concrete lug sills and soldier-brick lintels. The single-leaf entry with a blind transom has a soldier-brick lintel and is accessed by a concrete stoop with a metal railing. Window openings on the west (side) elevation hold paired eight-light metal casements edged with four-light fixed metal windows and capped by a multiple-light fixed transom. Basement-level openings hold two-light fixed metal windows and all openings have brick rowlock sills. A two-story ell is located on the rear elevation and has the same material treatment as the main block. No fenestration was visible from the right-of-way.

Site Notes:

October 2010: This duplex is located on the south side of the street on a grassy level lot enclosed by a metal chain-link fence. The dwelling is set back approximately 15 feet from the public brick sidewalk. The back yard is enclosed by a wood privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Art Deco

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, five-bay apartment building was constructed in 1936 by owner/builder Anton Koerber & Morris Platshon. Designed by George T. Santmyers, the twelve-unit building displays elements of the Art Deco and Classical Revival styles. Circa 2010, the T-shaped building was altered with the addition of a third story. The dwelling sits on a solid raised concrete-block foundation faced with brick. Constructed of six-course, American-bond brick, the building was capped by a flat roof edged with concrete coping. Molded concrete rosettes highlight the frieze of the main block and the two-story flat-roofed projecting bays on the façade (north elevation). They have a molded concrete water table and are ornamented with pilasters and geometric motifs on the outermost pilasters. The window openings on the bays are capped by molded zig-zag concrete lintels. The flat roofs of the bays serve as decks for the third story and are edged with a metal balustrade. Window openings hold 1/1, double-hung, vinyl sash with concrete lug sills and soldier-brick lintels. The second-story window openings of the center bay are capped by a continuous molded zig-zag concrete lintel. The center double-leaf entry is capped by a large one-light transom and has a wide molded concrete surround and a zig-zag concrete lintel.

The wood-frame third story is faced with stretcher-bond brick on the façade and vinyl German siding on the secondary elevations. It has a cross-gabled roof with overhanging boxed eaves and is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with brick rowlock sills and double-leaf doors.

Site Notes:

October 2010: This apartment building is located on the south side of the street on a sloping lot edged by a concrete retaining wall and a metal fence with brick posts. The dwelling is set back approximately 15 feet from the public brick sidewalk. The back yard is enclosed by a wood privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1892 by Stewart & Walters for owner George H. Johnson. Designed by Victor Mindeff, the Queen-Anne-style rowhouse is one of eight similar buildings constructed from the same permit (#0220). The dwelling is composed of a rectangular main block with a two-story rectangular projecting bay on the façade (north elevation) and a two-story ell on the rear (south) elevation. The brick building sits on a solid brick foundation and is faced with stretcher-bond brick on the façade (north elevation). It is capped by a sloping roof with a molded metal cornice and a checkerboard brick frieze. An interior brick chimney with a plain cap pierces the roof. The bay is capped by a pyramidal slate-shingled roof with a metal finial. The roof of the bay is edged with concrete coping. Window openings hold 1/1, double-hung, vinyl-sash windows with concrete lug sills. A two-course brick stringcourse served as a continuous lintel on the second story and a checkerboard brick stringcourse extends above the first-story openings. Window openings on the bay have a concrete lintel, while the opening above the main entry on the main block has a three-course rowlock brick segmental arch. The single-leaf entry is capped by a one-light transom and is edged by a one-light vinyl casement window. A metal awning supported by metal filigree posts shelters the entry. The rear elevation of the main block and the ell are fenestrated with 1/1, double-hung, vinyl-sash windows with brick rowlock sills and two-course segmental brick arches. A one-story, one-bay enclosed porch is located on the rear of the ell. The wood-frame structure is clad with vinyl German siding and has a half-hipped roof of asphalt shingles. Fenestration was not visible.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a grassy sloping lot edged by a metal chain-link fence. The dwelling is set back approximately 15 feet from the public brick sidewalk. The back yard is enclosed by a wood privacy fence and contains a carport.

