## STYLE/EXTERIOR DATA

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#4051). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (north elevation) have 6/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights surmounted by a spiderweb fanlight. The entry is framed by a double-coursed rowlock brick arch and is accessed by a brick stoop.

Fenestration at the rear (south) includes 12/1, 9/1, and 6/1 double-hung, vinyl-sash windows. The windows all sit on cast stone sills and are completed with double and triple course rowlock bricks segmental arches. The rear elevation features a secondary, double-leaf entry. The double-leaf wood door is surmounted by a single-light wood transom. The rest of the rear elevation is not visible due to the height of the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Street, N.E. The front yard is bound by a concrete curb. A concrete walkway and concrete steps connect the public right-of-way to the main entry. The rear yard extends south to an alley and is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#4051). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a plain cap is centered at the rear elevation. Window openings on the façade (north elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door surmounted by single-light wood transom. The entry is sheltered by a full-width flat roof that is supported by metal filigree supports. The entry is accessed by concrete steps and a brick pier porch with infilled with wood lattice.

There are no openings on the side elevation (west). Fenestration at the rear (south) include 1/1, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a secondary entry that is accessed by metal steps and a single-bay metal porch. The paneled wood door is surmounted by a blind wood transom.

Site Notes:

October 2013: This two-story, single-family, semi-attached rowhouse is located on the south side of Ames Place, N.E. The front yard is bound by a concrete curb. There are a small foundation plantings in the front yard. Concrete steps connect the public right-of-way to the main entry. The rear yard extends south to an alley.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#4051). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (north elevation) have 9/1 and 6/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door underneath a metal storm door, surmounted by a spiderweb fanlight. The entry is sheltered by a hood awning and accessed by a brick stoop.

Fenestration at the rear (south) includes 8/1 and 6/1 double-hung, vinyl-sash windows. The windows all sit on cast stone sills and are completed with double and triple course rowlock bricks segmental arches. The rear elevation features two secondary entries; the first is a single-leaf wood door surmounted by a single-light wood transom. The second is a double-leaf wood door surmounted by a four-light wood transom. Both door have access to a rear porch that is not visible because of the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Street, N.E. The raised front yard is bound by a stone retaining wall. There are several small foundation plantings. Brick steps connect the public right-of-way to the main entry. The rear yard extends south to an alley and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

**October 2013:** Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#4051). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (north elevation) have 9/1 and 6/1, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights underneath a metal storm door, surmounted by a single-light wood transom. The entry is sheltered by a single-bay flat roof porch that is supported by brick piers.

Fenestration at the rear (south) includes single-light vinyl-sash casement windows. There is a large second story addition of the rear of the rowhouse. It is clad in horizontal wood boards. There is also an attached, single-bay one-story garage that is made of concrete blocks. The addition and garage are both noted on the 1928 Sanborn Map.

Site Notes:

**October 2013:** This two-story, single-family rowhouse is located on the south side of Ames Street, N.E. The raised front yard is bound by a stone retaining wall and metal filigree fence. There are several foundation plantings and mature trees. Concrete steps connect the public right-of-way to the main entry. The rear yard extends south to an alley.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#4051). Set on a solid concrete foundation, the brick structure is faced with stucco. The flat roof is fronted by a molded metal cornice and stuccoed, brick corbeling. An exterior-rear brick chimney with a plain is centered at the rear elevation. Window openings on the façade (west elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A stuccoed brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled replacement wood door with lights surmounted by single-light wood transom. The entry is sheltered by a full-width flat roof that is supported by brick piers. The concrete porch and steps have metal balustrades.

Fenestration at the rear (south) include 1/1, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a full-width screened in wood porch attached to the rear. The porch features a metal shed roof. The rest of the rear is not visible due to the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Place, N.E. The raised front yard is bound by a stone retaining wall and chain-link fence. There are a small foundation plantings and one mature tree in the front yard. Concrete steps connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#4051). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. Window openings on the façade (west elevation) have 6/1 and 9/1, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door surmounted by a spiderweb fanlight. The entry is framed by a double course rowlock brick arch and accessed by a concrete stoop supported by brick piers.

Most of the rear (south) elevation is not visible because of the tall wood privacy fence and large mature trees. A secondary, single leaf entry is visible.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Place, N.E. The raised front yard has mature trees and shrubs in it and is bound by stone retaining wall and a metal fence. Concrete steps connect the public right-of-way to the main entry. The rear yard extends east to an alley and is enclosed by a wood privacy fence.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4050). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. Window openings on the façade (west elevation) have 6/1 and 9/1, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the southern bay, holds a single-leaf, replacement decorative wood door that is surmounted by a single-light wood transom. The entry is accessed by a concrete stoop supported by brick piers.

Fenestration at the side (north) elevation is typical of the façade. The side elevation features a double height porch that is supported by brick piers. The porch features wood balustrades on both levels and is accessed from the interior of the row house by two, single-leaf entries. Fenestration at the rear (east) include paired and single 6/1, double-hung, wood-sash windows. A secondary entry is located of the rear of the house and sheltered by the second story. It is accessed by a wood porch. There is also a two-story, shed-roof addition off the rear of the house. This addition also features a single-bay garage door. The addition is noted on the 1928 Sanborn Map.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the southeast of the intersection of 14th Street, N.E. and Ames Place, N.E. The front yard is bound by stone retaining wall. Concrete steps connect the public right-of-way to the main entry. The rear yard extends east to an alley.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4050). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond on the façade. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear stuccoed brick chimney with a plain cap is centered at the rear elevation. Window openings on the façade (west elevation) have 6/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the northern bay, holds a single-leaf, wood French door underneath a metal storm door, surmounted by wood spiderweb fanlight. The entry is completed with a doubled rowlock brick arch. The entry is accessed by a brick stoop and sheltered by a single-bay shed roof porch. The porch is supported by metal filigree supports and has a metal filigree balustrade.

Fenestration at the rear (east) include 1/1, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with cast stone sills. There is a single-bay, shed-roof concrete and metal porch off the rear of the house that is accessed by a secondary entry and a set of concrete steps. The secondary entry is a paneled replacement door surmounted by a single-light transom. There is a one-story, one-bay addition off the rear. The flat-roof, stuccoed brick addition features a single-leaf door with lights. The addition is noted on the 1928 Sanborn Map.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the east side of 14th Street, N.E. The front yard is bound by stone retaining wall. Brick steps connect the public right-of-way to the main entry. The rear yard extends east to an alley, and is partially enclosed by a chain-link fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4050). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a plain is parged and centered at the rear elevation. Window openings on the façade (west elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. Two of the second story windows are sheltered by metal awnings. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the northern bay, holds a single-leaf, paneled wood door surmounted by single-light wood transom. The entry is sheltered by a full-width flat roof and a metal awning. The porch is supported by concrete piers and metal filigree posts. The porch is infilled with wood lattice-work.

Fenestration at the stuccoed rear (east) include 8/8 and 6/6, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with segmental arches. There is a secondary double leaf contemporary entry that features two vinyl doors with lights surmounted by a transom. The door accesses a single-bay porch. The rest of the rear elevation is not visible behind the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the east side of 14th Street, N.E. The front yard is bound by a stone retaining wall. There are a small foundation plantings in the front yard. Concrete steps connect the public right-of-way to the main entry. The rear yard extends east to an alley, and is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4050). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond on the façade and side elevation and five-course, American-bond brick on the rear. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (west elevation) have 9/1 and 6/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the northern bay, holds a single-leaf, paneled wood door underneath a metal starburst door, surmounted by single-light wood transom. The entry is accessed by a brick stoop.

