STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: This two-story, three-bay Colonial Revival-style apartment building was constructed in 1938 by the owner/builder Louis L. and Robert W. Bowdler. Designed by architect Luther R. Ray, this apartment building is one of three similar constructed under the same permit (#214645). The building has a rectangular form and is set on a solid raised concrete foundation. The concrete structure is faced with six-course, American-bond brick. A flat roof is obscured by a plain brick parapet with metal coping. Centrally located on the façade (south elevation), the main entry holds a single-leaf, paneled wood door with tall, narrow lights set in a Colonial Revival-style surround composed of fluted pilasters and a denticulated cornice. Window openings contain 1/1, double-hung, vinyl sash. Rowlock brick sill strings complete the design of the façade. The secondary elevations were not surveyed or photographed by the volunteer surveyor.

Site Notes:

September 2009: This apartment building is located on a corner lot northeast of the intersection of Gales Street, N.E. and 17th Street, N.E. and has a setback of approximately twenty feet from the concrete sidewalk. The large, level grassy lot is marked by mature trees and shrubs. A milled point metal fence encloses the property. A brick patio and steps provide access up to the main entry. An alley forms the northern boundary of the lot.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: This two-story Colonial Revival-style duplex was constructed in 1948 by owner/builder Cory Construction Company. Designed by architect George T. Santmyers, this building is one of fifteen similar attached duplexes erected under the same permit (#305295). Set on a solid concrete foundation, this masonry structure is veneered in six-course, American-bond brick. The sloped roof is obscured by a plain brick parapet with metal coping. The single-leaf main entries, located in the outermost bays of the façade (south elevation), hold flush and paneled replacement doors. Window openings have 1/1, double-hung, vinyl sash with rowlock brick sills. Soldier brick flat arches compliment the first story openings. A soldier brick lintel string completes the second story. The north (rear) elevation was not surveyed or photographed by volunteer surveyor.

Site Notes:

September 2009: This multi-family rowhouse is located on the north side of Gales Street, N.E. and has a setback of approximately twenty feet from the concrete sidewalk. The level, grassy front yard has a concrete walkway split between the two main entries. Shared concrete stoops are located outside the door openings. An alley forms the northern boundary of the lot.

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: This two-story Colonial Revival-style duplex was constructed in 1948 by owner/builder Cory Construction Company. Designed by architect George T. Santmyers, this building is one of fifteen similar attached duplexes erected under the same permit (#305295). This building has been converted into a single-family dwelling. Set on a solid concrete foundation, this masonry structure is veneered in six-course, American-bond brick. The sloped roof is obscured by a plain brick parapet with metal coping. The main entry, located in the western bay, holds a single-leaf, flush door with semi-circular light (replacement) set in a wood surround. Ghosting from a broken pediment remains above the opening. The other door opening, located in the eastern bay, has been infilled with brick and single-light window installed. Other window openings have 2/2, double-hung, wood sash with rowlock brick sills. Soldier brick flat arches compliment the first story openings. A soldier brick string at lintel height completes the second story. The north (rear) elevation was not surveyed or photographed by volunteer surveyor.

Site Notes:

September 2009: This dwelling is located on the north side of Gales Street, N.E. and has a setback of approximately twenty feet from the concrete sidewalk. The level, grassy front yard has a concrete walkway and is enclosed by a brick wall with milled point metal fence inlay. A mature tree marks the landscape. An alley forms the northern boundary of the lot.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: This two-story Colonial Revival-style duplex was constructed in 1948 by owner/builder Cory Construction Company. Designed by architect George T. Santmyers, this building is one of fifteen similar attached duplexes erected under the same permit (#305295). This building has been converted into a single-family dwelling. Set on a solid concrete foundation, this masonry structure is veneered in six-course, American-bond brick. The sloped roof is obscured by a plain brick parapet with metal coping. The main entry, located in the eastern bay, holds a single-leaf, paneled door (replacement). The other door opening, located in the western bay, has been infilled with brick and single-light window installed. Other window openings have 2/2, double-hung, wood sash with rowlock brick sills. Soldier brick flat arches compliment the first story openings. A soldier brick string at lintel height completes the second story. The north (rear) elevation was not surveyed or photographed by volunteer surveyor.