Second-story openings have a rowlock brick stringcourse over a checkerboard stringcourse that serves as a continuous sill. A continuous lintel is created by a checkerboard brick stringcourse above a three-course rowlock brick stringcourse. The opening above the main entry on the main block has a jack brick arch. Basement-level openings contain one- and two-light wood windows with concrete lug lintels. The single-leaf entry is edged by a one-light vinyl casement window. A metal awning shelters the entry and concrete stoop. The rear elevation of the main block and the ell are fenestrated with 1/1, and 8/8, double-hung, vinyl-sash windows with two-course segmental brick arches. Fenestration of the first story has been altered and partially infilled. A single-leaf entry is centrally located on the rear.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a grassy sloping lot edged by a metal fence. The dwelling is set back approximately 15 feet from the public brick sidewalk. The back yard is enclosed by a wood privacy fence.

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1892 by Stewart & Walters for owner George H. Johnson. Designed by Victor Mindeleff, the Queen-Anne-style rowhouse is one of eight similar buildings constructed from the same permit (#0220). The dwelling is composed of a rectangular main block with a two-story rectangular projecting bay on the façade (north elevation) and a two-story ell on the rear (south) elevation. The brick building sits on a solid brick foundation and is faced with stretcher-bond brick on the façade. It is capped by a sloping roof with a molded metal cornice and a checkerboard brick frieze. An interior brick chimney with a plain cap pierces the roof. Window openings hold single and paired 1/1, double-hung, vinyl sash with concrete lug sills. A rowlock brick stringcourse served as a continuous sill on the second story and a checkerboard brick stringcourse extends below the window opening above the main entry. It has a three-course segmental rowlock brick arch. First-story openings on the bay have concrete lug lintels and second-story openings have jack brick arches. The single-leaf entry is edged by a small 1/1, double-hung, vinyl-sash window. A metal awning supported by metal filigree posts shelters the entry. Stucco covers the rear elevation of the ell, which is fenestrated with 1/1, double-hung, vinyl-sash windows with segmental arches. Fenestration of the first story was obscured by a full-width metal awning.

Site Notes:

October 2010: This rowhouse sits on the south side of the street on a grassy sloping lot edged by a metal chain-link fence. The dwelling is set back approximately 15 feet from the public brick sidewalk. The back yard is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1892 by Stewart & Walters for owner George H. Johnson. Designed by Victor Mindeleff, the Queen-Anne-style rowhouse is one of eight similar buildings constructed from the same permit (#0220). The dwelling is composed of a rectangular main block with a two-story rectangular projecting bay on the façade (north elevation). The brick building sits on a solid brick foundation and is faced with stretcher-bond brick. It is capped by a sloping roof with a molded metal cornice and a checkerboard brick frieze. An interior parged brick chimney with a plain cap pierces the roof. Window openings hold single and paired 1/1, double-hung, vinyl sash with concrete lug sills and a rowlock brick stringcourse that serves as a continuous lintel. Openings on the bay and the first story of the main block have concrete lug lintels, while the opening above the main entry and those on the upper story of the side (east) elevation have three-course rowlock brick segmental arches. The main entry is located on the facade and the opening has been enlarged. It holds a wide single-leaf door. The rear elevation has been parged and is fenestrated with 1/1, double-hung, vinyl-sash windows with brick rowlock sills and a single-leaf door.

Site Notes:

October 2010: This rowhouse sits on the southwest corner of G Street, N.E. and 14th Place, N.E. on a concrete-paved sloping lot edged by a metal fence. The dwelling is set back approximately 15 feet from the public brick sidewalk. The back yard is enclosed by a tall brick wall with a metal gate. A brick patio is located to the rear of the dwelling.