Fenestration at the rear (east) and side (south) elevations include 9/1 and 1/1, double-hung, vinyl-sash windows. Window openings on the side elevation are typical of the façade, complete with cast stone sills and lintels. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a full-width brick and wood deck off the rear of the house that is accessed by a secondary entry. The secondary entry is surmounted by a single-light wood transom window.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the east side of 14th Street, N.E. The front yard is bound by a concrete curb and chain-link fence. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends east to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#1197). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (west elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the southern bay, holds a single-leaf, paneled wood door with lights. The entry is surmounted by a wood, spiderweb fanlight. The entry is completed by a doubled, rowlock brick segmental arch and keystone.

Fenestrations at the rear (east) elevation include 6/1, double-hung, vinyl-sash windows. The windows on the rear are completed with double and triple course rowlock bricks segmental arches. The secondary entry on the rear that is not visible because of the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The slightly raised front yard is bound by a short brick retaining wall. The front yard features a few small foundation plantings and mature trees. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends west to an alley and is enclosed by a wood privacy fence.

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#1197). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (west elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the southern bay, holds a single-leaf, paneled wood door with lights and a metal filigree door. The entry is surmounted by a single-light wood transom. The entry is sheltered by a single-bay metal awning and accessed by a brick stoop.

Fenestration at the rear (east) and side (south) elevations include 1/1, double-hung, vinyl-sash windows, one tripartite vinyl casement window, and a two single-leaf entries. The window openings at the side elevation are completed with cast stone sills and cast stone lintels. The windows on the rear are completed with double and triple course rowlock bricks segmental arches. The secondary entry on the rear is surmounted by a single-light wood transom window and sheltered by a metal awning. The entry is accessed by a concrete stair.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the southwest side of the intersection of 15th Street, N.E. and Constitution Avenue, N.E. The slightly raised front yard is bound by a short brick retaining wall and enclosed by a metal fence. The front yard features a few small foundation plantings. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends west to rear yard that is adjacent to the alley that runs behind the rest of the house on 15th Street, N.E. The rear yard is enclosed by the same type of brick retaining wall and metal fence as the front yard.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of six similar buildings built under the same permit (#0859). Set on a solid concrete foundation, the rectangular structure is faced in five-course American-bond brick. A flat roof caps the dwelling and is complete with a molded metal cornice and block modillions. An exterior, rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The main entry, located in the western bay, holds a single-leaf paneled wood door with lights and a metal filigree door, surmounted by a single-light wood transom window. A one-story, full-width porch shelters the first story. Set on concrete piers the porch is capped by a flat, asphalt-shingled roof that is supported by square wood posts. The façade (north elevation) has 1/1, double-hung, vinyl-sash windows, set in wood surrounds with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the first story. The south (rear) elevation has 1/1, double-hung, vinyl sash replacement windows. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a secondary entry that is mostly not visible. It is a single-leaf entry and features a transom window. There is a wood deck that extends across the full-width of the rear.

Site Notes:

October 2013: This single-family rowhouse is located on the south side of North Carolina Avenue, N.E. and has a setback of approximately twenty feet from the brick sidewalk. The raised front yard is enclosed by a chain-link fence and bound by a concrete retaining wall. A set of concrete stairs and a concrete walkway provide access to the main entry from the public right-of-way. The property extends south to an alley.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#0859). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and block modillions. Window openings on the façade (northwest elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door and a storm door. The entry is surmounted by a wood fanlight set underneath a double rowlock brick arch. The entry is accessed by a brick stoop with a metal filigree banister and balustrade.

Fenestration at the rear (southeast) elevation includes 1/1, double-hung, vinyl-sash windows, and a single-leaf entry surmounted by a blind transom. Two openings have been bricked up. All of the existing window openings at the rear elevation are completed with cast stone sills and cast stone lintels. There is a full-width wood porch that is accessed by the secondary entry and the rear yard. The rear also features a concrete block wall that forms a parking area.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the southeast side of North Carolina Avenue, N.E and has a setback of approximately twenty feet from the brick sidewalk. The slightly raised front yard is bound by a short concrete retaining wall and enclosed metal fence. The front yard features a few small foundation plantings. Concrete steps and a brick-faced walkway connect the public right-of-way to the main entry. The rear yard extends southeast to an alley.

Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#0859). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (northwest elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights and a metal filigree door. The entry is surmounted by a wood fanlight set underneath a double rowlock brick arch. The entry is accessed by a brick stoop.

Fenestration at the rear (southeast) elevation includes 1/1, double-hung, vinyl-sash windows, and a single-leaf entry surmounted by a blind transom. All of the window openings at the rear elevation are completed with cast stone sills and cast stone lintels. There is a single-bay concrete and brick porch that accesses a secondary entry.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the southeast side of North Carolina Avenue, N.E and has a setback of approximately twenty feet from the brick sidewalk. The slightly raised front yard is bound by a short concrete retaining wall and a chain link fence. The front yard features a few small foundation plantings. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends southeast to an alley, and is enclosed by a metal chain-link fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of six similar buildings built under the same permit (#0859). Set on a solid concrete foundation, the rectangular structure is faced in five-course American-bond brick. A flat roof caps the dwelling and is complete with a molded metal cornice and block modillions. An exterior, rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The main entry, located in the western bay, holds a single-leaf paneled wood door with lights, surmounted by a single-light wood transom window. A one-story, full-width porch shelters the first story. Set on concrete piers infilled with decorative concrete blocks, the porch is capped by a flat, asphalt-shingled roof that is supported by metal filigree posts. The façade (north elevation) has 1/1, double-hung, vinyl-sash windows, set in wood surrounds with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the first story.

The south (rear) elevation has 1/1, double-hung, vinyl sash replacement windows set on cast stone sills and underneath cast stone lintels. There is a secondary entry that features a single-leaf wood door with lights surmounted by a blind wood transom. The secondary entry is accessed by a single-bay concrete porch that is set on brick piers.

Site Notes:

October 2013: This single-family rowhouse is located on the south side of North Carolina Avenue, N.E. and has a setback of approximately twenty feet from the brick sidewalk. The raised front yard is enclosed by a chain-link fence and bound by a concrete and stone retaining wall. A set of concrete stairs and a concrete walkway provide access to the main entry from the public right-of-way. The property extends south to an alley.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this three-story, four-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#0859). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and block modillions. An exterior brick chimney with a corbeled cap is located off the large bay on the east side of the rowhouse. Window openings on the façade (north elevation) have 9/1 or 1/1 double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. There is also a large, three-side bay that was added sometime in the late-twentieth century. The bay features a large multi-light vinyl casement window flanked by two, 1/1 double-hung vinyl sash windows. The second and third story windows are flanked by metal filigree, inoperable shutters. A brick sillcourse complements the cast stone sills at the second story. The façade features two projecting, full-height, canted bays. The bay closest to the entry is three-sided while the outer bay is six-sided and features a pyramidal roof. The main entry, located in the eastern bay, holds a replacement single-leaf, paneled wood door with sidelights, surmounted by a blind wood fanlight. Fenestration at the rear (south) elevation includes 1/1, double-hung, vinyl-sash windows, and a single-leaf entry door that is not visible but surmounted by a transom.

All of the window openings at the side elevation (south) are typical with the façade. There is narrow, three-story, addition attached to the rear of the dwelling. The flat-roof addition is clad in horizontal wood boards and features 6/6 double-hung, vinyl-sash windows and a single leaf secondary entry. The entry is accessed by a wood porch that can be accessed from the public right-of-way of Ames Place, N.E.

