Architectural Style(s)

Exterior & Architectural Notes:

**May 2009: Constructed between 1872 and 1873, this two-story, three-bay building has been substantially altered since its construction. The building is constructed of brick and is set on a solid brick foundation; the façade (south elevation) has been faced with five-course, American-bond brick. A sloping roof caps the dwelling and is fronted by a brick parapet. A one-story projection extends from the façade and spans its width. The metal-frame projection is capped by a flat roof with an ogee-molded cornice. The end bays contain single-leaf metal-frame glass doors and are topped with one-light metal transoms. The central bay contains paired one-light metal fixed windows. Transoms are visible over the first story openings of the main block. A soldier brick flat arch string course stretches across the façade above the first story. The three second story window openings contain one-light vinyl casement windows with concrete sills. A soldier brick string course spans the façade above the second story windows. Three symmetrically-placed recessed brick panels of basket-weave-bond brick are located above the three second story windows and have rowlock brick surrounds.**

**The rear (north) elevation of the building extends to the public alley. Constructed of irregular-course, American-bond brick, the rear elevation is fenestrated with one-light metal casement windows with concrete sills and double-leaf metal doors. A metal coal chute pierces the foundation and is sited in the westernmost bay.**

Site Notes:

**May 2009: This building is located on the north side of H Street, NE and directly fronts the concrete sidewalk. The building is adjacent to 412 and 416 H Street, NE. A public alley, paved with concrete, runs east to west and provides access to the rear of the building.**

### STYLE/EXTERIOR DATA

Architectural Style(s)

---

Exterior & Architectural Notes:

**May 2009: Constructed in 1928, this two-story, two-bay building is constructed of brick and is set on a solid concrete foundation. The first story of the façade (south elevation) is veneered with ashlar stone, while the second story is faced with stretcher-bond brick. A sloping roof caps the building. A molded cornice with brick corbelling complement the roof. The westernmost bay of the façade is pierced by double-leaf metal-frame glass doors, which are flanked by one-light metal sidelights. The easternmost bay contains a single-leaf wood-frame glass door. A molded architrave spans the façade and is sited above the first story openings. A band of five wood hopper windows is sited above the architrave. The westernmost three have six-lights and the easternmost two have three-lights. A molded lintel tops the band of transoms. The second story window openings contain paired 1/1, double-hung, wood-sash windows with soldier brick flat arches and a rowlock brick string course, which runs at the level of the sill.**

Site Notes:

**May 2009: This building is located on the north side of H Street, NE and directly fronts the concrete sidewalk. The building is adjacent to 408 and 412 H Street, NE. A public alley, paved with concrete, runs east to west and provides access to the rear of the building.**

### STYLE/EXTERIOR DATA

Architectural Style(s)

**Renaissance Revival (Italian)**

Exterior & Architectural Notes:

**May 2009:** Constructed in 1912, this three-story, five-bay building Italian Renaissance-style building was originally constructed as a grocery store with four upper story apartments. A central airshaft divides the building almost into two halves. The building is constructed of brick and is set on a solid concrete foundation. The façade (south elevation) is faced with stretcher-bond brick and the side elevations are constructed of American-bond brick. A sloping roof caps the building and is finished with a molded copper cornice. A parapet fronts the building and is faced with three recessed brick panels. At the center of each panel is a projecting diamond-shaped panel constructed of stone with a brick surround. Copper coping and a centrally-placed copper ornament complement the parapet. Two interior-side brick chimneys rise from the east (side) elevation and have corbeled brick caps. The end bays of the first story of the façade contain multi-light wood doors with one-light wood transoms. The central bay contains a single-leaf metal-frame glass door with a one-light metal sidelight. The first story of the façade has been altered since 1912 with the construction of two, one-story rectangular bays, which flank the central door entry. Each metal-frame bay is set on a foundation that is faced with corrugated metal and is capped by a flat roof with a molded metal cornice. Fenestration consists of large, one-light fixed metal storefront windows. Transom windows originally were sited above the flanking window bays of the first story, but are not partially covered with plywood. A copper architrave spans the façade above the first story and runs parallel with the copper rain spouts. Three-sided, canted oriel windows project from the end bays of the façade and stretch from the second to third stories. Each wood-frame oriel window is clad with copper and has a flat roof with overhanging eaves. The central openings of each oriel window contain either a 1/1 or 1/2, double-hung, wood-sash window. Each of the flanking openings contain narrow, 1/1, double-hung, wood-sash windows and are separated from the central opening by copper pilasters. The central bay of the main block's second story is fenestrated with a 1/1 double-hung, wood-sash window which is flanked by narrow 1/1, double-hung, wood-sash windows. Each window has a gauged brick jack arch with a concrete keystone. A wrought-iron balconet fronts the windows. The central bay of the third story features paired round-headed 1/1, double-hung, wood-sash windows. Three-course, rowlock brick rounded-head arches finish the windows and have concrete keystones and paneled concrete imposts. A wrought-iron balconet fronts the windows. A molded copper architrave stretches across the façade above the third story. The side elevations do not have fenestration. The rear (north) elevation is pierced by segmental openings which contain 1/1, double-hung, vinyl-sash windows with. Each story also features a segmental opening containing a single-leaf door with a three-course, rowlock brick segmental arch.

Two three-story, metal-frame porches are located on the rear elevation of the main block and flank the airshaft. Each story of the porch is supported by square metal posts. A three-story porch is noted on the 1928 Sanborn map, however, this porch was constructed ca. 1995.

Site Notes:

**May 2009:** This building is located on the north side of H Street, NE and directly fronts the concrete sidewalk. The building is adjacent to 400 and 406 H Street, NE. A public alley, paved with concrete, runs east to west and provides access to the rear of the building.

**STYLE/EXTERIOR DATA**

Architectural Style(s)

Exterior & Architectural Notes:

**May 2009: This two-and-one-half-story, two-bay, multi-family dwelling was constructed in 1890 as part of a five building project. The building is attached on two stories to the west and two-and-one-half to the east. The rectangular form of the building is offset by a three-story rear ell. Set on a solid brick foundation, this brick building has a stretcher-bond brick finish. An interior-side brick chimney extends from the east (side) party wall. The building is capped by a false Mansard roof of painted octagonal tin shingles. The roof has a paneled cornice, corbeled end braces, projecting party walls with fluted panels, and an ogee-molded coping. The roof has two aedicule dormers. The eastern dormer is a deck dormer and has paired 1/1, double-hung, vinyl-sash windows. The western dormer is pierced by a 1/1, double-hung, vinyl-sash window. The façade (south elevation) has a two-story, three-sided projecting bay. The façade features a water table and a two-course brick string on the first story. The western door opening features a single-leaf, wood-frame glass door with a tall, narrow, two-light wood transom. The projecting bay features a large opening on the façade leading to an integral porch. The porch shelters a single-leaf, metal-frame door with sidelight. The second story is pierced by 1/1, double-hung, vinyl-sash windows and a large, fixed vinyl-sash window on the façade of the projecting bay. All of the façade openings feature splayed soldier brick flat arches with a string of projecting gauged bricks above. Additional decoration consists of reeded bands with roundels. The rear ell has a seven-course, American-brick bond veneer and is pierced by 1/1, double-hung, vinyl-sash windows with two-course, segmental brick arches.**

Site Notes:

**May 2009: This building is located north of H Street, NE and directly fronts the concrete sidewalk. The building has a typical setback for the 400 block of H Street, NE.**

Architectural Style(s)

---

Exterior & Architectural Notes:

**May 2009:** This three-story, three-bay building has a two-story rear ell. Constructed in 1896, this building was originally constructed as a single-family dwelling. By 1928, the building had been rehabilitated to serve as a store and dwelling. It is a mixed-use building currently. Borrowing characteristics of many architectural styles, this imposing building is set on a solid brick and concrete foundation. The masonry building is constructed of brick and has a stretcher-bond finish. An elaborate false mansard roof of octagonal slate shingles caps the building. The false mansard roof is supplemented by a sloping roof which extends to the north to cover the majority of the building. Two interior-side brick chimneys extend from the east (side) elevation. The roof features a high-style entablature composed of a cushioned architrave and ogee-molded cornice supported by modillions. An ovular window opening protrudes from the mansard roof, though its sash has been removed in favor of plywood. Flanking the false mansard roof are brick columns with ogee-molded caps accentuated by large egg molding. The egg moldings are surrounded by ivy molding and supported by small tapered pilasters. The façade (south elevation) has a first story fenestrated by a single-leaf wood doors with lights and a single-leaf metal-frame glass door in the outer bays. The door openings have three-light transoms. The middle bay features a projecting square bay composed of brick. The bay holds single-light, metal fixed windows. A flat metal roof caps the bay and extends to shelter the western door opening. Three, three-light window openings are located above the projecting bay. The first story is corned by engaged pilasters which support large wood panels. The second story contains a three-sided bay window supported by wood knee braces. Fenestration of the bay consists of 1/1, double-hung, vinyl-sash windows set in narrow, square-edge wood surrounds. The openings are flanked by bezant molding. Below the openings the bay is clad in board-and-batten siding. Above the window openings are panels with a diamond-shaped bas relief. The roof of the bay window was not visible from the public right-of-way, however, it is supported by small modillions with an ogee-molded cornice. The third story is fenestrated by a ribbon of four, 1/1, double-hung, vinyl-sash windows set in a wooden crossette. Ivy molding is located in the corners of the crossette. The east and west (side) elevations have no fenestration. The fenestration of the north (rear) elevation was not visible due to safety issues.

Site Notes:

**May 2009:** This building is located north of H Street, NE and directly fronts the concrete sidewalk. A small planting bed is located in front of the store, within the public sidewalk. The bed has an immature trees and flowers. An alley extends behind the building.

## STYLE/EXTERIOR DATA

Architectural Style(s)

Exterior & Architectural Notes:

**May 2009: This one-story building was built ca. 1975 and replaced an earlier two-story building. The building, including the solid foundation, feature six-course, American-bond brick. The flat roof is finished with metal flashing. On the west (front) elevation is a one-light fixed window. Just north of the window is a bulkhead with a single-leaf metal door. The south (side) elevation is fenestrated by a two-light fixed window that is protected by a cloth awning. Spanning the width of the window is a brick garden wall. West of the window is a former entrance that has been infilled with stretcher-bond brick.**

**The main entry is located in a one-story, one-bay, ca. 1980 vestibule addition is located on the west (front) elevation of the building. It is located north of the bulkhead. The masonry addition, including the solid foundation, features stretcher brick veneer. A side-gabled roof of asphalt shingles caps the vestibule. Fenestration is made up of a single-leaf metal door on the south elevation and a one-light fixed window with a square-edged wood surround on the west elevation.**

**Another addition is constructed of brick and is set on a solid foundation that has been partially parged. A flat roof finished with metal flashing caps it. Fenestration is made up of a single-leaf metal door that is located on the west (front) elevation.**

Site Notes:

**May 2009: This property is located in the northeast corner of the intersection of H Street, NE and 4th Street, NE. The building fronts a concrete sidewalk on its south and west elevations. It is oriented towards 4th Street. The building is adjacent 402 H Street, which is located to the east.**

## STYLE/EXTERIOR DATA

Architectural Style(s)

**Italianate**

Exterior & Architectural Notes:

**May 2009:** This two-story, four-bay building was constructed in between 1872 and 1873. It may have originally been a single dwelling, but now has a commercial unit is located in the first story. The masonry building and solid foundation is veneered in stretcher-bond brick. An Italianate cornice, with brackets, modillions, and a paneled frieze, finishes the roof, which could not be seen. The first story has a recessed half-canted arrangement that is created by two entrances and two canted bays. The three-sided canted projections, which are partially obscured by plywood covers, are located in the westernmost bay and the second bay to the east. The second bay to the west and the easternmost bay hold a single-leaf paneled wood door with lights. Above the canted bays and entrances are transoms that are covered by plywood and topped by a tin cornice with modillions. Flanking the transom windows are the top sections of metal pilasters, which are largely obscured by plywood. The second story is fenestrated by 2/2, double-hung, wood-sash windows with concrete sills and lintels. The east and west (side) elevations are completely obscured by attached buildings. The north (rear) elevation was not accessible.