Romanesque Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1892 by Stewart & Walters for owner George H. Johnson. Designed by Victor Mindeleff, the rowhouse is one of eight similar buildings constructed from the same permit (#0220). The dwelling exhibits influences from the Queen Anne and Romanesque Revival styles. It consists of a rectangular main block with a two-story ell on the rear (west) elevation. Set on a solid brick foundation, the building is constructed of five-course, American-bond brick and is faced with stretcher-bond brick. The sloping roof is edged by a molded metal cornice with a checkerboard brick frieze. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and a recessed single-leaf entry. The entry is framed by a three-course rowlock brick semicircular arch. The first-story window openings on the façade (east elevation) have jack brick arches. The second-story opening and the openings on the secondary elevations have two-course rowlock brick segmental arches. A three-sided canted oriel is located on the southernmost bay of the upper story of the façade. The oriel has a parged spandrel and is capped by a half-hipped metal roof with a molded metal cornice. Brick pilasters frame the oriel, which sits on a checkerboard brick stringcourse. Openings on the rear elevation of the ell have header-brick sills.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and directly fronts the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Romanesque Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1892 by Stewart & Walters for owner George H. Johnson. Designed by Victor Mindeff, the rowhouse is one of eight similar buildings constructed from the same permit (#0220). The dwelling exhibits influences from the Queen Anne and Romanesque Revival styles. It consists of a rectangular main block with a one-story rectangular projecting bay on the façade (east elevation) and a two-story ell on the rear (west) elevation. Set on a solid brick foundation, the building is constructed of irregularly-coursed, American-bond brick and is faced with stretcher-bond brick. The sloping roof is edged by a molded metal cornice with a checkerboard brick frieze and is pierced by metal flues. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and a recessed double-leaf entry with a semicircular transom. The entry is framed by a three-course rowlock brick semicircular arch. The first-story window openings on the bay have a continuous concrete lintel capped by a checkerboard brick stringcourse. A rowlock brick stringcourse serves as a continuous sill. The second-story opening above the entry and the openings on the secondary elevations have two-course rowlock brick segmental arches. The flat roof of the bay is edged by a wood and metal balustrade. Access to the roof of the bay is provided by a single-leaf entry that is capped by a three-course rowlock brick segmental arch. Openings on the rear elevation of the ell have header-brick sills. A wood deck is located on the roof top and is edged by a horizontally laid wood privacy fence. A wood pergola was barely visible from the street.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and directly fronts the public brick sidewalk. The back yard is enclosed with a wood privacy fence and is accessed by a paneled vinyl roll-up door.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1911 by owner/builder James D. Burn. Designed by Samuel R. Turner, the building is one of four similar rowhouses constructed from the same permit (#3422). The building reflects a restrained interpretation of the Classical Revival style. It sits on a solid concrete foundation and is constructed of five-course, American-bond brick. The sloping roof is ornamented with a molded metal cornice and brick corbeling and is pierced by an interior parged brick chimney with a plain cap. The first story is fenestrated with a single-leaf entry and a 1/1, double-hung, vinyl-sash window; both with blind transoms. The upper story holds a paired one-light vinyl sliding window. All openings have concrete lug sills and are capped by segmental brick arches. Secondary elevations are fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills and two-course segmental brick arches. A single-leaf entry with a blind transom and segmental brick arch is located on the rear (west) elevation.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and is set back approximately three feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay single dwelling was constructed in 1910 by architect/builder A.F. Wood for owner Martha E. Stockett. The building is two similar Classical Revival-style dwellings constructed from the same permit (#1597). The building is composed of a rectangular main block with a two-story ell on the rear (west) elevation. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick and is capped by a sloping roof ornamented with a molded metal cornice and brick corbeling. An interior brick chimney with a plain cap pierces the roof. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills. Two-course brick stringcourses are located at the water table and the sill level. The single-leaf entry is capped by a narrow one-light transom. All openings on the building have two-course rowlock brick segmental arches with drip molding. Window openings on the rear elevation of the main block and the ell have brick rowlock sills. A single-leaf entry with a narrow one-light transom is located on the rear of the ell. The sloping roof is pierced by an interior-side brick chimney with a plain cap.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and is set back approximately three feet from the public brick sidewalk on a sloping yard edged by a low brick retaining wall. The back yard is enclosed with a wood privacy fence.

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was constructed in 1910 by architect/builder A.F. Wood for owner Charles A. Stockett. The building is five similar Classical Revival-style rowhouses constructed from the same permit (#2561). The building is composed of a rectangular main block with a two-story ell on the rear (west) elevation. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick and is faced with permastone. The building is capped by a sloping roof ornamented with a molded metal cornice. An interior brick chimney with a plain cap pierces the roof. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with permastone sills. The single-leaf entry is capped by a one-light transom. All openings on the façade (east elevation) have flat permastone arches with keystones. The window opening on the second story of the rear elevation has a concrete lug sill and two-course segmental brick arch. The rear elevation of the ell is parged and is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf entry.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and is set back approximately three feet from the public brick sidewalk on a sloping yard edged by a low brick retaining wall. The back yard is paved with concrete and is edged with a wood privacy fence.