Site Notes:

October 2013: This two-story, multi-family rowhouse is located on the southeast side of North Carolina Avenue, N.E. The property is also bound to the west by 14th Street, N.E. and to the south by Ames Place, N.E. The slightly sloping front yard is enclosed by a short metal fence. The large corner lot yard features a few small foundation plantings and a few mature trees. Short concrete steps and a concrete walkway, connect the public right-of-way to the main entry. The rear yard extends southeast towards Ames Street.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#1388). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a metal cap is located on the rear elevation of the dwelling. Window openings on the façade (north elevation) have 9/1, double-hung, wood-sash windows covered with storm windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled metal. The entry is surmounted by a single-light wood transom. The raised entry is accessed by a solid, brick entry porch.

Fenestration at the rear (south) elevation includes 1/1, double-hung, vinyl-sash windows, and a single-leaf wood door with lights completed with double and triple rowlock brick segmental arches. The secondary entry is accessed by a wood porch and is surmounted by a single-light wood transom. Most of the first-story of the rear is not visible because of a wood privacy fence that encloses the rear. The wood fence is supported by a concrete retaining wall.

Site Notes:

October 2013: This two-story, single family semi-attached rowhouse is located on the south side of Ames Place, N.E. The raised front yard is bound by a brick retaining wall that supports a short, metal filigree fence. Concrete steps connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#1388). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (north elevation) have 6/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a replacement single-leaf, paneled wood door with lights and a metal filigree door, surmounted by a single-light wood transom set underneath a cast stone lintel. The entry is accessed by a solid, brick stoop.

Fenestration at the rear (south) elevation includes 1/1, double-hung, vinyl-sash windows, and a single-leaf entry door that is not visible but surmounted by a transom. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. The first-story of the rear is not visible because of a wood privacy fence that encloses the rear.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Place, N.E. The slightly raised front yard is bound by a brick retaining wall. The small yard features a few small foundation plantings. Concrete steps and a concrete walkway, both faced in stone, connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a metal chain-link fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#1388). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a metal cap is located on the rear elevation of the dwelling. Window openings on the façade (north elevation) have 9/1, double-hung, wood-sash windows covered with storm windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights. The entry is surmounted by a single-light wood transom. The first story is sheltered by a one-story, full-width porch. Set on brick piers with wood lattice infill, the porch is capped by a flat roof and supported by Tuscan wood columns. The porch features a squared wood balustrade.

Fenestration at the rear (south) elevation includes 1/1, double-hung, vinyl-sash windows, completed with double and triple rowlock brick segmental arches. The first-story of the rear is not visible because of a wood privacy fence that encloses the rear.

Site Notes:

October 2013: This two-story, single family rowhouse is located on the south side of Ames Place, N.E. The raised front yard is bound by a stone retaining wall that supports a short, metal filigree fence. Concrete steps faced in flagstone connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#1388). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (north elevation) have 9/1 and 6/1, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights, surmounted by a spiderweb fanlight. The entry is sheltered by a one-story, one-bay flat roof porch that is supported by Tuscan columns.

Fenestration at the rear (south) elevation includes 2/2, double-hung, wood-sash windows. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a one-story, full-width shed roof that shelters a secondary entrance that is obscured by the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Place, N.E. The slightly raised front yard is bound by a brick retaining wall. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#1388). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (north elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a replacement single-leaf, paneled wood door with lights and contemporary storm door, surmounted by a single-light transom.

Fenestration at the rear (south) elevation includes 1/1, double-hung, vinyl-sash windows, and a replacement wood entry door surmounted by a transom. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a one-story, one-bay aluminum shed roof that shelters a secondary entrance that is obscured by the wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Ames Place, N.E. The slightly raised front yard is bound by a brick retaining wall. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of eight similar buildings built under the same permit (#1388). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbelled cap is located on the rear elevation of the dwelling. Window openings on the façade (north elevation) have 1/1, double-hung, vinyl-sash windows covered with storm windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door. The first story is sheltered by a one-story, full-width porch. Set on a solid brick foundation infilled, the porch is capped by a flat roof and has wood, turned post supports and a squared wood balustrade.

Fenestration at the rear (south) elevation includes 1/1, double-hung, vinyl-sash windows, completed with double and triple rowlock brick segmental arches. The first-story of the rear is not visible because of a wood privacy fence that encloses the rear.

Site Notes:

October 2013: This two-story, single family rowhouse is located on the south side of Ames Place, N.E. The raised front yard is bound by a brick retaining wall. Concrete steps connect the public right-of-way to the main entry. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of two similar buildings built under the same permit (#1035). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (south elevation) have 9/1, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the center bay, holds a single-leaf, paneled wood door, surmounted by a single-light wood transom. The entry and eastern bay are sheltered beneath a one-story, two-bay porch. Set on a brick pier foundation, the porch is capped by a flat roof supported by filigree supports. The façade features a projecting, full-height, two-sided canted bay on the west portion of the main block. Windows on the side (east) elevation are single-light casement windows. All windows are supported by cast stone sills. Windows on the first story are complemented with double-course rowlock brick segmental arches.

Site Notes:

October 2013: This two-story, single-family, semi-attached rowhouse is located on the north side of Ames Place, N.E. The level front yard is enclosed by a brick retaining wall and is planted with small foundation plantings. Concrete steps connect the public right-of-way to the main entry. The rear yard extends north to an alley and is not visible from the public right-of-way.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4049). Set on a solid, concrete foundation, the brick structure is faced with Flemish-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An interior brick chimney with a corbeled cap is centered on the original rear elevation of the dwelling. Openings on the façade (east elevation) hold 1/1, double-hung, vinyl-sash windows. The windows are set between cast stone sills and lintels and within wood surrounds. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay on the north portion of the main block. The main entry holds a single-leaf paneled-wood replacement door with accented with a spiderweb transom, and a projecting rowlock brick segmental arch with keystone brick. The entry is set on a single-bay brick stoop.

Fenestration at the rear (west) elevation include 1/1, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a one-story, single-bay attached garage addition. The addition features a paneled metal garage door. The top of the flat-roof addition is used a porch and enclosed by a metal balustrade. The backyard is enclosed by a wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The raised front yard is bound by a stone retaining wall. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends north to an alley.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4049). Set on a solid, concrete foundation, the brick structure is faced with Flemish-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An interior brick chimney with a corbeled cap is centered on the original rear elevation of the dwelling. Openings on the façade (east elevation) hold 1/1, double-hung, vinyl-sash windows. The windows are set between cast stone sills and lintels and within wood surrounds. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay on the north portion of the main block. The main entry holds a single-leaf paneled-wood replacement door with lights surmounted by single-light transom window. The first story is sheltered by a one-story, one-bay porch. Set on a brick pier foundation the porch is capped by a flat roof and has wood, Tuscan column supports.