Site Notes:

September 2009: This dwelling is located on the north side of Gales Street, N.E. and has a setback of approximately twenty feet from the concrete sidewalk. The level, grassy front yard has a concrete walkway and is enclosed by a brick wall with milled point metal fence inlay. An alley forms the northern boundary of the lot.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: This two-story Colonial Revival-style duplex was constructed in 1948 by owner/builder Cory Construction Company. Designed by architect George T. Santmyers, this building is one of fifteen similar attached duplexes erected under the same permit (#305295). Set on a solid concrete foundation, this masonry structure is veneered in six-course, American-bond brick. The sloped roof is obscured by a plain brick parapet with metal coping. The single-leaf main entries, located in the outermost bays of the façade (south elevation), hold paneled wood doors (replacements). Window openings have 1/1, double-hung, vinyl sash with rowlock brick sills. Soldier brick flat arches compliment the first story openings. A soldier brick string at lintel height completes the second story. The north (rear) elevation was not surveyed or photographed by volunteer surveyor.

Site Notes:

September 2009: This multi-family rowhouse is located on the north side of Gales Street, N.E. and has a setback of approximately twenty feet from the concrete sidewalk. The level, grassy front yard has a concrete walkway split between the two main entries. Chain-link fence and milled point metal fence partially enclose the yard. An alley forms the northern boundary of the lot.

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: This two-story Colonial Revival-style duplex was constructed in 1948 by owner/builder Cory Construction Company. Designed by architect George T. Santmyers, this building is one of fifteen similar attached duplexes erected under the same permit (#305295). Set on a solid concrete foundation, this masonry structure is veneered in six-course, American-bond brick. The sloped roof is obscured by a plain brick parapet with metal coping. The single-leaf main entries, located in the outermost bays of the façade (south elevation), hold paneled wood doors with semi-circular lights (replacements). Window openings have 1/1, double-hung, vinyl sash with rowlock brick sills. Soldier brick flat arches compliment the first story openings. A soldier brick string at lintel height completes the second story. Fenestration of the east (side) elevation consists of 1/1, double-hung, vinyl-sash windows with rowlock brick sills and soldier brick flat arches. The north (rear) elevation was not surveyed or photographed by volunteer surveyor.

Site Notes:

September 2009: This end-unit dwelling is located on a corner lot northwest of the intersection of Gales Street, N.E. and 18th Street, N.E. and has a setback of approximately twenty feet from the sidewalk. Bounded by a chain-link fence, the grassy front yard has a concrete walkway extending up to the two main entries. A narrow strip of grass separates the east (side) elevation from the sidewalk aside 18th Street. The backyard extends north to an alley and is enclosed with a chain-link fence. A mature tree dots the backyard.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 20009: This two-story Colonial Revival-style multi-family dwelling was constructed in 1949 by Cory Construction Company. Designed by George T. Santmyers, this building was one of six similar rowhouses erected under the same permit (#316025). The dwelling has a rectangular form and is set on a solid concrete foundation. The masonry structure has a six-course, American-bond brick veneer. A sloped roof is obscured by a brick parapet with metal coping. Located in the outermost bays of the façade (north elevation), the single-leaf main entries hold paneled wood doors with semi-circular lights (replacement). Window openings contain 1/1, double-hung, vinyl sash with rowlock brick sills. A soldier brick string at lintel height compliments the second story openings. The south (rear) elevation was not photographed or surveyed by the volunteer surveyor.