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was constructed in 1910 by architect/builder A.F. Wood for owner Charles A. Stockett. The building is five similar Classical Revival-style rowhouses constructed from the same permit (#2561). The building is composed of a rectangular main block with a two-story ell on the rear (west) elevation. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick and is capped by a sloping roof ornamented with a molded metal cornice and brick corbeling. An interior brick chimney with a plain cap pierces the roof. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills. Two-course brick stringcourses are located at the water table and the sill level. The single-leaf entry is capped by a one-light transom. All openings on the façade (east elevation) have two-course rowlock brick segmental arches with drip molding. The rear of the main block and the ell have been parged and all window openings have brick rowlock sills. The second-story opening on the rear of the main block has been infilled with bricks. A single-leaf entry with a one-light transom and segmental arch is located on the rear of the ell.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and is set back approximately five feet from the public brick sidewalk on a sloping yard edged by a brick retaining wall with a metal fence. A stone patio is located to the rear of the dwelling and is partially enclosed with a wood privacy fence. The remainder of the back yard is covered with concrete pavers.

Outbuilding Notes:

October 2010: This one-story, one-bay prefabricated shed was constructed ca. 1995. The wood-frame structure is clad with T-111 siding and has an asphalt-shingled shed roof. It is fenestrated with a single-leaf door.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay rowhouse was constructed in 1910 by architect/builder A.F. Wood for owner Charles A. Stockett. The building is five similar Classical Revival-style rowhouses constructed from the same permit (#2561). The building is composed of a rectangular main block with a two-story ell on the rear (west) elevation. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick and is capped by a sloping roof ornamented with a molded metal cornice and brick corbeling. An interior brick chimney with a plain cap pierces the roof. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills. Two-course brick stringcourses are located at the water table and the sill level. The single-leaf entry is capped by a one-light transom. All openings on the façade (east elevation) have two-course rowlock brick segmental arches with drip molding. The rear of the main block and the ell have been parged and openings have segmental arches. A single-leaf entry with a one-light transom is located on the rear of the ell. To the south of the entry is a one-light vinyl casement.

Site Notes:

October 2010: This rowhouse sits on the west side of the street and is set back approximately five feet from the public brick sidewalk on a sloping yard paved with concrete. The back yard is lined with a wood privacy fence and contains a prefabricated shed located just west of the dwelling.

Architectural Style(s)

Exterior & Architectural Notes:

October 2010: This two-story, three-bay duplex was constructed in 1904 by builder G.H. Lloyd for owner Albert C. Peale (permit #1058). The dwelling is a restrained interpretation of the Classical Revival style. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick and is capped by a sloping roof ornamented with a molded metal cornice and brick corbeling. Two interior brick chimneys with plain caps pierce the roof. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with pressed brick sills and two-course rowlock brick segmental arches. The two single-leaf entries are recessed within a semicircular arch composed of two courses of rowlock brick. The rear of the dwelling has been parged and has single-leaf entries on the first and second stories. The upper story has a blind transom over the entry. A two-story wood deck with a square-post wood balustrade is located on the rear.

Site Notes:

October 2010: This duplex is located on the west side of the street and is set back approximately five feet from the public brick sidewalk. It sits on a sloping yard edged by a parged retaining wall. The back yard is enclosed with a wood privacy fence.

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1907 by owner/builder J.R. Haislip. Designed by E. Volland, the building is one of two similar dwellings constructed from the same permit (#3998). The building reflects the Queen Anne and Italianate styles. The building is composed of a rectangular main block with a two-story, three-sided canted projecting bay on the façade. It sits on a solid raised concrete foundation and is constructed of five-course, American-bond brick faced with stretcher-bond brick on the façade (south elevation). The sloping roof is ornamented with overhanging eaves, a molded metal cornice with modillions, and a frieze with checkerboard brick panels. An interior parged brick chimney pierces the roof. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills. Two-course brick stringcourses serve as continuous sills on the façade. The single-leaf entry is capped by a one-light transom and all openings on the façade have a rock-faced concrete lintel. The basement level of the façade contains a single-leaf entry and 1/1, double-hung, vinyl-sash windows. Openings on secondary elevations have concrete lug sills and segmental brick arches. The single-leaf entry on the rear elevation has a one-light transom and is sheltered by a one-story, one-bay porch. The shed roof of asphalt is supported by square wood posts.