Fenestrations on the side (north) elevation of the main block are typical with the façade. There is a two-story, full-width wood-framed addition at the rear of the house faced in vinyl siding. Openings on the addition are single, paired, and tripled double-hung, vinyl-sash windows and single and paired vinyl casement windows. The shed roof addition features a single-leaf metal garage door on the north elevation of the basement level and a single-leaf wood door on the rear of the dwelling. The secondary entry is sheltered by a single-bay aluminum hood. The backyard is enclosed by a wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located to the southwest of the intersection of 15th Street, N.E. and A Street, N.E. The slightly sloping corner front yard is enclosed by a short stone retaining wall complete with a chain-link fence. The rear yard extends to an alley and is enclosed by a concrete retaining wall and wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4049). Set on a solid, concrete foundation, the brick structure is faced with Flemish-bond brick. The basement level has a standing-seam metal roof the wraps around the side elevation of the house. The flat roof of the main block features solar panels and is fronted by a molded metal cornice. An exterior-rear brick chimney with a corbeled cap is centered on the rear elevation. Window openings on the façade (east elevation) feature tripled vinyl-sash casement windows at the basement level and paired double-hung, vinyl-sash windows on the rest of the elevation. The openings on the first and second stories are supported by cast stone sills and lintels and wood surrounds. A brick sillcourse complements the cast stone sills at the second story. The main entry features a paneled wood door with lights, surmounted by a three-light wood transom. The entry on the façade is sheltered by a one-story, one-bay brick pier porch, capped by a flat roof supported by fluted wood columns.

Fenestrations at the side (south) and rear (west) elevations includes single and paired 1/1, double-hung vinyl-sash windows and single-light casement windows with false six-light muntins. Windows on the basement level sit on top of cast stone sills. On the first and second stories, the openings are typical with the façade. There is a two-story addition on the rear elevation. This addition visible on the 1959 Sanborn Map was constructed sometime second quarter of the twentieth century. The addition features a secondary single-leaf paneled wood entry and a single-leaf paneled metal garage door and is attached to the adjacent rowhouse on A Street, N.E. The second level of the addition features a shed-roof portion and a porch enclosed by a metal balustrade.

Site Notes:

October 2013: This two-story, single-family rowhouse is located to the northwest of the intersection of 15th Street, N.E. and A Street, N.E. The slightly sloping lot is enclosed by a metal fence. Concrete steps connect the public right-of-way to the main entry. The rear extends to the west, along the north side of A Street, N.E.

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4049). Set on a solid, concrete foundation, the brick structure is faced with Flemish-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (east elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set between cast stone sills and lintels and within wood surrounds. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the northern bay and features a paneled wood door with lights, surmounted by a single-light transom window. The first story of the façade is sheltered beneath a one-story, three-bay brick pier porch, capped by a flat roof supported by wood columns.

Fenestration at the rear (west) elevation includes singled and doubled 1/1, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with single and triple-course rowlock bricks segmental arches. There is a one-story, two-bay, shed-roof enclosed porch attached to the north elevation of the house. The backyard is enclosed by a wood privacy fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The slightly raised front yard is bound by a stone retaining wall completed with a chain-link fence. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends north to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#4049). Set on a solid, concrete foundation, the brick structure is faced with Flemish-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade have 1/1 vinyl-sash slider windows at the foundation and 1/1, double-hung, vinyl-sash windows on the rest of the elevation. The windows are set between cast stone sills and lintels and within wood surrounds. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry holds a single-leaf flush wood door beneath a two-course rowlock segmental arch with a keystone and is approached by a brick stoop. The entry is sheltered by a single-bay aluminum hood.

Fenestration at the rear (north) elevation include 1/1, double-hung, vinyl-sash windows. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches. There is a one-story, two-bay, porch supported by concrete steps and brick piers. The porch holds a single-leaf paneled wood door and is sheltered by a shed roof supported by filigree supports. The backyard is enclosed by a brick wall.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The raised front yard is bound by a stone retaining wall and planted with several foundation plantings. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends north to an alley.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

**October 2013:** Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of nine similar buildings built under the same permit (#1582). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbelled cap is centered on the rear elevation of the dwelling. Window openings on the façade (south elevation) have 1/1, double-hung, vinyl-sash windows with false 9/1 muntins. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights, surmounted by a single-light transom. The first story is sheltered by a one-story, full-width porch. Set on a brick pier foundation infilled with decorative screen concrete block, the porch is capped by a flat roof and has metal filigree supports and a turned metal balustrade.

Fenestration at the rear (north) elevation includes 1/1, double-hung, vinyl-sash windows, completed with double and triple rowlock brick segmental arches. A single-leaf secondary entry marked by a paneled wood door with lights marks the first story. A one-story, three-bay addition is appended to the rear of the dwelling. The wood-framed, flat-roofed addition holds a single-leaf secondary and vinyl windows. Judging on its materials and construction it was built in the late twentieth century.

Site Notes:

**October 2013:** This two-story, single family rowhouse is located on the north side of Ames Place, N.E. The raised front yard is bound by a short-brick retaining wall surmounted by a chain-link fence. A concrete walkway and stair connect the public right-of-way to the main entry. The rear yard extends north than an alley. Off the rear of the house is a 1-story, full-width addition.

Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbelled cap is centered on the rear elevation of the dwelling. Window openings on the façade (south elevation) have 1/1, double-hung, vinyl-sash windows covered with storm windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door, surmounted by a single-light transom. The first story is sheltered by a one-story, full-width porch. Set on a brick pier foundation infilled with decorative screen wood lattice, the porch is capped by a flat roof and has wood, Tuscan column supports and a squared wood balustrade.

Fenestration at the rear (north) elevation includes 1/1, double-hung, vinyl-sash windows, completed with double and triple rowlock brick segmental arches. A single-leaf secondary entry marked by a vinyl replacement door marks the first story.

Site Notes:

October 2013: This two-story, single family rowhouse is located on the north side of Ames Place, N.E. The front yard is bound by a chain-link fence. Concrete steps connect the public right-of-way to the main entry. The rear yard extends north to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of nine similar buildings built under the same permit (#1582). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (south elevation) have 6/6, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door, with a single-light transom. Fenestration at the rear (north) elevation includes a 1/1, double-hung, vinyl-sash window and original 6/6 and 8/8, double-hung, wood-sash windows. All of the openings are completed with double and triple course rowlock brick segmental arches. A single-leaf secondary entry with a single-light transom is centered at the first story.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the north side of Ames Place, N.E. The slightly raised front yard is bound by a stone retaining wall. The yard is planted with shrubbery and a mature tree. A set of concrete steps, a concrete walkway, and a set of brick steps with a metal railing connect the public right-of-way to the main entry. The rear yard extends north to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of nine similar buildings built under the same permit (#1582). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (south elevation) have 9/1, double-hung, wood-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the western bay, holds a single-leaf, paneled wood door with a single-light, surmounted by a single-light transom. The entry and center bay window are sheltered beneath a one-story, two-bay porch. Set on a brick pier foundation, the porch is capped by a flat roof and has Tuscan wood column supports and a wood balustrade. The side (west) elevation is fenestrated with 2/2, double-hung, wood-sash window, completed with cast stone sills and lintels. Fenestration at the rear (north) elevation includes 1/1, double-hung, vinyl-sash windows and 6/1, double-hung, wood-sash windows. All of the openings are completed with double and triple course rowlock brick segmental arches.

