BRICKBUILDER COMPETITION, No. 3.

CHARLES H. CULLEN, HARTFORD, CONN.

228 F St NE

H.R. Howenstein rowhouse, designed by L.T. Williams.
Features Craftsman elements: front porch, shed dormer, overhanging eaves, and exposed rafters.

330 F St NE

B. Stanley Simmons rowhouses (Queen Anne Style). These houses also have angled two and three-story bays, running bond brick coursing, molded sill courses, and nebule molding.

338 F St NE

B. Stanley Simmons rowhouses (Queen Anne Style). These houses also have angled two and three-story bays, running bond brick coursing, molded sill courses, and nebule molding.

637 3rd St NE

622-626 3rd St NE

Queen Anne style rowhouses with running bond brick coursing, nail head and pellet molding over windows, oriel windows balanced over the first story windows and door, rounded window openings on the third story, and iron stairs.

315 G St NE

330 G St NE

Classical Revival
rowhouse built by Joseph
M. Carmody, designed by
A.M. Poynton and George
S. Cooper.

222 G St NE

Senator John H. Sherman's rowhouses designed by T. F. Schneider with running bond brick coursing, angled bays and checkerboard brick design and dentils at the cornice.

224-226 G St NE

Senator John H. Sherman's rowhouses designed by T. F. Schneider with running bond brick coursing, angled bays and checkerboard brick design and dentils at the cornice.

709 3rd St NE

734 3rd St NE

Queen Anne rowhouses designed by F. G. Atkinson. The visual symmetry of the massing and facades is well-preserved here and expresses the architecture of multi-dwelling development that characterizes so much of the northeast part of the Hill and often differentiates it from the lot-by-lot development pattern in southeast Capitol Hill.

720 3rd St NE

Queen Anne rowhouses designed by F. G. Atkinson. The visual symmetry of the massing and facades is well-preserved here and expresses the architecture of multi-dwelling development that characterizes so much of the northeast part of the Hill and often differentiates it from the lot-by-lot development pattern in southeast Capitol Hill.

715 3rd St NE

Queen Anne rowhouses designed by F. G. Atkinson. The visual symmetry of the massing and facades is well-preserved here and expresses the architecture of multi-dwelling development that characterizes so much of the northeast part of the Hill and often differentiates it from the lot-by-lot development pattern in southeast Capitol Hill.

710 3rd St NE

Queen Anne rowhouses designed by F. G. Atkinson. The visual symmetry of the massing and facades is well-preserved here and expresses the architecture of multi-dwelling development that characterizes so much of the northeast part of the Hill and often differentiates it from the lot-by-lot development pattern in southeast Capitol Hill.

236-8 G St NE

Senator John H. Sherman's rowhouses designed by T. F. Schneider with running bond brick coursing, angled bays and checkerboard brick design and dentils at the cornice.

608 3rd St NE

605 3rd St NE

B. Stanley Simmons rowhouses (Queen Anne Style). These houses also have angled two and three-story bays, running bond brick coursing, molded sill courses, and nebule molding.