Site Notes:

October 2010: This single dwelling is located on the north side of the street and is set back approximately ten feet from the public brick sidewalk. It sits on a sloping yard edged by a concrete and brick retaining wall with a metal fence. The back yard is enclosed with a brick wall and wood privacy fence. A garage is located north of the dwelling.

STYLE/EXTERIOR DATA

Architectural Style(s)

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1906 by owner/builder E.P. Brink. Designed by Brink & Son, the Queen Anne-style building is one of five similar rowhouses constructed from the same permit (#0331). The dwelling consists of a rectangular main block with a two-story rectangular projecting bay on the façade (south elevation) and a two-story ell on the rear (north) elevation. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick faced with stretcher-bond brick on the façade. A four-course brick stringcourse decorates the water table. A false mansard roof of standing-seam metal obscures the sloping roof of the main block. The roof is ornamented with a molded metal cornice with dentils and a paneled metal frieze. The bay is capped by a flat-on-hip roof of standing-seam metal. Fenestration consists of 1/1, double-hung, vinyl-sash windows and large one-light fixed vinyl windows with concrete lug sills and a single-leaf entry with a one-light transom. All openings on the façade have a concrete lug lintel. Openings on the rear elevation and the ell have concrete lug sills and two-course segmental brick arches. An interior brick chimney with a plain cap pierces the roof of the ell. A two-story enclosed porch is located on the rear of the ell. The wood-frame structure is clad with plywood and has a sloping roof. It is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf entry with a one-light transom. A one-story wood deck is located off the porch. It is edged by a square-post balustrade.

Site Notes:

October 2010: This single dwelling is located on the north side of the street and is set back approximately ten feet from the public brick sidewalk. It sits on a sloping yard edged by a wood picket fence. The back yard is enclosed with a wood privacy fence.

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1906 by owner/builder E.P. Brink. Designed by Brink & Son, the Queen Anne-style building is one of five similar rowhouses constructed from the same permit (#0331). The dwelling consists of a rectangular main block with a two-story rectangular projecting bay on the façade (south elevation) and a two-story ell on the rear (north) elevation. Set on a solid concrete foundation, the building is constructed of five-course, American-bond brick faced with stretcher-bond brick on the façade. A four-course brick stringcourse decorates the water table. A false mansard roof of standing-seam metal obscures the sloping roof of the main block. An interior parged brick chimney pierces the sloping roof. The false mansard is ornamented with a molded metal cornice with dentils and a paneled metal frieze. The bay is capped by a flat-on-hip roof of standing-seam metal. Fenestration consists of 1/1, double-hung, vinyl-sash windows with concrete lug sills and a single-leaf entry with a one-light transom. All openings on the façade have a concrete lug lintel, with the exception of the basement-level opening, which holds paired one-light vinyl sliders with a jack brick arch. All openings on secondary elevations have segmental arches and windows have concrete lug sills. The single-leaf entry on the first story of the ell has a one-light transom. The basement level was not visible from the alley.

Site Notes:

October 2010: This single dwelling is located on the north side of the street and is set back approximately ten feet from the public brick sidewalk. It sits on a sloping yard edged with a brick retaining wall with concrete coping and a metal chain-link fence. The back yard is enclosed with a wood privacy fence.

Craftsman

Exterior & Architectural Notes:

October 2010: This two-and-a-half-story, three-bay dwelling was constructed in 1923 as a single-family dwelling by owner/builder Heflin & Bro. Designed by Simpson & Son, the building reflects the Craftsman and Classical Revival styles (permit #9869). The building is now used as a multiple dwelling with a basement-level apartment. The dwelling sits on a solid concrete foundation and is constructed of five-course, American-bond brick. A two-story projecting bay with the same material treatment is located on the south (side) elevation. The dwelling is capped by an asphalt-shingled false mansard roof with flared overhanging eaves and exposed rafter ends. A shed-roof dormer is located on the western slope of the roof and holds paired six-light wood awning windows. The roof has wide overhanging eaves. Fenestration consists of 6/1, double-hung, wood-sash windows with concrete lug sills and continuous soldier-brick lintels. The single-leaf entry is capped by a one-light transom and is sheltered by a one-story, full-width porch. Set on a brick pier foundation covered with lattice, the porch has a flat roof with overhanging eaves and a molded wood cornice that is supported by brick posts on brick piers. A two-story, full-width porch is located on the rear (east) elevation. Set on a brick pier foundation, the porch has a shed roof supported by square wood posts. Both stories are edged with square-post balustrades. Single-leaf entries on both stories of the rear elevation provide access to the porch. A garage is integrated into the basement level of the porch. Accessed from the south elevation, the vehicular opening has been enclosed with T-111 siding and now holds a single-leaf door that leads to a basement-level apartment.