Site Notes:

October 2013: This two-story, single-family, semi-attached rowhouse is located on the north side of Ames Place, N.E. The level front yard is enclosed by a metal fence and is planted with shrubs. Concrete steps connect the public right-of-way to the main entry. The rear yard extends north to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of nine similar buildings built under the same permit (#1582). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse is located above the foundation level. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (south elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay. The main entry, located in the eastern bay, holds a replacement single-leaf, paneled wood door with lights, surmounted by a spiderweb fanlight and a double rowlock brick arch with keystone. Fenestration at the rear (north) elevation includes 1/1, double-hung, vinyl-sash windows, a two-light vinyl sliding window with a single-light transom, and a replacement vinyl sliding entry door. All of the window openings at the rear elevation are completed with double and triple course rowlock bricks segmental arches.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the north side of Ames Place, N.E. The slightly raised front yard is bound by a brick retaining wall and is planted with shrubs. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends north to an alley, and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of nine similar buildings built under the same permit (#1582). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. The flat roof is fronted by a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (south elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set atop cast stone sills and topped by cast stone lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf, paneled wood door with lights, surmounted by a single-light transom. The first story is sheltered by a one-story, full-width porch. Set on a brick pier foundation infilled with decorative screen concrete block, the porch is capped by a flat roof and has metal filigree supports and a turned metal balustrade.

Fenestration at the rear (north) elevation includes 1/1, double-hung, vinyl-sash windows, completed with double and triple rowlock brick segmental arches. A single-leaf secondary entry marked by a paneled wood door with lights marks the first story. A one-story, one-bay garage is appended to the west bay of the rear elevation. The garage is not recorded on the 1927-1928 Sanborn map but was constructed by 1959, according to the Sanborn map from that year. The brick-veneered garage is marked by an original paneled wood garage door. The flat roof of the garage is encircled by a chain-link metal fence.

Site Notes:

October 2013: This two-story, single-family, semi-attached rowhouse is located on the north side of Ames Place, N.E. The slightly raised front yard is bound by a stone retaining wall surmounted by a metal fence. The yard is planted with shrubs. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends north to an alley.

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced in Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The façade (north elevation) has 1/1, double-hung, wood-sash windows, covered with aluminum storm windows, with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the first story. The main entry, located in the eastern bay, holds a new, single-leaf paneled wood door with a single light, set beneath a single-light transom. A one-story porch shelters the first story. Set on a brick foundation that is pierced by a three-light window, the porch is capped by a flat roof with a molded metal cornice, and is supported by prominent brick piers. The rear (south) elevation has 1/1, double-hung, vinyl-sash windows with rowlock brick sills and double and triple course rowlock brick segmental arches.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Constitution Avenue, N.E. The raised front yard has a brick-faced retaining wall that is surmounted by a short metal fence. A set of brick steps with a metal railing provides access to the front porch. The front yard is marked by immature shrubs. Enclosed by a wood privacy fence, the backyard extends south to an alley.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The façade (north elevation) features a projecting, full-height, three-sided canted bay. Window openings hold 1/1, double-hung, wood-sash windows with 6/6 snap-in muntins, completed with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf paneled wood door, and is surmounted by a single-light transom and label molding. The rear elevation is covered in vinyl siding, and is fenestrated with 6/6 and 8/8 wood-sash windows, and with a single-leaf entry.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Constitution Avenue, N.E. The raised front yard is bound by a stone-veneered retaining wall, and is planted with mature shrubbery. A set of concrete steps and a concrete walkway connect the public right-of-way to a brick stoop accessing the front entry. The rear yard is enclosed by a wood privacy fence, and extends south to an alley.

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The façade is fenestrated with 1/1, double-hung, vinyl-sash windows with false muntins, completed with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the eastern bay and is marked by a paneled wood door with lights, surmounted by a single-light transom and a cast stone lintel. The first story of the façade is sheltered beneath a one-story, three-bay porch, capped by a flat roof with metal molding and supported by metal filigree posts.

The east (side) elevation is clad in five-course, American-bond brick and has no openings. The rear elevation is fenestrated with 1/1, double-hung, vinyl-sash windows, surmounted by double and triple rowlock brick segmental arches. A single-leaf secondary entry is sheltered beneath a one-story, one-bay porch capped by a shed roof supported by square wood posts. This porch is recorded on the 1927-1928 Sanborn map and the 1959 Sanborn map update.

Site Notes:

October 2013: This two-story, single-family, semi-attached rowhouse is located on the south side of Constitution Avenue, N.E. The slightly raised front yard is bound by a brick retaining wall. A set of concrete steps and a concrete walkway connect the front entry and the public right-of-way. The rear yard extends south to an alley and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#1197). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse accents the façade (east elevation) above the foundation level. The dwelling is capped by a flat roof that is completed with a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (west) elevation. The façade is fenestrated with single-light vinyl casement windows with false diamond muntins. The window openings are completed with cast stone sills and lintels, and a brick sillcourse complements the cast stone sills at the second story. The main entry is located in the southern bay, and is marked by a single-leaf, paneled wood door with lights, framed by fluted wood pilasters and surmounted by a molded segmental wood pediment. The entry is approached by a brick stoop with brick piers and a metal balustrade. Fenestration at the rear (west) elevation includes a paired, eight-light wood casement window at the second story, accented by a triple rowlock brick segmental arch. A second opening at the second story has been bricked-in. The first story is not visible from the public right-of-way.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The raised front yard planted with shrubbery and is bound by a brick retaining wall surmounted by a metal fence. A set of brick steps and a brick walkway connect the public right-of-way and the main entry. The rear yard extends west to an alley and is enclosed with a wood privacy fence.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#1197). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse accents the façade (east elevation) above the foundation level. The dwelling is capped by a flat roof that is completed with a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (west) elevation. The façade features a projecting, full-height, three-sided canted bay. The façade is fenestrated with 1/1, double-hung, vinyl-sash windows completed with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the southern bay, and is marked by a single-leaf, paneled wood door with lights, accented with a spiderweb transom, and a projecting rowlock brick segmental arch with keystone. Fenestration at the rear (west) elevation includes single and paired 1/1, double-hung, vinyl-sash windows completed with double and triple rowlock brick segmental arches. A single-leaf garage opening is located at the foundation level of the northern bay, and is marked by a roll-up metal garage door.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The raised front yard planted with shrubbery and an immature tree and is bound by a brick retaining wall. A set of concrete steps and a concrete walkway connect the public right-of-way to a brick stoop at the main entry. The rear yard extends west to an alley and is enclosed with a wood privacy fence.

**STYLE/EXTERIOR DATA**

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#1197). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A brick bandcourse accents the façade (east elevation) above the foundation level. The dwelling is capped by a flat roof that is completed with black modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. A small, third-story pop-up addition is centered at the roof, and appears to date to circa 2000, judging by its form and materials. The wood-frame addition is clad in vinyl siding and is capped by a front-gabled roof. A square wood balustrade encircles the roof, and is accessible via the addition.

The façade features a projecting, full-height, three-sided canted bay. The façade is fenestrated with 1/1, double-hung, wood-sash windows completed with cast stone sills and lintels, and a brick sillcourse complements the cast stone sills at the second story. The main entry is located in the northern bay, and is marked by a single-leaf, paneled wood door with single light, surmounted by a single-light transom and label molding. The entry is sheltered beneath a one-story, one-bay porch that is capped by a flat roof and supported by Tuscan wood columns set on a brick stoop.

The side (south) elevation is marked by a one-story, one-bay projecting entry at the raised foundation level. The frame addition is clad in vinyl siding and is topped by a half-hipped roof covered in standing-seam metal. It is marked by a single-light fixed window and a single-leaf door. The 1959 Sanborn map indicates that a store operated out of the basement level at this time; the store was likely accessed at this point. The remainder of the south elevation is fenestrated with typical window openings. A two-story plus basement level wing is appended to the rear (west) elevation of the main block. One bay deep and three bays wide, the wing is set on a brick-clad foundation, and the wood-frame structure is clad in vinyl siding. It is topped by a shed roof. Fenestration includes 1/1, double-hung, vinyl-sash windows and a single-leaf secondary entry. This wing is recorded on the 1927-1928 Sanborn map and on the 1959 Sanborn map.