Site Notes:

**May 2009:** This building is located on the north side of H Street, NE and directly fronts the concrete sidewalk. It is adjacent 408 H Street, which is located to the east, and 404 H Street, which is located to the west.

**MISCELLANEOUS NOTES DATA**

Notes:

Until approximately 1869, Square 808 was committed as St. Peter's Grave Yard and is noted as such as early as 1854. The 1869-1871 General Assessment book indicates that Lot 7 was unimproved. The 1872-1873 General Assessment book notes that the lot was owned by John F. Ennis. The value of improvements totaled \$300 or 2,000 square feet at a rate of .15.

General Assessment, 1872-1873. Corporation of Washington. (Vol. 14 of 18) Records of Government of the District of Columbia, Record Group 351 (Entry 46), National Archives Building, Washington, D.C. p. 656.

General Assessment, 1869-1871. Corporation of Washington. (Vol. 13 of 18) Records of Government of the District of Columbia, Record Group 351 (Entry 46), National Archives Building, Washington, D.C. p. 714.

General Assessment, 1854. Corporation of Washington. Records of Government of the District of Columbia, Record Group 351 (Entry 46), National Archives Building, Washington, D.C.

**May 2009: Attached to the north (rear) elevation is a one-story garage. According to Sanborn Fire Insurance maps, it was constructed before 1928. It features stretcher-bond brick veneer and is partially covered in plywood. It is fenestrated by a rollup metal garage door.**

**STYLE/EXTERIOR DATA**

Architectural Style(s)

Exterior & Architectural Notes:

**May 2009: This three-story, three-bay building was designed by Julius Wenig and was constructed in 1917. It was originally designed as a funeral home and dwelling, but now serves as an office building. The structure is made of brick and sits on a solid concrete foundation. It is veneered on the façade by stretcher-bond brick on the second and third stories and limestone (painted) on the first story. A sloping roof is partially obscured by a brick parapet wall featuring stretcher-bond brick veneered with protruding sections made of soldier bricks. The parapet is finished with a modest wood cornice. Beneath the parapet is a more prominent cornice with block modillions and end brackets. The first story of the façade (south elevation) features a large, centrally placed, one-light window with a marble panel below. An awning protects the window. Single-leaf entries flank the projection and holds single-leaf paneled wood doors with one light. Each entry features hood molding and is protected by an awning.**

**A three-sided oriel is centrally located on the façade of the second and third stories. A flat roof finished by an ogee-molded cornice caps the oriel. The oriel is fenestrated on both the second and third stories by a one-light fixed window flanked by 1/1, double-hung, wood-sash windows. The second-story windows on the oriel have flared jack arches of brick with a keystone. Beneath the second-story windows is a concrete sill course. An ogee-molded stringcourse is located approximately one foot below the sill course. The second story windows have concrete sills and a continuous lintel that spans all three windows. There is no other fenestration on the second or third stories. The east and west (side) elevations are obscured by adjacent buildings.**

Site Notes:

**May 2009: This building is located on the north side of H Street, NE and directly fronts the concrete sidewalk. It is adjacent 414 H Street, which is located to the east, and 410 H Street, which is located to the west. A public alley is located to the north and provides access to the rear of the property. A garage is attached to the north (rear) elevation of the primary resource.**

Architectural Style(s)

Exterior & Architectural Notes:

**May 2009:** This two-and-one-half story, two-bay rowhouse was constructed in 1890 by Joseph S. Boss. It was constructed in coordination with the buildings at 416 and 420 H Street, which are extant. A commercial unit is now located in the first story. The building is capped by a false mansard roof of painted octagonal tin shingles. The roof has a paneled cornice, corbeled end braces, projecting party walls with fluted panels, and an ogee-molded coping. The building and solid foundation are constructed of brick and is finished with a stretcher-bond brick veneer. The first story of the façade (south elevation) is fenestrated by a tripled 1/1, double-hung, wood-sash window in the western bay and a single-leaf wood door with lights in the eastern bay. The windows are set in a wood surround and are protected by metal security bars. The door features a metal security storm door. A shed roof spans the façade and shelters the first story fenestration. It is covered in asphalt shingles and has a boxed eave covered in metal sheets. The second story of the façade features a tripled 1/1, double-hung, wood-sash window with a concrete sill. The false mansard roof has two dormers. In the false mansard is a small 1/1, double-hung, wood-sash in the westernmost bay and a paired 1/1, double-hung, wood-sash window in the easternmost bay. Each window is finished with a fluted surround and topped by a closed pediment.

An original ell is located off the north (rear) elevation of the main block. It is constructed of brick and capped by a sloping roof. Visible fenestration is made up of 1/1, double-hung, wood-sash windows. Further details could not be seen.

Site Notes:

**May 2009:** This building is located on the north side of H Street, NE and directly fronts the concrete sidewalk. It is adjacent 420 H Street, which is located to the east, and 416 H Street, which is located to the west. A public alley is located to the north and provides access to the rear of the property. A concrete wall spans the northern boundary line.

### STYLE/EXTERIOR DATA

Architectural Style(s)

Exterior & Architectural Notes:

**May 2009:** This two-and-one-half story, two-bay building was constructed in 1890 by Joseph S. Boss to be used as a dwelling. It was constructed in coordination with the buildings at 416 and 418 H Street, which are extant. The building features a mansard roof covered in tin octagonal shingles. It is constructed of brick and is set on a solid brick foundation. The second story is veneered in stretcher-bond brick, the first story is covered in stucco and the foundation is obscured by a tin mold pressed to look like rock-faced concrete blocks. Vinyl siding partially clad the north (rear) elevation. On the east (side) elevation is an interior-side brick chimney. A prominent cornice with fret detailing separates the first and second stories.

The first story of the façade (south elevation) is fenestrated by a one-light fixed window flanked by 1/1, double-hung, vinyl-sash windows in the western bay and a single-leaf glass door in a metal frame in the eastern bay. Above the entry is a two-light transom. The first story of the east elevation is fenestrated by three sets of a one-light fixed window flanked by 1/1, double-hung, vinyl-sash windows. Also on the east elevation is a paired one-light casement window,, a recessed entry holding a single-leaf wood door with a transom above and a two-story projecting bay fenestrated by 1/1, double-hung, vinyl-sash windows.

The southeast corner of the first-story is canted and features an ionic column that supports the cornice. Above the canted first-story corner is a three-sided oriel that is capped by a pyramidal roof covered in octagon shingles. The second and top stories (including the corner oriel) are fenestrated by 1/1, double-hung, vinyl-sash windows. Each window on the second story has a concrete sill which continues into a brick sill course that wraps around the south (front) and east (side) elevations. The windows located in the wall dormers on the top story are set in wood surround and feature a closed pediment on top. Visible fenestration on the north (rear) elevation is made up of a 1/1, double-hung, vinyl-sash window.

A one story extension, which may be original to the building, is located off the north (rear) elevation. It features stretcher-bond brick and is capped by a flat roof. The roof features the same prominent cornice with fret detailing as the main block. On the east (side) elevation is a double-leaf entry with metal security gate. The entry is protected by an awning.

Site Notes:

**May 2009:** This property is located northwest of the intersection between H Street, NE and 5th Street, NE. The building directly fronts the concrete sidewalk. It is adjacent 418 H Street, which is located to the west. A public alley is located to the north and provides access to the rear of the property.