Site Notes:

October 2010: This dwelling sits on the northeast corner of 14th Street, N.E. and F Street, N.E. on a gently sloping lot enclosed with a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence. A concrete driveway enters the property from F Street, N.E. and extends to the basement-level garage.

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1907 by owner/builder J.R. Haislip. Designed by E. Volland, the building is one of five similar dwellings constructed from the same permit (#3999). The building reflects the Queen Anne and Italianate styles and is composed of a rectangular main block with a two-story, three-sided canted projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. It sits on a solid raised concrete foundation and is constructed of five-course, American-bond brick faced with stretcher-bond brick on the façade (west elevation). The sloping roof is ornamented with overhanging eaves, a molded metal cornice with modillions, and a frieze with checkerboard brick panels. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with concrete lug sills. Two-course brick stringcourses serve as continuous sills on the façade. The single-leaf entry is capped by a one-light transom and all openings on the façade have a rock-faced concrete lintel. Windows on the basement level of the façade contain paired one-light vinyl sliders. Openings on the rear elevation and ell have two-course segmental arches and windows have concrete lug sills. An exterior-side brick chimney with a plain cap is located on the ell. Single-leaf entries with blind transoms are located on the first and second stories. A two-story wood deck with a solid wood balustrade is located on the rear of the ell.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot enclosed with a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1897 by J.T. Moxley for Rosalier Moxley. Designed by Moxley, the building is one of two similar dwellings constructed from the same permit (#0856). The building reflects the Queen Anne and Italianate styles and is composed of a rectangular main block with a two-story, rectangular projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. The brick house sits on a solid raised brick and concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick corbeling, and brick dentils. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental soldier-brick arches with drip molding. Two-course brick stringcourses serve as continuous sills on the façade and a four-course brick stringcourse serves as the water table. The single-leaf entry is capped by a one-light transom and is sheltered by a metal awning. Openings on the basement level of the façade contain paired one-light vinyl sliding windows. The window openings on the rear elevation have concrete lug sills and two-course segmental brick arches. The ell is obscured by a two-story addition on the rear of the ell. The wood-frame addition is clad with aluminum siding and is capped by a shed roof. It is fenestrated with single and paired 6/6, double-hung, vinyl-sash windows and a single-leaf entry. A one-story porch spans the width of the addition. The metal awning is supported by metal posts.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot enclosed with a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1927 by owner/builder Jacob Stozsky (permit #6434). Designed by Harry A. Brandt, the building reflects the Craftsman and Classical Revival styles. Set on a solid concrete foundation, the dwelling is constructed of five-course American-bond brick and is capped by a sloping roof obscured by an asphalt-shingled false mansard. The mansard has flared overhanging eaves with a bracketed cornice. Fenestration consists of single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and continuous brick lintels. The single-leaf entry has a narrow one-light transom and is sheltered by a one-story, one-bay porch. Set on a brick pier foundation infilled with pierced concrete blocks, the porch has a flat roof supported by brick posts on brick piers. A molded concrete balustrade edges the porch. The two-story ell on the rear elevation is obscured by a two-story enclosed porch. The wood-frame porch has a shed roof and is clad with vinyl siding. It is fenestrated with 1/1, double-hung, vinyl-sash windows and a single-leaf entry.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot enclosed with a brick retaining wall with a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is paved with concrete and is edged with a metal chain-link fence.