Site Notes:

October 2013: This two-story, single-family, semi-attached rowhouse is located at the northwest intersection of 15th Street, N.E. and A Street, N.E. The corner lot is bound by a stone retaining wall with a metal fence, and is planted with mature shrubbery. A set of concrete steps leads from the public right-of-way to the main entry. A concrete parking pad is located at the rear side of the dwelling, and is immediately accessible to an asphalt alley.

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of six similar buildings built under the same permit (#1197). Set on a solid concrete foundation, the brick structure is faced with five-course, American-bond brick. A dentiled bandcourse accents the façade (east elevation) above the foundation level, which has been fully excavated. The dwelling is capped by a flat roof that is completed with a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (west) elevation. The façade is fenestrated with 1/1, double-hung, vinyl-sash windows, and with a single one-light fixed window. The windows are typically completed with cast stone sills and lintels, and a brick sillcourse complements the cast stone sills at the second story. The main entry is located in the northern bay, and is marked by a single-leaf, paneled wood door, framed by a Colonial Revival-style surround with wood pilasters and a segmental, sunburst pediment. The foundation level is marked by glassblock windows and a single-leaf secondary entry. Fenestration at the rear (west) elevation includes single and paired 1/1, double-hung, vinyl-sash windows, completed with rowlock brick sills and double and triple course rowlock brick segmental arches.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the west side of 15th Street, N.E. The level front yard has been paved with concrete and is bound by a wood fence. A set of brick and concrete steps with a metal railing connect the public right-of-way and the main entry. The rear yard extends west to an alley and is enclosed with a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, four-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced in Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney is centered at the rear (south) elevation. The façade (north elevation) has replacement 1/1, double-hung, wood-sash windows with false 6/6 snap-in muntins. Each window is completed with a cast stone sill and lintel, and a brick sillcourse complements the cast stone sills at the first story. The main entry, located in the eastern bay, holds a replacement, single-leaf paneled wood door with a single light, set beneath a single-light transom with label molding. An octagonal window is set immediately to the west of the entry, and is also set beneath label molding; this window likely replaced a former entry. The foundation level is pierced by a single-leaf secondary entry to a basement apartment, and by several typical windows.

The rear (south) elevation is fenestrated with 1/1, double-hung, wood-sash windows with snap-in muntins, and all of the window openings are completed with rowlock brick sills and double or triple course rowlock brick segmental arches.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of North Carolina Avenue, N.E. The grassy front yard is planted with mature trees and shrubbery, and is crossed by paved brick walkways. A set of concrete steps and a brick stoop approach the main entry. The yard is enclosed by a short metal fence. The rear yard extends south to an alley, and is enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The façade (north elevation) features a projecting, full-height, three-sided canted bay. Window openings hold 1/1, double-hung, wood-sash windows with 6/6 snap-in muntins, completed with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry, located in the eastern bay, holds a single-leaf paneled wood door with lights, and is surmounted by a single-light transom and label molding. The rear elevation is fenestrated with 1/1, double-hung, vinyl-sash windows with snap-in muntins, and all of the window openings are completed with rowlock brick sills and double or triple course rowlock brick segmental arches.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Constitution Avenue, N.E. The slightly raised front yard is bound by a brick retaining wall, and a brick bound planter box holds immature shrubbery. The main entry is approached by a brick walkway from the public right-of-way, and a set of brick steps leading to a brick stoop. The rear yard is enclosed by a wood privacy fence, and extends south to an alley.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, three-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure has been covered with weatherboard siding. A flat roof caps the dwelling and is completed with a molded metal. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. Fenestration at the façade (north elevation) includes 1/1, double-hung, wood-sash windows with aluminum storm windows. Each window is completed with louvered wood shutters. The main entry is located in the eastern bay and is marked by a replacement, paneled wood door. The Colonial Revival-style surround is composed of pilasters and a simple entablature. The first story of the façade is sheltered beneath a one-story, full-width porch. Set on a brick pier foundation with lattice infill, the porch is topped by a flat roof with metal molding, and has brick pier supports with a metal balustrade.

The original Flemish-bond brick work is exposed at the rear elevation, and window openings hold 9/9, double-hung, wood-sash window completed with cast stone sills and double and triple course rowlock brick segmental arches. A secondary entry located at the eastern bay of the first story is sheltered beneath a small, one-story, one-bay, wood-frame screened-in porch. This porch is recorded on the 1927-1928 Sanborn map and the 1959 Sanborn map.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of Constitution Avenue, N.E. The slightly raised front yard is bound by a brick retaining wall that is surmounted by a metal fence. A set of concrete steps and a concrete walkway lead to a set of concrete steps approaching the front porch. The grassy yard is planted with shrubs. The rear yard extends south to an alley and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The façade (north elevation) features a projecting, full-height, three-sided canted bay. Window openings hold replacement 6/1, double-hung, wood-sash windows, completed with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the eastern bay, and is marked by a replacement, single-leaf paneled wood door with single light, surmounted by a single-light transom and label molding. Visible fenestration at the rear elevation includes 1/1 and 2/2 double-hung, wood-sash windows completed with double and triple course rowlock brick segmental arches. A single-leaf secondary entry marked by a paneled wood door with lights is centered at the elevation.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of North Carolina Avenue, N.E. The slightly raised front yard is bound by a stone retaining wall surmounted by a metal fence. The yard is planted with small shrubs. A concrete walkway and brick steps connect the public right-of-way to a brick stoop approaching the main entry. The rear yard extends south to an alley and is enclosed by a wood privacy fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). Set on a solid concrete foundation, the brick structure is faced with Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. An exterior-rear brick chimney with a corbeled cap is centered at the rear (south) elevation. The façade (north elevation) features a projecting, full-height, three-sided canted bay. Window openings hold replacement 1/1, double-hung, vinyl-sash windows, completed with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the eastern bay, and is marked by a replacement, single-leaf paneled wood door with lights, surmounted by a single-light transom and label molding. Visible fenestration at the rear elevation includes 1/1 double-hung, vinyl-sash windows completed with double and triple course rowlock brick segmental arches. A single-leaf secondary entry is sheltered by a one-story, one-bay, wood-frame porch that is screened-in. Set on a wood pier foundation, the porch is capped by a shed roof of asphalt shingles, and is approached by a set of wood steps. This porch is recorded on the 1927-1928 Sanborn map and the 1959 Sanborn map.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of North Carolina Avenue, N.E. The slightly raised front yard is bound by a concrete retaining wall surmounted by a chain-link metal fence. The yard is planted with small shrubs and a large, mature tree. A concrete walkway and concrete steps connect the public right-of-way to a brick stoop with a metal balustrade approaching the main entry. The rear yard extends south to an alley and is enclosed by a chain-link metal fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1908 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, five-bay, Classical Revival-style single-family rowhouse was one of twelve similar buildings built under the same permit (#4078). According to historic Sanborn maps dating to 1927-1928 and 1959, this dwelling was originally two separate buildings, which have since been combined. Set on a solid concrete foundation, the brick structure is faced in Flemish-bond brick. A brick bandcourse is located above the foundation level. A flat roof caps the dwelling and is completed with a molded metal cornice and brick corbeling. Two exterior-rear brick chimneys with corbeled caps rise at the rear (south) elevation. The façade (north elevation) has 1/1, double-hung, wood-sash windows, with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the first story. The main entry, located in the eastern bay, holds a replacement, single-leaf paneled wood door, set beneath a single-light transom. The entry and adjacent two bays to the west are sheltered beneath a one-story, three-bay porch. Set on a brick foundation, the porch is capped by a flat roof with molded metal cornice, and has brick pier supports.