Site Notes:

September 2009: This end-unit residence is located on the south side of Gales Place, N.E. and has a setback of approximately ten feet from the sidewalk. The grassy front yard is enclosed by a chain-link fence. A concrete walkway splits to provide access to the two front doors. Split by an immature bush, concrete stoops are located in front of the door openings. The property extends south to an alley.

STYLE/EXTERIOR DATA

Architectural Style(s)

Colonial Revival

Exterior & Architectural Notes:

September 2009: Peace Baptist Church is a 500-seat church constructed in 1959 with modern additions to the façade (east elevation) and south (side) elevation. The original block, a rectangular-shaped sanctuary with a tower in the northeast corner, is set on a solid foundation. The masonry structure is faced with five-course, American-bond brick and features brick pilasters extending down the north (side) elevation. The main block is capped by an asphalt-shingled front-gabled roof and includes short brick parapets with concrete coping across the façade and rear elevation. Fenestration of the church consists of large stained glass windows and 2/2, double-hung, wood-sash windows. All openings include rowlock brick sills. The northeast tower has a square footprint and stands three stories in height. Capped by a pyramidal standing-seam metal roof with finial, the tower has stained glass and 2/2, double-hung, wood-sash windows. Large openings in the upper story appear to have been enclosed with glass block; arranged in such a manner as to form a cross. Louvered vents are located above. The west (rear) elevation was not photographed or surveyed by the volunteer surveyor.

A large addition was added to the south (side) elevation in the 1980s and replaced an earlier detached apartment building. The addition has a long rectangular form and is set on a solid foundation. The masonry structure is faced with five-course, American-bond brick and capped by a flat roof with concrete coping. A small section in the northeast corner of the addition is lower and capped by an asphalt-shingled side-gabled roof. Fenestration includes large paired fixed windows set above awning windows.

A substantial addition has been constructed on the façade (east elevation) of the Peace Baptist Church. Based on its form and materials, this addition dates to ca. 2000. The addition is composed of a side-gabled block, a central block in the form of a tower with a large metal cross attached, and a large, front-gabled northern section. Exterior cladding is a combination of five-course, American-bond brick and pre-formed concrete panels. Roofs are covered with standing-seam metal. Fenestration includes double-leaf, metal-frame glass doors with large fixed windows above as well as large sanctuary windows providing light to the front-gabled section of the addition. Furthermore, a large ocular stained glass window is located in the top of the front-gabled section.

Site Notes:

September 2009: Peace Baptist Church is located on the west side of 18th Street, N.E. southwest of the intersection of 18th Street and Gales Place. The edifice fronts the concrete sidewalk aside 18th Street while maintaining a setback of approximately ten feet from the sidewalk parallel to Gales Place. A narrow grassy strip north of the building is enclosed by a chain-link fence. A handicapped ramp, also located north of the building, provides access to a below-grade door opening. An alley forms the southern boundary of the lot. The property extends west to a vacant lot.

Architectural Style(s)

Modern

Exterior & Architectural Notes:

September 2009: These three, three-story large apartment buildings were constructed between 1963 and 1980 according to historic aerials. The western and eastern buildings have an L-shaped form while the large middle building has a U-shaped form.

Set on solid raised concrete foundations, these masonry structures are faced with stretcher-bond brick and are capped by flat roofs. Window openings contain paired-over-single sash, narrow fixed sash, as well as paired 1/1 double-hung sash. Soldier brick sills compliment the buildings design. Third-story oriels clad in vertical metal sheets are capped by shed roofs.

Elevations facing courtyards feature three-story balconies with brick privacy walls. Double-leaf sliding glass doors lead out to cast concrete decks with metal balusters.

Site Notes:

September 2009: This housing complex encompasses the northern half of Block 4511. The property is bounded by Benning Road to the north, 17th Street to the west, 18th Street to the east, and Gales Place to the south. The level, grassy property has three large buildings separated by open grassy courtyards with concrete walkways. Mature trees frame the buildings while rows of hedges line two asphalt parking lots located in the southwest and southeast corners of the property.