Exterior & Architectural Notes:

October 2010: This two-story, three-bay single dwelling was constructed in 1924 by owner/builder Charles H. Bray (permit #10790). The building reflects the Craftsman and Classical Revival styles and is set on a solid concrete foundation. The dwelling is constructed of five-course American-bond brick and is capped by a sloping roof obscured by an asphalt-shingled false mansard. The mansard has flared overhanging eaves with a bracketed cornice. Fenestration consists of 6/1, double-hung, wood-sash windows with concrete lug sills and soldier-brick lintels. The single-leaf entry has soldier-brick lintel and is sheltered by a one-story, one-bay porch. Set on a brick pier foundation infilled with lattice, the porch has a flat roof with a molded wood cornice and modillions. The roof is supported by brick posts on brick piers and is edged with a metal balustrade. The two-story ell on the rear elevation is obscured by a two-story enclosed porch. An exterior-side brick chimney with a plain cap is located on the south side of the ell. The wood-frame porch has a shed roof and is clad with vinyl siding. It is fenestrated with paired and tripled 1/1, double-hung, vinyl-sash windows and a single-leaf entry.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot edged by a low concrete retaining wall. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is paved with concrete and serves as a parking area.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1896 by builder/architect J.T. Moxley for Rosalier Moxley. The building is one of three similar rowhouses constructed from the same permit (#0502). It reflects the Queen Anne and Italianate styles and is composed of a rectangular main block with a two-story, rectangular projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. The brick house sits on a solid raised brick and concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick corbeling, and brick dentils. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental soldier-brick arches with drip molding. Two-course brick stringcourses serve as continuous sills on the façade and a four-course brick stringcourse serves as the water table. The single-leaf entry is capped by a one-light transom. Openings on the basement level of the façade contain one-light vinyl awning windows. The rear elevation and ell are obscured from view by a two-story enclosed porch. The wood-frame porch is clad with vinyl siding and is capped by a shed roof. It is fenestrated with paired one-light vinyl sliders and a single-leaf door.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot edged by a low concrete retaining wall. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

Architectural Style(s)

Italianate

Queen Anne

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1896 by owner/builder D.B. Gottwals (permit #1835). The building reflects the Queen Anne and Italianate styles and is composed of a rectangular main block with a two-story, rectangular projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. The brick house sits on a solid raised concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick corbeling, and brick dentils. An asphalt-shingled pyramidal roof caps the projecting bay. The dwelling is fenestrated with single and paired 1/1, double-hung, wood-sash windows with concrete lug sills and segmental soldier-brick arches with drip molding. Two-course brick stringcourses serve as continuous sills on the façade and a four-course brick stringcourse serves as the water table. The single-leaf entry is capped by a one-light transom. Basement-level openings hold paired one-light vinyl sliders with jack brick arches. Openings on the rear elevation and on the ell have segmental brick arches. Window openings on the ell hold three-light metal fixed and casement windows with brick rowlock sills. A single-leaf entry with a one-light transom is located on the first story of the ell.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a tall metal chain-link fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay rowhouse was constructed in 1896 by owner/builder D.B. Gottwals (permit #1835). Originally constructed as a single-family dwelling, the building reflects the Queen Anne and Italianate styles. It is now used as a multiple dwelling with a basement-level apartment. The house is composed of a rectangular main block with a two-story, rectangular projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. The brick house sits on a solid raised brick and concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick corbeling, and brick dentils. An asphalt-shingled pyramidal roof caps the projecting bay. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental soldier-brick arches with drip molding. Two-course brick stringcourses serve as continuous sills on the façade and a four-course brick stringcourse serves as the water table. The single-leaf entry is capped by a one-light transom. A single-leaf entry is located in the basement level of the bay. Window openings on the rear elevation and ell have segmental brick arches and concrete lug sills. A one-story enclosed porch is located on the rear of the ell. Clad with vinyl siding, the wood-frame porch is capped by a sloping roof. It is fenestrated with a single-leaf entry and 1/1, double-hung, vinyl-sash windows.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot enclosed by a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

Exterior & Architectural Notes:

October 2010: This two-story, two-bay multiple dwelling was constructed in 1900 by owner/builder John D. Johnson. Designed by Victor Mindeleff, the eclectic building is one of two multiple dwellings constructed from the same permit (#1304). The brick dwelling sits on a solid concrete foundation and is faced with stretcher-bond brick on the façade (west elevation). The sloping roof of the main block is obscured by an asphalt-shingled pent with very wide overhanging eaves with a boxed cornice. The dwelling is fenestrated with 1/1, double-hung, vinyl-sash windows with brick rowlock sills. A two-course brick stringcourse serves as a continuous sill on the first story. The paired opening on the first story has a jack brick arch. The main entry, a single-leaf door, is capped by a two-light transom and a molded lintel cap. A three-sided canted oriel with an aluminum siding-clad spandrel is located on the upper story. The basement-level opening has a rock-faced concrete lintel. The rear elevation was largely obscured by a large tree. The two-story two-bay ell on the rear has a shed roof and is fenestrated with paired one-light vinyl sliding windows and a sliding glass door on the first story.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot enclosed by a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

Architectural Style(s)

Queen Anne

Italianate

Exterior & Architectural Notes:

October 2010: This two-story, two-bay single dwelling was constructed in 1897 by builder/architect J.T. Moxley for Rosalier Moxley. The building is one of two similar dwellings constructed from the same permit (#0537). It reflects the Queen Anne and Italianate styles and is composed of a rectangular main block with a two-story, rectangular projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. The brick house sits on a solid raised brick and concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick corbeling, and brick dentils. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental soldier-brick arches with drip molding. Two-course brick stringcourses serve as continuous sills on the façade and a four-course brick stringcourse serves as the water table. The single-leaf entry is capped by a one-light transom. Basement-level openings hold paired one-light vinyl sliders. Openings on the rear elevation and on the ell have segmental brick arches and windows have concrete lug sills. Single-leaf entries are located on the first and second story of the ell. The first-story opening has a blind transom.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

STYLE/EXTERIOR DATA

Architectural Style(s)

Classical Revival

Exterior & Architectural Notes:

October 2010: This two-story, three-bay single dwelling was constructed in 1902 by B.L. Nevius, Sr. for L.M.F. Nevius (permit #0449). Designed by Speiden & Speiden, the building reflects the Classical Revival style. It is composed of a rectangular main block with a two-story ell on the rear (east) elevation. The brick house sits on a solid raised brick and concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick dentils, and a molded metal stringcourse. The dwelling is fenestrated with 16/1, double-hung, wood-sash windows with concrete lug sills. All openings have segmental brick arches and second-story arches are ornamented with drip molding and keystones. The single-leaf entry is capped by a one-light transom. The entry is sheltered by a one-story, three-bay porch. Set on a brick pier foundation with lattice, the porch has a shed roof of asphalt supported by square wood posts. A metal balustrade edges the porch. Openings on the rear elevation and on the ell have segmental brick arches and windows hold 2/2, double-hung, wood sash with concrete lug sills. Single-leaf entries with one-light transoms are located on both stories of the ell. A two-story porch spans the width of the ell. The shed roof is supported by square wood posts and both stories are edged by a square-post wood balustrade.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot edged by a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.

October 2010: This two-story, two-bay single dwelling was constructed in 1897 by builder/architect J.T. Moxley for Rosalier Moxley. The building is one of two similar dwellings constructed from the same permit (#0346). It reflects the Queen Anne and Italianate styles and is composed of a rectangular main block with a two-story, rectangular projecting bay on the façade (west elevation) and a two-story ell on the rear (east) elevation. The brick house sits on a solid raised brick and concrete foundation and is faced with stretcher-bond brick on the façade. The sloping roof is ornamented with a molded metal cornice, brick corbeling, and brick dentils. The dwelling is fenestrated with single and paired 1/1, double-hung, vinyl-sash windows with concrete lug sills and segmental soldier-brick arches with drip molding. Two-course brick stringcourses serve as continuous sills on the façade and a four-course brick stringcourse serves as the water table. The single-leaf entry is capped by a one-light transom. Basement-level openings hold two-light wood awning windows. Openings on the rear elevation ell have segmental brick arches with concrete lug sills. The ell is obscured by a two-story enclosed porch. The wood-frame porch is clad with Bricktex and is capped by a shed roof. Fenestration includes 1/1, double-hung, vinyl-sash windows and a single-leaf door with a one-light transom.

Site Notes:

October 2010: This dwelling sits on the east side of the street on a gently sloping lot edged by a low concrete retaining wall with a metal fence. The house has a setback of approximately 15 feet from the public brick sidewalk. The back yard is enclosed with a wood privacy fence.