The rear (south) elevation has single and paired 1/1, double-hung, vinyl-sash windows with double and triple course rowlock brick segmental arches. The west bay of the first story is marked by a single-leaf entry; it is no longer accessible as the historic entry porch and steps have been removed. The foundation level has been fully excavated, and is pierced by a single-leaf secondary entry and a single-light window. A new, one-story metal structure was under construction at the time of survey, and may be the framework for a new attached garage.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the south side of North Carolina Avenue, N.E. The raised front yard has a stone retaining wall that is surmounted by a short metal fence. Concrete steps and a stone walkway connect the public right-of-way to the front porch. The front yard is marked by shrubbery. The backyard extends south to an alley.

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Constructed in 1907 by Kennedy & Davis Co. and designed by A.H. Sonnemann, this two-story, two-bay, Classical Revival-style single-family rowhouse was one of nine similar buildings built under the same permit (#1787). Set on a solid, concrete foundation, the brick structure is faced with five-course American-bond brick. The flat roof is fronted by a molded metal cornice and brick block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear elevation. Window openings on the façade (south elevation) have 1/1, double-hung, vinyl-sash windows. The windows are set between cast stone sills and lintels and within wood surrounds. A brick sillcourse complements the cast stone sills at the second story. The façade features a projecting, full-height, three-sided canted bay on the east portion of the main block. The main entry, located in the western bay, holds a single-leaf paneled wood door beneath a two-course rowlock segmental arch with a keystone and is approached by a brick stoop.

Fenestration at the rear (north) elevation includes 1/1, double-hung, vinyl-sash windows on the second story. All of the window openings at the rear elevation are completed with triple course rowlock bricks segmental arches. There is a one-story, full-width, shed-roof porch supported with brick piers attached to the north elevation of the house. The backyard is enclosed by a concrete retaining wall underneath a chain-link fence.

Site Notes:

October 2013: This two-story, single-family rowhouse is located on the north side of A Street, N.E. The slightly raised front yard is bound by a stone retaining wall completed with a chain-link fence. Concrete steps and a concrete walkway connect the public right-of-way to the main entry. The rear yard extends north to an alley, and is enclosed by a short concrete retaining wall surmounted by a tall chain-link fence.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, two-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). The building has a rectangular main block with a shallow projecting front bay set on a solid concrete foundation. The structure is faced with five-course, American-bond brick. Capped by a flat roof, the façade (south elevation) features a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbelled cap is centered at the rear (north) elevation. Located in the western bay, the main entry holds a single-leaf, paneled wood door underneath a spiderweb fanlight. The entry is set underneath a two-course rowlock segmental arch with a keystone and is approached by a brick stoop. Window openings on the façade contain 9/1, double-hung, wood sash set within wood surrounds, atop cast stone sills. The openings are topped with cast stone lintels.

The north (rear) elevation is parged and has 1/1, double-hung vinyl windows. There is a one-story, two-bay wood deck attached to the rear of the dwelling. The back yard is enclosed by a wood privacy fence.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. The dwelling has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by a short of a stone retaining wall. A set of brick-faced concrete stairs and brick walkway lead to the front entry. There are small trees and shrub plantings. The property extends to the north to an alley and has a two-bay wood porch attached to the rear of the dwelling.

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company. The dwelling is one of sixteen similar buildings under the permit (#1787). Set on a solid concrete foundation, the brick structure is faced with five-course American-bond brick. A flat roof caps the dwelling and features a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (north) elevation of the dwelling. The window openings on the façade (south elevation) are 1/1, double-hung, vinyl windows complete with wood surrounds and cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the western bay and features a paneled wood door with lights, surmounted by a single-light transom window.

The north (rear) elevation features 1/1, double-hung, vinyl windows on top of concrete sills set underneath doubled and tripled rowlock brick segmental arches. There is a one-story, two-bay asphalt-shingled shed-roof porch supported by wood posts off the western bay of the dwelling. This porch is not visible on the 1959 Sanborn Map, and was constructed sometime in the second half of the twentieth century.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. The dwelling has a setback of approximately ten feet from a concrete sidewalk. The raised front yard is bound by a short concrete retaining wall surmounted by a metal fence. Concrete steps and a concrete walkway connect the front entry to the public right of way. The property extends north to an alley and has a backyard enclosed by a chain-link fence.

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company. The dwelling is one of sixteen similar buildings under the permit (#1787). Set on a solid concrete foundation, the brick structure is faced with five-course American-bond brick. A flat roof caps the dwelling and features a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (north) elevation of the dwelling. The window openings on the façade (south elevation) are 1/1, double-hung, wood-sash underneath storm windows, complete with wood surrounds and cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the second story. The main entry is located in the western bay and features a paneled wood door with lights, surmounted by a single-light transom window. The first story of the façade is sheltered beneath a one-story, three-bay porch, capped by a flat roof supported by Tuscan wood columns.

The north (rear) elevation features 1/1, double-hung, wood-sash windows on top of brick, rowlock sills set underneath brick segmental arches. There is a one-story, two-bay asphalt-shingled shed-roof porch supported by wood posts off the western bay of the dwelling. This porch is visible on both the 1928 and 1959 Sanborn Maps.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. The dwelling has a setback of approximately ten feet from a concrete sidewalk. The raised front yard is bound by a stone retaining wall. A set of concrete stairs leads to a brick walkway and connecting stair that connects the front entry to the public right of way. The property extends north to an alley and has a backyard enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, two-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). The building has a rectangular main block with a shallow projecting front bay set on a solid concrete foundation. The structure is faced with five-course, American-bond brick. Capped by a flat roof, the façade (south elevation) features a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is stuccoed and centered at the rear (north) elevation. Located in the western bay, the main entry holds a new single-leaf, paneled wood door with lights underneath a fanlight. The entry is set underneath a two-course rowlock segmental arch with a center keystone and is approached by a brick stoop. Window openings on the façade contain 1/1, double-hung, wood sash set within wood surrounds beneath storm windows. The fenestrations have cast stone sills and lintels.

The north (rear) elevation is stuccoed and has both 1/1, double-hung vinyl-sash windows with false 6/6 muntins and paired single-light vinyl-windows with twelve-light false muntins. The openings on the rear are surmounted by stuccoed arches. There is a one-story, one-bay attached concrete garage. There is a deck on the flat-roof of the addition enclosed by a wood balustrade. There is a single-leaf, paneled, metal garage door on the north end of the addition.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. The dwelling has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by a metal fence supported by a stone retaining wall. A set of slate-faced concrete stairs and a walkway lead to the front entry. The property extends to the north and has a concrete driveway that connects to the adjacent alley.

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). Set on a solid concrete foundation, the rectangular structure is faced in five-course American-bond brick. A flat roof caps the dwelling and is complete with a molded metal cornice and block modillions. An exterior, rear brick chimney with a corbeled cap is centered at the rear (north) elevation. The main entry, located in the western bay, holds a single-leaf paneled replacement wood door with lights, set between fluted pilasters. A one-story, three-bay porch shelters the first story. Set on concrete piers infilled with decorative concrete blocks, the porch is capped by a hipped, asphalt-shingled roof. The façade (north elevation) has 1/1, double-hung, vinyl-sash windows, set in wood surrounds with cast stone sills and lintels. A brick sillcourse complements the cast stone sills at the first story.

The west (side) elevation has five-course, American-bond brick work and no openings. The north (rear) elevation is stuccoed and has 1/1, double-hung, vinyl sash replacement windows with concrete sills surmounted with stuccoed arches. There is a one-story enclosed porch on the west-bay of the dwelling. There is also a one-story, one-bay flat-roofed addition of the rear of the house. The top of the addition is enclosed by a wood and metal fence. There is also a double-leaf flush wood door providing access into the alley. This addition is noted on the 1959 Sanborn Map.

Site Notes:

October 2013: This semi-attached, single-family rowhouse is located on the north side of A Street, N.E. and has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by a chain-link fence and bound by a brick retaining wall. A set of concrete stairs and a concrete walkway provide access to the main entry from the public right-of-way. The property extends north to an alley.

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). The building has a rectangular main block and a two-story shallow projecting front bay set on a solid concrete foundation. The structure is faced with five-course, American-bound brick. Capped by a flat roof, the façade (south elevation) features a molded metal cornice and block modillions. An exterior-rear brick chimney with a plain cap is centered at the rear (north) elevation. Located in the western bay, the main entry holds a single-leaf, paneled door and a fanlight. The entry is set within a replacement Colonial Revival-style surround composed of fluted pilasters, entablature, and a broken pediment with acorn finial. Window openings hold 1/1, double-hung, vinyl-sash windows with 6/6 snap-in muntins, completed with cast stone sills and lintels. A cast stone sillcourse complements the sills at the first story. The north (rear) elevation has an attached full-width wood deck.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. and has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by a concrete block retaining wall and planted with mature shrubbery. A set of brick stairs and a brick walkway provide access to the main entry from the public right-of-way. The property extends north to an alley and is enclosed by a wood privacy fence.

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this three-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). Constructed as a two-story building, a third-story addition capped by a false mansard roof was added to the building circa 2012. The building has a rectangular main block set on a solid concrete foundation. The structure is faced with five-course, American-bond brick and has a one-story, full-width, flat-roofed porch set on a brick pier foundation. Capped by an asphalt-shingle mansard roof, the façade (south elevation) features a molded metal cornice and block modillions. Located in the western bay, the main entry holds a single-leaf, paneled replacement door with a transom window. Window openings on the façade contain 1/1, double-hung, vinyl sash set within wood surrounds, atop cast stone sills. The openings are topped with cast stone lintels. The third-story addition has a shed-roof dormer with tripled, 1/1, double-hung vinyl openings.

The east (side) elevation has five-course, American-bond brick work and no openings. The north (rear) elevation has 1/1, double-hung, vinyl sash replacement windows with cast stone sills surmounted with two and three-course rowlock brick segmental arches. A secondary entry is marked by a replacement door with transom, and is approached by a wood stoop and steps. There is also a single-height, two-bay detached garage to the north of the house, accessible via the alley constructed ca. 1918. The garage is noted on the 1928 Sanborn Map.

Site Notes:

October 2013: This semi-attached, single-family rowhouse is located on the north side of A Street, N.E. and has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is bound by a stone retaining wall. A set of parged, concrete stairs and a parged contrite walkway provide access to the main entry. The property extends north to an alley and has a backyard enclosed by a brick wall.

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Classical Revival**

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, two-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). The building has a rectangular main block with a shallow projecting front bay set on a solid concrete foundation. The structure is faced with five-course, American-bond brick. Capped by a flat roof, the façade (south elevation) features a molded metal cornice and block modillions. An exterior-rear brick chimney with a plain cap is located on the rear (north) elevation of the dwelling. Located in the western bay, the main entry holds a single-leaf, paneled wood door with lights and transom covered by a metal storm door. The entry is approached by a brick stoop. The historic fanlight is visible underneath the existing surround. Window openings on the façade contain 1/1, double-hung, vinyl sash set within wood surrounds, atop cast stone sills. The openings are topped with cast stone lintels.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. and has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is bound on stone retaining wall. A set of concrete stairs and a concrete walkway provide access to the main entry. The property extends north to an alley and has a backyard enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, two-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). The building has a rectangular main block with a shallow projecting front bay set on a solid concrete foundation. The structure is faced with five-course, American-bond brick. Capped by a flat roof, the façade (south elevation) features a molded metal cornice and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (north) elevation. Located in the western bay, the main entry holds a single-leaf, paneled door and a fanlight. The entry is set underneath a two-course rowlock segmental arch and is approached by a brick stoop. Window openings on the façade contain 1/1, double-hung, metal sash set within wood surrounds, atop cast stone sills. The openings are topped with cast stone lintels.

The north (rear) elevation has 1/1, double-hung, vinyl sash replacement windows with cast stone sills set underneath two-course rowlock segmental arches. There a one-story, one-bay attached garage addition to the rear of the main block that was constructed sometime in the latter half of the nineteenth century. The addition is faced in hardiplank siding and has a patio on top of the addition. The patio is enclosed by a wood privacy fence.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. and has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by a stone retaining wall. A set of concrete stairs and a concrete walkway provide access to the main entry. The property extends north to an alley and has an attached garage addition.

The building has a rectangular main block with a shallow projecting front bay set on a solid concrete foundation. The structure is faced with five-course, American-bond brick. Capped by a flat roof, the façade (south elevation) features a molded metal cornice and block modillions. An exterior-rear brick chimney with a plain cap is parged and centered at the rear (north) elevation. Located in the western bay, the main entry holds a single-leaf, paneled wood door with lights underneath a fanlight. The entry is set underneath a two-course rowlock segmental arch and is approached by a brick stoop. Window openings on the façade contain 1/1, double-hung, wood sash set within wood surrounds, atop cast stone sills. The openings are topped with cast stone lintels.

The north (rear) elevation is parged and has both 1/1, double-hung and slider vinyl windows. There is a wood deck off the rear. The back yard is enclosed by a wood privacy fence.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. The dwelling has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by a wood fence to the north of a stone retaining wall. A set of stone-faced concrete stairs and walkway lead to the front entry. The property extends to the north to an alley and enclosed by a wood privacy fence.

Exterior & Architectural Notes:

October 2013: Designed by A.H. Sonnemann, this two-story, three-bay Classical Revival-style rowhouse was constructed in 1908 by Kennedy & Davis Company and is one of sixteen similar buildings built under the same permit (#1787). The building has a rectangular main block set on a solid concrete foundation. The structure is faced with five-course, American-bond brick and has a one-story, full-width, flat-roofed porch set on a brick pier foundation. Capped by a flat roof, the façade (south elevation) features a molded metal cornice set and block modillions. An exterior-rear brick chimney with a corbeled cap is centered at the rear (north) elevation. Located in the western bay, the main entry holds a single-leaf, paneled door with lights underneath a transom window. Window openings on the façade contain 1/1, double-hung, vinyl sash with false, 6/6 muntin. The openings are set within wood surrounds, atop cast stone sills and topped with cast stone lintels.

The north (rear) elevation has 1/1, double-hung, vinyl sash replacement windows with 6/6 false muntins and cast stone sills set underneath two-course rowlock segmental arches. There is a full-width, double-height wood porch off the rear of the house.

Site Notes:

October 2013: This attached, single-family rowhouse is located on the north side of A Street, N.E. and has a setback of approximately ten feet from the concrete sidewalk. The raised front yard is enclosed by wood fence set on a stone retaining wall. A set of brick stairs and a brick walkway provide access to the main entry. The property extends north to an alley and is enclosed by a wood privacy fence.
